About Idaho State University

Idaho State University has served the citizens of the state since 1901 when the institution was first established as the Academy of Idaho. Renamed the Idaho Technical Institute in 1915 and reorganized as the Southern Branch of the University of Idaho in 1927, it was established as Idaho State College in 1947. By action of the 37th Idaho Legislature, the institution became Idaho State University on July 1, 1963. The University’s Strategic Plan is online at http://isu.edu/strategicplan/.

Certificate programs of varying lengths, an Associate of Applied Science degree and a Bachelor of Applied Science degree are included in the curricula of the College of Technology. Bachelors’ and masters’ degrees in a variety of fields are awarded by the College of Arts and Letters, College of Business, College of Education, College of Science and Engineering, Kasiska Division of Health Sciences, and the Graduate School. Terminal degrees offered at Idaho State University include Master of Business Administration, Master of Fine Arts, Doctor of Philosophy, Doctor of Arts, Doctor of Education, Doctor of Nursing Practice and Doctor of Pharmacy.

Mission

Idaho State University is a public research-based institution that advances scholarly and creative endeavors through academic instruction, and the creation of new knowledge, research, and artistic works. Idaho State University provides leadership in the health professions, biomedical, and pharmaceutical sciences, as well as serving the region and the nation through its environmental science and energy programs. The University provides access to its regional and rural communities through delivery of preeminent technical, undergraduate, graduate, professional, and interdisciplinary education. The University fosters a culture of diversity, and engages and impacts its communities through partnerships and services.

Core Themes:

Core Theme One: Learning and Discovery

Idaho State University fosters student learning and discovery through teaching, research, and creative activity. ISU delivers high quality academic programs at all levels: technical certificates; undergraduate, graduate, and professional degrees; and postgraduate professional training.

Core Theme Two: Access and Opportunity

Idaho State University provides diverse pathways to retention and graduation through educational preparation, academic and co-curricular opportunities, and extensive student support services.

Core Theme Three: Leadership in the Health Sciences

Idaho State University provides statewide leadership in the health sciences. With the academic support of its colleges and the division, the University offers a broad spectrum of degree levels and provides residency training in the health professions. New knowledge is created through biomedical, translational, clinical, rural, and health services research. Teaching, research, practice, and community partnerships provide interprofessional education and excellence in patient care. University clinics provide an environment for learning, inquiry and comprehensive health care service to the community.

Core Theme Four: Community Engagement and Impact

As an integral component of the community, Idaho State University develops partnerships and affiliations through the exchange of knowledge, resources, research, and expertise. Through a diverse university staff, faculty, and student body, ISU provides cultural, social, economic, and other opportunities to enrich the lives of citizens.

Regional Accreditation

Idaho State University is accredited by the Northwest Commission on Colleges and Universities.

Accreditation of an institution of higher education by the Northwest Commission on Colleges and Universities indicates that it meets or exceeds criteria for the assessment of institutional quality evaluated through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Accreditation by the Northwest Commission on Colleges and Universities is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding an institution’s accredited status by the Northwest Commission on Colleges and Universities should be directed to the administrative staff of the institution. Individuals may also contact:

Northwest Commission on Colleges and Universities
8060 165th Avenue N.E., Suite 100
Redmond, WA 98052 (425) 558-4224 http://www.nwccu.org

Specialized Accreditation

In addition, many undergraduate and graduate programs maintain specialized professional accreditation. The Office of Institutional Research maintains the most up-to-date list of ISU programs with specialized accreditation. As of the printing of this catalog the following programs have received specialized accreditation by the following organizations:

College of Arts and Letters
• American Psychological Association (APA)
• Council on Social Work Education (CSWE)
• National Association of Schools of Music (NASM)
• National Association of Schools of Theatre (NAST)

College of Business
• Association to Advance Collegiate Schools of Business (AACSB)

College of Education
• Commission on Accreditation of Athletic Training Education (CAATE)
• National Council for Accreditation of Teacher Education (NCATE)

Kasiska Division of Health Sciences
• Accreditation Council for Education in Nutrition and Dietetics (ACEND)
• Accreditation Council for Occupational Therapy Education (ACOTE)
• Accreditation Council for Pharmacy Education (ACPE)
• Accreditation Review Commission on Education for the Physician Assistant (ARC-PA)
• American Speech-Language-Hearing Association (ASHA)
• Commission on Accreditation of Allied Health Education Programs (CAAHEP)
• Commission on Accreditation in Physical Therapy Education (CAPTE)
• Commission on Collegiate Nursing Education (CCNE)
• Commission on Dental Accreditation (CODA)
• Council for Accreditation of Counseling & Related Educational Programs (CACREP)
• Council on Education for Public Health (CEPH)
• Joint Review Committee on Education in Radiologic Technology (JRCERT)
• National Accrediting Agency for Clinical Laboratory Sciences (NAACLS)
• National Council for Accreditation of Teacher Education (NCATE)

College of Science and Engineering
• Accreditation Board for Engineering and Technology (ABET)

College of Technology
• Accreditation Board for Engineering and Technology (ABET)
• Accreditation Commission for Education in Nursing (ACEN)
• Association of Technology, Management, and Applied Engineering (ATMAE)
• Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM)
• Commission on Accreditation of Allied Health Education Programs (CAAHEP)
• Commission on Massage Therapy Accreditation (COMTA)

Program Accreditation Requirements
Current and future programs not offered by the College of Business may include no more than 1/4 of ISU minimum credit requirements for a baccalaureate degree from classes offered by the College of Business.

Student Outcomes Assessment
All undergraduate academic programs at four year public institutions in Idaho are required to assess student learning in the major and general education programs. Similar requirements for assessment also appear in the new guidelines issued by the Northwest Commission on Colleges and Universities which provides Idaho State University’s institution-wide accreditation.

Idaho State University’s goal is to encourage students to develop abilities and acquire knowledge that will be of lasting benefit in their personal and professional lives. To ensure that this goal is met, a program of student outcomes assessment has been implemented to improve the teaching and learning process. Comprehensive information that includes student performance and student opinion is vital to the success of the assessment program. To provide this information, undergraduate students in the academic division may be asked to participate in a variety of assessment activities which may include formal and informal examinations, interviews, surveys and follow-up studies after graduation.

Federal Family Education Rights and Privacy Act of 1974
Idaho State University, in compliance with the Family Educational Rights and Privacy Act (FERPA), is responsible for maintaining educational records and monitoring the release of information of those records. Staff and faculty with access to student educational records are legally responsible for protecting the privacy of the student by using information only for legitimate educational reasons to instruct, advise, or otherwise assist students.

Only those records defined as “directory information” may be released without the express written permission of the student. Directory information includes the student’s name, address listings, telephone listings, e-mail addresses, full-time/part-time status, class level, college, major field of study, degree types and dates, enrollment status, club and athletic participation records, and dates of attendance including whether or not currently enrolled. No other information contained in a student’s educational records may be released to any outside party without the written consent of the student.

A student may restrict release of directory information through the BengalWeb (https://bengalweb.isu.edu) by accessing the “Update Addresses and Phones” screen under the Academic Tools tab. This restriction will apply to the student’s address and telephone listings only. All other directory listings will continue to be available for release.

Additional FERPA information may be found on the web at: http://isu.edu/registrar/student-resources/ferpa/

Alumni Association and Foundations

Alumni Association
http://www.isu.edu/alumni
mailto:alumni@isu.edu

The mission of the Idaho State University Alumni Association is to promote the welfare and to advance the objectives of Idaho State University through the sustained involvement of its alumni by providing philanthropic, intellectual and social opportunities.

The association is governed by a board of directors and administered through the office of Alumni Relations, 554 S. 7th Avenue, Pocatello, in the H. F. Magnuson House.

Specific goals are to identify alumni and friends to assist Idaho State University in strengthening support from its constituencies, to inform alumni and friends about Idaho State University, to provide for the efficient management of the Alumni Association, and to involve and motivate alumni and students to maintain their affiliation and support of Idaho State University.

The officers and directors meet three times a year with the director of alumni relations, who is appointed by the university administration.

Idaho State University Bengal Foundation
The Idaho State University Bengal Foundation is a nonprofit organization formed to raise money for athletic scholarships. The main fund raising activities include an annual auction, scholarship fund drive, athlete-to-athlete phone-a-thon, several golf tournaments, and other special events held throughout the year.

The Bengal Foundation was officially formed in September of 1976. It is governed by a board of directors and administered through the office of the Bengal Foundation located in Holt Arena. For information on becoming a member, contact The Bengal Foundation at (208) 282-2397.

Idaho State University Foundation, Inc.
The Idaho State University Foundation is a nonprofit corporation established in 1967 under the laws of the State of Idaho.
The mission of the Idaho State University Foundation is to stimulate voluntary private support from alumni, parents, friends, corporations, foundations, and others for the benefit of Idaho State University.

The foundation raises and manages private resources supporting the mission and priorities of the university, and provides opportunities for students and a degree of institutional excellence unavailable with state funding levels.

The foundation is dedicated to assisting the university in the building of the endowment to address, through financial support, the long-term academic and other priorities of the university.

The foundation is responsible for identifying and nurturing relationships with potential donors and other friends of the university; soliciting cash, securities, real and intellectual property, and other private resources for the support of the university; and acknowledging and stewarding such gifts in accordance with donor intent and its fiduciary responsibilities.

The Idaho State University Foundation is located on the first floor of the Administration Building.

**Policy Statements**

Catalogs, bulletins, course and fee schedules, etc., are not to be considered as binding contracts between Idaho State University and students. The university and its divisions reserve the right at any time, without advance notice, to: (a) withdraw or cancel classes, courses, and programs; (b) change fee schedules; (c) change the academic calendar; (d) change admissions and registration requirements; (e) change the regulations and requirements governing instruction in, and graduation from, the university and its various divisions; and (f) change any other regulations affecting students. Changes shall go into force whenever the proper authorities so determine, and shall apply not only to prospective students but also to those who are matriculated at the time in the university. When economic and other conditions permit, the university tries to provide advance notice of such changes.

Students enrolled in a program that is closed, relocated, or discontinued should be given notice of the closure as soon as is practical. Notwithstanding any other provision of State Board of Education policy, university policy, or university catalog statements to the contrary, arrangements should be made for enrolled students to complete affected programs in a timely manner and with minimum interruptions. When there is a similar program within the institutions governed by the Board, an affected student will be provided with information on transferring to that program, although admission to any such program is contingent upon the availability of a position and the student’s meeting any applicable admission requirements. If there is no similar program available within the institutions governed by the Board or the student is not able to gain admission to a similar program, the university will make reasonable efforts to assist the student in locating to another program at the university or elsewhere for which he or she is qualified.

Idaho State University is committed to providing a positive education for all students. The university has a legal and ethical responsibility to ensure that all students and employees can learn and work in an environment free of harassment and discrimination. It is the ISU policy to prohibit and eliminate discrimination on the basis of race, color, national origin, religion, sex, age, or disability. This policy applies to all programs, services, and facilities, and includes, but is not limited to, recruitment, applications, admissions, access to programs and services and employment. For additional information and specific contact information, see: http://www.isu.edu/aaction/
Colleges and Departments

Idaho State University is comprised of the following academic units:

**College of Arts and Letters** (p. 6)

Expenses

Fees for the academic year are set by the Idaho State Board of Education after the publication of the catalog. Fee information can be found here:

http://www.isu.edu/finserv/studentfs.shtml

Refund Policy

The Refund Policy applies to all for-credit classes regardless of location of the class.

This policy does not include the advance deposits required by the College of Technology and by the Dental Hygiene, Physical Therapy, and Physician Assistant programs in the College of Health Professions.

All refunds are paid by University check or E-refund.

Basis for Refunds

Refunds are calculated and authorized by the office of Finance and Administration. The official drop/withdrawal date is the actual date the drop or withdrawal form is received by an authorized University office or accepted in the University’s automated system.

Refunds of registration charges for full-time fees, part-time credit hour fees, non-resident tuition, and professional program fees are calculated on the applicable refund percentage applied to the dropped credits, using the first official day of the University semester or session as the starting date. Examples of refund calculations can be found at the following link http://www.isu.edu/finserv/fsstudent/RefundExamples.pdf.

Federal financial aid provisions may require funds to be returned to federal programs in excess of your ISU refund. In such situations, you will be billed for the excess remitted by the University in your behalf.

The official starting and ending dates of all classes are those designated by the University registrar.

Fall and Spring Semesters Refund Periods and Percentages

- **100% Refund**: Classes cancelled by the University.
- **100% Refund**: 16-week classes for the first (10) ten days of University classes and 8-week classes for the first (5) five days of University classes.
- **50% Refund**: 16-week classes for the next (5) five days (third week) of University classes and 8-week classes for the next (5) days (second week) of University classes.
- **No Refund**: 16-week classes dropped after the third week of classes. 8-week classes dropped after the tenth day of classes.
- **For classes, short courses, continuing education classes, and workshops with nonstandard starting and ending dates**, refund requests are reviewed on an exception basis. The official starting and ending dates are those designated by the University registrar.

Summer Session Refund Periods and Percentages

- **100% Refund**: Classes cancelled by the University.
- **100% Refund**: Full term session (May - Aug) for the first 10 days of University classes and 4, 6, 8 week sessions dropped in the first 5 days of University classes.
- **100% Refund**: Workshop classes dropped before the 1st day of the workshop.
- **50% Refund**: Full term session (May - Aug) for the next 5 days (3rd week) of University classes and 4, 6, 8 week classes dropped in the next 5 days (2nd week).

Non-refundable Fee Charges/Payments

The following fees or charges are not refundable:

1. Reduced fee charges authorized by the State Board of Education. Examples include faculty/staff/spouse reduced fees, senior citizen reduced fees, education contract classes, etc.
2. Late processing charges.
3. Amounts paid to satisfy unpaid fees/charges from previous terms.
4. Amounts paid for student malpractice insurance.

Refunds for Exceptional Circumstances

In specific cases, as listed below, a full refund of the registration tuition and fees, credit hour fee, non-resident tuition and professional fees will be granted following official withdrawal from the University, provided the withdrawal process is completed during the first half of the semester or session (i.e., first eight weeks of a semester, first four weeks of a session). Proper documentation must be presented and approval granted by the offices of Student Affairs and Finance and Administration before the refund will be processed.

1. Induction of the student into the U.S. Armed Forces.
2. Incapacitating illness or injury which prevents the student from returning to school for the remainder of the term. A medical withdrawal must be processed through the University Student Health Center.
3. Death of a student.
4. Death of spouse, child, parent, or legal guardian of student.

To request an exception to the refund policy other than those listed above click here (http://www.isu.edu/finserv/refundappeal.shtml).

Deductions from Refunds

The University reserves the right to deduct amounts owed the University from refunds. Refunds of fees for the term, less any outstanding fee loan balances for the term, are applied to the financial aid awarded to the student in the priority sequence shown below:

1. Amounts required by law to be returned to Federal Financial Aid programs
2. Third party agency payments of actual tuition and fees
3. University authorizations specifically for the payment of tuition and fees (i.e., graduate teaching assistant, athletics, etc.)
4. Federal aid programs (see Financial Aid Handbook for priority)
5. Miscellaneous outstanding balances due the University
6. University loan programs
7. University and donor scholarship programs

Any balance is refunded to the student.

Payment of Refunds to the Student

A University check for the refund balance is mailed to the home address of the student, along with an itemized disclosure of any deductions. Refund checks
are processed four weeks after the beginning of the term, or a minimum of three weeks after the date of payment if the student paid the charges.

**Contact Us**

For information regarding the refund policy please contact:

- Kari Schroeder (ushekari@isu.edu) - 282-2790
Financial Aid and Scholarships

A significant number of students receive financial assistance at Idaho State University. Students frequently receive assistance from a variety of funding sources; e.g., a Pell Grant, plus an Idaho State University Freshman Scholarship, plus College Work Study.

Financial assistance programs are administered by various departments at Idaho State University. The following list identifies the types of financial funding available and the university office to contact for further information. If writing to any of the departments listed below, use the address format here:

ASISU (Senate, Student Activities Board, Bengal)
Federal and State Financial Aid

Financial aid is help for meeting college costs – both direct educational costs (such as tuition, fees, books, etc.) and personal living expenses (such as food, housing, and transportation). Each year thousands of Idaho State University students rely upon student assistance funds to meet some of their college costs. The majority of these students rely upon federal and state government student assistance programs which are managed by the Financial Aid Office.

Major financial aid programs available through the Financial Aid Office include the following:

• Federal College Work Study
• Federal Perkins Loans
• Need-based Nonresident Waivers
• Federal TEACH grants
• Federal Supplemental Educational Opportunity Grants
• Federal Pell Grants
• Federal Student Loans
• Federal Parent Loans for Undergraduate Students
• Federal Graduate PLUS Loans

The application form used for financial aid programs through the Financial Aid Office is the Free Application for Federal Student Aid (FAFSA). The FAFSA will cover one full academic year – fall, spring and summer semesters. Students are encouraged to submit their FAFSA as early as possible, preferably after filing tax forms for the applicable year.

Financial Aid counselors are available to discuss students’ concerns related to financial aid. The Financial Aid staff will describe the types of financial assistance available and will assist students with the application process. Financial Aid counselors can also assist students in determining the cost of attendance, how to manage money while in school, and how to identify alternative sources of funding.

Students must meet certain conditions in order to receive federal financial assistance through Idaho State University. The general conditions include the following: completion of a FAFSA to determine eligibility; admission and enrollment as a degree seeking student in an aid-eligible major; meet Financial Aid satisfactory academic progress policy; be a U.S. citizen or an eligible non-citizen; and not owe a refund or repayment on Title IV loans. Loans and work study require at least half-time enrollment. In some cases, students enrolled in fewer than six credits may qualify for Pell and TEACH grants.

To obtain more specific information, contact the Financial Aid Office, Room 337, Museum Building, 921 S 8th Ave, Stop 8077, Pocatello, ID 83209-8077, (208) 282-2756. Or use the Financial Aid and Scholarship Web page, http://www.isu.edu/finaid/.

Scholarships

The majority of scholarships at Idaho State University are administered by the Director of Scholarships with the assistance of various University committees. Scholarship funds are made possible through student fees, the generosity of individuals, and contributions of business, labor, fraternal, and professional organizations.

Scholarship criteria vary (i.e., minimum grade point average, financial need, major, etc.). Scholarship announcements, including eligibility and application deadline information, are regularly distributed by the Scholarship Office through the Bengal Online Scholarship System (BOSS), to campus departments, and posted on the Scholarship Office bulletin boards located in the Hypostyle of the Pond Student Union Building. Please visit the Scholarship Office website (http://www.isu.edu/scholarships) for a link to apply through the BOSS system as well as receive other valuable information. Individuals seeking information on scholarships should contact the Scholarship Office:

Scholarship Office
Room 327, Museum Building
921 South 8th Avenue, Stop 8391
Pocatello, ID 83209-8391
(208) 282-3315
http://www.isu.edu/scholarships

Non-resident tuition waivers are available to qualified students who demonstrate financial need (inquiries should be addressed to the Idaho State University Scholarship Office), and to students who have demonstrated strong academic ability. Contact the Scholarships Office for Non-Resident Tuition Waiver information and applications.

Scholarships for New Incoming (First Time) Freshman or Transfer Students

The Application for Admission to ISU is the application for scholarships and Non-Resident Tuition Waivers for new incoming (first time) freshmen and/or transfer students. February 15th is the deadline for Fall entry and November 1st is the deadline for Spring entry for both new incoming freshman and transfer students. Scholarships are awarded based on academic merit and/or ACT/SAT scores. International Students are considered for the International Non-Resident Tuition Waiver. Deadline for International Students is May 1 for Fall Entry and November 1 for Spring Entry.

Affirmative Action/Equal Opportunity & Diversity

Rendezvous Building, Room 157
921 S. 8th Ave., Stop 8315
Pocatello ID 83209
(208) 282-3964

http://www.isu.edu/aaction/

Idaho State University strives to create an environment where all individuals feel welcome and safe. Each member of the university community shares the responsibility of creating such an environment.

The university is committed to creating and maintaining a learning environment that is free of discrimination and harassment and in which every student is treated with dignity and respect. Accordingly, the university prohibits, to the extent permitted by applicable law, discrimination and harassment against an individual on the basis of that person’s race, color, religion, gender, age, sexual orientation, national origin, ancestry, physical or mental disability, or veteran status. Harassment and discrimination will not be tolerated and should be reported to the Office of Affirmative Action/Equal Opportunity & Diversity located in the Rendezvous Building, Suite 157, (208) 282-3964.

Associated Students of Idaho State University (ASISU)

Pond Student Union, Room 215
921 S 8th Ave Stop 8125
Pocatello ID 83209-8125
(208) 282-3435

http://www.isu.edu/asisu/

The Associated Students of Idaho State University (ASISU) is the representative body for students, and functions through the leadership of the student body president, vice president, Student Senate, and numerous committees. These officers are responsible for all activities sponsored by the Associated Students. Applications for committee membership are available in the ASISU Administrative Offices. ASISU also contracts with a local law firm to offer free legal counseling to students. Detailed information on student government can be found in the Student Handbook.

Bengal Pharmacy

Located at:
990 S 8th Avenue
(208)-282-3407
Mailing address:
921 S 8th Ave Stop 8311
Pocatello, ID 83209-8311

http://www.isu.edu/healthcenter/pharmacy/

The Bengal Pharmacy provides low-cost prescription drugs as well as over-the-counter medications at reduced costs. Students may wish to transfer prescriptions from their hometown to the Bengal Pharmacy while they are attending Idaho State University. All Idaho State University students, both full and part-time, and their spouses may use the Bengal Pharmacy. A valid Bengal ID card is required to obtain services.

Campus Recreation Department

Campus Recreation Office
Recreation Center, Room 360
921 S 8th Ave Stop 8105
(208) 282-3516

http://www.isu.edu/camprec

The Campus Recreation Department is located in the Student Recreation Center south of Reed Gymnasium. The Recreation Center offers 100,000 sq. ft. of recreation space and houses indoor courts for tennis, racquetball, and basketball; weights, fitness machines, cardio areas and an indoor track. It also houses one of the northwest’s largest indoor climbing walls. An addition completed in the summer of 2010 offers an airy and open environment for a daily workout. Intramural programs are also available through Campus Recreation with as many as 30 activities to choose from. Please contact Campus Recreation at 282-4854 or on the web at http://www.isu.edu/camprec.

Career Center

418 Museum Building
921 S 8th Ave Stop 8108
(208) 282-2380
Stretching from your entry into the university on through graduation, the Career Center’s continuum of services will meet your career needs.

The Career Center offers a career and life planning course (COUN 1150), online career information and guidance systems, career counseling, and career testing to learn more about majors and occupations that fit with your personality and interests. We can assist you with internship opportunities, resumes and cover letters, interviewing, on-campus recruiting, graduate school preparation, and other job search strategies. We also offer job listings which include full-time opportunities to part-time and temporary positions. Throughout the year, several different career-related fairs are offered to help students find a broad range of positions and career information.

The Career Center primarily serves Idaho State University students and alumni, but also extends services to community members. Call us to see how we can help you meet your career needs.

Central Academic Advising
JoAnn Hertz, Director
Museum Building, Room 307
921 S 8th Ave Stop 8054
Pocatello, ID 83209-8054
(208) 282-3277
http://www.isu.edu/advising/
advinfo@isu.edu

Central Academic Advising is a service designed to assist first-year and undecided students in making academic decisions. Central Academic Advising provides information about campus resources, guidance in developing course schedules and degree plans, clarification of campus policies and procedures, and support in developing effective strategies for academic success.

Advisors also serve as a general resource for all Idaho State University students and faculty. Any student is welcome to contact Central Academic Advising for advising or referral. If students are unsure about whether an advisor has been assigned to them, they may contact Central Academic Advising for information.

Mandatory Advising

The Mandatory Advising program is required for academic degree seeking freshman students for the first two semesters of attendance at Idaho State University and for transfer students for the first semester of attendance. Students subject to mandatory advising must complete the Fundamentals of Advising and Registration (FAR) sessions that are coordinated by Central Academic Advising. Freshmen may contact any CAA office (http://www.isu.edu/advising/contact.shtml) to schedule a FAR session. The two freshman FAR sessions are available online at http://isu.edu/advising/nosearch/first_mad/; http://isu.edu/advising/nosearch/second_mad/. The transfer FAR session is only available online at http://isu.edu/advising/nosearch/transfer_mad/.

Mandatory Advising at Idaho State University is not intended to replace college or faculty advising.

C. W. HOG

Pond Student Union, First Floor
(entrance below east end of Hypostyle)
921 S 8th Ave Stop 8128
(208) 282-3912
http://www.isu.edu/outdoor/cwhog.shtml

The Cooperative Wilderness Handicapped Outdoor Group, C. W. HOG, is located on the lower level of the Pond Student Union. The mission of Cooperative Wilderness Handicapped Outdoor Group, located on the Pocatello campus of Idaho State University, is to provide challenging outdoor adventures for individuals with disabilities, focusing on enhancing attitudes, increasing positive self-image, and supporting people of all ages and abilities. C.W. HOG also runs the new Universal Challenge Course, which is an amazing tool for team-building and fun. Academic credit may be granted for participation in activities which include weight training, seated aerobics, swimming, snow skiing, challenge course facilitation, water skiing and whitewater rafting.

Craft Shop

Pond Student Union, First Floor
921 S 8th Ave Stop 8119
(208) 282-3281
http://www.isu.edu/stunion/craftshop

The Craft Shop was established for students and the community to learn the necessary skills to create their own crafts and projects. Work centers include a wood shop, clay studio, and a darkroom. Other areas are set up for sewing, mat cutting for photos, dry mounting, paper cutting, and bicycle repair. There are experienced staff and student employees available to familiarize you with the facilities in the Craft Shop, and assist you in the design and creation of your next craft project. Non-credit classes are offered each semester in a variety of arts and crafts.

Disability Services

Karina Mason Rorris, Director
Rendezvous Building, Room 125
921 S 8th Avenue Stop 8121
Pocatello ID 83209-8121
(208)282-3599
http://www.isu.edu/ada4isu/disabilityservices@isu.edu

The Disability Services office is located on the first floor of the Rendezvous building. Students with documented disabilities who qualify for accommodations provided by the university must self-identify to the Center in order to have accommodations provided. Information about accommodations is available in the Center and may be picked up in person or requested by telephone by calling (208) 282-3599.

Americans with Disabilities Compliance Statement

The Americans with Disabilities Act (ADA) provides protection from discrimination for individuals on the basis of disability. The ADA extends civil rights protection to people with disabilities who utilize the services provided by Idaho State University.

Idaho State University makes significant efforts to comply with requests for “reasonable accommodations,” to a course, policy, or physical barrier and will not discriminate in the recruitment, admission, or treatment of students or employees with disabilities.

In order for Disabilities Services to arrange accommodations, we request notification as early as possible so that your needs may be met. In addition to complying with the civil rights protections of the ADA, we provide access to assistive technology, a social community and workshops in how to be a more successful student.
Diversity Resource Center

Rendezvous Building, Room 129
921 S 8th Ave Stop 8036
Pocatello ID 83209-8306
(208) 282-3142
http://www.isu.edu/drc/

The Center’s primary focus is to assist ethnic and international students and organizations. We seek both to enhance their experience at Idaho State University and to assist them in contributing to campus diversity and cultural competency. In addition, the Center develops, promotes, and delivers campus-wide activities directed toward enhancing multicultural understanding. The Center provides orientation sessions to American minority students to inform them about the University culture and expectations. The Center also houses audio, video, and printed material, both historical and current, related to diversity and multicultural issues.

Early Learning Center (ELC)

Kerry Williamson, Director

Early Learning Center, near the Pond Student Union Building, Pocatello
921 S 8th Ave Stop 8316
Pocatello, ID 83209-8316
(208) 282-2769

Sam Bennion Student Union Building
1784 Science Center Drive
Idaho Falls, 83402
(208) 282-7868
http://www.isu.edu/earlylc/

The Early Learning Center (ELC) has child care centers in Pocatello and Idaho Falls; both sites are IdahoSTARS STAR-rated facilities. The Pocatello Center cares for children six weeks through eleven years of age, while the Idaho Falls Center accepts children ages two through six. Services are provided to Idaho State University students, staff, faculty and alumni. In Idaho Falls, the privilege is extended to the same members of the University of Idaho community. Each center offers a developmentally appropriate curriculum, and USDA-approved breakfast, lunch and afternoon snack are provided.

The Pocatello program is housed in the Early Learning Center, located near the Pond Student Union Building. In Idaho Falls, the center is in the Sam Bennion Student Union Building.

Entertainment

Every week during the school year and the summer semester, the Student Activities Board (http://www.isu.edu/sab), Union Program Council (http://www.isu.edu/union/upc), and other student organizations (http://www.isu.edu/storg) host a wide variety of activities—movies, concerts, lectures, homecoming events, holiday parties, theatrical plays, celebrations and more! In addition, the Pond Student Union (http://www.isu.edu/stunion) houses a Games Center with video games, billiards, and bowling. For the more relaxed crowd, television sets are located in the Bengal Café and the lower level of the Pond Student Union.

International Programs and Services

Museum Building, Room 319
921 S 8th Ave Stop 8270
(208) 282-2941
http://www.isu.edu/ipo/

The office of International Programs and Services provides assistance to the international students, faculty, and scholars on campus as well as providing assistance to those interested in an international educational experience abroad. International student services include student orientation to the Idaho State University campus and Pocatello community, ongoing cross-cultural activities, and additional programs to help international students make the most of their time at Idaho State University.

Education-abroad services include assisting students in choosing a program, facilitating the credit transfer, and conducting a pre-departure orientation for those about to embark on an international experience. Services continue for those who have returned from an experience abroad.

This office supports all academic departments in bringing foreign faculty and visiting scholars to campus by assisting with the necessary paperwork for immigration and by offering support services to departments hosting visiting scholars.

Finally, this office coordinates communication among relevant offices on campus and works with faculty, administrators and the student organizations to provide ongoing support and guidance for international students, scholars, and faculty and those who have completed an international educational experience.

Janet C. Anderson Gender Resource Center (GRC)

Rendezvous 235, Stop 8141
Idaho State University
Pocatello, ID 83209-8141
(208) 282-2805
http://www.isu.edu/andersoncenter/

The Janet C. Anderson Gender Resource Center (GRC) provides gender related education and programming at Idaho State University. We host film screenings, panels, art shows, lunchtime talks, focus groups, and the annual Gender and Sexuality in Everyday Life Conference. We also provide training for the ISU Green Dot bystander intervention program. See the schedule of events on our website for further details.

Programs: The ISU Green Dot Bystander Intervention Program is a nationally recognized leadership program that promotes the intolerance of violence on campus and in communities. Green Dot is based on training campus leaders to change the culture, “Every Day Everyone, No one has to do everything… Everyone has to do something!” The GRC has certified Green Dot trainers that provide education and training in Green Dot practices for ISU faculty, staff and students. Contact the GRC for information, training dates or to schedule a group training.

Conferences: The GRC and the ISU College of Arts & Letters hold the annual Gender & Sexuality in Everyday Life Conference each spring. The Gender and Sexuality in Everyday Life Conference focuses on how ideas and stereotypes concerning gender and sexuality roles shape and influence various aspects of our daily lives. By acknowledging these roles, we can begin to break down some of the barriers they constitute and move towards awareness and open dialogue. This year the conference will be presenting a great combination of local ISU faculty and student presenters, as well as guests from all over the country and internationally. The Gender and Sexuality in Everyday Life Conference offers a unique opportunity for ISU students of all levels, as well as interested community members, to experience a professional conference without having to travel or pay expensive registration fees.
Resources: The GRC library holds books, magazines, and pamphlets on a variety of gender-related topics. Materials may be borrowed for up to a month.

Additionally, we offer internship, practicum, and volunteer opportunities for Idaho State University students, faculty, and staff, as well as educational presentations on a variety of gender-related topics.

The GRC is open to all members of the Idaho State University community regardless of gender identification, sexual orientation, ethnic or cultural background, religion, abilities, or age — everyone is welcome! Everyone who is a part of the GRC, whether staff, intern, or volunteer, strives to ensure that all GRC services and activities will be accessible and available, provided in safe and comfortable surroundings, of high quality, and of interest to the Idaho State University community. The opportunities at the GRC are limited only by the imaginations of those who choose to participate.

Military Education Benefits

For any information concerning veterans’ educational benefits, rights, and opportunities, contact:

Military Education Benefits Chief
Office of the Registrar
921 S 8th Ave Stop 8196
Pocatello, ID 83209-8196
(208) 282-2676
vco@isu.edu
http://isu.edu/registrar/military-ed-benefits/

Native American Student Services

Idaho State University
Native American Student Services
921 S. 8th Avenue, Stop 8010
Pocatello, Idaho 83209-8010
http://www2.isu.edu/success/nass/index.shtml
nass@isu.edu

Native American Student Services assists, advises, and supports Indigenous peoples in the attainment of their educational goals through academic advising, tutoring, cultural activities, utilization of internal and external resources and advocacy. It is our goal, through these services and others provided by Idaho State University, to promote retention and increase the graduation rates of our Native students.

Outdoor Adventure Center

Pond Student Union, First Floor
(Lower northwest entrance off the Quad)
921 S 8th Ave Stop 8128
(208) 282-3912

Here is your ticket to adventure, fun and smiles! Students, faculty and staff are invited to participate in any or all of the Outdoor Adventure Center’s activities. The Center offers common adventure based outings and classes such as canoeing, climbing, cross-country skiing, kayaking, rafting, backpacking, caving, mountain biking, horseback riding, mountaineering, orienteering, and camping. Rental equipment is available for a variety of outdoor activities. The Center also teaches special topic workshops on topics such as avalanche awareness, backcountry survival and the Leave No Trace ethics.

The Outdoor Adventure Center hosts speakers and other special events like the Pocatello Pump (a climbing competition). The Center has an extensive resource center with books, magazines and maps. The Center manages the Portneuf Yurt Range Yurt System, consisting of five yurts available for use by winter enthusiasts.

Visit our website at http://www.isu.edu/outdoor

Religion

religious activities among students are promoted by Pocatello churches. There are three religious centers on campus; the LDS Institute (https://studentview.lds.org/home.aspx/60320), St. John’s Community (http://bengalcatholics.com) (Roman Catholic), and the University Bible Church (http://www.universitybible.org).

Some of the religious organizations on campus include the Baptist Campus Ministries, Campus Crusade for Christ, Catholic Campus Ministry, Idaho State University Ecumenical Ministry (American Baptist, Christian-Disciples of Christ, Episcopal, United Methodist, United Presbyterian, and United Church of Christ-Congregational), Latter-Day Saints Student Association, Lutheran Campus Ministry, Muslim Student Association, and Wesley Foundation.

Scheduling and Event Services

Pond Student Union, Hypostyle Room 299
921 S. 8th Ave., Stop 8354
(208) 282-2297
http://www.isu.edu/union/scheduling/

The Scheduling and Event Services Office assists students, the campus community, and university guests in planning and coordinating meetings, conferences, programs, and other special events to serve the educational development needs of Idaho State University. The office coordinates facility reservations and room set-up, including sound and audiovisual equipment needs.

Student Activities Board

Student Leadership and Involvement
Pond Student Union, First Floor
921 S 8th Ave Stop 8118
(208) 282-3451
http://www.isu.edu/sab/

The Student Activities Board is responsible for many of the entertainment and social programs on campus. This student committee has the responsibility of programming movies, dances, homecoming, musical entertainment, speakers, family programming, and many other activities. The Student Activities Board provides valuable leadership experience for its members, who learn to maintain and work within a budget, negotiate and fulfill contractual details, arrange publicity, work with committee members, and coordinate all details associated with event production.

Student Employment

For student employment possibilities, see the Career Center (p. 12).
(208) 282-2380

Student Organizations & Greek Life

Involvement Center
Pond Student Union, First Floor
921 S 8th Ave Stop 8170
(208) 282-3451
http://www.isu.edu/stdorg
Organizations play an important role in the education of students at Idaho State University. We encourage a rich climate of diverse and active organizations.

At Idaho State University there are over one hundred fifty active clubs and organizations including academic, professional, cultural, religious, service, and special interest organizations, honor societies, sports clubs and fraternities and sororities.

Minimum requirements for membership in an organization are determined by the university. To be eligible to join a recognized university club or organization, a student must be a regularly enrolled, fee-paying student in good standing.

Other regulations and/or standards are set by the individual clubs or organizations.

All organizations are required to file a list of their officers, members and advisor with the Office of Student Organizations every year to remain current and eligible to receive the privileges of a recognized club or organization.

Regulations for fraternity and sorority recruitments are determined by the National Panhellenic Conference and the fraternity organizations.

Greek-letter fraternities and sororities at Idaho State University are coordinated by the Greek Council and Panhellenic Council. Currently, these are Alpha Xi Delta, Delta Sigma Phi, Kappa Sigma, and Sigma Sigma Sigma.

For further information, refer to the Student Organizations Directory or the Student Handbook, or contact the Student Organizations Office.

**Student Success Center**

Executive Director: Cynthia D. Hill, Ph.D.
Associate Director: James Yizar, Jr., Ed.D.

Pocatello:
Rendezvous Building, Room 323

http://www.isu.edu/success/
ssc@isu.edu

Idaho Falls:
Center for Higher Education, Room 220
(208) 282-7925

*Mailing address for both locations:*
921 S 8th Ave Stop 8010
Pocatello ID 83209-8010

The Student Success Center coordinates a variety of resources for students. Academic Programs provides a foundation for learning and academic success. Central Academic Advising assists students in making academic decisions, and Disability Services assists students with documented disabilities. Native American Student Services advocates for and guides Native American students.

TRiO Student Services prepares eligible students to enroll in and graduate from post-secondary institutions. In order to participate in any of the TRiO programs, potential participants must meet the following criteria:

- Two-thirds of participants must meet federal low-income guidelines AND be first-generation college students.
- Remaining one-third of participants may be low-income OR first-generation college students OR have a documented physical, psychological, or learning disability.
- Students must have a need for program services.

*Note: TRiO eligibility criteria will vary with individual programs.*

Once students have been determined eligible, they may be provided a diversity of academic support services through one of the three TRiO programs including Educational Talent Search, Upward Bound, and Student Support Services.

**PRE-COLLEGE PROGRAMS**

**Educational Talent Search (ETS)** works with eligible program participants who are in the 9th through 12th grades and have potential to be successful in college. Students receive tutoring, assistance with study skills, organizational skills, test-taking strategies, and career exploration. They also attend field trips and cultural activities, and participate in community service projects and technology workshops. During their senior year they are also provided help with admission/financial aid forms and obtaining other information that will prepare them to enter the college of their choice. Participating target high schools are: Aberdeen, American Falls, Blackfoot, Bonneville, Burley, Century, Highland, Idaho Falls, Jerome, Minico, Pocatello, Shoshone-Bannock, Snake River, and Twin Falls High School.

**Upward Bound (UB)** assists eligible 9th through 12th grade students in preparing for the challenges of a post-secondary education. The program consists of an intense academic summer component and a follow-up component during the school year. The summer program is held on the Idaho State University campus. For eight weeks students are taught by certified high school teachers and receive credit toward high school graduation in most of the traditional academic disciplines including math, English, science, and foreign languages. Study skills, test-taking strategies, and career exploration are incorporated into the summer curriculum and additional academic support services such as tutoring are provided by tutors/mentors. The academic year follow-up program is geared to supporting the curricular and academic support activities students experience.
during the summer. Regular tutoring and other academic enhancement services are provided to students throughout the school year. Participating target high schools are: Aberdeen, American Falls, Blackfoot, Century, Highland, Pocatello, Shoshone-Bannock, and Snake River High School.

**POST-SECONDARY PROGRAM**

**Student Support Services** (SSS) is a post-secondary retention-oriented program that offers academic support services to eligible students. Advisors provide students assistance with course selection and scheduling along with personal and financial counseling. Other important services available to students include tutoring and supplemental instruction. Tutors and Supplemental Instruction Leaders are model students who have excelled in their academic disciplines. The SSS program’s goal is to help students be successful, both academically and socially, while attending Idaho State University, by providing strong support to help students achieve their educational and career objectives leading to their completion of a baccalaureate degree and pursuit of graduate school educational opportunities.

**University Counseling and Testing Services**

Pocatello:
Graveley Hall, Top Floor, South Wing
921 S 8th Ave Stop 8027
(208) 282-2130

Idaho Falls:
1784 Science Center Drive
Room 223 Bennion SUB
Stop 8150
(208) 282-7750

http://www.isu.edu/ctc/

**Counseling Service**

The staff of the University Counseling and Testing Service are available to assist students who are encountering personal, social, and emotional difficulties while enrolled at Idaho State University. During an initial assessment process, the student and counselor discuss the student’s needs and concerns and decide upon an appropriate counseling plan. Individual, couples, and group counseling are available. When appropriate, the counselor will assist the student with a referral. We can usually counsel students with concerns such as anxiety, depression, low self esteem, lack of motivation, eating problems, stress, grief, and interpersonal relations including couple and family problems.

Personal counseling is free and confidentiality is maintained within the ethical and legal guidelines of the American Counseling Association, the American Psychological Association and the State of Idaho. Staff are licensed by the State of Idaho as professional counselors or psychologists. Masters' and Doctoral trainees (interns) are under the direct supervision of licensed staff.

**Consultation and Crisis Intervention Services**

Whenever any member of the university community has an immediate mental health concern for their self or another person, they may contact our office. One staff member is available each day during normal working hours for emergencies and consultations. After normal working hours, emergency response is initiated by contacting Campus Security and/or 911. Counseling staff may coordinate and assist with follow-up to such emergencies.

In addition to crisis intervention and follow-up services, counseling service staff are available for a variety of other consultations. The most common consultations include debriefing with individuals and departments who have had a critical incident, assisting individuals and departments in working with students with difficulties, and providing support and follow-up to individuals and departments undergoing significant change.

**Outreach Services**

University Counseling and Testing Service staff provide a wide variety of outreach services including: teaching academic courses; leadership development programs; workshops on communication skills, mindfulness, anxiety, anger, and stress management; guest lectures on a variety of topics; and information on such concerns as depression, anxiety, eating disorders and sexual assault. Workshops, lectures, and courses can be designed to fit the needs of specific individuals, groups, or departments.

**Testing Service**

The University Counseling and Testing Service actively pursues the opportunity to serve the university and the community as a full service testing center. In addition to serving the university’s needs for course placement testing, proctoring on-line course exams, and special requests for proctored exams, we currently serve the larger community as a contract test site for: PROMETRIC, ACT, Miller Analogies Test (MAT), GED, Pearson Vue, Kryterion, and CLEP. For current information on the cost and registration process for any of the over 500 examinations available through our center, please check out our website: http://www.isu.edu/ctc/.

**University Health Center**

921 S 8th Ave. Stop 8311
(208) 282-2330

http://www.isu.edu/healthcenter/

All students are eligible to see a care provided at the University Health Center at no charge for the basic office visit. Almost all insurances are accepted for other charges.

The University Health Center provides the entire range of medical office care as is provided at a hometown doctor’s office. This includes everything from colds and flu to treatment of high blood pressure and diabetes. We care for broken bones, lacerations, abscesses, and other urgent care problems. Preventative health services such as immunizations, healthy lifestyle counseling, and birth control are areas of particular interest.

The University Health Center bills private insurance when billable services such as laboratory tests, X-ray studies, special procedures, etc., are performed. The University Health Center does its best to see people on the same day they are ill. Same day appointments are available daily. A valid Bengal ID card is required to obtain services.

The University Health Center is located at 990 Cesar Chavez Avenue—across from Graveley Hall.

**University Honors Program**

Sherri Dienstfrey-Swanson, Ph.D., Director
Rendezvous Building, Room 323
921 S 8th Ave Stop 8010
Pocatello ID 83209-8010
Office: (208) 282-3662
honors@isu.edu

The University Honors Program is an academic learning community that offers a broad range of enriched educational experiences, typically found at a small private college, for bright, talented, and ambitious undergraduate students. The main goals of the program are:
1. To provide a challenging and imaginative curriculum;
2. To prepare students for a post-graduate education through seminars, individual research, and one-on-one interaction with faculty; and
3. To enrich the life of all honors students by fostering a spirit of ongoing inquiry and a love of learning.

The University Honors Program offers interdisciplinary, theme-driven course sequences in the humanities, social sciences, and natural sciences. They are designed for students who are motivated to develop their critical and creative thinking in a more personalized atmosphere than may be expected in normal lower division courses. These courses are offered in small classes (25 maximum enrollment) by interested faculty, deal with broad and/or interdisciplinary issues, and confront some aspect of the human condition. Innovative teaching and assignments are encouraged, and interaction with faculty and class members is lively. Please check www.isu.edu/honors for this year’s core curriculum themes and additional information. Questions about the University Honors Program and courses may be directed to the address above.

The University Honors Program Curriculum fulfills many of the General Education Requirements.

**University Tutoring**
Haydie LeCorbeiller, D.A., Director
Rendezvous Building, Room 323
921 S 8th Ave Stop 8010
Pocatello ID 83209-8010
(208) 282-4823
http://www.isu.edu/success/ssc@isu.edu

**Content Area Tutoring**
The Content Area Tutoring (CAT) Program provides small-group tutoring in all academic areas except writing and math, which are handled through the Writing and Math Centers. Students may request tutoring in courses from anthropology to zoology at the CAT offices in Pocatello’s Rendezvous Center (REND 323, 282-3662) or Idaho Falls (CHE 220, 282-7925).

A separate tutoring system, based in the Roy F. Christensen Building, focuses on the tutoring needs of College of Technology students.

**Math Center**
The Math Center provides drop-in tutoring services to help students on the Pocatello and Idaho Falls campuses understand concepts in undergraduate math and math-related courses. Tutors ask questions to clarify what students know and how the concept has been taught to them. They help students see what they have been doing incorrectly, and they work other examples with students to suggest approaches to the problems that students are doing.

**Writing Center**
The Writing Center provides individualized tutoring in Pocatello, Idaho Falls, and online to help students improve the quality of their writing for undergraduate and graduate courses in all subjects. Tutors are available by appointment to work with students at any stage of the writing process, from generating ideas to revising full drafts. They assist with organization and development of ideas for particular audiences and purposes, as well as with issues of punctuation and usage.

**Veteran Student Services Center**

“Your Veteran and Military Connection at Idaho State University”
Todd D. Johnson, M.A., Director
Student Union Building
3rd Floor (near the Salmon River Suites)
921 S. 8th Ave., Stop 8095
Pocatello, ID 83209-8095
(208) 282-4245
http://www.isu.edu/veterans/

Veterans’ Crisis Line (http://www.veteranscrisisline.net/ForVeterans.aspx)
The Veteran Student Services Center aims to make ISU one of the most “veteran-friendly” campuses in the United States by simplifying access to existing services, addressing the needs of the individual veteran, and supporting our growing community of student veterans and service members. As a veteran-centered transition and support program, our mission is to provide first-class service, guidance, and advocacy for ISU student veterans, benefit-eligible dependent students, and their family members through strong campus and community partnerships.

Professional staff and trained student advocates attend to student’s needs; services include veteran/military-friendly study and computing areas, assistance with admissions, G.I. Bill benefits, academic advising, disability and learning resources, financial assistance and scholarships, career preparation, and a variety of other veteran-specific support and academic resources. The Center also works closely with the Student Veterans of America - Armed Forces Club, a student-run organization serving the veteran community, which has chapters on both the Pocatello and Idaho Falls campuses. For more information, contact the Veteran Student Services Center at (208) 282-4245.

**Wellness Center**
(208) 282-2117
http://www.isu.edu/wellness/

Students at Idaho State University have the unique opportunity of having a wellness center on campus. The mission of the Wellness Center is to promote a holistic approach to health through quality health promotion and education programs and public service to all students at Idaho State University. We are committed to providing opportunities that facilitate and support personal growth in the multiple dimensions of health: physical, mental, emotional, spiritual, social, and environmental. A wide variety of aerobic classes and mind and body classes are offered through GET-FIT Program, including body sculpt, interval training, Zumba®, boot camp, Insanity® Live, muscle pump, cross training, barbell, Pilates, and yoga. All classes are held at Idaho State University Reed Gym and Red Hill. The current class schedule for the GET-FIT Program is available at http://www.isu.edu/wellness/services/get-fit/.

The Wellness Center also offers fitness assessments to Idaho State University students. This includes cardiovascular endurance, body composition, blood pressure, flexibility, and abdominal strength. Students have access to two free fitness assessments per semester. Other services provided by the Wellness Center for students at no cost for a limited number of sessions include personal training, nutrition/wellness coaching, and smoking cessation. American Heart Association CPR/first aid courses are also available for a reasonable fee.

For further information on Wellness Center programs and activities, please call the Wellness Center at (208) 282-2117 or send email to wellness@isu.edu or visit the website at http://isu.edu/wellness. Office hours during the Fall and Spring
academic semesters are 8 a.m. - 5 p.m., Monday through Friday. Office hours during the Summer term are 7:30 a.m. through 4 p.m., Monday through Friday.
Athletics

Holt Arena
http://www.isubengals.com/

The Athletic Department at Idaho State University is a Division I (FCS) member of the National Collegiate Athletic Association (NCAA) and the Big Sky Conference. Men’s sports offered are basketball, cross country, football, tennis, and indoor and outdoor track and field. Women’s sports offered are basketball, cross country, golf, soccer, softball, tennis, indoor and outdoor track and field, and volleyball. In addition, Idaho State University has extensive participation in a wide variety of club sports.

Athletic Eligibility
To participate in intercollegiate athletics, students must comply with the eligibility rules of the National Collegiate Athletic Association, the Big Sky Conference, and Idaho State University. Prospective students who have questions concerning eligibility should direct their questions to the Assistant Athletic Director for Compliance.

Intercollegiate Athletics-Directors and Coaches

Tingey, Jeffrey, Athletic Administration, Director of Athletics
Anderton, Marilyn, Athletic Insurance Coordinator
Burtenshaw, Lisa, Development KP Sports Representative
Carlson, Greta, Bengal Athletic Boosters Administrative Assistant

Physical Facilities and University Services

The Idaho State University campus encompasses over 1,100 acres of property. Its 105 buildings are surrounded by 180 acres of attractively maintained landscape. There are over 5,600 parking spaces available throughout the campus.

For convenience, a free on-campus shuttle bus is available during the fall and spring semesters. Riding a bicycle is also a popular way to get around campus. The campus is located just off of the interstate, making access very easy. The university commuter bus system brings students to the campus from over 70 miles away from Idaho Falls, neighboring towns, and areas in between.

All academic units are housed in the various campus buildings ranging from the oldest, Frazier Hall (built in 1925), to the newest, the Rendezvous Building (completed in 2008). The Rendezvous is a new 256,000 square foot, multi-use facility located in the center of campus. It contains 82 student suites which house 300 students, a 40 classroom academic building with a 250 seat lecture hall/future planetarium, a core food service facility to serve housing students and retail customers, as well as a 120 seat drop-in computer lab and numerous styles of study and relaxation spaces. This expansive facility creates a new living, learning, studying, social and academic heart for the campus.

The L. E. and Thelma E. Stephens Performing Arts Center, completed in 2004, is located on 16.8 acres, high on a hill on the perimeter of the campus, adjacent to Interstate 15. This 123,000 square foot facility includes a 1,200 seat concert hall, an elegant rotunda, a 446 seat thrust theatre, and a 200 seat black box theatre. The three-level concert hall, the Center’s largest venue, incorporates state-of-the-art design and technology to optimize sound. The Center also includes classroom space, offices for the Department of Theatre and Dance, and a conference room. The facility and the various, wonderful performances it presents are a must-see part of campus.

Opened in October 2008, the Center for Advanced Energy Studies or “CAES” Building is a world-class research facility with offices and laboratories for collaborative projects between Idaho State University, Boise State University, the University of Idaho, and Idaho National Laboratory scientists and engineers. It is certified as a LEED Gold building and located on our Idaho Falls campus. It is a 55,000 square foot, $18 million facility and includes a fluids lab, advanced materials lab, imaging suite, radio chemistry and chemistry labs, systems modeling, power wall, and visualization cave.

Opened in August 2009, the 101,000 square foot ISU-Meridian Health Sciences Center includes programs with an emphasis on health sciences, consolidating academic programs already leasing space in Meridian and the Treasure Valley.

Remodeling and updates of the campus are an ongoing process. All of the campus buildings are accessible to the disabled.

Occupied in 1971, Holt Arena was the first enclosed football stadium on any university campus. The arena is used for football and basketball games, indoor track meets, and various trade and garden shows, as well as championship rodeos.

Remodeled in 2002, Reed Gymnasium provides a unique and exciting venue for basketball games, volleyball, and other sporting events. A world-class climbing wall is located in the Recreation Center along with racquetball courts, a running track, weight rooms and other sports equipment as well as an Olympic-size swimming pool. The Recreation Center was expanded in 1996. A new $7.7 million expansion, completed in April 2010, includes weight, cardio-training and fitness areas, dance/multipurpose rooms, offices, and lobby. A new NCAA Women’s Softball Field is under construction and will provide a competition-level practice and performance field for the ISU women’s softball team.

Historic Davis Field provides a well-maintained, multi-use field and outdoor running track where Idaho State University hosts a variety of events including soccer and track tournaments and Special Olympics. Bartz Field is a 30 acre, dog-friendly field used for events such as softball, archery, sledding, cross country, golf, and rugby. The Pocatello Greenway passes through the campus above Davis Field, connecting with 13 miles of trail through the Portneuf Valley.

Outdoor recreation opportunities abound on the many acres of developed and undeveloped campus grounds. A disc golf course, challenging cross-country track, vertical challenge tower, bike trails, jogging trails, hiking areas, and walking paths are part of the Idaho State University campus. Softball, track, ultimate frisbee, soccer, and rugby are all options for the active student. Summer and winter sports, including rock climbing, skiing and snowboarding, are also available only minutes away in the beautiful mountains surrounding the city. Just 35 miles away, located in the mountainous valley of the Portneuf River on the old route of the Oregon Trail and California Trail, the city of Lava Hot Springs is a popular resort location, noted for its numerous hot springs amenable to bathing, an Olympic-size swimming pool, and unique shops and restaurants.

The ISU-Idaho Falls campus provides modern classroom facilities and a student union. The university also has many outreach centers available to assist students in Southeast Idaho, Twin Falls, and Meridian.

University Bookstore

The ISU Bookstore, called the University Bookstore, is located in the lower level of the Pond Student Union. The bookstore carries both new and used textbooks for all your courses, as well as school and office supplies, Bengal gear and gifts, and general interest books.

Bookstore hours are 8 a.m. – 5 p.m. Monday – Friday, and 10 a.m. – 2 p.m. on Saturdays during the fall and spring semesters, and 8 a.m. – 4 p.m. Monday – Friday during the summer. The bookstore can be reached at 208-282-3237, or online at http://www.isustore.com.

A bookstore is also located at the Idaho Falls campus called the University Place Bookstore, and they can be reached at 208-282-7940, or online at http://www.idahofallsstore.com.

Students can purchase their textbooks online by going to their concise class schedule, which can be found under Registration Tools on the Academic Tools page of BengalWeb (https://bengalweb.isu.edu). On the Concise Student Schedule, go to the bottom of the page and click on the link corresponding to your campus: ”Buy Pocatello Books” or ”Buy Idaho Falls Books.”

Refunds will be paid with receipt through the first week of classes for fall and spring semesters, and during the first two days of summer classes. Refunds, with receipt, will be paid through the drop/add period with proof of dropped class. All refunded books must be returned in the condition purchased; new books that are marked or damaged will be refunded at the used book price. See store for details.

Information Technology Services

Idaho State University’s Information Technology Services (ITS) is dedicated to meeting the computing needs of ISU’s students. ITS maintains eight full service student computer labs in Pocatello, three in Idaho Falls, two in Meridian, and one in Twin Falls. They also provide kiosk computers in numerous locations...
throughout campus to provide fast and convenient stand-up email and internet access. And, finally, ITS provides wireless access for students on campus who have their own mobile devices.

Many individual departments operate additional computer labs (partially supported by ITS) which often feature specialized discipline-specific software. Use of the general ITS computer labs, kiosks, wireless network and most departmental labs require the purchase of an ISU Computer Account (currently $35 per semester and $30 for summer). Up to $25 worth of black and white printing is included with a computer account. Some courses require computer accounts.

New computer accounts may be purchased at the IT Service Desk in Pocatello (BA-B9 and Rendezvous Computer Lab), and in the ISU Idaho Falls, Twin Falls, and Meridian computer labs. Students who currently have a computer account can renew their account online or in person.

The IT Service Desk, 208-282-HELP (4357) or help@isu.edu, provides technology support to students accessing IT services, such as Moodle, BengalWeb, or e-mail. Students may also visit our IT Service Desk locations wherever computer accounts are sold (locations listed above).

BengalWeb (ISU’s electronic portal) provides one-stop, personalized access to all of ISU’s electronic resources. Students can use it to register for classes, print out class schedules, find book lists, check on financial aid, pay for classes and fees, and check their grades. It also provides links to campus news, advising, housing, the library, movie schedules, and much more. All admitted students have access to BengalWeb at http://BengalWeb.isu.edu.

All ISU students are automatically given a free ISU email account. ISU uses this account for all official communication, from waitlist notifications to pending deadlines. Students should check their ISU email often or have it forwarded to their preferred email address. Students who need help accessing BengalWeb or their ISU email should contact the ISU Service Desk at (208) 282-HELP (4357).

**Student Unions**

Idaho State University offers student union services in three locations: the Earl R. Pond Student Union and Hypostyle (Pocatello lower campus), the Samuel H. Bennion Student Union (Idaho Falls), and Union facilities in the new Rendezvous Center (Pocatello mid campus). These locations serve the campus as focal points for experiential education and provide student opportunities for campus employment.

The Earl R. Pond Student Union provides students with: lounges, check cashing service, automatic teller machine, food service, bowling, billiards, movie theater, computer lab, copy service, ballroom, barber shop, bookstore, meeting rooms, guest rooms, and much more. This facility is in constant use by students, organizations, university departments, and community groups.

The Pond Student Union and the Union Hypostyle house offices for the Associated Students of Idaho State University (ASISU); Student Affairs, including the Vice President for Student Affairs, Associate Dean of Students (University Judicial Officer), The Bengal student newspaper, the Outdoor Adventure Center (comprised of C.W. HOG, Outdoor Program, and Outdoor Adventure Rentals), Craft Shop, Idaho State University Mail Center, KISU-FM Public Radio, New Student Orientation, Scheduling and Event Services, Student Activities Board (SAB), Student Organizations and Greek Life, Union Program Council (UPC), University Food Services, an ISU Credit Union branch, and the Bengal Card Services office.

The Samuel H. Bennion Student Union provides students with: lounges, automatic teller machine, food service areas, computer lab, multi-purpose room, bookstore, meeting rooms, the Student Health Center, TRIO Student Services, Parking and Bengal Card Services, Counseling, Testing, Career Services, Early Learning Center, and the offices of Student Services.

The Rendezvous Center brings additional student lounging areas, automatic teller machine, food service areas, computer lab, meetings rooms, and convenience store.

**University Housing**

http://www.isu.edu/housing
mailto:reslife@isu.edu
208-282-2120
745 S. 5th Avenue, Stop 8083
Pocatello, ID 83209-8083

According to the American Council on Education, students who live on campus are more likely to succeed academically than students who live off campus. This includes earning higher grades and being more likely to complete a college degree. University Housing is here to contribute to your success at Idaho State University.

**Housing Options**

University Housing offers traditional residence halls and suites, as well as apartments. Traditional age first-year students are eligible to live in either the residence halls or the suites; however, returning students have priority and availability in the suites can be limited. On-campus apartments are available for sophomores and above, married students, and students with children. Floor plans and photos, as well as pricing, can be found at http://www.isu.edu/housing. The housing fee covers all utilities and basic cable television. On-campus housing is within the university’s wireless internet network, but beware that use of internet service requires an ISU computer account, for which a fee is charged per semester.

**Food Service**

University food service is required for first-year students living in the residence halls, and is an option for other students, regardless of whether they live on campus.

**To Apply**

Applying for University Housing is separate from application to Idaho State University. Housing applications are completed and submitted online. To apply, simply go to the Housing website (http://www.isu.edu/housing) and then click the “Apply Now” link. Then select either the residence hall or apartment application. If you have questions please email reslife@isu.edu.

**University Library**

The University Library, named for its past director, Eli M. Oboler, contains major collections of books, periodicals, electronic resources, maps, microforms, and government publications and provides a full range of services to students, faculty, and staff. The library collection of 700,377 book and serial volumes and its 4,576 active journal subscriptions in all formats are accessible through its automated catalog and circulation system, or its Journals by Title, both available through the library web page at http://www.isu.edu/library/. In addition, the library provides access to numerous databases, many of them with full-text content providing access to an additional 63,711 journals. The University Library has been a depository for federal publications since 1908 and for state of Idaho publications since 1972. The government publications collection contains over 445,024 printed items and approximately 1,964,868 items published in microform.

General reference service is provided on the first floor, where librarians are available to assist patrons in the use of over 89 databases and other reference resources. Library instruction is available to classes and student groups and is
tailored to address students’ specific needs, from general library orientation to subject-specific bibliographic research. In addition to supplying informational materials from its own collections, the library provides an inter-library loan service, equipped to locate and deliver books and periodical articles from other libraries’ holdings. Using online electronic ordering and transmission, as well as postal services, the inter-library loan service fills most requests within a week, but students should allow a two-week turnaround time.

The Idaho Health Sciences Library, a department of the Eli M. Oboler Library, supports the health sciences information needs of the university and the Idaho health care community. It also provides specialized health science reference, research and instruction services. The Arthur P. Oliver Law Library, located on the third floor of the Eli M. Oboler Library, houses more than 13,000 law books. An excellent reference resource for students, faculty, and staff, it is supplemented with legal databases.

Idaho Falls
The University Library Center at Idaho State University-Idaho Falls provides reference services, a limited reference collection, and a study area for Idaho State University students. Also available are public access workstations on which students and faculty are able to access most of the information databases available to students at the main campus. With the assistance of trained staff, students are able to request the delivery of books and journal articles from the University Library.

Twin Falls and Lewiston
The Oboler Library has agreements with the libraries at the College of Southern Idaho and at Lewis-Clark State College. These agreements ensure strong library support for Idaho State University students in the Twin Falls and the Lewiston areas. Under these agreements, students are able to access the two libraries and check out materials. They also receive full reference, instruction, inter-library loan, and database searching services. On-line access is available to Idaho State University Library databases and the catalog.

Meridian
A similar agreement in Meridian provides ISU students and faculty the same library privileges accorded to Boise State University students and faculty upon presentation of their Idaho State University identification card.

For more detailed information regarding Library services, including hours of service and policies, visit the library website at http://www.isu.edu/library.

Library Courses
LLIB 1115 Introduction to Information Research: 3 semester hours. Develop life-long strategies for recognizing when you need information, locating it, evaluating it, and using it effectively and ethically. Explore a variety of tools and formats in order to find sources worth using/citing in support of academic projects. Satisfies Objective 8 of the General Education Requirements. F, S

LLIB 1125 Introduction to Health Information Research: 3 semester hours. Develop life-long strategies for recognizing when you need health information, as well as how to find it, evaluate it, and use this information effectively and ethically. This course will focus on concepts such as evidence-based practice, developing a well-built clinical question, searching biomedical information resources, and using health-science research techniques. S

Graduate Programs and Graduate Courses
Idaho State University offers many master’s and several doctoral programs as well as a Family Practice Residency Training Program for physicians. Numerous graduate courses are delivered in almost all disciplines. Undergraduates who are last semester seniors may take up to six credits at the graduate level in the 5000 series with permission. Enrollment in graduate courses requires admission to graduate school, except the professional development courses which are the 5597 series. For additional information regarding graduate courses and programs of study, please see the Graduate Catalog.
Idaho Museum of Natural History

Director: Dr. Leif Tapanila

Mission Statement

The mission of the Idaho Museum of Natural History is to acquire, preserve, study, interpret, and display objects relating to the natural history of Idaho and the Northern Intermountain West for research and education. The Museum seeks to enhance in the citizens of Idaho and visitors an understanding of Idaho’s natural and cultural heritage. Specific areas of interest encompass the anthropology, botany, geology, paleontology, and zoology of Idaho and the Northern Intermountain West. Audiences served include citizens of Idaho, visitors, and the national and international community of students and scholars. Information is disseminated through exhibitions, public and professional presentations, publications, formal and informal education, telecommunications, and other interpretive programs.

Curators in Anthropology, Earth Science and Life Science lead national and international research. Our active research profile supports acquisition and use of collections for all areas of natural history research and education. ISU faculty and students have access to Museum collections for instruction, training, and graduate theses and dissertations.

Our Public Programs Division develops and implements programs and exhibitions on a wide range of science topics, emphasizing current Museum research and environmental and ecological themes. These programs are both university level and for K-12 education.

The Museum offers undergraduate and graduate students educational credits under the Museum subject code and through courses in Anthropology, Biology, Education, Geosciences, History, and other affiliate Idaho State University departments. See Museum course descriptions (http://coursecat.isu.edu/undergraduate/allcourses/muse) in the All Courses section of the catalog.

For more information, please visit the Idaho Museum of Natural History's website at: imnh.isu.edu.
Biomedical Research Institute (IBRI)

Director: Dr. Shawn Bearden

Established in 2005 to increase the collaboration, efficiency and focus of the University’s biomedical research activities, the Biomedical Research Institute is a network of investigators and resources focused on research as a means to improve human health.

The Institute is an interdisciplinary biomedical research environment where scientists, engineers, and health professionals can interact synergistically, without the restrictions of traditional discipline barriers. The IBRI seeks to help every member reach their potential in making significant contributions to improving human health through discovery and dissemination of new knowledge, methods, and technologies.

Our members include academic investigators, clinician scientists, and supporting personnel at ISU and partnering organizations.

Informatics Research Institute (IRI)

http://www.iri.isu.edu/

Director and Professor: Schou
Associate Director and Assistant Professor: Frost
Associate Professors: Sammons
Research Professor: Schmidt
Affiliate Professors: Leibrock

The Informatics Research Institute (IRI) is an academic unit providing coordination for several interdisciplinary degrees and research centers across campus. Informatics is an integrative discipline that arises from the synergistic application of computational, informational, organizational, cognitive, and other disciplines whose primary focus is in the acquisition, storage and use of information in a broad spectrum of domains. It includes the study and application of information technology in the arts, sciences, commerce, medicine, and society in general. The IRI has a mission in teaching, research, and service. Activities include:

- Developing interdisciplinary programs in informatics
- Developing interdisciplinary degree programs
- Developing and offering outreach programs
- Coordinating activities of related centers on campus
- Providing leadership in critical infrastructure protection
- Developing educational programs
- Developing infrastructures to support research in diverse fields
- Coordinating interdisciplinary academic concentrations

The IRI coordinates activities among the National Information Assurance Training and Education Center (NIATEC), Simplot Decision Support Center (SDSC), Center for Innovative Technology in Archaeological Informatics (CITI-AI). The IRI charter includes development of interdisciplinary AA, AS, BA, BS, Masters and Doctoral programs as well as concentrations in Information Assurance.

Archaeological Informatics

CITI-AI – Center for Innovative Technology in Archaeological Informatics. The CITI-AI leads research in the organization and analysis of archaeological information. It creates and maintains active partnerships within the archaeological community and serves as an interdisciplinary center of activity uniting basic informatics research and modeling within the Informatics Research Institute, Idaho State University, and its affiliated faculty.

Simplot Decision Support Center

The Simplot Decision Support Center (SDSC) is a facility designed to increase group decision making effectiveness and efficiency. It is a research and development effort of Idaho State University resulting from the generosity of the Simplot Corporation. The Simplot Decision Support Center is one of a few dedicated facilities in the nation and is available as a resource to both local and national organizations. It has led the national effort in developing information assurance and computer security training and education standards for the federal government.

Information Assurance

NIATEC – The National Information Assurance Training and Education Center is a consortium of academic, industry, and government organizations to improve the literacy, awareness, training, and education standards in Information Assurance. As the federally designated cornerstone for essential education and training components of a strong Information Assurance initiative, the mission is to establish an effective Information Assurance infrastructure. NIATEC is associated with Idaho State University Center of Academic Excellence. It is a component in the national plan to establish a federal cyber-corps to defend against cyber-based disruption and attacks. Key to building such a cyber-corps is the implementation of robust graduate and undergraduate curricula in Information Assurance.

Information Assurance Degree Concentrations

The IRI coordinates the federally designated Center of Academic Excellence in Computer Security Education. The Center of Academic Excellence includes formal concentrations in Information Assurance at the undergraduate and graduate level in cooperation with NIATEC and CITI. In addition, the Informatics Research Institute offers formal concentrations in Information Assurance. These concentrations may be above the regular degree requirements documented by the DHS/CNSS approved Certificates offered by Idaho State University.

Certificates for Concentrations:

- CNSS 4011 - National Training Standard for Information Systems Security (INFOSEC) Professionals
- CNSS 4012 - Senior Systems Manager
- CNSS 4013 - Systems Security Administration
- CNSS 4014 - Information Systems Security Officer
- CNSS 4015 – Systems Certification

Program of Study:

Students with appropriate pre-requisites may take courses within the information assurance program as part of a formal information assurance concentration in their degree program. With approval of their advisor and the faculty they may pursue certificates in specialty areas. In addition to courses that support specialized certifications the program offers courses in Computer Forensics and Risk analysis. All courses require preparation of research papers in information assurance topic related to their major field.

- CNSS 4011 - Students in the Computer Information System major may take INFO 4411 Intermediate Information Assurance , a minimum of 6 hours of INFO 4419 Advanced Informatics Practicum or INFO 4493 Advanced...
Informatics Internship and two additional courses in Information Assurance. Students in the INFO minor may take the same series of courses. Students in other majors may have to take additional courses.

All students seeking additional certifications must complete the requirements for CNSS 4011 and the following:

- **CNSS 4012** – Students certifying for 4012 must complete:
  - INFO 4411 Intermediate Information Assurance 3
  - INFO 4412 Systems Security for Senior Management 1-3
  - INFO 4413 Systems Security Administration 1-3
  - INFO 4414 Systems Security Management 1-3
  - INFO 4415 System Certification 1-3

- **CNSS 4013** – Students certifying for 4013 must complete:
  - INFO 3380 Networking and Virtualization 3
  - INFO 4411 Intermediate Information Assurance 3
  - INFO 4413 Systems Security Administration 1-3

- **CNSS 4014** – Students Certifying for 4014 must complete:
  - INFO 4411 Intermediate Information Assurance 3
  - INFO 4413 Systems Security Administration 1-3
  - INFO 4414 Systems Security Management 1-3

- **CNSS 4015** – Students Certifying for 4015 must complete:
  - INFO 4411 Intermediate Information Assurance 3
  - INFO 4414 Systems Security Management 1-3
  - INFO 4415 System Certification 1-3

**Institute of Emergency Management**

Director: Mikitish

The Institute of Emergency Management (IEM), located on the Idaho State University - Meridian Health Science Campus, was created by the Idaho State Board of Education in July 2003. The purpose of the Institute is to offer workshops, courses, certificates, and degrees to meet the professional and career development needs of Idaho’s emergency response community. IEM offers live-online Associate of Science and Bachelor of Science degrees in Emergency Management and Fire Services Administration, as well as the classroom-based Associate of Science degree in Paramedic Science and the B.S. in Health Science concentration in Emergency Medical Services. The Paramedic Science A.S. classes are conducted at the Meridian campus. For additional information visit http://www.isu.edu/idiem/.

**Institute of Nuclear Science and Engineering (INSE)**

Director and Associate Professor: Dunzik-Gougar

Idaho State University established an Institute of Nuclear Science and Engineering (INSE) with approval from the Idaho State Board of Education in 2003. The INSE objective is to expand research in nuclear engineering and science. The partners in this expanded research are the ISU College of Science and Engineering, the Office of Research, and the Center for Advanced Energy Studies. CAES is a research and education consortium comprised of the three Idaho public universities, the University of Wyoming, private industry, and the Idaho National Laboratory (INL). All of the faculty affiliated with INSE are also faculty of the Department of Nuclear Engineering and Health Physics programs in the College of Science and Engineering.

Idaho State University’s proximity to INL and the INL’s designation as the premier nuclear energy research laboratory in the U.S. create a great opportunity for nuclear engineering research at Idaho State University. A number of ISU’s nuclear engineering faculty hold joint appointments at INL. Also, several faculty were previously employed at what is today the INL, in research and engineering projects.

INSE coordinates a scholarship program for students interested in pursuing a Bachelor of Science degree in nuclear engineering. Students at Idaho State University, the University of Idaho, or Boise State University may apply as sophomores in engineering. Completion of the Nuclear Engineering degree takes place at Idaho State University, on either the Idaho Falls or the Pocatello campus. Agencies within the U.S. nuclear industry, especially AREVA, the Department of Energy, and more recently, the Nuclear Regulatory Commission, have supported scholarships in this program. Participants are encouraged and assisted to find summer positions at INL.

For further information, visit http://engr.isu.edu/nehp/ne/fac
Administration

For information about current university administration, please go to http://isu.edu/administration/, where you will find links to ISU’s Organizational Chart, Mission Statement, Strategic plan, and other administrative information.
Idaho State University – Idaho Falls

Ann Howell, Director

Idaho State University–Idaho Falls
350 University Place
1784 Science Center Drive
Idaho Falls, ID 83402
7800 from campus telephones
(208) 282-7800 from off campus
http://www.isu.edu/departments/ifche

Idaho State University–Idaho Falls is the higher education center of one of Idaho’s most dynamic cities. It offers a comprehensive general education curriculum as well as 29 complete degree programs, all from a Carnegie-classified research institution with more than 50 years of experience in helping Upper Snake River Valley residents achieve their goals. Idaho State University–Idaho Falls is the largest of Idaho State University’s statewide network of higher education centers. It provides more than 2,000 students each semester the opportunity to complete associate, bachelor, master, and doctoral degrees in Idaho Falls, making it the city’s hometown university. Conveniently located at University Place on the banks of the Snake River, Idaho State University–Idaho Falls’ neighbors include the U.S. Department of Energy headquarters for the Idaho National Laboratory, and the new Center for Advanced Energy Studies.

Students at Idaho State University–Idaho Falls take classes that are not only close to home, but also just a short drive from a three-state region’s commercial, health care, business and government centers. Upper Valley residents who are seeking continuing-education opportunities find electives as well as noncredit professional- and personal-development courses. Day and evening classes also are available. Among the many degree programs that can be completed at Idaho State University–Idaho Falls are associate degrees in biology, business, English, history, mathematics and physics; the M.B.A.; the B.S. in nuclear engineering; the Ph.D. in Engineering and Applied Science (Nuclear Engineering); the B.S. in nursing; and the M.Ed. and Ed.D.

Through its partnership with the University of Idaho, students can take classes from either university using a single admission, registration and fee-payment process. A partnership with Eastern Idaho Technical College makes health-professions education available close to the city’s high-tech regional medical center.

Idaho State University–Idaho Falls’ contemporary facilities include up-to-date computing labs, a large auditorium and student-services offices. A campus centerpiece is the Samuel H. Bennion Student Union that includes study and games areas, cafeteria, lounge, bookstore, and computer lab.

Between classes, students can cross-country ski at adjacent Freeman Park, jog on the paved riverside greenbelt, or watch University Place’s resident bald eagles and ospreys soar above the river.

To learn how Idaho State University–Idaho Falls can help you achieve your goals conveniently and affordably, call (208) 282-7800; visit the campus at 1776 Science Center Drive; or browse online at http://www.isu.edu/departments/ifche.
Idaho State University – Meridian

Idaho State University–Meridian
1311 E Central Dr.
Meridian ID 83642
(208) 373-1700

http://www.isu.edu/meridian/

Idaho State University’s presence in the Treasure Valley began in the early 1970s with clinical pharmacy rotations at the Veteran Affairs Medical Center in Boise and the Nampa State School.

Since then, ISU—with approval from the Idaho State Board of Education—has added more than 20 graduate and undergraduate degrees to its academic offerings (http://www.isu.edu/meridian/programs.shtml) in the Treasure Valley. Most fields of study are in the health professions and sciences.

As programs have grown, so too has ISU’s physical space, moving from leased facilities to the Idaho State University Meridian Health Science Center in August 2009. The ISU-Meridian Health Science Center (http://www.isu.edu/meridian/maps.shtml), which spans four acres, houses nine distance-learning classrooms; the L.S. Skaggs Pharmacy Complex; Counseling and Speech and Language clinics; and human patient simulation and clinical/medical science laboratories. The Delta Dental of Idaho Dental Residency Clinic, which opened in 2011, provides advanced training for dentists and treatment for under-served patients.

Unique to ISU-Meridian is its partnership with West Ada School District (http://www.westada.org/site/default.aspx?PageID=1), whose administrative offices and Renaissance Magnet High School are adjacent to the university. Renaissance students interested in careers in medical sciences and research will have the opportunity to use ISU laboratories and resources.

ISU-Meridian serves as the higher education anchor of THE CORE (http://thecoreidaho.com), an 1,800-acre business enterprise corridor with public and private partners committed to building the economy through innovations in health, research and technology.
Idaho State University – Twin Falls

Chris Vaage, Director
Lesa Wagner, Asst. Director

CSI Higher Ed Center
Hepworth Building
Suite 144
P.O. Box 1238
Twin Falls, ID 83303

Phone: 208-933-2300
Fax: 208-933-2309

http://www.isu.edu/twinfalls/

ISU programs in Twin Falls have had major success ranging from producing the region's educators to providing its health professionals. ISU began providing courses in the Twin Falls area in the 1960s. In 1981, the ISU established the Twin Falls Resident Center to meet the growing demand for higher education in Southern Idaho. It was later moved to the College of Southern Idaho Campus in 1992, where it is still housed today.
Alumni Association and Foundations

Alumni Association

www.isu.edu/alumni
alumni@isu.edu

The mission of the Idaho State University Alumni Association is to promote the welfare and to advance the objectives of Idaho State University through the sustained involvement of its alumni by providing philanthropic, intellectual, and social opportunities.

The association is governed by a board of directors and administered through the office of Alumni Relations, 554 S. 7th Avenue, Pocatello, in the H. F. Magnuson House.

Specific goals are to identify alumni and friends to assist Idaho State University in strengthening support from its constituencies, to inform alumni and friends about Idaho State University, to provide for the efficient management of the Alumni Association, and to involve and motivate alumni and students to maintain their affiliation and support of Idaho State University.

The officers and directors meet three times a year with the director of alumni relations, who is appointed by the university administration.

Idaho State University Bengal Foundation

The Idaho State University Bengal Foundation is a nonprofit organization formed to raise money for athletic scholarships. The main fund raising activities include an annual auction, scholarship fund drive, athlete-to-athlete phone-a-thon, several golf tournaments, and other special events held throughout the year.

The Bengal Foundation was officially formed in September of 1976. It is governed by a board of directors and administered through the office of the Bengal Foundation located in Holt Arena. For information on becoming a member, contact The Bengal Foundation at (208) 282-2397.

Idaho State University Foundation, Inc.

The Idaho State University Foundation is a nonprofit corporation established in 1967 under the laws of the state of Idaho.

The mission of the Idaho State University Foundation is to stimulate voluntary private support from alumni, parents, friends, corporations, foundations, and others for the benefit of Idaho State University.

The foundation raises and manages private resources supporting the mission and priorities of the university, and provides opportunities for students and a degree of institutional excellence unavailable with state funding levels.

The foundation is dedicated to assisting the university in the building of the endowment to address, through financial support, the long-term academic and other priorities of the university.

The foundation is responsible for identifying and nurturing relationships with potential donors and other friends of the university; soliciting cash, securities, real and intellectual property, and other private resources for the support of the university; and acknowledging and stewarding such gifts in accordance with donor intent and its fiduciary responsibilities.

The Idaho State University Foundation is located on the first floor of the Administration Building.
Division of Continuing Education and Conference Services

Gary Salazar, Director
Division of Continuing Education and Conference Services
1001 N 7th Ave. Stop 8062
Pocatello ID 83209-8062
(208) 282-3155
extendedlearning@isu.edu
http://www.isu.edu/conteduc

Continuing Education coordinates programs throughout Idaho State University as well as area businesses. Programs include courses and workshops for faculty and staff, professionals, businesses and educators, with emphasis on administering a wide variety of educational experiences for the community and surrounding region.

The general mission of Continuing Education is to provide high quality leadership and support services for continuing professional education and lifelong learning activities for all ages held throughout the university’s service territory, with special emphasis on teacher education, health professions, and arts and sciences. Program sites in Idaho include Pocatello, Idaho Falls, Twin Falls, Ketchum/Sun Valley, and Meridian. Specific programs are also held nationally. Offerings include credit and non-credit programs, evening and weekend programs, short courses, web conferences, seminars, institutes, youth enrichment programs, customized training and conferences. Continuing Education administers the National Continuing Education Unit (CEU) (see below) in conjunction with the International Association for Continuing Education and Training. More than 15,000 people participate annually in 400 activities.

Programs served by Conference Services include the annual Idaho Conference on Health Care, Early Childhood Conference, Intermountain Conference on the Environment, and coordination of web conferences such as those produced by the National University Telecommunications Network (NUTN), PBS/Adult Learning Systems (ALS), and Worldwide Lessons in Leadership.

ISU’s Division of Continuing Education, in partnership with Gatlin Education Services (GES), offers hundreds of engaging online courses for personal enrichment and/or professional development in a variety of industries and fields. For more information, visit http://www.isu.edu/conteduc/.

For a list of course offerings, to make suggestions for course offerings or potential instructors, or other desired information, write or telephone the address given above.

CEU Program

The Continuing Education Unit is an internationally accepted method for quantifying the value of noncredit continuing education activities (defined as quality instruction that does not carry academic credit). Each contact hour in an approved workshop, in-service, conference session, short course or training program is recorded as 1/10 CEU. These do not accumulate for college credit. Noncredit continuing education programs that offer CEUs are most frequently sponsored by associations, agencies, educational institutions, business and industry for the benefit of members, registered participants, employees, etc. It communicates to participants the value that the sponsoring group places upon professional development, information updating, retraining and lifelong learning. There is a recording fee of $20 per class to create a permanent transcript that is then available through the Idaho State University Registrar’s Office upon written request.

New Knowledge Adventures and Friends for Learning

Under the direction of the former Elderhostel organization, now known as Road Scholar, Idaho State University has developed these programs for Idahoans 50 years and older, featuring member-directed, peer-led programs throughout the fall and spring semesters, and short courses in a wide variety of areas. Members join for one semester at a time and all programs are open to them in Pocatello New Knowledge Adventures (http://cetrain.isu.edu/enrollment/new-knowledge-adventures) and Idaho Falls Friends for Learning (http://cetrain.isu.edu/enrollment/friends-learning).
Idaho Residency Requirements

Idaho Residency Requirements for Fee Payment

In determining residency for fee assessment purposes, Idaho State University is governed by Idaho Statute 33-3717B (http://www.legislature.idaho.gov/idstat/Title33/T33CH37SECTION33-3717B.htm) and Idaho State Board of Education Rules. (https://adminrules.idaho.gov/rules/current/08/0104.pdf?cache=1488323813231)

The Idaho State Board of Education provides information about residency requirements on their website at: https://boardofed.idaho.gov/public_col_univ/Residency/residency.asp

Initial Determination of Residency Status

A student’s residency status is determined during the admissions process based upon the information provided on ISU’s admission application.

Changing Residency Status

If a student would like to request a change in residency status, the first step is to complete the Idaho Residency Determination Worksheet (IRDW). The IRDW can be downloaded from: https://boardofed.idaho.gov/public_col_univ/Residency/Residency%20Determination%20Worksheet%202006%202016.pdf

If the student is requesting that ISU certify the student’s Idaho residency for application to the University of Utah Medical School, the process is the same. However, please clearly note across the top of the IRDW, “For University of Utah Medical School.”

Please note that when completing the IRDW, the student’s signature must be notarized (this service is available in the Office of the Registrar, as well as ISU satellite locations and most local banks/credit unions). The IRDW and supporting documentation can then be personally delivered, mailed, or emailed to the Office of the Registrar:

921 S. 8th Ave
Mail Stop 8196
Pocatello, ID 83209-8196
Phone: (208) 282-2661
Email: Residency Officer (irdw@isu.edu)

Non-Resident Tuition Waivers

There are Non-Resident Tuition Waivers available to undergraduate students from the Scholarship Office. Waivers are awarded based on current GPA, state of residency, and/or program of study. Contact the Scholarship Office at (208) 282-3315 for additional information. For information regarding Non-Resident Tuition Waivers for graduate students, please contact the Graduate School at (208) 282-2150.

Additional Information

For additional residency information, please contact the Office of the Registrar at (208) 282-2661 or Residency Officer (irdw@isu.edu). Residency information may also be found on the Office of the Registrar website at http://isu.edu/registrar/residency/.
Graduate Catalog

Graduate Catalog 2017-2018

Idaho State University subscribes to the principles and laws of the State of Idaho and federal government, including applicable executive orders pertaining to civil rights, and all rights, privileges, and activities of the University are made available without regard to race, creed, color, sex, handicap, or national origin. The University is an Equal Opportunity and Affirmative Action employer. Evidence of practices which are not consistent with such policies should be reported to the Office of the President of the University.

Policy Statement Concerning Graduate Catalog Contents

Catalogs, bulletins, course or fee schedules shall not be considered as binding contracts between Idaho State University and students. The University reserves the right at any time, without advance notice, to: (a) withdraw or cancel classes, courses, and programs; (b) change fees schedule; (c) change the academic calendar; (d) change admissions and registration requirements; (e) change the regulations and requirements governing instruction in, and graduation from, the University and its various divisions; and (f) change any other regulations affecting students. Changes shall go into force whenever the proper authorities so determine, and shall apply not only to prospective students but also to those who are matriculated at the time in the University. When economic and other conditions permit, the University tries to provide advance notice of such changes.

Students enrolled in a program that is closed, relocated, or discontinued should be given notice of the closure as soon as is practical. Notwithstanding any other provision of State Board of Education policy, University policy, or University catalog statements to the contrary, arrangements should be made for enrolled students to complete affected programs in a timely manner and with minimum interruptions. When there is a similar program within the institutions governed by the Board, an affected student will be provided with information on transferring to that program, although admission to any such program is contingent upon the availability of a position and the student meeting all applicable admission requirements. If there is no similar program available within the institutions governed by the Board or the student is not able to gain admission to a similar program, the University will make reasonable efforts to place the student in a related or comparable program within the University. If none is available, the University will make reasonable efforts to assist the student in locating to another program at the University or elsewhere for which he or she is qualified.

Graduate School Vision Statement

The Graduate School aspires to be a leading driver of high quality graduate education, and is dedicated to the embodiment of academic and creative excellence, resulting in scholars, researchers and practitioners committed to and capable of continually broadening the scope of academic discourse, discovery and innovation.

Graduate School Informed Beliefs
1. Integrity
2. Inquiry and Innovation
3. Academic and Creative Excellence
4. Collaboration
5. Social Justice Awareness & Advocacy
6. Inclusiveness
7. Interdisciplinary Research
8. Lifelong Learning
9. Quality Customer Service

Graduate School Mission Statement

The Graduate School promotes and supports excellence in graduate education. In realizing this mission, the Graduate School acts to recruit, support, retain and matriculate scholars, researchers and practitioners educationally empowered as critical thinking citizens and agents of innovation, opportunity and change.

  Restricted Registration
  Continuing Registration for Graduate Students
  Registration without Permission
- Admission Requirements for Unclassified (Non-Degree seeking) Students (p. 43)
- Admission of Last-Semester Seniors (p. 43)
- Admission Requirements for Professional Development (p. 43)

Idaho State University invites applications for admission to Graduate School from students holding baccalaureate degrees from any regionally accredited colleges or universities in the United States, or with equivalent preparation acquired in another country. Prospective applicants may apply as degree-seeking or non-degree-seeking students. Non-degree-seeking students include those seeking certification, professional growth, or strengthened backgrounds for various professional and industrial occupations.

Admission Requirements for Doctoral Programs
Admission to doctoral programs varies depending upon the program of study. Potential applicants are encouraged to read the appropriate sections of the Graduate Catalog and/or check Department websites for individual program variations. Please see individual department sections for GPA & GRE requirements for doctoral programs.

Admission Requirements for Other Programs (e.g., Master’s degrees)
Degree-seeking students must meet the following requirements:

1. A baccalaureate degree or higher from a college or university regionally accredited in the United States or its equivalent from a school in another country. All Official transcripts must be sent either in printed form or electronically from the institution(s) directly to the Graduate School (students can not mail in their transcripts). Email address: graddean@isu.edu. Mailing address: Graduate School, Idaho State University, 921 S. 8th Ave, Mail Stop 8075, Pocatello, ID 83209-8075.

2. In instances where a standardized test is required, official GRE (Graduate Record Examination)/MAT (Miller Analogies Test)/GMAT (Graduate Management Admissions Test) score reports are required. Student copies are not acceptable. To register for the GRE, contact either the GRE-ETS, Box 6000, Princeton, New Jersey, 08541-6000, http://ets.org/gre or the ISU Counseling and Testing Center (208)282-2130. To register for the GMAT/MAT (for GMAT: http://www.mba.com/us or http://www.pearsonassessments.com/postsecondaryeducation/graduate_admissions/mat.html for the MAT), contact the Idaho State University Counseling and Testing Center. GRE/GMAT/MAT scores are used for other purposes in addition to admission. Most departments/colleges/divisions also use these scores as part of the criteria for awarding graduate assistantships, fellowships, or scholarships. Other parts of the campus may also use these scores in the process of awarding scholarships. Students at Idaho State University may take these tests at the Counseling and Testing Center. Special study sessions are available at the University in the Student Success Center (208) 282-3662 to aid the student in preparing for the GRE/GMAT. All scores should reflect testing within the last five years or be subject to review by the Dean of the Graduate School. With certain programs as exceptions (see below) applicants who already hold a master’s degree or higher from a regionally accredited university may not be required to submit GRE, MAT, or GMAT test scores.

<table>
<thead>

<td>No admission</td>
</tr>
</tbody>
</table>

* The method of calculating an Admission GPA is based on the last 60± semester undergraduate credits (90± quarter credits), using complete semesters (quarters). In the case of those students who have not completed the baccalaureate degree, the grade point average will be calculated on the last 60 credits at the time of application.

</tr>
</tbody>
</table>

* Please see individual department sections for GPA & GRE requirements for programs. Some Departments may have higher requirements than stated in this table.

3. Recommendation for admission by the department, division or college offering the desired degree program. Please see individual department sections of this catalog for additional requirements.

4. Approval for admission by the Dean of the Graduate School.
The Application Process

The admission process is initiated as follows:

1. Applications for admission are online (www.isu.edu/graduate) by clicking on the Apply Now button.

2. Applicants applying as degree-seeking students must request that each institution at which they have taken any post-secondary work submit one official transcript directly to the Graduate School. Students who have already earned a master's or doctoral degree from a regionally accredited institution or the equivalent higher degree acquired in another country, need only have the official advanced degree/s transcript submitted in lieu of a bachelor's degree transcript. However, some programs may require full academic record. Please check with individual departments and programs.

3. Official transcripts must be sent either in printed form or electronically from the institution(s) directly to the Graduate School (students can not mail in their transcripts)
   a. Email address: graddean@isu.edu
   b. Mailing address: Graduate School, Idaho State University, 921 S. 8th Ave, Mail Stop 8075, Pocatello, ID 83209-8075.
   c. Idaho State University undergraduate transcripts are available to the Graduate School and need not be forwarded by the applicant.

4. Applicants must include a $60 non-refundable processing fee with each application form. The files of students who do not pay the required application fee will not be processed for admission.

5. Some programs require additional information (e.g., letters of recommendation); please contact the specific department and review individual departmental sections of this catalog for additional requirements. These documents get sent directly to departments.

6. Applicants must clearly indicate the desired graduate program on the application form.

7. GRE/GMAT/MAT may be required for degree-seeking applicants at the discretion of the department. Only official score reports are accepted.

8. Additional requirements for degree-seeking last semester seniors are listed and international students are described under those headings on the following pages.

Application Deadlines

Please note that some programs have earlier deadlines than those listed; please contact the program director or department chair for specific details. Priority deadlines for application forms to be completed and returned to the Graduate School are: April 1st for summer semester enrollment; April 1st for fall semester enrollment; and November 1st for spring semester enrollment, or the following Monday should these dates fall on a weekend. The deadline for international students is June 1st for the fall semester enrollment and October 1 for spring semester enrollment. Programs that admit international students for the summer semester, will have a deadline of February 15.

Notification of Admission

Applicants will receive a notification letter from the Graduate School regarding their admission status. Admission to Graduate School allows a student to enroll in graduate courses in the specified department and college/division. It does not imply admission to courses in other departments. Only those admitted as degree-seeking students may assume that they are permitted to seek an advanced degree in the discipline/department that approved the admission. Non-degree-seeking students who are admitted are permitted to take graduate courses, but this admission does not imply they will later be approved for admission as a degree-seeking student.

Re-Enrollment or Re-Admission of Graduate Students

Graduate students who have been admitted to Graduate School may enroll for graduate or undergraduate classes by preregistration or registration for the term for which they were accepted. Graduate students who fail to enroll or defer their admission status through the Graduate School to a future term (within the two following academic semesters) must reapply for admission and pay the processing fee. The deferral request must be received by the Graduate School no later than October 14 for fall term or March 14 for spring term.

Graduate students who have enrolled for the term in which they have been admitted may take one year (2 semesters excluding summers) off before they would need to re-enroll or reapply to the Graduate School. However, some departments may have more restrictive requirements, and admission may be valid for only a particular semester or year. Students should contact departments to determine these more restrictive requirements.

Registration

All applicants who have received notice of admission into Graduate School may register during the appropriate registration periods prior to each semester. On-line registration is available to admitted students. To expedite completion of the registration procedure, all recipients of graduate teaching assistantships, graduate fellowships, and/or scholarships to be applied toward tuition and fees must preregister.

Restricted Registration

Any graduate student receiving a grade of C+ or below in two graduate courses on his or her program of study, or whose GPA falls below 3.0, will automatically be blocked from registering for additional courses. For the block to be removed, the student’s department or college/division must communicate to the Graduate School in writing its wish to allow the student to continue in the program. Please note that some programs vary in their restrictions with regard to this policy; contact the graduate program director or department chair for specific details.

Continuing Registration for Graduate Students

Graduate students who have registered for one or more credits of master's project, master's paper, master's thesis, or doctoral thesis or dissertation (usually, courses numbered 6650, 6651, 6699, 7730, or 8850) must be registered for at least one graduate credit during subsequent semesters, including each summer semester, until they have completed their degrees. Students who, for compelling reasons, wish to interrupt their work on projects, theses, or dissertations may request, in writing, a leave of absence from the Graduate School.

Graduate students who fail to meet the continuing registration requirement will be judged to have dropped out of their programs and will no longer enjoy access to university resources, including the library and computer facilities. In order to regain access to university resources, students will be required to reapply to the Graduate School and be readmitted. A corollary of this requirement is that a graduate student must be registered for at least one graduate credit in order to take a final oral examination or be processed for graduation. Any student who registers for the required credit and then subsequently drops the credit will be considered in violation of this policy.

Registration without Permission

Students who register for graduate courses in violation of any restriction printed in the Graduate Catalog or written on their Admission notification, or who register for graduate courses after receiving a letter of dismissal from the
Admission of Last-Semester Seniors

Seniors in residence at Idaho State University and Brigham Young University-Idaho may register for no more than 6 graduate credits during the semester or summer session in which they will complete the work for a bachelor’s degree at Idaho State University or Brigham Young University-Idaho. This option is reserved for outstanding seniors who are seriously considering attending Idaho State University for graduate education. This registration must be approved by the course instructor, by the student’s advisor, and the department chairperson. ONLY COURSES NUMBERED 5000-5599 MAY BE TAKEN WITH THIS OPTION.

If a senior admitted to graduate study under this provision fails to complete graduation requirements for a bachelor’s degree, all graduate credits earned revert to undergraduate credit. The student’s load, including both graduate and undergraduate credit, may not exceed 16 credits, or 9 credits in the case of summer school. A senior selecting this option must file an Application for Admission with the Graduate School when he/she requests permission to take graduate level courses. Application deadlines for admission of last-semester seniors are the same as those for degree-seeking graduate students.

PharmD students may apply and be admitted to the Graduate School after completing 120 credits if they meet all application requirements.

Admission Requirements for Professional Development

Students - K-12 Teachers (5597 Courses)

The Graduate School recognizes the need for K-12 teachers certified in Idaho to improve their professional capabilities. In most cases, the courses are workshops or short courses that can be taken in a compressed time period. These types of courses are “advanced” with respect to the students who enroll, but are not courses that a particular discipline offers to a student with the goal of earning an advanced degree. Therefore, professional development courses are offered by many departments to meet the perceived need of individuals, and are treated differently in the following respects:

1. Students may enroll in professional development courses offered under the 5597 number without the necessity of being admitted to Graduate School. However, they must hold a baccalaureate degree from an accredited institution at the time they enter the class or receive special permission from the Dean of the Graduate School if they are last-semester seniors at Idaho State University.

2. The credits earned will not count toward an advanced degree nor may they be petitioned to count at a later date.

3. There is no limit to the number of 5597 credits that a student may earn.

4. All instructors of 5597 courses must have an advanced graduate degree.

5. For each 5597 course in which students enroll, students must certify that they possess a baccalaureate degree and agree to the conditions by which they are permitted to register for the course.

6. Students who have been admitted into the Graduate School are permitted to take 5597 courses.

7. Departments shall determine if and when professional development courses are to be offered with their prefix.

Students (5598P Courses)

The Graduate School recognizes the need for individuals to improve their professional capabilities. In most cases, the courses can be taken in a compressed time period. These types of courses are “advanced” with respect to the students
who enroll, but are not usually courses that a particular discipline offers to a student with the goal of earning an advanced degree. Therefore, professional development courses are offered by many departments to meet the perceived need and are treated differently in the following respects:

1. Students may enroll in professional development courses offered under the 5598P number without the necessity of being admitted to Graduate School. However, they must hold a baccalaureate degree from an accredited institution at the time they enter the class or receive special permission from the Dean of the Graduate School if they are last-semester seniors at Idaho State University.

2. The credits earned will not count toward an advanced degree unless a petition is filed within three years of the last day of the course. The petition must have the following documentation: (1) A copy of the instructor's curriculum vita, (2) A copy of the course syllabus (including a list of achievement measures), (3) A copy of the class list (with grades). (The Office of Continuing Education, and/or the department or college offering the course will provide materials not otherwise available to the student).

3. While there is no limit to the number of 5598P credits that a student may earn, a maximum of three credits may be petitioned for use to satisfy elective credits in the student's program of study. 5598P courses may not be substituted for "required" courses.

4. All instructors of 5598P courses must have an advanced graduate degree.

5. For each 5598P course in which students enroll, students must certify that they possess a baccalaureate degree and agree to the conditions by which they are permitted to register for the course.

6. Students who have been admitted into the Graduate School are permitted to take 5598P courses. If they desire to use 5598P credits in their degree program, a petition must be filed for each course in accordance with the procedures described.

7. Departments shall determine if and when professional development courses are to be offered with their prefix.

### International Admissions

Applications for admission to Graduate School are processed in the Graduate School. Applications will not be processed until the processing fee has been received. The deadline for international students to apply is June 1st for fall semester enrollment and October 1st for spring semester enrollment. Programs that admit international students for the summer semester, will have a deadline of February 15. In addition to the admission requirements listed previously, international students must meet the following conditions:

1. International students must send official transcripts in English; or students may submit an official report from a credential evaluation service that includes a verified copy of transcripts. The credential evaluation service must be a member of NACES (www.naces.org [http://www.naces.org]).

2. As a step toward obtaining a U.S. visa, international students must submit a financial statement to the Graduate School verifying that they will be able to support themselves financially for a minimum of one year while attending Idaho State University. This document must consist of a statement or letter from a bank indicating that funds are available and accessible. The amount of money available to the student must be listed on the financial statement. A graduate assistantship or fellowship awarded by a department or college/division may be used as part of this amount.

3. International students who have not graduated from an accredited college or university in the United States and whose native language is not English, normally must achieve satisfactory scores on the Test of English as a Foreign Language (TOEFL) or on the International English Language Testing System (IELTS). Exceptions to this requirement are students from Australia, Canada, Ireland, the United Kingdom, and New Zealand. Satisfactory TOEFL requirements for Classified admission are: (1) Internet-based test (IBT): a total score of 80 with a score of at least 20 on each Section of the iBT (graduate assistants who teach courses must score 23 or above on the Speaking Section); or (2) Paper-based test: a total score of 550 with a score of at least 55 on Section I (Listening Comprehension) on the Paper-based test. Information about the TOEFL, including test dates and locations in international countries, can be obtained from Educational Testing Service (ETS) at [http://www.ets.org](http://www.ets.org). Satisfactory IELTS performance for Classified admission includes scoring 6.5 or higher on the total band score. Graduate assistants who teach courses must score 6.5 or above on the speaking test component. An international student may also meet the English language proficiency requirement by achieving a Level 112 from an ELS Language Center, or satisfactory completion of the Intensive English Institute courses at Idaho State University (see note below). PHOTOCOPIES OF TOEFL OR IELTS SCORES WILL NOT BE ACCEPTED. Note: Some departments have established different admission standards. Please see department sections of this catalog and the department's website for complete information.

4. International students may not enter the United States for graduate study without a U.S. Immigration (I-20) form. This form will be issued by the International Programs Office after the student is approved for admission by the Dean of the Graduate School. International students are urged to remain in their own countries until they receive notice of acceptance.

5. International students transferring from a school within the United States must be “IN STATUS” with Immigration and Naturalization Services to be issued an I-20 form from Idaho State University. A transfer form will be sent after the application has been received, to be completed as verification of acceptable immigration status.

6. International applicants who wish to be considered for summer admission must submit a complete application by February 14 (prior to the summer start term). International applications submitted after this date will be updated with a start term for the following Fall term. However, some programs only begin during the summer session. For these programs additional latitude may be considered.

If you have questions or need additional information, please contact the Graduate School at (208)282-2270, FAX number (208)282-4847.

### ISU’s Intensive English (IEI) Program:

Graduate students may be exempted from the English Proficiency Conditions stated above if they have successfully completed ISU’s Intensive English Institute’s program of study with a grade of B- or better in each of the Advanced English II courses, receive a recommendation from an IEI instructor, and fulfill all other requirements from the department in question. Graduate teaching assistants whose native language is not English may also be required to submit a filmed presentation and a writing sample to the desired department for approval.
General Information and Policies

Policy Statement Concerning Graduate Catalog Contents

Catalogs, bulletins, course or fee schedules shall not be considered as binding contracts between Idaho State University and students. The University reserves the right at any time, without advance notice, to: (a) withdraw or cancel classes, courses, and programs; (b) change fees schedule; (c) change the academic calendar; (d) change admissions and registration requirements; (e) change the regulations and requirements governing instruction in, and graduation from, the University and its various divisions; and (f) change any other regulations affecting students. Changes shall go into force whenever the proper authorities so determine, and shall apply not only to prospective students but also to those who are matriculated at the time in the University. When economic and other conditions permit, the University tries to provide advance notice of such changes.

Students enrolled in a program that is closed, relocated, or discontinued should be given notice of the closure as soon as is practical. Notwithstanding any other provision of State Board of Education policy, University policy, or University catalog statements to the contrary, arrangements should be made for enrolled students to complete affected programs in a timely manner and with minimum interruptions. When there is a similar program within the institutions governed by the Board, an affected student will be provided with information on transferring to that program, although admission to any such program is contingent upon the availability of a position and the student meeting all applicable admission requirements. If there is no similar program available within the institutions governed by the Board or the student is not able to gain admission to a similar program, the University will make reasonable efforts to place the student in a related or comparable program within the University. If none is available, the University will make reasonable efforts to assist the student in locating to another program at the University or elsewhere for which he or she is qualified.
## Dates, Deadlines, and Procedures

### Summary of Procedures for Graduate Degrees and Graduation

<table>
<thead>
<tr>
<th>Procedure</th>
<th>Under Direction of</th>

Dates are subject to change.
Classifications of Degree-Seeking Graduate Students

- Classified Status (p. 47)
- Classified (with Performance Requirements) [Classified (w/PR)] Status (p. 47)
- Change from Classified (w/PR) to Classified Status (p. 47)
- Unclassified (Non-degree Seeking Students) Status (p. 47)

Classified Status

Graduates of regionally accredited institutions who have earned grade point averages of 2.5 or higher for the last 60 credits taken at the undergraduate level, are eligible, upon submission of official GRE/GMAT/MAT scores as appropriate, to be admitted to Classified status in graduate master's programs. Doctoral students must meet individual department GPA and standardized test requirements. See department sections of this catalog for complete information.

The College of Business requires the GMAT. The Department of Counseling and the College of Education accept the MAT in lieu of the GRE. Please see the department sections for this information.

Classified (with Performance Requirements) [Classified (w/PR)] Status

Classified (with Performance Requirements) [i.e., Classified (w/PR)] status is a transitional status, and is not a valid status for a student to graduate.

In order to graduate, a student must have Classified status (see the following section "Change from Classified (w/PR) to Classified Status").

A department/college/division may, at its discretion, recommend admission for graduate students in a degree program with Classified (w/PR) status to ascertain their ability to do graduate work within a particular curriculum. Students admitted to Classified (w/PR) status are those who may not have satisfactorily met all admission requirements.

Classified (w/PR) status also may be recommended by a department for students whose credentials do not meet specific departmental requirements. NOTE: Students admitted to Classified (w/PR) status should ascertain their eligibility for federal financial aid. Such students are not eligible to receive Idaho State University graduate assistantships or Non-resident tuition waivers.

Change from Classified (w/PR) to Classified Status

The following criteria must be met by the student before Classified (w/PR) status can be changed to Classified:

1. The student must complete at least nine graduate credits and maintain a 3.0 GPA or higher;
2. If the GRE/GMAT/MAT was not taken by the student prior to admission to Classified (w/PR) status, the student must take the GRE/GMAT/MAT specified in the Admission notification.

Upon completion of the above two criteria, a request to change the student’s status to Classified may be submitted to the Dean of the Graduate School. The following steps must be followed to accomplish this change:

1. At any time after meeting the above criteria, a student may initiate an Approval for Change of Student Status in the Graduate School. The department/college/division may also initiate the change and should do so by written request when the student has met the required criteria.

2. The change from Classified (w/PR) to Classified status must be approved by the Dean of the Graduate School.

If a student admitted to Classified (w/PR) status fails to meet the conditions for admission stated on the Admission notification, the student’s admission may be revoked.

Unclassified (Non-degree Seeking Students) Status

Individuals holding a bachelor's degree who desire to take courses for graduate credit for personal or professional enrichment but who do not want to pursue a graduate degree are eligible to apply for admission to Unclassified (non-degree seeking) status. Students who are admitted to Unclassified status are allowed to register for a maximum of 9 graduate credits per semester. Since an Unclassified status student is not seeking a degree, course and/or program advising, except on an informal basis if requested, will not be provided.
Course Levels, Credits and Grading

  Full Time Graduate Status

- Grading (p. 49)

  Incomplete Grades

Course Levels

Courses numbered 66xx and 77xx are for students admitted into Graduate School only. Courses numbered 55xx also provide graduate credit (except 5597 and 5598P, see the sections entitled “Admission Requirements for Professional Development Students”). However, undergraduate students may be enrolled in these courses; the undergraduate counterpart will be designated as 44xx. Extra work is required of graduate students enrolled in 55xx courses (see next section). Applicability of 55xx courses to degree requirements is determined by the department offering the degree. Credit by examination (course challenge) is not permitted in graduate programs. Credit is not generally granted toward a graduate degree for 55xx courses when the corresponding 44xx course was taken at the undergraduate level.

The “Additional Work” Requirement to Receive Graduate Credit in Courses Offered as 55xx:

The Graduate School expects instructors to require specific work to be done in a graduate level course to justify graduate credit being given. For students to receive graduate credit in those courses designated at the 55xx level, specific and evaluated activities and performances must be identified in the course syllabus. Below is a suggested list of activities that an instructor might use to meet this requirement.

1. An additional scholarly activity such as:
   a. integrative term paper(s);
   b. substantive report(s) that may be one of the following: survey, analysis and report; laboratory investigation and report; library research and report;
   c. participation in a significant regional or national meeting (e.g., poster session, panel discussion, paper presentation).

2. Classroom activities that are beyond those required of undergraduates and are evaluated:
   a. special presentation of some subject;
   b. provision of leadership on discussion of some significant topic in the classroom;
   c. classroom activity that is evaluated and not required of undergraduates.

3. Examinations: Special examinations that are different from those given to undergraduates and are more demanding than those given to undergraduates. Such exams should be those that require greater performance at a higher cognitive level, such as interpretation, synthesis, and evaluation.

Credits

For a master’s degree, a minimum of 30 credits in approved course work, including thesis credits if required, must be completed. Except in the cases of the M.N.S., M.A.M.S.T., and M.P.A. degrees, a master’s degree student must complete at least fifteen 6600-level credits. Credit requirements for doctoral degrees vary by program.

A credit hour in graduate courses requires:

The credit, sometimes referred to as semester credit or semester hour, is a unit of academic work. One credit is defined to require fifty minutes in a class each week for one semester (or the equivalent).

One semester credit hour in academic courses requires (1) fifty minutes in class each week for one semester (which assumes approximately twice this amount of time in study and preparation outside the classroom), or (2) approximately two and one-half hours in laboratory each week for a semester, or (3) equivalent combinations of (1) and (2). For purposes of equivalency calculations, a semester is assumed to be sixteen weeks. Short term courses of one week (five days) or more require time in class, laboratory, and preparation equivalent to the above for a total of 45 clock hours per credit.

Semester Credit Limits

The maximum number of credits obtainable in a semester is 16, including courses taken at the undergraduate level. In a summer semester, a student may earn a number of credits equal to the number of weeks enrolled plus two, and the total number of summer semester credits may not exceed 12 (e.g., a student taking classes for eight weeks may earn up to 10 credits). Graduate Assistants may register for no more than 12 credits per semester.

Students who, because of exceptional circumstances, want to take more than the maximum number of credits, must request permission in writing from the Dean of the Graduate School. They must also have support in writing from their advisor, and the graduate program director or chairperson of their department.

Thesis or dissertation credits are not awarded to the student until after completion and final approval by the examining committee. At this time, the advisor reports a grade of S or U for all previous thesis/dissertation registrations. The student may register for thesis/dissertation credits any semester she/he is enrolled as a degree-seeking student, subject to the approval of the student’s advisor and department chair or program director, but the letters IP (in progress) are recorded on the transcript in place of a grade for all such registrants until final approval is obtained. Usually, thesis credits are limited to 6 that can count toward a degree on a Master's level program of study.

Time Limits

Master’s and Educational Specialist Degrees

All requirements for a master’s degree (except the MAcc degree) or educational specialist degree, must be completed within 8 years preceding the student’s graduation. An extension of time may be obtained for good cause with the approval of the Dean of the Graduate School.
The time limit for the MAcc degree is 5 years. Please refer to the College of Business section of this catalog.

Out-of-Date Credits

All credits applied to a master’s degree or to an educational specialist degree must have been taken within 8 years immediately prior to granting of the degree unless it can be shown that the course work taken more than 8 years earlier covers material that has not changed substantially during the intervening time, or that the student has been able to remain current in the topics covered in the course. Evidence that the older coursework is still appropriate must be supported and approved in writing by the student's advisor and department chair, and submitted with a petition to the Dean of the Graduate School.

Credit Time Limits for Doctoral Degrees

The doctorate is a research and/or performance degree and signifies that the holder has the competence to function independently at the highest level of endeavor in the chosen profession. Hence, the number of years involved in attaining or retaining competency cannot be readily specified. Rather, it is important that the doctoral student’s competency be assessed and verified in a reasonable period of time prior to conferral of the degree.

The comprehensive examination is the method of assessing whether the student has attained sufficient knowledge of the discipline and supporting fields in order to undertake independent research or practice. It is expected that the examination will occur after all coursework has been completed and language or other requirements satisfied, and that it consists of a series of examinations covering all areas specified in the program of study.

Because the comprehensive examination attests to the academic competence of the student who is about to become an independent researcher or practitioner, the examination should not precede the conferring of the degree by too long a period of time. Consequently, doctoral candidates are allowed 5 years in which to complete remaining degree requirements. In the event a student fails to complete the doctorate within 5 years after passing the comprehensive examination, an extension of time can be obtained by:

1. The student getting a specified set of requirements from the student’s committee that states in writing what must be done to make the candidate up-to-date in the discipline. These new requirements for obtaining an extension may include the necessity to repeat parts or all of the comprehensive examination;
2. The student must then submit a petition to the Dean of the Graduate School for the extension and provide the written documents showing the additional requirements established by the student’s committee justifying the requested extension.

Auditing Graduate Courses

The Graduate School does not endorse the auditing of courses at the graduate level due to the expectations of the rigor of graduate study. At the graduate level, students need to be substantially engaged with the material, so that they can master the intricacies and be able to evidence knowledge about the topic. The professor provides information, guidance, mentoring, and critique of the material so that the student is experienced with the totality of the material. Auditing a graduate course does not provide the opportunity for engagement of the material and the instructor's focus to the level necessary to facilitate the depth of learning required in graduate education.

Full Time Graduate Status

Nine Graduate Level Credits constitutes full time graduate status.

Continuing Registration for Graduate Students

Graduate students who have registered for one or more credits of master's project, master's paper, master's thesis, or doctoral thesis or dissertation (usually, courses numbered 6650, 6651, 6699, 7750, or 8850) must be registered for at least one graduate credit during subsequent semesters, including each summer semester, until they have completed their degrees. Students who, for compelling reasons, wish to interrupt their work on projects, theses, or dissertations may request, in writing, a leave of absence from the Graduate School. Academic clock does not stop during the violation of the continuous enrollment policy.

Graduate students who fail to meet the continuing registration requirement will be judged to have dropped out of their programs and will no longer enjoy access to university resources, including the library and computer facilities. In order to regain access to university resources, students will be required to reapply to the Graduate School and be readmitted. A corollary of this requirement is that a graduate student must be registered for at least one graduate credit in order to take a final oral examination or be processed for graduation. Any student who registers for the required credit and then subsequently drops the credit, will be considered in violation of this policy.

Grading

A 3.0 GPA for the courses listed on the program of study is required for any graduate degree or certification at Idaho State University. A grade of C+ or lower indicates questionable performance at the graduate level. However, some departments may accept a C+ grade in one or two courses as long as the minimum overall 3.0 GPA is maintained. C+ or lower grades may cause departments/colleges/divisions to dismiss students from a graduate degree program. A GPA lower than a 3.0 can also result in dismissal.

Idaho State University uses a graduated letter grading system to indicate the instructor's evaluation of a student's performance in a course. These letter grades are converted to a numerical value for computing a student’s semester and cumulative grade point averages. At the beginning of each course, an instructor should inform students of the criteria to be used in evaluating their performance through the class syllabus or other written means.

The grade of A is the highest possible grade; grades of D+ or lower will not be allowed for graduate work. Plus (+) or minus (-) symbols are used to indicate grades that fall above or below the letter grades. The grades of A+, F+, and F- are not used. For purposes of calculating grade points and averages, the plus (+) increases the grade’s point value by .3, and minus (-) decreases the grade’s point value by .3 (e.g., a grade of B+ is equivalent to 3.3, and A– is 3.7). A student's work is rated in accordance with the following scale:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Value</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.00</td>
<td>excellent performance</td>
</tr>
<tr>
<td>A-</td>
<td>3.70</td>
<td>excellent performance</td>
</tr>
<tr>
<td>B+</td>
<td>3.30</td>
<td>good performance</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
<td>good performance</td>
</tr>
<tr>
<td>B-</td>
<td>2.70</td>
<td>good performance</td>
</tr>
<tr>
<td>C+</td>
<td>2.30</td>
<td>inadequate performance</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
<td>inadequate performance</td>
</tr>
<tr>
<td>C-</td>
<td>1.70</td>
<td>inadequate performance</td>
</tr>
<tr>
<td>D+</td>
<td>1.30</td>
<td>unacceptable performance</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
<td>unacceptable performance</td>
</tr>
<tr>
<td>D-</td>
<td>0.70</td>
<td>unacceptable performance</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
<td>unacceptable performance</td>
</tr>
</tbody>
</table>

Courses in which A, A-, B+, B, or B- grades are earned are acceptable toward a graduate program and graduation requirements, unless specifically excluded for a particular requirement, course, program, or degree. Courses in which C+, C, or C- grades are earned might be used toward program and graduation requirements.
in some programs; two such grades will place the student on semester-by-
semester review. Grades of D+, D, D-, or F may not be used to satisfy graduation
requirements. No credits are awarded for any course in which an F grade is
earned.

All thesis and dissertation credits and some research courses are graded on a
satisfactory (S) or unsatisfactory (U) basis. Departments/colleges/divisions
may grade additional graduate courses with the S/U system with approval of
the Graduate Council. IP (in progress) grades are given for those students who
have initiated but not completed their thesis, dissertation, or research work. No
graduate courses will be offered on a Pass/No Pass (P/NP) basis.

For “IP” (in progress) courses, instructors are responsible for processing a
Change of Grade after the completion of all relevant course work. In the case of
thesis and dissertation work, there may be multiple IP credits to be changed once
the thesis/dissertation has been completed and fully approved.

As noted elsewhere in the Catalog, “I” (incomplete) grades must be completed
and the Change of Grade processed by the instructor within 1 calendar year of the
awarding of the “I” grade. Failure to change the “I” grade within this time period
will result in the “I” grade becoming permanent.

For letter graded courses, prefixes, titles, and level (e.g., 4400/5500) are
transcribed as originally registered once the semester is closed (i.e., the end of
the semester within which the course was first registered for by the student). As
an example: A graduate student mistakenly registers for course ABC4400 for
the Fall 2020 semester. During that semester a petition request to change the
ABC4400 registration to ABC5500 (i.e., drop ABC 4400 and add ABC5500)
may be submitted for consideration. However, once the Fall 2020 semester has
concluded, the ABC4400 course can not be changed.

With permission of the relevant department, students may repeat a course in
which they received a grade lower than an A. In such cases, the last grade
received shall be the grade used in the calculation of the program of study GPA.

Incomplete Grades

An Incomplete grade (I) may be awarded at midterm or semester end. At
midterm, an Incomplete indicates the student, through illness or other excusable
absence, has missed so much work the instructor cannot assign a regular grade.
An Incomplete grade at midterm is not a final grade. An Incomplete grade may,
by the option of the instructor, be given at the end of the semester only when a
student has satisfactory performance within three weeks of the end-of-semester
examination period.

The instructor must submit a Course Completion Contract along with the grade
report for that class. The Course Completion Contract must be signed by the
instructor and the instructor stipulating the assignment(s) required to finish the
course within the allowable time period. A copy of the Contract is to be given to
the student, a copy retained by the instructor, a copy sent to the Graduate School,
and the original sent to the Registrar’s Office.

Incomplete work must be completed within one (1) calendar year from the date
such grade is given, but an instructor could specify a shorter time period. A
change of grade must be submitted by the faculty member or the Incomplete will
become permanent.

To receive credit for a course in which an Incomplete grade has become
permanent, the entire course must be repeated.

Petitions to deviate from the incomplete grade policy will not be allowed except
under extraordinary circumstances (e.g., serious, long-term illness).

Academic Warning/Probation

Graduate students are placed on academic warning when their grades and/or
GPA are unsatisfactory. Graduate students are required to have a minimum
overall 3.0 GPA. Anything below a 3.0 GPA will place graduate students on
academic warning and can also result in dismissal. One or more Cs grades or
below can also place graduate students on academic warning and can also result
in dismissal. Students who are on Academic Warning or Probation are limited in
the number of credits they are allowed to take (13 for Graduate Students). These
credit limits are absolute and are not petitionable.

Academic Probation at ISU has three levels, each with a corresponding credit
cap: Academic Warning (13 credits maximum), Probation One (9 credits
maximum), and Probation Two (6 credits maximum). Students on Probation
Two can be dismissed from the university.
Transfer of Credits

Master's Degrees
All graduate credits must be earned as Idaho State University resident credits except for the following:

In all master's degree programs, a total of 9 semester credits may be transferred from a regionally accredited institution. Transfer of credits from a regionally accredited institution are acceptable only if the courses are specifically approved by the Graduate School and the academic department of Idaho State University when the final program of study is submitted. In these instances, only the credit hours transfer, not the grades.

Official transcripts to be used for transfer of credits in a degree program must be received by the Graduate School before application for a degree will be approved.

Intra-institutional Transfer
Transfer of Credits from Unclassified to Classified Status
Students may petition the Dean of the Graduate School to transfer course work taken while admitted to Unclassified status to a degree program. The total number shall not be more than 30% of the total credits of the program of study required of each student for the degree.

Transfer of Credits from One Program to Another
There are no limits to the number of Idaho State University credits that may be applied toward a master’s degree program or certificate program that were originally earned in a different degree program if:

1. The student was not awarded a degree in the original program, and
2. The department approves the transfer of such credits and the courses taken meet the requirements for the degree approved by the Graduate Council.

There are no limitations with respect to electives that exceed the requirement for the degree.

Departments and/or colleges/divisions may allow students to apply up to 9 semester credits earned at Idaho State University to two master’s degrees with Graduate School approval.

Doctoral Programs
Departments may accept credits by transfer in total or in part from a master's degree earned at Idaho State University or at another accredited institution regardless of age of the courses. See section on “Time Limits” for further discussion of this policy.

Deadline for Transfer Credit Request
Requests for transfer credits need to be submitted to the Graduate School within the 1st year of program enrollment and prior to submission of program of study.

Residency Credits
All credits that are to be applied to an advanced degree must be earned as resident credits or accepted for transfer as described in the Transfer of Credits section. Resident credits are those earned through the main Idaho State University campus, the Idaho State University-Idaho Falls campus, the Idaho State University-Meridian campus, and/or the Idaho State University-Twin Falls campus.

Courses approved by the Graduate Council and taught solely by approved faculty of Idaho State University at other sites in the state may be accepted as resident credit.
Advisors and Supervisory Committees

When a student is accepted into a graduate program, a temporary advisor is assigned by the department chair or graduate program director. Following departmental procedures and regulations, a permanent advisor who will be responsible for helping the student to identify a supervisory committee and develop a program of study is then selected. For professional programs, please see the program catalog description regarding the role of advisors and supervisory committees. The student should discuss the appointment of a supervisory committee early in the program.

All supervisory Committees shall consist of an odd number of members. These members must be members of the Graduate Faculty and approved by the Dean of the Graduate School. Appointments to supervisory Committees of non-faculty members or of faculty members not on the Graduate Faculty must be approved by the Dean of the Graduate School. A listing of Graduate Faculty is contained in this catalog.

A master’s degree supervisory committee must include at least three graduate faculty members who are approved by the department director of graduate programs and the dean of the Graduate School. At least one member must be from within and at least one must be from outside the department in which the student is enrolled; the outside member will also serve as the Graduate Faculty Representative (GFR, see below).

A doctoral degree supervisory committee must include at least five graduate faculty members who are approved by the department director of graduate studies and the dean of the Graduate School. Three members must be from within and at least one must be from outside the department in which the student is enrolled; one of the outside members will also serve as the Graduate Faculty Representative (GFR, see below).

The Graduate Faculty Representative (GFR) is typically appointed at the same time the other members of the committee are named, according to departmental procedures and policies, and must be approved by the Dean of the Graduate School. The GFR must be a current member of the Graduate Faculty and be selected from outside the department in which the student is studying. The GFR represents the Graduate School on the advisory committee and is responsible for reporting the results of graduate examinations to the Dean of the Graduate School. In addition, according to departmental policies and procedures, the GFR may also serve as a regular voting member of the supervisory committee.

Scheduling of the Exam:

1. The student and major advisor must work with the GFR and other committee members to schedule a convenient time for the examination. The major advisor must notify the Graduate School of the date, time, and place of the exam at least three days prior to the exam, so that the ballot packet can be prepared.

2. If the student or major advisor wishes to change the time of a previously scheduled exam, all members of the committee must be contacted and must agree to the change. The Graduate School must be notified in advance.

3. Any committee members that can not make a physical attendance may be present by way of distance communication software (e.g. Zoom, Skype, etc.)

Instructions for Graduate Faculty Representatives

The GFR represents the Graduate Faculty by ensuring that the exam is conducted fairly, professionally, and with the highest academic standards:

Conduct of the Exam:

1. On the day of the exam, or the afternoon before, the GFR (or designee) will receive the GFR packet from the Graduate School Office Coordinator (http://coursecat.isu.edu/graduate/generalinfoandpolicies/advisorsandexaminingcttes/emailto:schejess@isu.edu) in one of two ways:
   • as an online form or a PDF via email
   • you may also request to pick up the packet from the Graduate School in person

Because the packet contains an examination evaluation form, it should be returned by the GFR (or designee) in person or by email (http://coursecat.isu.edu/graduate/generalinfoandpolicies/advisorsandexaminingcttes/emailto:schejess@isu.edu) to the Graduate School promptly after the exam is completed.

2. Under no circumstances should the GFR permit the exam to be conducted if:
   a. the ballot packet is not available in the Graduate School, or
   b. any member of the committee is not present.

3. During the exam, the GFR may ask questions and participate in the examination of the student if he or she wishes.

4. The responsibilities of the GFR are to:
   a. ensure that the exam is conducted professionally and fairly;
   b. write an evaluation of the exam, noting any irregularities (e.g., inappropriate questions, insufficient time for adequate examination, etc.);
   c. distribute the ballots at the end of the exam (after the student has left the room) and make sure that each member votes and signs a ballot;
   d. announce the results to the committee and make sure that the student is informed of these results immediately afterward;
   e. return the ballot packet to the Graduate School as soon as possible.

The Graduate Council wishes to ensure that every exam is conducted fairly and with sufficient rigor to serve as a final examination for the awarding of an advanced degree. The Council appreciates the help and the cooperation of GFR in this effort.

Conflict of Interest of Graduate Faculty

Faculty are expected to conduct themselves professionally in their evaluation of graduate students, and are expected to exclude themselves from evaluation of graduate students with whom impartiality may be jeopardized by considerations that are not academic.

Procedure for Changing a Major Advisor

When a student seeks a change in his/her major advisor, the following procedure must be followed:

1. The student must submit to the academic unit head or graduate program director, as appropriate, a written request for change of major advisor. This request shall contain the rationale on which the request is based and may, if the student wishes, propose a specific replacement.

2. If the unit head/program director and the current advisor accept the rationale, and if an appropriate new advisor acceptable to the student is secured, the
unit head/program director will submit the proposed new appointment to the Dean of the Graduate School for approval.

3. Should the unit head/program director or the current major advisor not agree to the proposed change and the conditions thereof, and if no compromise acceptable to all parties can be reached, the matter shall be arbitrated by the unit graduate faculty (or its designated committee). Such arbitration may need to consider the question of ownership of data from research already undertaken by the student under the major advisor’s supervision, similarly whether another appropriately specialized major advisor is available for the student. The unit head/program director will notify the Dean of the Graduate School of the decision reached by the department graduate faculty or its designated committee.

4. Any appeal of the department’s decision by the student shall be directed to the Dean of the Graduate School.

**Changes to or Vacancy in Major Advisor or Committee Member**

1. Major Advisor terminating employment with Idaho State University
   a. Upon the announcement of a major advisor’s resignation from Idaho State University, the primary responsibility for determining the new advisor for the graduate student will lie with the student and the department administering the program. If possible and desirable to all parties, the original Major Advisor can be retained temporarily on the department graduate faculty in order to remain on the committee and advise the student to degree completion. His/her role on the committee will also be negotiated by the student and the department. If it is not possible or desirable for the advisor to remain part of the committee, the department chair, the department graduate program director, and/or the department faculty will consult with the student and identify a new advisor. The Graduate School will be apprised of the process and the decision, and will ensure the process is fair for the student while maintaining rigorous standards in the program.

b. If the department’s resolution is unsatisfactory to the student, the student may appeal to the Graduate School. The Dean of Graduate Studies, in consultation with the department, the Graduate Council, and the Graduate Faculty Representative (if one has been assigned), as necessary, will determine the student’s advising status.

c. Among the advising options available to the student are the following:
   i If the student is well advanced and nearing completion of his/her project, s/he may remain at ISU and complete his/her degree, without a new Program of Study.
   ii If possible and desirable, the advisor may be retained on the department’s graduate faculty for the time required for the student to complete the degree, not to exceed three years.
   iii The student may request to be re-assigned to a new major advisor from within the Program. A student currently paid from a major advisor’s extra or intramural funds will be awarded a stipend subject to available program resources, in consultation with the Dean of the Graduate School and the relevant Graduate Program Director and Department Chair.
   iv In the case of doctoral students, if programmatically available, the student may instead complete a thesis and examination for a Master’s Degree before exiting the Program. Decisions as to the desirability of these options will be made based on the progression of the student in his/her research project and how much time remains before completion of the work.
   v The student may leave ISU with the departing major advisor.

2. In the event of the death or incapacitation of the major advisor, resulting in an inability to fulfill the required advisory duties to the graduate student, the same procedure will apply (except, of course, 1.c.ii).

3. A student-initiated change of major advisor must be submitted to relevant Graduate Program Director and Department Chair as per the current Policy “Procedure for Changing a Major Advisor” (2012-2013 Graduate Catalog, p. 13).

4. In the event a student is unable to form a committee or install a chair/major advisor for their thesis/dissertation, the student is thus unable to move forward with their degree requirement. The student may have two options to consider:
   a. Withdraw from the academic program if they are not able to move forward with the thesis/dissertation requirement.
   b. Apply to change academic programs, thus encountering a new set of requirements.
Program of Study, Candidacy, Application for a Degree

Program of Study

A Program of Study must be submitted to and approved by the Graduate School the semester prior to the semester in which a student intends to graduate. The submission date is defined as: the date the program of study is submitted to the Graduate School with all student, department, and college signatures. See "Dates, Deadlines, and Procedures (http://coursecat.isu.edu/graduate/generalinfoandpolicies/proceduresummary)" for specific dates. The Program of Study will list all requirements that must be completed in order to receive the degree or certificate; this includes committee members.

If the requirements for the degree or certificate being sought change during a student’s program, the student is entitled to follow those requirements in effect at the time of admission, or the student may elect to follow newer requirements.

Candidacy for Doctoral Degrees

Admission to candidacy for doctoral degrees occurs after the student has passed a preliminary/qualifying examination that is usually administered early in the program; or when substantially all course work has been completed and the comprehensive examination has been passed.

Students seeking doctoral degrees must submit a Program of Study to the Graduate School upon completion of examinations, along with a letter verifying advancement to candidacy, noting the candidate’s successful examination completion. See "Dates, Deadlines, and Procedures (http://coursecat.isu.edu/graduate/generalinfoandpolicies/proceduresummary)" for specific dates. The Program of Study lists all requirements that must be completed in order to receive the doctoral degree.

Application for a Degree

An application for graduation must be filed with the Graduate School. See "Dates, Deadlines, and Procedures (http://coursecat.isu.edu/graduate/generalinfoandpolicies/proceduresummary)" for specific dates.

The application and a diploma processing fee of $20 must be paid at this time. If the student does not complete requirements during this semester, an updated application must be submitted for the subsequent semester and a $20 reprocessing fee paid to the Graduate School.

Degree applicants must submit all official transcripts before applying for a degree. Official transcripts to be used for transfer of credits into a degree program must be received before the application for a degree will be processed.

Applications for degrees will not be processed without the prior approval of a Program of Study.
Examinations

All graduate students with a thesis/dissertation/DA scholarly activity are required to complete a final examination. Final examinations are scheduled by departments after receiving approval of the student's program of study and reported to the Graduate School.

All examinations must be completed at least three (3) weeks before the end of the semester in which the student plans to graduate. All graduate requirements must be completed prior to or at the end of the semester during which final examinations are held (See Dates, Deadlines, and Procedures (http://coursecat.isu.edu/graduate/generalinfoandpolicies/proceduresummary)).

Students writing theses/dissertations/DA scholarly activities are given final oral examinations (typically a thesis/dissertation/DA defense). Others are usually given both written and oral examinations.

Oral examinations are open to all members of the Graduate Faculty as observers. Oral examinations are open to non-Graduate Faculty with permission of the advisor and the Dean of the Graduate School. When students are required to make presentations as part of the examination process, these presentations will be advertised and open to the public.

Following the oral exam, the committee meets in closed session to determine the outcome of the examination. The student passes the exam if a majority of the committee so votes. Otherwise, the student fails the exam. In the case of a tie vote with an even number committee, the student defaults to failing the exam. For students failing the oral exam, the Graduate School allows one re-examination. This re-examination is to take place during the subsequent three (3) semesters unless otherwise approved by the Graduate School. If the academic unit involved has a formal re-examination policy that is more stringent, that policy supersedes the Graduate School re-examination policy.

If the candidate's program requires a thesis/dissertation/DA scholarly activity, copies in substantially final form shall be in the hands of the advisory committee at least two (2) weeks before the date scheduled for the oral examination (see Dates, Deadlines, and Procedures (http://coursecat.isu.edu/graduate/generalinfoandpolicies/proceduresummary) section of catalog). Oral examinations are to be held at least three (3) weeks prior to the date of graduation (see Dates, Deadlines, and Procedures section of catalog (http://coursecat.isu.edu/graduate/generalinfoandpolicies/proceduresummary)). If any committee member questions the adequacy of the substance or form of the thesis/dissertation/DA scholarly activity, the committee as a whole decides if the document and the student are sufficiently prepared for an oral examination.

The major advisor is responsible for reporting grades (using a Change of Grade) for all prior thesis/dissertation/DA scholarly activity registrations of the candidate when the document has been approved by the advisory committee.

After the successful defense of a thesis/dissertation/DA scholarly activity, the student must submit all appropriate documents to the Graduate School within two (2) weeks (see Dates, Deadlines, and Procedures (http://coursecat.isu.edu/graduate/generalinfoandpolicies/proceduresummary) section of catalog). Failure to do so may delay graduation. If the required documents are not submitted within one year, the Dean of the Graduate School may declare the defense void and require that it be repeated.

A manual with detailed instruction for thesis/dissertation/DA scholarly activity preparation and clearance (Instructions for Preparing Theses, Dissertation, DA Papers, and Professional Projects) is available on the Graduate School website (http://www.isu.edu/graduate) or from the Graduate School.

Graduate students in programs that are primarily course-based, professional training programs are not required to have a final exam, based on the guidelines for those programs as specified in the Graduate Catalog. If the candidate's program requires a final exam but does not result in a thesis/dissertation/DA scholarly activity, the department or college/division is responsible for having a written examination on the degree program prepared and administered. If the student's performance is judged to be satisfactory or if it is determined that deficiencies may be cleared up during the oral examination, the advisory committee conducts the oral examination on the scheduled date. Otherwise, the student may be expected to complete subsequent requirements before the oral examination is held. All oral examinations must be completed at least three (3) weeks prior to the date of graduation (see Dates, Deadlines, and Procedures (http://coursecat.isu.edu/graduate/generalinfoandpolicies/proceduresummary) section of catalog).
Petitions

A student may petition the Dean of the Graduate School for exceptions to the rules and procedures stated in the Graduate Catalog or for consideration of problems not covered by the stated procedures. Petition forms for graduate students are available only from the Graduate School; undergraduate petition forms will not be accepted.

A student may use the petition form to request:

1. withdrawal from courses after the deadline for withdrawal as stated in the University Calendar;
2. use of credits more than eight (8) years old to count towards a master’s degree;
3. transfer of credits from unclassified to classified status;
4. transfer of more than nine credits from another institution to a master’s degree program at Idaho State University;
5. an extension of the maximum time (eight years) allowed for completion of a master’s degree or educational specialist degree;
6. an extension of the maximum time (five years) allowed for completion of a doctoral degree after comprehensive examinations have been passed;
7. correction of errors or inaccuracies on the student’s official transcript; or
8. any other deviation from Graduate School policy listed in this catalog.

Petition forms may not be used for:

1. appeals of a grade or of dismissal from a program. See the section on “Appeals and Dismissals” in this Catalog;
2. substitutions of courses within degree requirements or waivers of degree requirements. (Exceptions to degree requirements are requested as a part of the approval process for the Program of Study.)

Drop or Withdrawal

Students may voluntarily drop graduate courses until the official drop date listed in the University Calendar. Dropped classes will not appear on a student's transcript. After the official drop date, students may withdraw from one or more courses prior to the withdrawal deadline with a "W" appearing on the transcript. To withdraw from a course or courses after the official withdrawal deadline, students must provide a written request using a Graduate School Petition. Students wishing to withdraw from graduate courses or a graduate program after the official withdrawal date must obtain approval from their professors, program/department chair, and the Dean of the Graduate School. Voluntary withdrawal from a graduate program during an appeal of dismissal automatically terminates the appeals process.
Appeals and Dismissals

• Appeal of a Grade
• Dismissals (p. 58)

Appeal of a Grade

A grade appeal is not designed to evaluate general teaching effectiveness, but rather to determine whether a student was treated in an arbitrary and/or capricious manner by the instructor in regard to a final grade.

Graduate students who wish to appeal final grades must use the following procedural format. Appeal of a grade must be made within one semester following the posting of the grade. Grades earned in the spring semester that are to be appealed need not be appealed during the summer, but the appeal process must be initiated in the following fall semester. Documentation of the appeal must be sent to the Graduate School to be placed in the student’s file. The Graduate School encourages resolution of appeals at the lowest possible level. Faculty members who are overruled in the appeal process are entitled to the same sequence of appeal as the graduate student.

Midterm grades are not official and may not be formally appealed. Students who wish redress for midterm grades should discuss the grade with the instructor of the course in order to determine a course of action leading up to the final grade.

When a grade appeal involves plagiarism, cheating, or other instances of academic dishonesty, refer also to the “Academic Dishonesty” section of the Graduate Catalog.

Procedures for the Appeal of a Grade

After each step in the procedures for the appeal of a grade, all written appeal request and decision statements must be copied to all involved parties (e.g., the student, the instructor, the department chair, the Dean of the academic college/division).

Step 1: The Instructor of the Course

When a student receives a grade that is judged by that student to be unjustifiably low, normally the first step in the appeal process is to discuss the matter with the instructor of the course. This is an informal meeting to attempt to resolve the issue. If the instructor agrees with the student, the grade is changed using standard procedures. If the instructor supports the original decision, the student may file a formal appeal. The student must prepare a formal written statement in accordance with the format presented in the “Protocol for Appealing a Grade,” which is described in the next section. The original of this statement is given to the department chair, and a copy is given to the instructor. In response, the instructor must prepare a written statement explaining the reasons for the grade and submit that statement to the department chair with a copy to the student.

Step 2: The Department Chair

The chair of the department in which the appealed grade was received is charged with reviewing the student’s and the instructor’s written statements. The chair may also interview the student and the instructor, and may conduct whatever additional investigation deemed appropriate to help in the decision-making process. The chair must render a decision within 15 working days of receipt of the student’s appeal documents.

If the chair sustains the decision of the instructor, the appeal may be taken by the student to the Dean of the academic college/division. If the chair disagrees with the instructor’s decision, the chair must forward all appeal documents to the Dean of the academic college/division. Regardless of the decision, the chair must prepare and submit to the Dean of the academic college/division, a written statement that explains the reason for her/his decision with a copy to the instructor and the student.

Step 3: The Dean of the Academic College/Division

The Dean of the academic college/division is next in the formal appeal process. The Dean’s first charge is to appoint an impartial committee of graduate faculty members to review all documentation pertaining to the appeal. The Dean will provide copies of all documentation to the committee. In addition to reviewing these documents, the committee should interview both the student and the instructor and may conduct any other investigation deemed necessary. The committee, which is advisory to the Dean, must submit a written statement of its recommendation to the Dean.

The Dean should review all documents and recommendations and may interview the student, the instructor, department chair, and conduct any other investigation deemed necessary. The Dean’s decision is to be tendered in writing, and addressed to the student, sent by certified mail (return receipt requested) with copies to the instructor, department chair and chair of the impartial committee. The committee’s deliberation and the Dean’s decision must be completed within 30 working days of receipt of the student’s appeal in the Dean’s office. If the decision of the Dean is rejected by the student, the appeal may be taken by the student to the Graduate Council.

Step 4: The Graduate Council via the Dean of the Graduate School

At the request of the student, the Graduate Council will review all appeal documentation and respond with a decision within 30 working days of receipt of the student’s appeal. The Graduate Council may interview the student and instructor and carry out any other investigation deemed necessary. Once the decision is made, it is final and will be communicated by the Dean of the Graduate School.

Step 5: Change of Grade Within the Specific College/Division (instructor, department chair, dean)

At any stage where the appeal process is concluded, the last appeal level will process a change of grade, if appropriate, using standard procedures.

In instances where the appeal is resolved at the Graduate Council level, the Council’s decision is communicated in writing by the Dean of the Graduate School to the student, and copied to the Dean of the academic college/division, department chair, instructor, and chair of the impartial committee. The Dean of the academic college is responsible for processing the change of grade, if appropriate, using standard procedures upon receipt of Council’s appeal decision correspondence.

Protocol for Appealing a Grade

Protocol for appeal of a grade must include the student’s name, department/college, date of the appeal, course title and number, instructor’s name, and grade received in the course. Also included must be the student’s rationale for appeal of the grade. The student should state as succinctly as possible the reasons for making the appeal. The student must also state the remedy he/she is seeking.
Dismissals

Dismissal Policy

A graduate student may be dismissed from a graduate program by a department/college according to the following criteria:

1. If the student receives two or more grades of C+ or below, or
2. If the student fails to meet the continuation standards of the department (including conditions stated in the Admission letter), or
3. If it is the academic judgment of two-thirds of the graduate faculty in the department that the student is not making satisfactory progress in the program, and such judgment is recorded by formal vote.

In all cases the student must be notified in writing by certified mail, return receipt requested, that he/she is dismissed and must be told in the document that she/he has the right of appeal according to the Idaho State University Graduate Catalog. The student should be given a copy of the Graduate Catalog, appropriate catalog pages, or notified that the Catalog is available online or in the Graduate School.

All dismissal communications are to be copied to the department chair, Dean of the academic college, and Dean of the Graduate School.

Students receiving letters of dismissal will automatically be dropped from all graduate courses in the program from which they are being dismissed, regardless of whether they choose to appeal; fees will be refunded in accordance with university policy. A “W” grade will then be entered on the transcript for all graduate courses not completed. Students receiving dismissal letters after the 10th day of classes may petition the Dean of the Graduate School for permission to complete the graduate courses in which they are enrolled. Students who appeal the dismissal will be blocked from registration for additional graduate courses during the appeals process. See “Procedures for the Appeal of Dismissal from a Graduate Program” for specific procedures.

The initiation of the appeal of the dismissal must occur within 15 working days of the notification of the dismissal, unless the student is appealing dismissal due to receiving two or more grades of C+ or below. In that case, the student may wish to appeal one or more grades before beginning appeal of dismissal (see “Appeal of a Grade” section). If the grade is upheld, and the student now wishes to appeal the dismissal, the student must begin the appeal of dismissal within 15 working days of receipt of the notification of the decision of the grade appeal. If the grade is changed to a B- or above, and the student no longer has two or more grades of C+ or below, the dismissal will be cancelled by the department/college. However, if the dismissal is based on Items 2 or 3, previously listed, the dismissal proceedings may continue. The Graduate School encourages resolution of appeals at the lowest possible level.

When a dismissal involves plagiarism, cheating, or other academic dishonesty, refer also to the “Academic Dishonesty” section of the Graduate Catalog.

Procedures for the Appeal of Dismissal from a Graduate Program

At each level appeal decisions are to be communicated in writing and addressed to the student, sent by certified mail (return receipt requested), and copied to all appropriate level decision persons, and the Graduate School.

Step 1: The Departmental Level

1. The student must request reconsideration in writing using the “Protocol for Appealing Dismissal from a Graduate Program,” which is described in the next section.
2. A majority of the graduate faculty of the department must meet within 15 working days of the filed appeal and must decide by a 2/3 vote of those present to sustain the dismissal, or the dismissal is revoked. If necessary, the meeting of the graduate faculty may include those participating by telephone, email, or video conference. Should it prove impossible during the summer to convene a majority of the graduate faculty, the department chair/program director is required to assemble them in the first 15 working days they are on contract in the fall semester.
3. Either decision (revoke or sustain) is to be explained in writing to the student. Copies of this decision and explanation must be sent to the Dean of the academic college and the Dean of the Graduate School.
4. If the department upholds the dismissal, the student may appeal the decision to the Dean of the academic college. The student must appeal to the dean of the academic college within 15 working days of the receipt of the notification of the department’s decision.
5. If the dismissal is revoked, the department chair shall notify, in writing, the student, the Dean of the academic college and the Dean of the Graduate School, and the student shall be reinstated using standard procedures.

Step 2: The Dean of the Academic College

1. If the student appeals to the Dean of the academic college, then the Dean should review all documents and recommendations and may interview the student, the instructor, department chair, and conduct any other investigation deemed necessary. The Dean must consider the appeal within 30 working days of the student’s filed appeal and must decide to either revoke or sustain the dismissal.
2. Dean Overrules Dismissal. If the dismissal is revoked, the Dean must state in writing the reasons for the overrule and notify the student, the department chair, and the Dean of the Graduate School, and the student shall be reinstated using standard procedures. The graduate faculty of the department may appeal the Dean’s decision to the Graduate Council following the appeal steps listed in this policy.
3. Dean Sustains Dismissal. If the Dean sustains the decision to dismiss, she/he must notify in writing the student, the department chair, and the Dean of the Graduate School.

Step 3: The Graduate Council via the Dean of the Graduate School

1. The student may appeal to the Graduate Council if the Dean of the academic college sustains the dismissal. The student must appeal to the Graduate Council within 15 working days of receipt of the notification of the dean’s decision. This appeal must be in writing.
2. The Graduate Council must consider the appeal within 30 working days of receipt of the student’s appeal. This appeal should include copies of all appeal documents.
3. The Graduate Council may interview the student, graduate faculty, and Dean of the academic college, and conduct any other investigation deemed necessary. The student may have an advisor present during Council’s interview, but this person shall not act in a legal capacity (these are not legal proceedings) and may not address the Council.
4. The Council’s decision to revoke or sustain the dismissal is final.
5. In instances where the appeal is resolved at the Graduate Council level, the Council’s decision is communicated in writing, by the Dean of the Graduate School to the student, and copied to the Dean of the academic college and the department chair.
6. The Council’s decision, with all other documentation, will be kept in the student’s file in the Graduate School.
7. If the decision is to revoke the dismissal, the Dean of the Graduate School will reinstate the student in the program.
Protocol for Appealing Dismissal from a Graduate Program

Protocol for appeal of dismissal from a graduate program must include the student’s name, department/college, and date of the appeal. Also to be included is the rationale for appeal of the dismissal. The student should state as succinctly as possible the reason for making the appeal. The student must also state the remedy he/she is seeking.

Re-Applying After a Dismissal

A student may re-apply to a different program at Idaho State University after being dismissed from their current program.
Academic Dishonesty

Academic dishonesty includes, but is not limited to, cheating and plagiarism. Academic dishonesty at the graduate level is considered a serious offense and may result in dismissal from a graduate program.

When a faculty member suspects a graduate student of academic dishonesty, the instructor should present the evidence to the student and consider the student’s response. If the instructor concludes after consultation with the student that academic dishonesty occurred, the instructor writes a letter to the chair of the department in which the student is seeking a graduate degree, describing the incident. The instructor should include with the letter any evidence used to draw the conclusion that academic dishonesty has occurred (e.g., copies of the student’s written assignment, copies of documents thought to have been plagiarized, etc.), and should state clearly the penalty imposed within the course itself. The penalty should be in proportion to the severity of the offense. If the penalty is to be a failing grade, the instructor should first consult with the chair of the department, and the chair should meet jointly with the student and faculty member to review the incident. The student may appeal the penalty by following the procedures in the Graduate Catalog entitled “Appeal of a Grade.”

The department chair may, in accordance with the policy and procedures of the department, impose the penalty of dismissal from the program. A student may appeal the dismissal by following the procedures in the Graduate Catalog entitled “Appeal of Dismissal from a Graduate Program.”

The chair of the department should send a copy of the instructor’s letter reporting the offense, along with any evidence submitted to the chair, to the student, to the Dean of the academic college in which the student is seeking a graduate degree, and to the Dean of the Graduate School. A copy of the letter is to be placed in the student’s file in the department and in the Graduate School. If the student’s appeal is upheld, the letter and all other records of the accusation of academic dishonesty are to be deleted from the student’s files.
Participation in Classified or Proprietary Research

The Graduate School affirms the policy regarding the participation of graduate students in classified or proprietary research as it is stated in the Idaho State University Patent Policy. To fulfill the University's obligations as a publicly aided educational institution, University research should serve a public rather than a private purpose and the results should be disseminated on a non-discriminatory basis. The University encourages studies whose results can be freely published. However, the University recognizes that certain proprietary concerns of private research sponsors and the effective commercialization of research outcomes may require limited delays in publication. This policy shall apply to all persons employed by Idaho State University or a component thereof, and to anyone using facilities or funds as outlined in Section V of this policy. This policy, as amended from time to time, shall be deemed to constitute part of the conditions of employment of every employee and of every student. This statement shall be interpreted to mean that students must not be delayed in their program of study up to and including the awarding of the degree and that placement of the finished thesis or dissertation in the library for public access may not be delayed longer than six months.

Interdisciplinary Degrees

Idaho State University offers students the opportunity to pursue an interdisciplinary master's degree (M.A., M.S., M. Ed.). The degree sought will be Interdisciplinary Studies. Other fields in the title will be the fields of academic concentration.

The requirements include: completion of a minimum of 30 credit hours with a minimum of 10 credits from two participating departments. Students must be admitted into such a program by each department that participates. Students must contact each department contemplated to be involved prior to initiating the development of an interdisciplinary program.

Although students must take at least 10 credits in each of the departments participating, departments may, at their discretion, require additional credit hours of the students as a condition of the departmental participation and admission of the student in the program. An initial program of study must be submitted to the Graduate School during the first year of course work.

Requirements for interdisciplinary degrees are the same as for other degree programs. An interdisciplinary thesis may be written with a minimum of three credits and a maximum of five credits in each department. The final oral examination must include a representative from each department and a GFR from a department not involved in the interdisciplinary degree program.

Interdisciplinary Degree Admission Requirements

The student must apply to, and meet all criteria for, admission to the Graduate School. Certain departments may also have other admission requirements. Please check with specific departments for further details.

Environmental Science and Management Master's Degree Program

Students may pursue an M.S. in Environmental Science and Management (ESM) through the College of Engineering. See the description and requirements of this decree in the Department of Civil and Environmental Engineering.

Study Abroad

STUA 5500 Study Abroad 9-12 credits: Pre-arranged, planned courses of study at selected academic institutions outside of the United States. The student is responsible for resident credit arrangements with department(s) and the International Programs Office prior to departure. Prefix and course name will be replaced on ISU transcript when study abroad transcript arrives. Graded S/U. REPEATABLE WITH DEPARTMENT PERMISSION.

Memorandum of Understanding Agreements Between Brigham Young University - Idaho (BYU-I) and Idaho State University (ISU)

There are two possible arrangements for a five-year bachelor-master degree; those arrangements are 3+2 and 4+1 programs. In the 3+2 arrangement, the student is enrolled at BYU-I for the first three years and ISU for the final two years resulting in a Bachelor's degree from BYU-I and a Master's degree from ISU. In the 4+1 arrangement the student is enrolled at BYU-I for four years with the option to take graduate classes from ISU during their senior year and then is admitted to graduate school at ISU in their fifth year resulting in a Bachelor's degree from BYU-I and a Master's degree from ISU. Please check the Graduate School's website and/or individual department websites for participating programs and more details.
Financial Support

The following financial information is a listing of the categories of financial help that may be available to graduate students. However, in many instances specific sources of assistance are available only at certain times of the year and require application with a deadline enforced. With respect to campus-based aid (special non-resident waivers, loans, and college work study), applications should be made the January preceding the fall/spring semester for which aid is desired. To obtain specific details about a particular type of financial assistance, contact the Office of Financial Aid (http://www.isu.edu/financial), Museum Building, Stop 8077, Idaho State University, Pocatello, ID 83209-8077, (208)282-2756.

- Satisfactory Academic Progress (p. 62)
- Assistantships and Fellowships (p. 62)
- Tuition and Fee Scholarships (p. 63)
- Graduate School Awards (p. 63)
- Non-Resident Tuition Waivers (NRTW) (p. 63)
- Loans and Grants (p. 63)
- Scholarships (p. 63)
- Employment (p. 64)
- Travel Funds (p. 64)
- Thesis and Dissertation Research Costs (p. 64)
- Western Regional Graduate Program (p. 64)

Satisfactory Academic Progress

To retain financial support as a graduate student, almost all sources of funds require that the student maintain satisfactory academic progress.

For graduate assistantships and fellowships, students ordinarily must earn nine graduate credit hours or more each semester and maintain a 3.0 grade point average. Some departments may require additional evidence of satisfactory progress for a student to remain eligible to receive assistantship or fellowship support. Students who receive financial aid through the Office of Financial Aid must meet the criteria established by that office for satisfactory progress to remain eligible for further aid.

Assistantships and Fellowships

Assistantships and fellowships are awarded at the departmental or college level. Requests for consideration of these awards should be directed to the graduate program director, department chair, or academic dean of a specific academic unit. Most assistantships and fellowships are awarded on an academic year basis. These awards are generally made in the spring for the following academic year. To ensure consideration, a request for such financial support should be made to the academic unit by February or March. Contact individual departments or colleges for specific application deadlines.

Only students admitted as Classified (degree-seeking) students are eligible to apply for graduate assistantships or fellowships. Classified (w/ PR) and Unclassified students are not eligible to receive assistantships. Because full-time graduate assistants are expected to work up to 20 hours per week, the maximum number of graduate credits an assistant may earn in a given semester is 12. Normally, a full-time graduate assistant is expected to carry a minimum of nine graduate credits, which is a full load. DA fellows are expected to carry a minimum of nine graduate credits per semester. Permission to carry fewer than nine or more than 12 credits may be granted by the Dean of the Graduate School upon written recommendation of the student's advisor or program director. However, since the Idaho State Board of Education requires that graduate assistants be full-time fee-paying students, graduate assistants who are approved to take fewer than full-time graduate credits will still be charged full-time tuition/fees.

Doctoral graduate assistants ordinarily receive higher stipends than those at the master's level. Full-time graduate assistants and fellows may also be awarded scholarships to cover in-state student fees, student health insurance, and nonresident tuition in addition to the stipend.

A student with a graduate assistantship or fellowship may be employed in addition to the awarded stipend. This employment may only occur with permission of the Dean of the Graduate School and usually must be limited to 10 hours per week. Requests for permission for such employment must be sent in writing by the department chair or graduate program director to the Dean of the Graduate School.

Graduate Assistantships (GA)

There are about 200 GAs available across the University; most of these require serving as an instructor for a department. Most assistantships are awarded in the spring semester for the next academic year. Full-time GAs are expected to work up to 20 hours/week for their stipend. Contact the department chair or graduate program director for GA application information.

Graduate assistants who are international students, whose native language is not English, and who have been assigned to teach, must complete an English speaking proficiency examination, usually the Spoken English Assessment Kit (SPEAK), administered at the ISU Student Success Center. In order for an international student to be awarded a GA and teach a course, the student must score 23 or above on the Speaking Section of the TOEFL iBT.

Normally, graduate assistants are involved in classroom instruction, supervision of laboratory sections, grading papers and/or examinations, assisting faculty members in research activities, or other equivalent duties.

Research Assistantships (RA)

Research Assistantships are available across the University through grants from other external sources. Conditions of employment and amounts of compensation vary. Questions about such sources of support should be directed to the academic departments or colleges.

Fellowships

Doctor of Art Fellowships are awarded each year to students admitted to and enrolled in Doctor of Arts programs. These fellowships are available in the Departments of Biological Sciences, Mathematics, and Political Science. Most of these fellowships are awarded in the spring semester for the next academic year. Contact the departments for details and applications. Please be aware that the entire DA fellowship award (tuition/fee scholarship and the monthly stipend) is disbursed as scholarships so will impact a student's federal financial aid eligibility.

Contact, Location, and Phone Number:

- Biological Sciences, Life Sciences Bldg., 282-3765
- Mathematics, Physical Sciences Bldg., 282-3350
- Political Science, Graveley Hall, 282-2211
Tuition and Fee Scholarships
Departments may offer tuition and fee scholarships as separate awards to graduate assistants, research assistants, and DA fellows. However, these offers are at the discretion of the departments. Non-resident tuition waivers accompany all graduate assistantships and DA fellowships but are offered as separate scholarships.

Graduate School Awards

Graduate Assistantship Teaching Experience (GATE)
The former “At-Large” Graduate Assistantships are renamed Graduate Assistant Teaching Experience (GATE) Assistantships. GATE assistantships are awarded annually by the Graduate School to departments. Department applications are due December 15, with awards being made in early March annually. GATE Assistantships are one year, Master’s level awards. GATE assistants are required to participate in the GATE Curriculum and the GATE opportunity, and allocate and fulfill their assistantship hour requirements as follows:

- Up to 15 hours/week = Department discretion in support of “teaching”
- Up to 5 hours/week = dedicated to the GATE experience.

The GATE Curriculum requires GATE awardees to: (a) enroll in the GATE Seminar during their first (the Fall) semester of graduate study. The GATE Seminar (GRAD 6600) is a 1 credit graduate seminar, designed and delivered by the Graduate School, focused on enhancing, supporting, and facilitating graduate student exploration of, and success in college-level teaching; and (b) enroll/participate in 1 “elective” graduate-level academic credit (or equivalent) focused on teaching.

GRAD 6600 GATE Seminar 1 credit. A graduate seminar designed and delivered by the Graduate School, focused on enhancing, supporting, and facilitating graduate student exploration of, and success in college-level teaching. Required of GATE TA/GA recipients, but open to all ISU graduate students. Graded S/U. May be repeated.

Non-Resident Tuition Waivers (NRTW)
There are several categories of non-resident tuition waivers. In each case a different contact person or procedure must be followed in applying. It is important to note that these waivers do not cover the required in-state enrollment fees, but only the non-resident tuition. Unless other scholarships are awarded, the student must pay the in-state enrollment fees each semester, including summer.

A limited number of these awards are distributed on a competitive basis. To be eligible for consideration for an NRTW, a graduate student must have Classified admitted status and have submitted GRE/GMAT/MAT scores to the Graduate School. Students should apply using the form supplied by the Graduate School, focused on enhancing, supporting, and facilitating graduate student exploration of, and success in college-level teaching. Required of GATE TA/GA recipients, but open to all ISU graduate students. Graded S/U. May be repeated.

Minimum Criteria:
- Must be full-time (at least 9 graduate credits each semester)
- Must be a degree-seeking undergraduate student
- Must have a minimum GPA of 3.00 at the time of award and for award renewal
- Awards are renewable for up to eight semesters based on meeting the minimum criteria
- Preference given to academically superior students in under-subscribed majors

Loans and Grants
Loans may be available to graduate students. To inquire about application and eligibility requirements contact the Office of Financial Aid, Room 337, Museum Building, Stop 8077, Idaho State University, Pocatello, ID 83209-8077, (208) 282-2756.

Federal grant programs administered by the Office of Financial Aid are not available to graduate students. Pell Grants, Supplemental Educational Opportunity Grants, and State Student Incentive Grant Programs are only available to undergraduate students who have not earned a bachelor’s degree. Special non-resident waivers administered by the Office of Financial Aid are available to graduate students who are citizens or eligible non-citizens and meet other financial need criteria.

Research Grants
A small fund in the Office of Research has been created to provide money to graduate students on a competitive basis to conduct thesis or dissertation research. Research proposals with budgets must be submitted to the Office of Research by deadlines established and posted on the Office of Research website (http://www.isu.edu/research). Guidelines for research grant proposal preparation are available from the Office of Research. The Call for Proposals is typically sent out the first Monday in February for the following fall semester, and the last Monday in September for spring semester awards.

Scholarships
Scholarships are available to graduate students in some instances. Announcements of scholarships currently available are posted on the scholarship bulletin board located outside the Office of Financial Aid (Museum Building, Room 327). Please note that some scholarship categories are discontinued at times and new ones are created. Therefore, a regular check at the Office of Financial Aid may be useful to interested students. In addition, there may be off-campus scholarship sources such as parents’ or spouses’ employers, fraternal organizations, churches or businesses, or national foundations. These sources may be discovered by a systematic and careful search by the student. Departments/colleges may also have specific scholarships.

A small number of ASISU scholarships, which are derived from student fee payments, are available to graduate students. These are awarded on a competitive basis. Application materials can be obtained from the offices of Deans of academic colleges, the Office of Research and the Graduate School near the middle of each semester. The Graduate Student Scholarship Committee recommends awardees to the Scholarship Office and the ASISU Senate. Graduate student applications for consideration of ASISU scholarships must be returned to the Graduate School to be considered for a graduate student ASISU Scholarship.
Employment Information
A student with a graduate assistantship or fellowship may be employed for compensation in addition to the awarded stipend. This employment may only occur with permission of the Dean of the Graduate School and usually must be limited to 10 hours per week. Requests for permission for such employment must be sent in writing by the department chair or graduate program director to the Dean of the Graduate School.

Student Employment is now found at the Career Center (http://www.isu.edu/career/). Please contact (208) 282-2778.

Travel Funds
Graduate students may request aid for travel expenses to present papers on thesis or dissertation research at regional or national meetings. Such requests should be presented only after a paper has been accepted by the official sponsoring organization of the discipline. Funds for such purposes are very limited, and only modest requests are likely to be funded. Funds for such purposes should be requested sequentially from the following contact points:

- Academic Department
- Academic College
- Office of Research
- Graduate School

When submitting written requests to the Office of Research for travel funds, a breakdown of expenses for registration, lodging, travel, and per diem is necessary. See the Office of Research website (http://www.isu.edu/research) for details.

Thesis and Dissertation Research Costs
Some academic departments meet at least some of the costs of thesis and dissertation research. In some instances, such costs may be met by extramural funds obtained by faculty and/or departments. With the exception of the small research grant program listed previously, the Office of Research does not provide funds for such purposes and will refer students to the department chair or dean of the college when such requests occur. Publication costs of theses and dissertations are met by the student unless a faculty member or department chooses to pay such costs with funds available to them.

Western Regional Graduate Program (WRGP)
The Western Regional Graduate Program (WRGP) makes high-quality, distinctive graduate programs and healthcare-related programs available to students of the West at the resident tuition rate. As part of the Student Exchange Program of the Western Interstate Commission for Higher Education, WRGP helps place students in a wide range of graduate programs, all designed around the educational, social, and economic needs of the West.

Through WRGP, residents of Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming are eligible to enroll in available programs outside of their home state at resident tuition rates. Students need not demonstrate financial need.

To be included in WRGP, programs must meet the criteria of distinctiveness (if they are not related to healthcare) and quality. Programs are nominated by their institutions, peer reviewed by other graduate institutions in the West, and then researched and reviewed by WICHE staff for final approval. At this time, some 250 programs from more than 45 Western institutions participate. A full list of WRGP programs is on the WRGP website, http://wiche.edu/wrgp.

To be considered for the WRGP tuition rate, students simply apply directly to the department of the enrolling institution and identify themselves as WICHE WRGP applicants. Contact information for each participating program is listed in the WRGP online directory. WRGP students must fulfill all the usual requirements of the department and institution concerned, and meet all admission deadlines.

The following graduate programs at Idaho State University have been approved by WRGP for the 15-16 academic year:

- Audiology: Au.D.
- Biological Sciences: Ph.D., D.A. and M.S.
- Clinical Psychology, Ph.D.
- Deaf Education, M.S.
- English and the Teaching of English, M.A. and D.A.
- Experimental Psychology, Ph.D.
- Historical Resources Management, M.A.
- Mathematics, D.A.
- Medical Laboratory Science, M.S.
- Political Science, D.A.
- Public Health, M.P.H.
- Speech-Language Pathology, M.S.
- Waste Management and Environmental Science, M.S.

For more information please visit the WRGP website: http://www.wiche.edu.

Check the ISU WRGP section of the website at http://www.isu.edu/graduate/finsupp.shtml#western_regional for updated information.
Since 1993, students and faculty of Idaho State University have benefited from ISU’s membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 91 colleges and universities, and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education, the DOE facility operated by ORAU, undergraduates, graduates, postgraduates and faculty may access a multitude of opportunities for study and research. Students may participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the number of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs (http://www.orau.gov/orise/educ.htm), or by calling either of the contact persons below.

ORAU’s Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU’s members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scientist Program, consortium research funding initiatives, faculty research, and support programs, as well as services to chief research officers.

For more information about ORAU and its programs, visit the ORAU website at www.orau.gov (http://www.orau.gov).

Or contact:
Office for Research
(208) 282-2618.

Or contact:
Monnie E. Champion
ORAU Corporate Secretary

Graduate Expenses

- Enrollment Fees (p. 66)
- Idaho Residency (p. 66)
- Other Fees and Charges (p. 66)
- Refund Policy (p. 66)
- Federal Family Educational Rights and Privacy Act of 1974 (p. 68)

Fees are subject to change without advance notice by the Idaho State Board of Education prior to the first official day of class. (See “Policy Statement Concerning Graduate Catalog Contents (p. 36)” on the title page of this catalog.)

In general, the expenses for Idaho State University graduate students may be divided into classifications of fees, board, and room. In addition to the fees listed, some courses may require the expense of special uniforms, protective clothing, field trip expenses, lab fees, or instructional costs for remedial courses.

Enrollment Fees

Graduate students will be charged fees as full-time students whenever they enroll for 9 credits or more. For financial aid purposes, graduate assistants/fellows and students receiving other financial aid must enroll for 9 credits per semester to be considered full-time.

Certain programs require full-time summer study. Students in these programs are assessed full-time fees during the summer semester.

2016-2017 Fees and Tuition:

Please visit http://www.isu.edu/finserv/costinfo.shtml for updated information on fees and tuition.

Idaho Residency

Please visit http://coursecat.isu.edu/aboutisu/idahoresidencyrequirements/ for information on Idaho Residency Requirements for Fee Payment.

Other Fees and Charges

- Graduate Classified (degree seeking) Application/Processing Fee.....$60.00
- Unclassified (non-degree seeking) Application/Processing Fee ....$30.00
- Late fee (after semester has started) ....$50.00
- Reapplication fee .....$60.00
- Change of Status (unclassified to classified).....$60.00
- Graduate International Degree Seeking Application/Processing Fee ...... $60.00
- Graduate Conditional Admission IEI/ELS Application/Processing Fee ...... $55.00

For additional information, please visit http://www.isu.edu/finserv/costinfo.shtml.

Class Fees (in addition to regular registration fees)

Many university classes require additional fees for specialized instruction and/or supplies. See the Class Schedule (https://ssb.isu.edu/bprod/bwckschd.p Disp_dyn_sched) for class fees required for specific courses.

Late Registration Processing Fees

Second through 10th day of classes.....$50.00
After 10th day of classes.....$100.00

To help defray the extra cost involved with late registration, processing fees are charged in addition to any other regular fees. All students (full-time, part-time, faculty, staff, etc.) paying fees after the deadline for fee payment are charged a late processing fee. The cashier is not authorized to accept late registration fee payment without the appropriate late processing fee. This fee is non-refundable. No department or employee of the university, other than those specifically authorized, has the authority to waive the fee.

Faculty, Staff and Spouse Registration Fee.....$20.00 + $5.00 per credit hour

A copy of the current “Education Policy for Idaho State University Employees” is available in the Human Resources Office. Verification of employment and authorization forms for reduction in fees can be obtained from the Human Resources Office.

Senior Citizen Registration Fee.....$20.00+ $5.00 per credit hour

Age 60 years or older: proper identification indicating date of birth is required. Fee reduction is applicable to residents and non-residents of Idaho. It does not apply to special class fees. Fee is for courses on a space available basis only.

Transcript Fee

Please see information at: http://transcripts.isu.edu

Application for Graduation and Diploma Processing Fee .....$20.00

This fee is collected from each applicant for each graduate degree and for each certificate. This fee is paid to the Office of the Registrar.

Reprocessing Fee for Graduation .....$20.00

This fee is paid to the Graduate School.

Housing Costs

Please contact University Housing (http://www.isu.edu/housing) for more information, Stop 8083, Idaho State University, Pocatello, ID 83209, or (208)282 -2120.

Refund Policy

General Fee Refunds

The Refund Policy applies to all for-credit classes regardless of location of the class.

All fee refunds will be paid by University check.

When any student enrolled in for-credit classes withdraws from Idaho State University or makes schedule changes that reduce the fee obligation, refunds are made on the following basis:

General University Fees Paid Without Use of a Fee Reduction Program

Refunds are calculated and authorized by the Office of Financial Services. The drop/withdrawal date is the actual date the drop or withdrawal form is received by an authorized University office or automated system.

Refunds of registration charges for full-time fees, part-time credit hour fees, nonresident tuition, professional program fees, and departmental fees are
calculated on the total amount of fees paid, using the first official day of the University semester or session as the starting date.

Federal financial aid provisions may require funds to be returned to federal programs in excess of your ISU refund. In such situations, you will be billed for the excess remitted by the University in your behalf.

The official starting and ending dates of all classes are those designated by the University registrar.

**Percentage Refund of Computed Base**

**Fall and Spring Semester:**
- Classes cancelled by the University: **100%**
  - 16-week classes for the first (10) ten days of university classes and 8-week classes for the first (5) five days of University classes: **100%**
  - 16-week classes for the next (5) five days (third week) of University classes and 8-week classes for the next (5) days (second week) of University classes: **50%**
  - 16-week classes dropped after the third week of classes. 8-week classes dropped after the tenth day of classes: **No Refunds**

**Summer Session:**
- Classes cancelled by the University: **100%**
  - Full term session (May - Aug) for the first 10 days of University classes and 4, 6, 8 week sessions dropped in the first 5 days of University classes: **100%**
  - Workshop classes dropped before the 1st day of the workshop: **100%**
  - Full term session (May - Aug) for the next 5 days (3rd week) of University classes and 4, 6, 8 week classes dropped in the next 5 days (2nd week): **50%**

For classes, short courses, continuing education classes, and workshops with nonstandard starting and ending dates, refund requests are reviewed on an exception basis. The official starting and ending dates are those designated by the University registrar.

**Non-Refundable Fee Charges/Payments**

1. Reduced fee charges authorized by the State Board of Education. Examples include faculty/staff/spouse reduced fees, senior citizen reduced fees, education contract classes, etc.
2. Late processing charges.
3. Amounts paid to satisfy unpaid fees/charges from previous terms.
4. Amounts paid for student malpractice insurance.
5. Student Health Insurance premiums are not refunded under this policy.
   Please contact the Student Insurance Coordinator at (208) 282-2972.

**Refunds for Exceptional Circumstances**

In specific cases, as listed below, a full refund of the registration tuition and fees, credit hour fee, non-resident tuition and professional fees will be granted following official withdrawal from the University, provided the withdrawal process is completed during the first half of the semester or session (i.e., first eight weeks of a semester, first four weeks of a session). Proper documentation must be presented and approval granted by the offices of Student Affairs and Finance and Administration before the refund will be processed.

1. Induction of the student into the U.S. armed forces.
2. Incapacitating illness or injury that prevents the student from returning to school for the remainder of the term. A medical withdrawal must be processed through the University Student Health Center.
3. Death of a student.
4. Death of spouse, child, parent, or legal guardian of student.

**Deductions from Calculated/Authorized Refund**

The University reserves the right to deduct amounts owed the University from refunds. Refunds of fees for the term, less any outstanding fee loan balances for the term, are applied to the financial aid awarded to the student in the priority sequence shown below:

1. Amounts required by law to be returned to Federal Financial Aid programs
2. Third party agency payments of actual tuition and fees
3. University authorizations specifically for the payment of tuition and fees (i.e., graduate teaching assistant, athletics, etc.)
4. Federal aid programs (see Financial Aid Handbook for priority)
5. Miscellaneous outstanding balances due the University
6. University loan programs
7. University and donor scholarship programs

**Payment of Refund to Student**

A University check for the refund balance is mailed to the home address of the student, along with an itemized disclosure of any deductions. Refund checks are processed four weeks after the beginning of the term, or a minimum of three weeks after the date of payment if the student paid the charges.

**Registration Refund Appeals**

Contact the Vice President of Student Affairs or the University Controller for information about the University registration fee refund appeal process. Appeals should be submitted in writing before the end of the term for which the student is appealing.

**Room and Board Fees**

Students who fail to complete their agreement with University Housing will have their room and board fees pro-rated and, after appropriate penalties have been deducted, may receive a refund. See University Housing (http://www.isu.edu/housing) for details on residence hall and apartment living, and for details on any penalties for breaking agreements.

**Delinquent Accounts**

The cancellation of registration and withholding of academic credit of any student with a delinquent account or an unsatisfactory financial relationship with the Office of Finance and Administration is authorized without further notice, provided an attempt has been made to notify the student by the campus department in which the hold originated. This regulation may be invoked at the discretion of the Vice President, Finance and Administration, in cases of disregard in the settlement of returned checks, residence hall damage, library fines, telephone toll charges, overdue notes, traffic fines, room and/or board charges, apartment rental charges, etc.

**Dishonored Check Policy**

A charge is assessed each time a check is returned, the amount is charged to the student’s account, and the student is so notified. If the check is not cleared within ten (10) days, a second notice is sent and a “hold” placed on his/her records.
Any check tendered in payment of registration fees and subsequently returned by the bank will result in automatic postponement of the student’s registration.

In the case of a check tendered in payment for room and board and subsequently returned by the bank, the student is notified immediately and allowed not more than five (5) days for the check to clear. If not cleared within that time, the student’s meal ticket and/or room reservations is canceled.

**Federal Family Educational Rights and Privacy Act of 1974**

Idaho State University in compliance with the Family Educational Rights and Privacy Act (FERPA), is responsible for maintaining educational records and monitoring the release of information of those records. Staff and faculty with access to student educational records are legally responsible for protecting the privacy of the student by using information only for legitimate educational reasons to instruct, advise, or otherwise assist students.

Only those records defined as “directory information” may be released without the express written permission of the student. Directory information includes the student’s name, address listings, telephone listings, e-mail addresses, full-time/part-time status, class level, college, major field of study, degree types and dates, enrollment status, club and athletic participation records, and dates of attendance including whether or not currently enrolled. No other information contained in a student’s educational records may be released to any outside party without the written consent of the student.

A student may restrict release of all directory information by filing a Declaration of Non-disclosure of Educational Record Information form in the Office of Registration and Records. Students may choose to restrict release of their address and telephone listings only. This may be done through BENGALWEB (https://bengalweb.isu.edu). This restriction will apply to the students’ address and telephone listings only; all other directory listings will continue to be available for release.

Students must request complete directory information restriction or address/phone listing restrictions during the first week of the fall term to prevent their information from being published in the Student Directory. Any restriction is permanent and remains in place even after the student has stopped attending or has graduated from the University unless the student requests, in writing, that it be removed. Additional FERPA information may be found on the web at: http://isu.edu/registrar/student-resources/ferpa/
Arts and Letters

Kandi Turley-Ames, Ph.D., Dean

John Gribas, Ph.D., Associate Dean

Randy Earles, D.M.A, Associate Dean
Anthropology

Chair and Associate Professor: Reedy
Professors: Cartwright, Loether
Associate Professors: Dudgeon
Assistant Professor: Speer
Assistant Lecturers: Petersen, Thomas
Native Language Instructor: Gould

Mission
The mission of the Department of Anthropology is to research and teach about global human diversity and distinctiveness from the distant past to the present. Anthropology applies theoretical and practical tools to understanding the human past, human biology and evolution, language, contemporary society, and culture, and provides cross-cultural, environmental, and global perspectives on past and present human behavior. Our mission is to apply anthropological concepts to the resolution of important social, cultural, and environmental problems of our times. The Department of Anthropology offers graduate students the Master of Arts or Master of Science degrees with specialization in archaeological science, ecological anthropology, medical anthropology, applied anthropology, forensics, language preservation, and oral history.

Goals
Students who have completed a graduate degree in Anthropology at Idaho State University should be able to:

1. Read and understand anthropological theories and methods at a professional level.
2. Understand current debates within the field and critically evaluate the professional literature.
3. Use a comparative approach to theorize about the similarities and differences in the human condition across space and through time.
4. Design and carry out research and application of methods and theories at a professional level.

Measurable Outcomes
The Thesis or Special Project should show the following competencies based on the learning objectives:

1. Write a proposal using research methods and the application of theory to contemporary social issues.
2. Perform quantitative and/or qualitative analysis of data appropriate to the chosen subdiscipline.
3. Competently conceive, conduct, and write research and applications of anthropology at a level suitable for publication.

Admission Requirements
The student must apply to, and meet all criteria for admission to the Graduate School. In addition the student must provide:

1. A letter of application, including areas of interest and professional goals;
2. Three letters of recommendation;
3. Undergraduate transcripts and transcripts of any previous post-graduate coursework;
4. Minimum grade point average of 3.0;
5. Total GRE scores that average at least the 50th percentile for admission;
6. An undergraduate degree in anthropology is not required for acceptance into the program; however, students without upper division coursework in sociocultural anthropology, archaeology, and human origins equivalent to ANTH 5501, ANTH 5503, ANTH 5530, and an upper division linguistic anthropology course may be required to take these courses or approved readings courses before enrolling in content-respective graduate seminars.

Option 1: Master of Arts in Anthropology

General Requirements
A minimum of 30 credits must be taken, including 15 at the 6600-level or higher and the following required courses:

<table>
<thead>
<tr>

</tbody>
</table>

Additional 12 credits of graduate level courses approved by the student’s advisor are also required.

Total Hours: 30

Additional Requirements for the M.A. in Anthropology

1. Each student must develop a proposed program of study specifying the courses that will complement the program of study and be approved by the student’s graduate advisor.
2. Students completing the M.A. in Anthropology with an MPH degree may apply up to 9 credits to both degrees with advisors approval in both programs.
3. To maintain Classified status, students must register for a minimum of 6 credits in the Fall and Spring Semesters of the first year.
4. One must demonstrate proficiency in a second language, computer programming, geographic information systems (GIS), or statistics. This requirement will complement the student's program of study and will be evaluated by the student's primary advisor.

5. Student must write a Master's thesis or submit a manuscript. Either option requires a formal oral examination that the student must pass to graduate.

Courses

**ANTH 5501 History and Theory of Sociocultural Anthropology: 3 semester hours.**
Survey of the development of anthropology, various schools of thought, important personalities, and concepts that have contributed to anthropology over time.

**ANTH 5502 Ecological Anthropology: 3 semester hours.**

**ANTH 5503 Method and Theory in Archaeology: 3 semester hours.**
History of the development of current methods and theory in archaeology and contemporary applications.

**ANTH 5504 Material Culture Analysis: 3 semester hours.**
Methods and analyses used in archaeology and anthropology to understand the relationship between objects and culture. COREQ: ANTH 5505.

**ANTH 5505 Analytical Techniques Laboratory: 1 semester hour.**
Analytical techniques laboratory to accompany ANTH 5504. Students will complete an assigned project in material culture analysis. COREQ: ANTH 5504.

**ANTH 5506 American Indian Health Issues: 3 semester hours.**
An overview of health concerns, both current and past, of American Indian people, and the biological and sociocultural factors which influence health status.

**ANTH 5507 Anthropology of Global Health: 3 semester hours.**
How cultures define health and illness, and how these definitions ultimately influence the health status of individuals.

**ANTH 5508 Topics in Medical Anthropology: 3 semester hours.**
Rotating topics, including international health issues, ethno-psychiatry, ethnomedicine and non-western healing systems. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated for a maximum of 6 credits. PREREQ: ANTH 5507 or permission of instructor.

**ANTH 5509 Clinical Medical Anthropology: 3 semester hours.**
Explores the culture of biomedicine and the beliefs of patients. Topics include doctor/patient communication, cultural competency, cultural construction of risk, critiques of high-tech medicine and the international pharmaceutical industry.

**ANTH 5510 Introduction to Cultural Resources Management: 3 semester hours.**
Introduction to CRM reviewing historic preservation and federal legislation as they pertain to archaeology; practical experience in site survey and recording.

**ANTH 5511 Advanced Global Health: 3 semester hours.**
This class uses medical anthropology theories and approaches to explore and analyze current global health issues. Emphasis is on trans-disciplinary approaches to understanding and problem solving. The class content reflects current, ongoing global health crises. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**ANTH 5512 Human Osteology: 3 semester hours.**
Provides a comprehensive, working knowledge of the human skeletal system presented in a laboratory context, including identification of individual bones, osteogenesis, pathologies, demography and the applications of knowledge and techniques in real world settings. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: ANTH 2230 or permission of instructor.

**ANTH 5513 Old World Archaeology: 3 semester hours.**
Prehistory of the Old World. Precise areal focus and periods may vary. Includes both theory and exposition. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated for up to 6 credits. PREREQ: ANTH 2203 or permission of instructor.

**ANTH 5514 New World Archaeology: 3 semester hours.**
Examination of the prehistory of the Americas with emphasis on the North American continent. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated for up to 6 credits. PREREQ: ANTH 2203 or permission of instructor.

**ANTH 5520 Applied Anthropology: 3 semester hours.**
Introduction to the use of theories, methods, practices, and ethnographic findings of anthropology to solve human and environmental problems in academic, professional and global contexts. Special emphasis on future research and anthropological career trajectories. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**ANTH 5522 Globalization: 3 semester hours.**
An examination of issues surrounding the intersection of anthropology and globalization. Emphasis on the social scientific study of the intensity of flows of capital, labor, commodities, and ideologies across national borders. Cultural, political, and economic connections and transformations are interpreted through an ethnographic lens. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**ANTH 5525 Food and Culture: 3 semester hours.**
A global examination of the role of food in human culture. Among topics considered are the ways food shapes and reflects identity, how food habits develop and change through cultural interaction, ritual uses of food, diet and health, drawing on historical and modern case studies. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**ANTH 5526 Reading and Writing Ethnography: 3 semester hours.**
This course explores both contemporary and historical ethnographic writings that are foundational to the discipline. Students also engage in learning the art of ethnographic writing by producing short pieces of their own during the semester. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**ANTH 5530 Human Evolution: 3 semester hours.**
Examines relevant topical issues/problems in human evolution from a bioanthropological, ecological and demographic perspective, including paleoanthropology, evolutionary genetics, and the impact of health, nutrition, and disease in human populations. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated for up to 6 credits. PREREQ: ANTH 2230 or permission of instructor.

**ANTH 5531 Special Topics in Biological Anthropology: 3 semester hours.**
Rotating review of topics dealing with issues in biological anthropology. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.
ANTH 5534 Forensic Anthropology: 3 semester hours.
An introduction to forensic anthropology, an applied field within the larger discipline of biological anthropology, that analyzes human skeletal remains recovered from medico-legal contexts. The course will cover theoretical foundations and methodologies associated with forensic anthropology and will provide students with an informed appreciation for the field, as well as knowledge regarding the roles, responsibilities, and limitations of a forensic anthropologist. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

ANTH 5536 Human Variation: 3 semester hours.
An investigation of the biological basis of human diversity in contemporary populations. An evolutionary biocultural framework is used to understand how adaptation to various ecological stressors promotes human biological diversity. The course also addresses the nature of racial and racist studies in both historical and social contexts, and the question of race as a valid subject of scientific inquiry. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

ANTH 5538 Human Growth and Development: 3 semester hours.
This course covers the phenomenon of human growth, how growth and development can be measured, the molecular basis of growth, secular changes, genetic and environmental effects on growth, plasticity of the human phenotype, and applications to forensic age estimation in subadults. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

ANTH 5539 Principles of Taphonomy: 3 semester hours.
Effects of processes which modify organisms between death and the time the usually fossilized remains are studied. Emphasis on vertebrates. Equivalent to BIOL 5539 and GEOL 5539.

ANTH 5549 Qualitative Research Methods: 3 semester hours.
Study of qualitative research methods. Data gathering techniques and data analysis will be covered. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: ANTH 2250 or permission of instructor.

ANTH 5550 Sociolinguistics: 3 semester hours.
Study of the patterned covariation of language and society, social dialects and social styles in language; problems of bilingualism, multilingualism, creoles and language uses. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. Equivalent to ENGL 5588. PREREQ: ANTH 1107, ENGL 2281, or permission of instructor.

ANTH 5552 American Indian Verbal Arts: 3 semester hours.
Analysis of current theories in the study of oral literature and ethnopoetics, focusing on the oral traditions of American Indians.

ANTH 5554 Survey of American Indian Languages: 3 semester hours.
History of scholarship, analysis and classification of American Indian languages with emphasis on the languages of a particular phylum or geographical area.

ANTH 5555 Phonetics: 3 semester hours.
Introduction to descriptive linguistics focusing on phonetics and linguistic phenomena of English and the other languages of the world. Extensive practice in perception and production of such phenomena. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. Equivalent to LANG 5555. PREREQ: ANTH/LANG 1107.

ANTH 5556 Phonology and Morphology: 3 semester hours.
Phonological theory and analysis; current theories in morphology. Phonological rules, representations, underlying forms, derivation, justification of phonological analyses; morphological structure, derivational and inflectional morphology; relation of morphology to phonology. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. Equivalent to LANG 5556. PREREQ: ANTH/LANG 1107.

ANTH 5558 Historical Linguistics: 3 semester hours.
The methods and theories of the historical study of language. The comparative method, internal reconstruction, linguistic change over time, genetic typology of languages, and application of prehistory.

ANTH 5559 Linguistic Field Methods: 3 semester hours.
Practical experience in linguistic analysis of a language using data elicited from a native speaker. May be repeated up to 6 credits.

ANTH 5563 Applied Statistics in Anthropology: 3 semester hours.
Practical applications of commonly used statistical analyses in anthropology.

ANTH 5564 Advanced Analytical Methods in Anthropology: 3 semester hours.
Examination of and practical experience in applying advanced quantitative, qualitative, and laboratory methods and analyses. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated for up to 6 credits. PREREQ: ANTH 5563 or permission of instructor.

ANTH 5572 Native American Arts: 3 semester hours.
Survey of Native American arts and industries, including prehistoric, ethnographic, and contemporary venues.

ANTH 5574 Topics in Indian Education: 3 semester hours.
Rotating review of topics dealing with issues in Indian education. Consult current schedule of classes for exact course being taught. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

ANTH 5576 Seminar in Am Indian Studies: 3 semester hours.
Advanced level course with critical examination, readings, discussion and presentation of selected issues facing American Indians. PREREQ: 9 credits of American Indian Studies or permission of instructor.

ANTH 5578 Federal Indian Law: 3 semester hours.
Examination of tribal governments; their relationship with the federal government; sovereignty, jurisdictional conflicts over land and resources; and economic development. Equivalent to POLS 5578.

ANTH 5579 Tribal Governments: 3 semester hours.
Complex legal position of Indian tribes as self-governing entities; principles of inherent powers; governmental organization, lawmaking, justice, relation to state and federal government. Equivalent to POLS 5579.

ANTH 5580 Varieties of American Language: 3 semester hours.
In-depth study of various dialects of American English, including historical evolution of different dialects, effects of migration on dialects, and influences of non-English immigrant languages on development of American English. Field work studying the Snake River dialects of Idaho. Equivalent to ENGL 5580.

ANTH 5581 Topics in Sociocultural Anthropology: 3 semester hours.
Selected topics in social, political, economic, and religious systems/organizations. Intensive survey of literature and analysis of relevant materials. See current schedule of classes for exact course titles. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated for up to 9 credits with different course topics. PREREQ: Permission of instructor.

ANTH 5582 Independent Problems in Anthropology: 1-3 semester hours.
Investigation of an anthropological problem chosen by the student and approved by the staff. May be repeated up to 6 credits.

ANTH 5583 Field Research: 3 semester hours.
Practical experience in field research. May be repeated for up to 6 credits.

ANTH 5585 Anthropology of War and Violence: 3 semester hours.
Survey of war and violence from evolutionary foundations through modern representations. The course covers violence and war among chimpanzees, the genetics and biochemistry of violence, the role of evolution in making humans aggressive, and the history and ethnography of violent conflict around the world.
ANTH 5586 Archaeology Field School: 1-9 semester hours.
Practical field and laboratory training in archaeological excavation techniques and methods of analysis. May be repeated to a total of 9 credits.

ANTH 5587 Ethnographic Field School: 1-6 semester hours.
Supervised fieldwork in cultural anthropology in a given ethnographic setting where students and faculty work on a specific set of field problems. May be repeated to a total of 6 credits.

ANTH 5589 Topics in American Indian Studies: 3 semester hours.
Rotating review of topics dealing with issues in American Indian studies. Consult current schedule of classes for exact course being taught. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated with different topics.

ANTH 5590 Topics in Folklore: 3 semester hours.
Focused study of an issue in folklore or a particular genre of folklore, including history of the scholarship concerning that issue or genre. Rotating topics. May be repeated up to 9 credits with different topics. Equivalent to ENGL 5590.

ANTH 5591 Archaeology Laboratory Analysis: 3 semester hours.
Directed analysis of archaeological remains and report writing. May be repeated up to 6 credits.

ANTH 5594 Visual Anthropology: 3 semester hours.
Documentary and ethnographic filmmaking techniques including story structure, interviewing, audio and lighting, camera handling, composition, POV, and editing. Anthropological critiques of visual representation. Students create their own short film for a final project.

ANTH 5595 Department Colloquium: 1 semester hour.
Presentations of current research issues in Anthropology by faculty and students. May be repeated.

ANTH 5596 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. 1-3 credits. May be repeated. May be graded S/U.

ANTH 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

ANTH 6605 Seminar in Linguistic Anthropology: 3 semester hours.
Discussion of theories, methods, and results in linguistic anthropology.

ANTH 6610 Seminar in Medical Anthropology: 3 semester hours.
Discussion of current topics within the various specializations of medical anthropology.

ANTH 6615 Seminar in Biological Anthropology: 3 semester hours.
Discussion of theories, methods, and results in biological anthropology.

ANTH 6625 Seminar in Sociocultural Anthropology: 3 semester hours.
Discussions of theories, methods, and results in sociocultural anthropology.

ANTH 6635 Seminar in Archaeology: 3 semester hours.
Studies in current theories, methods, and results in archaeological anthropology.

ANTH 6641 Research Project: 1-6 semester hours.
The student will pursue original research under staff guidance. The final report will result in a publishable manuscript. May be repeated. Graded S/U.

ANTH 6642 Practicum in Teaching Anthropology: 3 semester hours.
Directed preparation of an anthropology course with a review of course materials, format, teaching techniques, films, and other aids. The trainee will participate in a supervised teaching experience.

ANTH 6649 Independent Study: 1-4 semester hours.
Independent research under the guidance of faculty. May be repeated.

ANTH 6650 Thesis: 1-6 semester hours.
May be repeated. Graded S/U.

ANTH 6655 Internship in Applied Anthropology: 3-6 semester hours.
Supervised experience in the development and implementation of an anthropological project.

ANTH 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

Master of Fine Arts in Art

The MFA degree is the recognized terminal degree in the studio arts. The MFA program is designed to refine the visual art skills of the graduate student in a particular area or areas of concentration by providing the instruction, facilities and time for the student both to develop a significant body of studio work and to expand his or her intellectual horizons in preparation for a rewarding professional career.

Studio Course Categories:
- Ceramics
- Drawing
- Fiber Media
- Painting
- Printmaking
- Sculpture

Master of Fine Arts in Art

Admission Requirements

Applicants for admission to the MFA program must apply to, and meet all criteria for admission to, the Graduate School. For admission to the Master of Fine Arts program in the Department of Art, the Graduate School does not require submission of Graduate Record Exam (GRE) scores, however, the taking of the GRE test is recommended for students who wish to compete for a non-resident tuition waiver.

Application must also be made to the Department of Art. Departmental evaluation requires the following materials, which should be sent directly to the Department of Art, Stop 8004, Idaho State University, Pocatello ID 83209:

- A letter of intent stating the applicant’s goals and objectives with regard to graduate study;
- A portfolio of work (20 digital images of studio work which the applicant feels would most effectively represent his/her involvement, ability, and potential);
  a. Digital file portfolios must be formatted for Macintosh computers. Twenty images should be submitted on a single CD.
  
  b. The CD should be labeled with the applicant’s name. Digital images, in RGB color, may be no larger than 5 Megabytes each. We recommend a longest pixel dimension of 1600 at a resolution of approximately 140 ppi. Save files as TIFF or highest-quality JPEG formats. We will not accept directions to a web site, or files submitted in presentation software, such as Powerpoint, or PDF files.
  c. Name and number all files with LastnameFirstname00.jpg or LastnameFirstname00.tif (e.g., JohnsonRobert12.jpg). Number images in the order to be viewed. Include with the submission a printed, hard-copy image inventory page headed with your name and the area(s) of study to which you are applying. The inventory page should indicate, by corresponding number, the title, date, dimensions, and medium of each work; and
  
  - Three letters of recommendation from undergraduate instructors, or other appropriate individuals, indicating the readiness of the applicant to pursue independent and sustained graduate-level work.

The Department has established March 15 as the application deadline for fall semester admission. Graduate Assistantship applications are also due by March 15.

October 15 is the application deadline for spring semester. (Assistantship applications are not considered for spring semester.) Applications received after these deadlines may be considered, subject to space availability.

The entire graduate faculty of the department will review all materials submitted by each applicant. Recommendations are made by measuring, as accurately as possible:

- The applicant’s demonstrated preparedness and potential to be successful in the program;
- The sense, on the part of the faculty, that the faculty could contribute, in a meaningful and constructive way, to the student’s development as an artist;
- Available space in the program, as well as faculty and departmental resources.

Other admission requirements include twelve credits of undergraduate Art History course work. Art History deficiencies of up to 6 credits may be compensated for by enrolling in the necessary courses concurrent with graduate work.
General Requirements

Basic requirements are a minimum of 60 credits in graduate courses approved by the Department of Art and the Graduate School. A minimum of two 5000-level courses, totally 6 credits, must be taken in the area of Art History (ART 5525 Contemporary Art, and ART 5527 Theories and Methodology, are strongly recommended for graduate students), and a minimum of 12 credits must be thesis project. The student may elect, as a program option, to take up to six credits in other related areas outside the Art Department. These courses must be departmentally approved. Students are required to complete ART 6601 and ART 6621. The department will accept a grade of C in one class as long as the minimum overall 3.0 GPA is maintained. The student will have the opportunity to repeat the course.

A written thesis will be submitted to the candidate’s thesis committee by the MFA candidate before the oral examinations. Each candidate for the MFA degree must also have a one-person exhibit during the last semester before the granting of the degree. A collection of digital images of the exhibit must be turned in to the Art Department at this time. The thesis project consisting of original creative work by the candidate is the focal point of the visual growth by the candidate and should demonstrate a professional level of competency within a unified creative point of view. The MFA degree is the terminal degree in the field of the visual arts. A minimum of two years of participation in the program is required for this goal. An oral examination is held concurrently with the thesis project show. Additional information is available from the Department of Art.

Courses

ART 5518 Art of the Book: 3 semester hours.
Expands the traditional idea of book form with innovative structures and concepts. Textual and nontextual formats and methods for generating ideas for works are addressed. Traditional techniques for bookbinding will also be included. Equivalent to MC 5518.

ART 5522 World Arts: 3 semester hours.
Study of the art produced in cultures outside of the western tradition. Topics include pre-Hispanic art of Mexico, Central and South American art, and North American Indian art, Oceanic art, and the art of Africa south of the Sahara.

ART 5523 Nineteenth Century Art: 3 semester hours.
History of the visual arts from the beginning of the 19th century up to the advent of Cubism.

ART 5524 Modern Art: 3 semester hours.
Study of art and art theories from the emergence of Realism to WWII (1840-1940), focusing largely on Western Europe and the United States.

ART 5525 Contemporary Art: 3 semester hours.
Study of art and art theories from WWII to the present.

ART 5526 Special Topics in Art History: 3 semester hours.
Reading and discussion on a significant movement, theme, theory, or geographic area in art history. May be repeated.

ART 5527 Theories and Methodologies: 3 semester hours.
Study of art historical methods and theories of art, including but not limited to formalism, Marxism, psychoanalysis, semiotics, feminism, and postcolonialism.
PREREQ: ART 1102 or equivalent.

ART 5531 Advanced Printmaking: 3 semester hours.
Advanced work in printmaking. Choice of medium.

ART 5532 Advanced Printmaking: 3 semester hours.
Advanced work in printmaking. Choice of medium.

ART 5541 Advanced Painting and Composition: 3 semester hours.
Special projects and experimental individual work for advanced students.

ART 5542 Advanced Painting and Composition: 3 semester hours.
Special projects and experimental individual work for advanced students.

ART 5551 Advanced Metals-Jewelry: 3 semester hours.
Experimental work. Individual projects may include plastics, electroplating, electroforming, advanced fabrication, anodizing or raising techniques.

ART 5552 Advanced Metals-Jewelry: 3 semester hours.
Experimental work. Individual projects may include plastics, electroplating, electroforming, advanced fabrication, anodizing or raising techniques.

ART 5556 Advanced Fiber Media: 3 semester hours.
Experimental work. Individual projects may include on-loom and off-loom techniques, dyeing processes, basketry, or multilayered fabrics.

ART 5566 Advanced Fiber Media: 3 semester hours.
Experimental work. Individual projects may include on-loom and off-loom techniques, dyeing processes, basketry, or multilayered fabrics.

ART 5571 Advanced Ceramics: 3 semester hours.
Individual projects may include ceramic sculpture, mosaics or experimental problems in form and techniques.

ART 5572 Advanced Ceramics: 3 semester hours.
Individual projects may include ceramic sculpture, mosaics or experimental problems in form and techniques.

ART 5581 Advanced Sculpture: 3 semester hours.
Experimental work with an emphasis on scale and environmental problems.

ART 5582 Advanced Sculpture: 3 semester hours.
Experimental work with an emphasis on scale and environmental problems.

ART 5591 Advanced Papermaking: 3 semester hours.
Further development of topics from ART 3391.

ART 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. 1 to 3 credits. May be repeated. May be graded S/U.

ART 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

ART 6601 Independent Study in Drawing: 3 semester hours.
Individualized course designed to address drawing-specific concerns: technical, material, and/or conceptual possibilities inherent to various drawing media. May be repeated for a total of 6 credits.

ART 6621 Graduate Seminar: 3 semester hours.
Reading and discussion of theories and practices related to the production and presentation of studio art under the supervision of the instructor. Students will research and prepare written presentations for weekly seminar discussion and evaluation. May be repeated.

ART 6635 Research in Studio or Theory: 4 semester hours.
Investigation of technical, material, and/or aesthetic/theoretical problems in art history/studio areas under the supervision of the instructor.

ART 6640 Experimental Problems in Studio: 4 semester hours.
Experimentation in technical, material, and aesthetic problems in a studio area under the supervision of the instructor.

ART 6645 Studio: 1-12 semester hours.
Studio work under the supervision of the instructor. 1-12 credits. May be repeated up to 12 credits.
ART 6649 Thesis Proposal: 1 semester hour.
Summary of the objectives and goals of the thesis project prepared under supervision of the student's advisor. Concurrent with application for admission to candidacy.

ART 6650 Thesis Project: 1-12 semester hours.
Preparation and presentation in a one-person show of a significant body of work which demonstrates a professional level of competency within a unified creative point of view. An exhibition and slides of the works are required by the department under the supervision of the candidate's advisor. A graduate faculty orals committee will review and approve or disapprove the show and thesis proposal. 1-12 credits. May be repeated up to 16 credits. Graded S/U. PREREQ: ART 6649.

ART 6660 Special Topics: 1-4 semester hours.
1-4 credits. May be repeated.

ART 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.
Communication, Media, and Persuasion

Chair and Professor: DiSanza
Professors: Gribas, Jull, Legge, Partlow Lefevre
Associate Professor: Beachboard, Ownby
Assistant Professors: Carr, Gershberg, Hartman
Lecturers: Collins, Czerepinski, Dixon, Moline, Morris, Robinson, Sowell, Underwood
Emeriti: Loebs, Frazier

Goals
The primary objectives related to the Master of Arts in Communication program are to help students develop the following competencies:

1. An understanding of the history and nature of the Communication discipline.
2. The ability to read, understand, and critique scholarly communication-related research and analysis.
3. The ability to design and conduct original communication-related research and analysis.
4. The ability to engage in critical thinking.
5. The ability to communicate effectively in writing.
6. The ability to communicate effectively through oral presentation.
7. The ability to engage in effective applied problem-solving for personal and professional goals.
8. The ability to construct and evaluate strategic verbal and visual messages.
9. The ability to use effective information research strategies.
10. An understanding of the role of communication in interpersonal, group/team, corporate, political, cultural, mediated, and historical contexts.
11. Knowledge and skill useful to graduates' professional success.
12. Knowledge and skill applicable to graduates' personal lives.

Admission Requirements
To be admitted to classified status, students must apply to, and meet all criteria for admission to the Graduate School. In addition, students need to score in the 40th percentile or higher in the verbal portion of the GRE.

Program Overview
The Master of Arts in Communication program is a highly flexible 30 credit graduate degree. Students typically take graduate courses in other departments to supplement work in Communication, Media, and Persuasion to build their own cohesive program of study. All students need to work with an advisor to design and approve a program of study and should contact one of the graduate faculty before registering for the first semester. Though it is possible to work at an accelerated pace, the Master of Arts in Communication is designed as a two-year program.

All programs of study will be expected to reflect the following departmental standards:

- At least 15 credits must be from 6600-level course work.
- At least 15 credits must be from course work in Communication, Media, and Persuasion.

Students choosing the Graduate Degree Paper option must take a minimum of 27 course credits plus a minimum of 3 Graduate Degree Paper (CMP 6660) credits.

Students choosing the Thesis option must take a minimum of 24 course credits plus a minimum of 6 Thesis (CMP 6650) credits.

1 To be taken in a student's first fall semester.
2 Or other graduate-level courses approved as part of a program of study.
Courses

**CMP 5503 Mass Communication and Society: 3 semester hours.**
Introduces students to mass media theories scholars use to study the effects of media messages. Students will also read and discuss research illustrating the media’s impact on individuals, society, and cultures. Topics include the media’s relationship to stereotyping, images of sexuality, violence, values, politics, and globalization. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**CMP 5504 Gender and Communication: 3 semester hours.**
Course examines communication arenas from a perspective that focuses on gender and includes study of similarities and differences in female/male patterns. Topics include nonverbal, organizational, language, family and friendship. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**CMP 5510 Mass Media History, Law, and Ethics: 3 semester hours.**
A comprehensive exploration of mass communication law and the history of mass media. The course examines media rights of free expression and First Amendment including libel privacy, access to information, free-press, and other related topics and themes. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**CMP 5518 Feature Writing: 3 semester hours.**
Develops feature reporting and writing skills for magazines and web publications. Students examine classic, exemplary works of journalism and gain experience creating feature profiles, sports and travel articles, restaurant reviews, and Gonzo-style investigations. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor.

**CMP 5520 Advanced Leader Communication: 3 semester hours.**
Advanced exploration of the vital relationship between communication and leader effectiveness with a focus on particular communication tools and strategies. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**CMP 5522 Conflict Management: 3 semester hours.**
Examines the dynamics of everyday conflicts across a variety of settings, from personal to organizational. Principles of conflict, similar across all communicative contexts, are emphasized. Theory and its application are given equal importance. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**CMP 5524 Management Communication: 3 semester hours.**
Examines the communication goals and functions unique to organizational managers and leaders. Topics studied include socialization and training, leader-member relationships, incentive-based systems of motivation, employee identification and commitment, and organizational development. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**CMP 5535 Narrative and Print: 3 semester hours.**
Exploration and reconsideration of conventional concepts of what makes a book, both in terms of narrative structure and physical form. Focus on examination of familiar forms in new ways to help students learn to approach multi-page projects from fresh and new angles. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. Equivalent to ART 5518. PREREQ: Permission of instructor.

**CMP 5536 Advanced Issues in Design: 3 semester hours.**
Focuses on complex design challenges, professional-level assignments, and design projects with multiple components. Application of research and entrepreneurial skills to seek innovative solutions for appropriate economic constituencies, users, and audiences. Professional presentations of ideas and design solutions for critique and discussion are central to this course. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor.

**CMP 5540 Sport Public Relations: 3 semester hours.**
Examines public relations theories and skills relevant to sport. Emphasizes image management; media and community relations; critical analysis of campaigns; and written and oral presentation skills necessary for sport public relations specialists. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor.

**CMP 5546 Public Relations Campaigns: 3 semester hours.**
Tactics and strategies for planning public relations programs for public and private organizations. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor.

**CMP 5557 Advanced Photography: 3 semester hours.**
Explores photographic concepts as they relate to visual storytelling for use within a multi-media business environment. We will investigate the idea of the photographer’s intent in regards to crafting color and B&W images into a visual story. Further, we will examine the elements and decisions required for printing a professional portfolio and establishing professional business goals. Additionally, each student will create a body of cohesive images suitable for use as a professional portfolio or a traditional art exhibit. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: CMP 5557L. PREREQ: Permission of instructor.

**CMP 5583 Rhetoric of Popular Culture: 3 semester hours.**
Explores the functions of rhetoric in popular culture mass media including news, television, film, fiction, advertising, music, and the internet. Emphasizes understanding how rhetoric in these mediums reflects, influences, and interacts with the culture. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**CMP 5587 Rhetorical Theory: 3 semester hours.**
Course provides students with the foundations of rhetorical by examining principle rhetorical theories from Classical, Medieval, Renaissance, Modern, and Contemporary eras. Specific evaluated graduate-level activities and/or performances are identified in the course syllabus.

**CMP 5588 Rhetorical Criticism: 3 semester hours.**
Study and application of various theories and methods of rhetorical criticism including Aristotelian and Burkean principles. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**CMP 5591 Independent Research Projects: 1-3 semester hours.**
Under the supervision of professors in the various areas of communication, students will prepare reports and carry out projects designed to promote professional growth. May be repeated for up to 6 credits. PREREQ: Permission of instructor and department.

**CMP 5599 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. Repeatable if covering different topics.

**CMP 6601 Introduction to Graduate Research Methods: 3 semester hours.**
Orientation to departmental graduate program policies and expectations, overview of the communication discipline, and introduction to methods used for producing scholarly research in the field.
**CMP 6630 Seminar in Communication**: 3 semester hours.
In-depth study and analysis of selected topics related to the communication field. See instructor for specific topics. Repeatable if covering different topics.

**CMP 6650 Thesis**: 1-6 semester hours.

**CMP 6660 Graduate Degree Paper**: 1-3 semester hours.
Graduate degree paper. 1-3 credits. Repeatable. Graded S/U.

**CMP 6691 Independent Study**: 1-3 semester hours.
Under the supervision of departmental graduate faculty, students will engage in self-directed reading, exploration, and study focused on topics relevant to the communication discipline and to the students' planned academic program. May be repeated for up to 6 credits. PREREQ: Permission of instructor and department.
English and Philosophy

Chair and Professor: J. Attebery
Director of Philosophy and Professor: Wahl
Graduate Program Director and Associate Professor: Attebery
Composition Director and Associate Professor: Hellwig
Assistant Professors: Berger, Lawrimore, Levay, Schultz-Hurst, Van Winkle, Watkins, Wilkes

The Department of English and Philosophy offers graduate curricula in English studies that include courses in language, literature, composition/rhetoric, and English pedagogy. The Department offers the Master of Arts and the Doctor of Philosophy degrees.

Admission Requirements for International Students

Students whose native language is not English must achieve at least one of the following minimum scores to be considered for admission into the master's or doctoral program in English: TOEFL 80 (internet-based)/213 (computer-based)/550 (paper-based); MTEL 84; IELTS 6.5.

Goals

The Department has articulated the following goals and student learning outcomes for students in graduate programs:

Learning Objectives - Master of Arts

Stated Mission and Goals: The M.A. program provides advanced training in British and American literature and culture, and opportunities to pursue advanced work in other areas of English studies, including linguistics, TESOL, and composition. The M.A. provides students with training to enter any field where verbal and analytical ability is essential, especially teaching, as well as preparation for further graduate work in Ph.D. programs.

Student Learning Objectives

1. M.A. students will understand major literary traditions in British and U.S. cultures.
2. M.A. students will understand ways that literary works are shaped by and participate in broad cultural trends.
3. M.A. students will understand important theoretical approaches to the study of literature and culture.
4. M.A. students will analyze and synthesize on-going scholarly conversations in English studies and situate their arguments in relation to these conversations.
5. M.A. students will understand linguistic structures (i.e. language and/or rhetoric) and employ this understanding in their readings of texts and in their writing.

Learning Objectives - Doctor of Philosophy

Stated Mission and Goals: The Doctor of Philosophy in English and the Teaching of English prepares students for teaching careers in English at colleges and universities.

Student Learning Objectives

1. Ph.D. students will have a professional understanding of major literary traditions in British and U.S. cultures.
2. Ph.D. students will have a professional understanding of the ways that literary works are shaped by and participate in broad cultural trends.
3. Ph.D. students will understand important theoretical approaches to the study of literature and culture and employ these theories in their research and writing.
4. Ph.D. students will define, research, and complete a significant research project within English studies, and be prepared to conduct research independently once they graduate.
5. Ph.D. students will understand linguistic structures (i.e. language and/or rhetoric) and employ this understanding in their readings of texts and in their writing.
6. Ph.D. students will understand theories of college-level English teaching and will be able to effectively translate these theories into practice.
7. Ph.D. students will be prepared for future professional activities as college-level English teachers.

Learning Objectives - Graduate Certificate in TESOL

Stated Mission and Goals: The Graduate Certificate in TESOL program provides theoretical and practical training for students who wish to teach English to speakers of other languages. The Certificate prepares students to pursue employment in any setting where English is taught as a second or foreign language, with an emphasis placed on post-secondary learners.

Student Learning Objectives

1. Certificate students will gain a broad understanding of the various areas of study in the field of linguistics.
2. Certificate students will gain an understanding of, and be able to apply, the major theoretical approaches to second language acquisition.
3. Certificate students will learn to develop effective curricula, courses, and activities for teaching English as a second or foreign language.
4. Certificate students will demonstrate mastery of their knowledge and skills in a classroom setting.

- Doctor of Philosophy in English and the Teaching of English (p. 80)
- Master of Arts in English (p. 82)
- TESOL Certificate (p. 83)

Doctor of Philosophy in English and the Teaching of English

The Doctor of Philosophy in English and the Teaching of English prepares students for teaching careers in English at colleges and universities.

The program emphasizes the study of English and American literature, course work in content-specific pedagogy, and supervised teaching internships. Students also undertake directed, specialized research in a required dissertation.
Admission Requirements

For full consideration for admission and financial aid, applications for fall admission must arrive by February 15.

Applicants for classified admission and/or financial support must submit the following materials:

1. Undergraduate and graduate transcripts.
2. An M.A. in English (or appropriate related field) with an accumulative grade point average of 3.5 in M.A.-level English courses.
3. Three letters of recommendation from professors who can comment on the student’s recent academic work.
4. Scores at or above the 50th percentile on the verbal section of the GRE general test. Scores on the analytical writing section will also be considered in admission decisions.
5. A writing sample (about 10-20 pages).
6. A brief statement (about 500 words) describing the applicant’s academic background, reasons for applying to the program, research interests, and professional goals.

The Graduate Committee in consultation with the department Chair evaluates these materials to determine admission to the program. Priority will be given to experienced, successful teachers.

General Requirements

The Doctor of Philosophy in English requires a minimum of 39 semester credits beyond the M.A.

A course completed as part of a student’s M.A. program may be approved by the Graduate Director to satisfy a particular requirement of the Ph.D. program, up to a maximum of 9 credits; however, the substitution of course work does not waive the minimum credit requirement for the Ph.D. program.

With the approval of the Graduate Director, students may transfer up to 9 credits of coursework beyond the M.A. from other institutions.

Students must maintain a 3.5 grade point average to advance to candidacy for the Ph.D. Three grades below B- during the entire program will automatically disqualify a student.

The exam areas are:

- a. The student’s dissertation area
- b. A broader field or literary period

Graduate students must follow the policy on incomplete grades as it is listed in the Idaho State University Graduate Catalog. Teaching assistantships and Ph.D. fellowships will not be renewed for students with incomplete grades on their transcripts.

Special Requirements

1. Student must complete at least 27 of the required 39 credits at the 6600 level or higher.
2. Students must complete two supervised teaching internships. The student must submit a detailed proposal for each internship to the Graduate Committee for approval prior to the semester of the internship. The proposal must be endorsed by the member of the graduate faculty who has agreed to supervise the internship. An unacceptable Ph.D. internship will have the same consequences as a course grade of C.
3. Students will write a dissertation with a section exploring the implications of the research for the student’s teaching of English. This dissertation project will be designed in consultation with a member of the English graduate faculty, who will serve as chair of the dissertation committee. The dissertation committee shall consist of three members of the graduate faculty, at least two of whom are English graduate faculty. In consultation with the dissertation director, the student is responsible for assembling the dissertation committee. The dissertation proposal must be approved by all members of the student’s dissertation committee and then submitted, with the comprehensive exam lists attached, to the Graduate Director for review, according to the guidelines in the English Graduate Handbook. A Graduate Faculty Representative (GFR) will be appointed after review of the proposal and exam lists.
4. Students must present a colloquium on the topic of the dissertation research, given in the last semester of their degree work, which will allow them to obtain experience in presenting the results of their research to their peers.

Total Hours: 12

Course Work Limitations

A maximum of 6 semester credits taken outside of ENGL-prefixed courses may be counted toward degree requirements, with the approval of the Graduate Director.

Comprehensive Examination

Students are eligible to take the comprehensive exam after completing 30 credits beyond the M.A. Students must take the exam before defending the dissertation.

The comprehensive examination is both written and oral. The examination tests the student in the general areas listed below, but the student in consultation with his/her dissertation committee will design the specific subjects and reading lists on which he/she will be tested. The exam lists must be approved by all members of the student’s dissertation committee and then submitted, along with the dissertation proposal, to the Graduate Director for review, according to the guidelines in the English Graduate Handbook.

The exam areas are:

- a. The student’s dissertation area
- b. A broader field or literary period
The Master of Arts in English prepares graduates for careers and for doctoral study in English and closely related fields. The program emphasizes study in English and American literature and requires course work in the English language and linguistics. A well-developed mentoring program provides supervised teaching experience in composition for students holding assistantships.

### Admission Requirements

Applications for admission and funding are due February 15th (to begin in fall semester), and October 1st (to begin in spring semester). Applicants must apply to and meet all criteria for admission to the Graduate School. In addition to the general requirements of the Graduate School, applicants must submit the following materials:

1. All undergraduate and any graduate transcripts, showing accumulative grade point average of at least 3.0 over the last 60+/- credits (90 +/- for quarters) undergraduate coursework.
2. GRE general test scores, a score at or above the 50th percentile on the verbal section of the GRE general test. Scores on the analytical writing section will also be considered in admission decisions.
3. Three letters of recommendation, preferably from professors who know the student’s recent academic work.
4. A brief statement (about 500 words) of academic and professional goals.
5. A brief writing sample (about 5 pages). The English Department Admissions Committee, in consultation with the department chair, evaluates the applicant’s materials to determine admission to the program. When these materials are evaluated, the Admissions Committee will look at the student’s preparation for graduate work in English, his/her academic promise (as indicated by transcripts, GRE scores, and letters of recommendation), and the fit between the student’s goals (as indicated in their statement) and the mission and strengths of the M.A. program.

Students admitted to the M.A. program are called Classified students. Some students may be admitted as Classified with performance requirements which means they must fulfill certain requirements specifically indicated with their admission and are not eligible for graduate assistantship support until they achieve Classified status. Continuation in the program is subject to a student’s meeting this requirement. Students admitted without at least 21 credits of undergraduate courses in English, excluding freshman composition, may be required to make up deficiencies in their undergraduate work.

### General Requirements

The Master of Arts in English program requires a minimum of 30 semester credits in courses approved by the Department of English. Students must take at least 18 of these credits in courses at the 6600-level courses or higher.

Students may fulfill these credit requirements in one of three options:

1. **Final Exam Option:** The student takes 30 credits of coursework, at least 18 of which must be at the 6600-level, and complete a final exam. OR
2. **M.A. Paper Option:** The student completes 30 credits, including at least 18 credits at the 6600-level, and completes a 3-credit final M.A. Paper, a revised paper based on work done in a course completed as part of the M.A. program, which must be submitted with a cover letter, CV, and statement describing their rationale for choosing the paper and the revision process. Up to 3 credits of portfolio work may count toward the 6600-level requirement. OR
3. **Thesis Option:** The student completes 30 credits, including at least 18 credits at the 6600-level, and completes a thesis. Up to 6 credits of thesis may count toward the 6600-level requirement.

Students selecting any of these options must also demonstrate proficiency in one foreign language and may do so in the following ways:

1. By demonstrating that they have obtained an intermediate level of competence in a foreign language, equal to completing the second sophomore-level (2200-level) course with a grade of B or better. Students may demonstrate this proficiency in one of three ways:
   - By completing all foreign language coursework (at the 2200-level or above) with an average grade of B or better, and with an interval of no longer than four years between the conclusion of the last language class and the beginning of graduate study in English at Idaho State University.
   - By passing the equivalent of four semesters of one foreign language with an average grade of B or better.
   - By passing the CLEP exam and earning credit for a 2200 course. OR
2. By passing with a grade of B or better a two-part examination administered by the Language and Literature Department. OR
3. By having completed a major or a minor in a foreign language, as verified by a college transcript. OR
4. By taking 6 credits beyond the normal 3 credits of required Language Studies coursework. These 6 credits, which do not count toward the degree requirements, must include:
   - Old English and History of English Language OR
b. or, plus one additional course in linguistics approved by the department

OR

5. By having a first language other than English.

All students must maintain a satisfactory record of scholarship. Three grades below B- during the entire program will automatically disqualify a student from continuing in the program.

Graduate students must follow the policy on incomplete grades as it is listed in the Idaho State University Graduate Catalog.

Teaching Assistantships will not be renewed for students with incomplete grades on their transcripts.

All students must take the following 12 required credits:

<table>

Total Hours 12

5. Applicants whose first language is not English need to meet the following TOEFL requirements for Classified admission:

a. Internet-based test (iBT): a total score of 80 with a score of at least 20 on each section (graduate assistants who teach courses must score 23 or above on the Speaking Section) on the iBT; or

b. Computer-based test: a total score of 213 with a score of at least 21 on Section 1 (Listening Comprehension) on the computer test; or

c. Paper-based test: a total score of 550 with a score of at least 55 on Section 1 (Listening Comprehension) on the paper test, or a score of 84 on the MTELP, or a score of 6 on the IELTS.

It is strongly recommended that applicants have some knowledge of a second language.

General Requirements

The certificate program is 18 credits and is granted alone or in addition to a graduate degree.

All students must take the following 12 credits:

<table>
<thead>
<tr>

</tbody>
</table>

Total Hours 12

In addition to the required courses, students must take two 3-credit electives chosen from the graduate-level linguistics offerings in either the Department of English and Philosophy or the Department of Anthropology.

Courses

ENGL 5501 Advanced Composition: 3 semester hours.
An advanced course in which students develop an independent style in writing such types of essays as the personal, biographical, argumentative, and critical. May contain prose analysis. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5506 Advanced Creative Writing: 3 semester hours.
Production and discussion of student writing. Study in a specific genre. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5507 Topics in Professional Writing: 3 semester hours.
Topics in professional writing, including standard genres, new media, and emerging trends in research and the workplace. Emphasis on developing practical skills, theoretical knowledge, and finished professional documents related to the topic. Specific, evaluated graduate-level activities are identified in the course syllabus. May be repeated once with a different topic for a maximum of 6 credits. PREREQ: Classified Graduate Status or permission of instructor.

ENGL 5509 Literary Magazine Production: 3 semester hours.
Hands-on experience in literary magazine production: editing, proofreading, and design. Strategies for screening and selecting stories, poems, and reviews. Consideration of the role of the small press in national literary culture. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5531 Teaching and Writing Projects Special Topics: 3 semester hours.
Aids teachers of all grade levels and all academic subjects in developing skills in teaching writing. Combines composition theory and practical classroom exercises with ongoing writing and critiques. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.
ENGL 5540 Philosophy and Literature: 3 semester hours.
Reflections on the relation between poetic and speculative discourse. Topics include forms of consciousness, temporality and narrative, metaphysics of genre. Equivalent to PHIL 5540. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5541 History of Literary Criticism: 3 semester hours.
Teaches major theorists and debates that have influenced the interpretation of literature. Students read key theoretical texts. Course may use a thematic or chronological approach. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5553 American Indian Literature: 3 semester hours.
Considers literary works by and about North American native people, especially in relationship to history, genre, and culture, including oral traditions. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5555 Studies in a National Literature: 3 semester hours.
Studies in important literatures and cultures not otherwise covered in the curriculum. Will include literatures in translation and literature written in English outside of America and the British Isles. Equivalent to LANG 5515 and CMLT 5515. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5556 Comparative Literature: 3 semester hours.
The analysis of ideas, problems, and techniques common to important writers of various national literatures. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5561 Classical Literature: 3 semester hours.
Study of the major literature of the classical Greek and Roman periods, especially in relationship to its cultural backgrounds. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5562 Medieval Literature: 3 semester hours.
Study of the major literature of the Middle Ages and its background, with emphasis upon the development of English literature. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5563 Renaissance Literature: 3 semester hours.
Study of the major literature of the Renaissance and its background, with emphasis upon the development of English literature. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5564 Seventeenth Century Literature: 3 semester hours.
Study of the major literature of the seventeenth century and its background, with emphasis on English or American or other literature of the period. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5565 Eighteenth Century Literature: 3 semester hours.
Study of the major literature of the eighteenth century and its background, with emphasis on English or American or other literature of the period. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5566 Early Nineteenth Century Literature: 3 semester hours.
Study of the major literature of the early nineteenth century and its background, with emphasis on English or American or other literature of the period. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5567 Late Nineteenth Century Literature: 3 semester hours.
Study of the major literature of the late nineteenth century and its background, with emphasis on English or American or other literature of the period. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5568 Early Twentieth Century Literature: 3 semester hours.
Study of the major literature of the early twentieth century and its background, with emphasis on English or American or other literature of the period. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5569 Contemporary Literature: 3 semester hours.
Study of recent major literature and its background, with emphasis on English or American or other literature of the period. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5570 Post-Colonial Literature: 3 semester hours.
Study of post-colonial literary texts, with attention to the role of literature in history, political resistance, and social movements of one or more colonized cultures. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5572 Proseminar in a Major Literary Figure: 3 semester hours.
Intensive study in a single major author other than Chaucer, Milton, and Shakespeare. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5573 Chaucer: 3 semester hours.
Intensive study of selected works of Chaucer. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5574 Milton: 3 semester hours.
Intensive study of selected works of Milton. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5575 Shakespeare: 3 semester hours.
Intensive study of selected works of Shakespeare. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5576 Shakespeare in Performance: 3 semester hours.
Intensive study of selected works by Shakespeare, with emphasis placed upon performance issues. Includes field trip to attend live dramatic productions of Shakespearian plays. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5580 Varieties of American English: 3 semester hours.
In-depth study of various dialects of American English, including historical evolution of different dialects, effects of migration on dialects, and influences of non-English immigrant languages on development of American English. Fieldwork studying the Snake River dialects of Idaho. Equivalent to ANTH 5580. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5581 Studies in Grammar: 3 semester hours.
Focus on the study of transformational-generative grammar and its application to sentence level problems. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5584 Special Topics in Linguistics: 3 semester hours.
Rotating topics in different areas of linguistics. Consult current schedule of classes for exact course being taught. May be repeated. PREREQ: ANTH/LANG/ENGL 1107. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5585 Linguistic Analysis: 3 semester hours.
Advanced topics course in the techniques of language analysis. Examples are phonology and morphology, semantics, or rhetorical grammar. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.
ENGL 5586 Old English: 3 semester hours. Intensive study of the Old English language, with attention to its intrinsic structure and its relation to Middle and Modern English. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5587 History of the English Language: 3 semester hours. Linguistic and historical study of the major changes and developments in the English Language. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5588 Introduction to Sociolinguistics: 3 semester hours. Study of the patterned covariation of language and society, social dialects and social styles in language; problems of bilingualism, multilingualism, creoles and language uses. Equivalent to ANTH 5550. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5590 Topics in Folklore: 3 semester hours. Focused study of an issue in folkloristics or a particular genre of folklore, including history of the scholarship concerning that issue or genre. Rotating topics. Repeatable with different topics. Equivalent to ANTH 5590. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5592 Folklore and Literature: 3 semester hours. Study of cross-influences between oral and written literatures. Emphasis may be on a written genre that imitates and draws upon oral genres, a movement or period in which oral tradition strongly influences written forms, or a particular writer who incorporates motifs and storytelling patterns from folklore. Rotating topics. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5597 Professional Education Development Topics: 1-3 semester hours. A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. May be graded S/U. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 5599 Experimental Course: 1-6 semester hours. This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6610 Careers in English: 1 semester hour. Preparation for English job searches and teaching careers. Does not count toward degree requirements. Graded S/U. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6611 Literary Theory and Criticism: 3 semester hours. Focused study of selected literary theories/critical approaches and their applications. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6612 Introduction to Graduate Studies in English: 3 semester hours. Introduces students to major literary theories and approaches and trains them in scholarly research methods. Requires development of a substantial research proposal. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6613 Literary Bibliography Manuscripts and Editing: 3 semester hours. Training in bibliographical, manuscript, and/or editing methodologies relevant to English. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6621 Seminar in a Major Literary Genre: 3 semester hours. Focused study of the theory and conventions of a major form (such as lyric poetry or novel) or a broader genre (such as realism, pastoral, or the fantastic). Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6623 Seminar in Literary Themes: 3 semester hours. Focused study of literature cohering around thematic content (such as religion, exploration, or diaspora). Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6625 Seminar in a Literary Period: 3 semester hours. Focused study of a literary period and issues in periodization. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6627 Seminar in Major Literary Figures: 3 semester hours. Focused study of the writings of one or two major writers. Critical and biographical topics and historical significance may be considered. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6630 Special Topics in Pedagogy: 3 semester hours. Focused study of topics regularly covered in ENGL 6631, ENGL 6632, or ENGL 6633. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6631 Seminar in Teaching Writing: 3 semester hours. Systematic application of contemporary composition theory to the teaching of writing; includes readings in and discussion of theories, research issues, and practices relevant to effective teaching and learning in composition classrooms. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6631L Teaching Composition Lab: 1 semester hour. Lab for English 6631. Experiential training for new M.A. TAs. Requires attending graduate faculty mentor's English 1101, regular meetings with mentor, teaching five times, and supervised grading. Graded S/U with written report by mentor. Required of first-semester M.A. TAs. Does not count toward degree requirements. PREREQ or COREQ: ENGL 6631. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6632 Seminar in Teaching Literature: 3 semester hours. Theoretical and practical approaches to teaching literature and literary interpretation at the undergraduate level, with attention to issues in course design and implementation, such as designing syllabi, leading discussion, and grading papers. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6633 Seminar in Teaching Business and Professional Writing: 3 semester hours. Preparation to teach undergraduate business and technical writing courses, including the nature and history of business and technical writing, as well as attention to practical issues in teaching, such as pedagogical strategies, textbook choice, and research design. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6635 Special Topics in the Teaching of English: 3 semester hours. Focused study of topics in English pedagogy that are not regularly covered in ENGL 6631, ENGL 6632, ENGL 6633, ENGL 6681, or ENGL 6682. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6640 Interdisciplinary Seminar: 3 semester hours. Focused study of a literary or literary-related problem or subject using the theories and methods of literature and other closely-related disciplines such as folklore, communications, rhetorical studies, history, linguistics, or anthropology. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6642 Seminar in Oral and Popular Culture: 3 semester hours. Focused study of a body of oral and/or popular cultural expression in related historical and cultural contexts with emphasis on literary connections. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.
ENGL 6650 MA Thesis: 1-6 semester hours.

ENGL 6651 MA Paper: 1-3 semester hours.
Substantial revision of a graduate paper to produce a manuscript suitable for submission to a peer-reviewer publication in the field. M.A. Program only. Optional. Graded S/U. May be repeated. Up to 3 credits may count toward degree requirements.

ENGL 6662 Seminar in Creative Writing: 3 semester hours.
Advanced study of creative writing. Course involves intensive readings in one or more selected genres (poetry, prose, drama), analyzed from the perspective of criticism and craft, and the development of course-related writing projects. PREREQ: ENGL 5506 or equivalent. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6680 Introduction to Linguistics: 3 semester hours.
Introduction to fundamental concepts and methodologies of modern linguistics, including phonetics, phonology, morphology, syntax, semantics, sociolinguistics, programmatic, and language acquisition. May include opportunities to explore the practical application of course topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6681 Theory of Second Language Acquisition: 3 semester hours.
The course will: 1) address theories describing the processes underlying second language acquisition, as well as relevant research, 2) consider what conditions increase the likelihood of successful second language acquisition, and 3) review the implications of 1 and 2 for second language learning and teaching. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6682 TESL Methodology: 3 semester hours.
Building on the theoretical framework of ENGL 6681, students develop effective ESL materials and curricula, taking into account SLA research as well as the characteristics, needs, and motivation of learners. The class will involve a large practical component. PREREQ or COREQ: ENGL 6681, and Classified Graduate Status or Permission of the Instructor.

ENGL 6685 Seminar in Linguistics: 3 semester hours.
Advanced studies in selected topics in linguistics. Course includes application of linguistic theories to specific forms of communication within the discipline of English. Repeatable with different topics. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 6690 Graduate Reading: 1-3 semester hours.
Supplementary reading course, arranged on an individual basis, to cover course content not otherwise available in the graduate program. Requires conferences with a faculty supervisor, written assignments or examination, and approval of a prospectus by the Graduate Committee. Repeatable with different topics. Does not count toward degree requirements.

ENGL 6694 Dissertation and Comprehensive Exam Preparation: 1-6 semester hours.
Student prepares a dissertation proposal and comprehensive exam lists and studies for qualifying exams in consultation with his or her dissertation director. Requires dissertation director's approval of projected dissertation research area, exam areas, and committee members. Limited to Ph.D. students only. Does not count toward degree requirements. May be repeated. Graded S/U.

ENGL 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated. PREREQ: Classified Graduate Status or Permission of the Instructor.

ENGL 7700 Supervised Teaching Internship: 3 semester hours.
Practical experience in classroom or laboratory teaching. Enrollment limited to
Global Studies and Languages

Chair: Raphael Chijioke Njoku (professor)
Professors: Sharon Sieber
Associate Professors: Daniel Hunt, Cathleen Tarp
Assistant Professor: King Yik, Zackery Heern
Instructor and Lab Director: Carmen Febles
Lecturers: Abeer Alqurashi, Tamra Bassett, Sandra Dillon, David Heath, Sanae Johnsen, Sarah McCurry, Marta Robredo, Valia Tatarova
Adjunct Faculty: Tracie Amend, Kurino Ashizawa, Svetlana Brainard, Anne Brookman, Lisa Coffield, Neva Eldredge, Sachiko Fukuoka, Drusilla Gould, Nancy Well, Zhiyuan Zhang
Emeritus Professors: Arthur Dolsen, Pamela Park

Goals
To increase knowledge and understanding of languages and cultures other than English through the development of foreign language skills in speaking, writing, reading, listening, and cultural competence.

Graduate Certificate in Spanish for Health Professions

Admission Requirements
For admission into the Spanish for Health Professions (SPHP) Certificate Program, applicants must satisfy the following criteria:

1. Admission to the Graduate School
2. Applicants whose language is not English need to meet the following
   a. TOEFL Requirements: (1) Internet-based test (IBT): a total score of 80 with a score of at least 20 on each Section of the IBT;
      b. or minimum rating of Intermediate High on the ACTFL English OPI.
3. It is highly recommended that students complete SPAN 1101-1102 or equivalent.

Language Core Courses
Students complete a minimum of 9 credits from the following or other approved electives. Please speak to an advisor about appropriate placement and verify prerequisites in the Catalog. Many of these courses are offered online or in a hybrid format.

Comparative Literatures Courses

CMLT 5515 Studies in Major National Literatures: 3 semester hours.
Studies in important literatures and cultures not covered by regular course offerings. Will include literatures in translation and literature written in English outside of America and the British Isles. Cross-listed as ENGL 5555.

CMLT 5535 Topics in World Film Studies: 3 semester hours.
Rotating topics in world film studies. Consult schedule of classes for topic being taught. May be repeated with different content. PREREQ: Permission of instructor.

CMLT 5588 Comparative Literature Seminar: 3 semester hours.
Advanced work in the areas of cultural studies, literature, and research methods. May be conducted in English. May be repeated for up to 6 credits with different content. PREREQ: Permission of instructor.

CMLT 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

CMLT 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

French Courses

FREN 5500 French Advanced Grammar: 3 semester hours.
Survey of selected grammar and composition topics on the advanced level. PREREQ: Permission of instructor.
**FREN 5565 French Translation and Interpretation: 3 semester hours.**
Theory and principles of translation and/or interpretation and their application in the fields of literature, business, law, and medicine. Topics may vary, may be repeated with different content. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: FREN 5565L. PREREQ: Permission of instructor.

**FREN 5565L Interpretation and Translation Lab: 1-3 semester hours.**
Intensive application of interpretation practices and procedures presented in FREN 4465. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated three times with different content. COREQ: FREN 5565. PRE-or-COREQ: FREN 3301 or FREN 3302.

**FREN 5570 Readings in French: 2 semester hours.**
Reading, discussion, and writing on selected topics in French literature. May be repeated once with different content. Conducted in French. PREREQ: Permission of instructor.

**FREN 5575 Topics in Culture and Literature: 3 semester hours.**
This course is designed to offer students an opportunity to explore a topic of interest in French or francophone literature and culture at a more advanced level through the study of a wide variety of literary and cultural texts. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated three times with different content. PRE-or-COREQ: CMLT 3360 or FREN 3301 or FREN 3302.

**GERM 5560 German Translation and Interpretation: 3 semester hours.**
Intensive application of interpretation practices and procedures presented in GERM 4460. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated three times with different content. COREQ: GERM 5560. PRE-or-COREQ: GERM 3301 or GERM 3302.

**GERM 5570 Readings in German: 1-2 semester hours.**
Reading, discussion, and preparation of reports on selected topics in German literature. May be repeated once with different content. PREREQ: Permission of instructor.

**GERM 5575 Topics in Culture and Literature: 3 semester hours.**
This course is designed to offer students an opportunity to explore a topic of interest in Germanic literature and culture at a more advanced level through the study of a wide variety of literary and cultural texts. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated three times with different content. PRE-or-COREQ: CMLT 3360 or GERM 3301 or GERM 3302.

**FREN 5580 Independent Study in French: 3 semester hours.**
A directed project, under the guidance of an instructor, emphasizing individual study or research according to the needs of the student. May be repeated. PREREQ: Permission of instructor.

**GERM 5580 Independent Study in German: 3 semester hours.**
A directed project, under the guidance of an instructor, emphasizing individual study or research according to the needs of the student. May be repeated. PREREQ: Permission of instructor.

**FREN 5590 French Senior Seminar: 3 semester hours.**
Advanced studies in selected topics from language, culture, literatures or methods of research. May be repeated up to 6 credits with different content. Conducted in French. PREREQ: Permission of instructor.

**GERM 5590 German Senior Seminar: 3 semester hours.**
Advanced studies in selected topics from language, culture, literatures, or methods of research. May be repeated up to 6 credits with different content. Conducted in German. PREREQ: Permission of instructor.

**FREN 5595 Topics in Language and Culture for Professions: 1-3 semester hours.**
Workshops offer students opportunities to enhance and supplement linguistic and cultural proficiency in a variety of professional contexts. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated three times with different content.

**GERM 5595 Topics in Language and Culture for Professions: 1-3 semester hours.**
Workshops offer students opportunities to enhance and supplement linguistic and cultural proficiency in a variety of professional contexts. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated three times with different content.

**FREN 5597 Prof Ed Development Topics: 1-3 semester hours.**
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. May be graded S/U.

**GERM 5597 Prof Ed Development Topics: 1-3 semester hours.**
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. May be graded S/U.

**FREN 5599 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**GERM 5599 Experimental Course: 1-6 semester hours.**
This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**GERM 6699 Experimental Course: 1-6 semester hours.**
This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

---

**Japanese Courses**

**JAPN 5570 Readings in Japanese: 2 semester hours.**
Reading, discussion, and writing on selected topics in Japanese literature. May be repeated once with different content. Conducted in English or Japanese, depending on each student's skills. PREREQ: Permission of instructor.

**JAPN 5599 Experimental Course: 1-6 semester hours.**
This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**JAPN 6699 Experimental Course: 1-6 semester hours.**
This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.
Languages and Literatures Courses

LANG 5515 Study in Major Natl Literature: 3 semester hours.
Studies in important literatures and cultures not covered by regular course offerings. Will include literatures in translation and literature written in English outside of America and the British Isles. Equivalent to ENGL 5555. PREREQ: Permission of instructor.

LANG 5537 The Teaching of Foreign Languages: 2-3 semester hours.
Study of the various methods used in teaching foreign languages, the extent and scope of language courses; the selection of suitable textbooks; audio-visual techniques and their contribution to language instruction. PREREQ: Permission of instructor.

LANG 5555 Introduction to Phonetics: 3 semester hours.
Introduction to descriptive linguistics focusing on phonetics and phonetic phenomena of English and the other languages of the world. Extensive practice in perception and production of such phenomena. Equivalent to ANTH 5555. PREREQ: ANTH/ENGL/LANG 1107.

LANG 5556 Introduction to Phonology and Morphology: 3 semester hours.
Phonological theory and analysis; current theories in morphology. Phonological rules, representations, underlying forms, derivation, justification of phonological analyses; morphological structure, derivational and inflectional morphology; relation of morphology to phonology. Equivalent to ANTH 5556. PREREQ: ANTH/ENGL/LANG 1107.

LANG 5577 Phonology: 3 semester hours.
Study of articulatory phonetics and practice in phonetic transcription of a broad survey of languages; phonological analysis and theory. PREREQ: Permission of instructor.

LANG 5584 Special Topics in Linguistics: 3 semester hours.
Rotating topics in different areas of linguistics. Consult current schedule of classes for exact course being taught. Specific and evaluated graduate-level activities and performances are identified in the course syllabus. PREREQ: Permission of instructor.

LANG 5588 Foreign Language Seminar: 3 semester hours.
Advanced studies in selected topics from language, culture, literatures or methods of research. May be conducted in English. May be repeated up to 6 credits with different content. PREREQ: Permission of instructor.

LANG 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. May be graded S/U.

LANG 5599 Experimental Course: 1-6 semester hours.
This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

Spanish Courses

SPAN 5500 Spanish Advanced Grammar: 3 semester hours.
Survey of selected grammar and composition topics on the advanced level. PREREQ: Permission of instructor.

SPAN 5505 Study Abroad: 1-3 semester hours.
Available only through study outside of US. Development of upper-division level communicative competencies in speaking, listening, reading, and writing, and of cultural awareness through exposure to customs, traditions, places, and peoples. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. Graded S/U.

SPAN 5510 Spanish for the Health Professions: 1-2 semester hours.
Elective course designed to meet the specific linguistic needs of health service providers in the context of the clinical encounter between provider and the Spanish-speaking patient, progressively presenting the vocabulary, structures, and related cultural issues as students set the stage for the clinical encounter, elicit the history of the present illness, past medical history, review of systems, and perform a physical exam. Within the structure of the medical interview, students will also learn to discuss medications and their effects, family history, social and sexual history, mental health, and preventive health and nutrition in the target language. May be taken twice with different content.

SPAN 5560 Interpretation and Translation I, II: 4 semester hours.
Theory and principles of translation and/or interpretation and their application in the fields of literature, business, law, and medicine. Topics may vary. May be repeated three times with a different content.

SPAN 5570 Readings in Spanish: 2 semester hours.
Reading, discussion, and writing on selected topics in Spanish literature. May be repeated once with different content. PREREQ: Permission of instructor.

SPAN 5575 Topics in Culture and Literature: 3 semester hours.
This course is designed to offer students an opportunity to explore a topic of interest in Hispanic literature and culture at a more advanced level through the study of a wide variety of literary and cultural texts. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated three times with different content. PRE-or-COREQS: CMLT 3360 or SPAN 3301 or SPAN 3302.
SPAN 5580 Independent Study in Spanish: 3 semester hours.
A directed project, under the guidance of an instructor, emphasizing individual study or research according to the needs of the study. May be repeated. PREREQ: Permission of instructor.

SPAN 5590 Spanish Senior Seminar: 3 semester hours.
Advanced studies in selected topics from language, culture, literatures or methods of research. May be repeated up to 6 credits with different content. Conducted in Spanish. PREREQ: Permission of instructor.

SPAN 5593 Spanish Internship: 1-3 semester hours.
Internship coordinated by faculty providing significant exposure to the use of Spanish in a professional service, or clinical environment. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated for up to 3 credits. Graded S/U.

SPAN 5594 Topics in Language and Culture for the Professions I: 1-3 semester hours.
Workshops offer students opportunities to enhance and supplement linguistic and cultural proficiency in a variety of professional contexts. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated three times with different content. Graded S/U.

SPAN 5595 Topics in Language and Culture for Professions II: 1-3 semester hours.
Workshops offer students opportunities to enhance and supplement linguistic and cultural proficiency in a variety of professional contexts. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated three times.

SPAN 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

SPAN 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times.

Master of Arts in Historical Resources Management
Mission: The MA in Historical Resources Management (HRM) trains students to explore established and emerging historical problems. The curriculum integrates traditional and interdisciplinary approaches to historical research with the development of digital and other professional skills needed to complete digital and other applied historical research projects. Students take courses in historical methods, digital history, research methodology, and professional development. An MA in HRM prepares students to use their historical, digital, and applied training in a variety of teaching, research, and other positions, including museums, consulting firms, non-profit organizations, government agencies, or further graduate study for academic careers.

Learning Outcomes
1. MA students will understand major trends, theories, and approaches in the field of History;
2. MA students will analyze and synthesize ongoing scholarly conversations in History and situate their arguments and projects in these contexts;
3. MA students will understand the range of digital resources available to historians and be able to use their chosen resources in producing and presenting research;
4. Students will define, research, and complete a significant research project within History studies, and be able to describe and justify their project in written and presentation formats;
5. Students will be able to apply their Historical learning to work in professionally-related academic, nonprofit, or business-sector contexts.

Degree Structure & Requirements
The program offers both a thesis-track and a non-thesis-track.

- In addition to required coursework, the thesis-track requires students to produce a written thesis based on their research that features a significant digital component.
- In addition to required coursework, students on the non-thesis track undertake a written exam and presentation on their independent research project.
- Both thesis and non-thesis options require students to present their research to the department and to pass an oral defense.

Digital Element
In order to develop a digital voice, which promotes both students' marketability and mastery of current trends in the field, students' research and its application must incorporate the digital humanities. This may take a variety of forms including the application of geographic information systems (GIS), spatial
analysis, digital media and production, 3D modeling, documentary production, web design, digital network analysis, data visualization, or another medium or method approved by the Graduate Director. The Graduate Director or faculty supervisor will help guide the development and direction of a student's digital element.

Coursework
A minimum of 30 credit hours of graduate work is required to complete the program. Fifteen of these credits must be at the 6600-level.

Beyond the required program components above, students must take at least one graduate-level course that will develop their ability to use digital tools in research (such as a course in geographic information systems), or an additional course that will further develop their academic and professional marketability (such as grant writing).

Coursework Limitations
Students may count up to six credits from outside the History department toward their degree, as approved by the Graduate Director.

Beyond the required program components above, students must take at least one graduate-level course that will develop their ability to use digital tools in research (such as a course in geographic information systems), or an additional course that will further develop their academic and professional marketability (such as grant writing).

Presentation and Oral Defense
There will be a final departmental presentation and oral examination for each student. For students pursuing the thesis option, the examination will be based on the thesis. For those with the non-thesis option, the written and oral examination will be based on the independent research project. The non-thesis examination will focus on both the scholarship in the field of digital history and the student's topic of focused research.

Separate GIS Certificate
Geographic information systems (GIS) is a powerful tool used for historical research, as well as for conducting analysis across a wide range of public and private sector applications. Training and experience with GIS is a highly marketable job skill. Many of our most successful graduates have combined an emphasis in historical GIS in the MA in HRM program with a Postbaccalaureate GeoTechnology Certificate, offered by the ISU Geosciences Department. Students must apply separately to the certificate program. Students may count up to six credits of GIS Certificate courses towards the MA in HRM, with approval of the Graduate Director. The combined programs usually add at least one semester to the time of completion.

Admission Requirements
The student must apply and meet all criteria for admission to the Graduate School. In addition, applicants must comply with the following departmental requirements:

1. Through the Graduate School Application system, applicants must submit three names of references to provide letters of recommendation, at least two of which should be from individuals familiar with their academic work.
2. Through the Graduate School Application system, applicants must submit a statement of interest regarding their historical studies and academic goals. Particular attention should be given to explaining how these interests and goals relate to the program.
3. Applicants should have at least 12 credits of previous course work in history.

Five-Year BA/MA Program:
Undergraduate students at ISU and BYU-Idaho may apply to enter the MA program during their fourth year, completing both degrees within as little as five years. Interested students should contact the department directly and students must apply by March 31 in their junior year.

Courses
HIST 5505 Problems in History: 3 semester hours. A thorough consideration of historical problems, particularly from a comparative perspective. Designed to give deeper insight into problems, issues, and topics which are treated more generally in other courses. May be repeated with different content.

HIST 5511 Intro to Museum Studies: 2 semester hours. History, philosophy, purposes, organization and administration of museums. Practical work in collections management and museum interpretation. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5518 US History for Teachers: 3 semester hours. U.S. history from indigenous cultures through modern America. Based on Idaho Department of Education Standards for High School Students. PREREQ: Permission of instructor.

HIST 5520 Topics in U.S. History: 3 semester hours. Examines topics and themes in U.S. history not covered in other courses. Repeatable with different topics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5521 Federal Indian Relations: 3 semester hours. This course provides a legal-historical examination of the relationship between North American tribal peoples and the U.S. federal government between 1750 and the present. Special emphasis will be placed on Indian removal, assimilation policy, treaty negotiation, the Dawes Severalty Act, education policy, Indian reorganization policy, and termination.

HIST 5523 Idaho History: 3 semester hours. A survey of the social, cultural, environmental, and political history of Idaho from pre-contact indigenous cultures to the present, emphasizing Idaho's relation to other states and regions in the West.

HIST 5525 Women in North American West: 3 semester hours. Comparative examination of the varied experiences of women in the North American West. Analyzes perceptions of women and women's views of themselves, women's activism, and women's cultural activities. Places special emphasis on the use of non-textual historical sources in uncovering the past lives of North American western women. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5527 North American West: 3 semester hours. History of the North American West from pre-contact indigenous cultures to the present, with an emphasis on exploration, settlement, ethnic groups, borderlands, environment, federal policy, and cultural depictions.
HIST 5529 Foreign Relations since 1900: 3 semester hours.
An introduction to the history of international relations in the twentieth century. This course emphasizes the impact of wars on various peoples and cultures, anti-colonialism and the rise of the so called 'Third World,' and the processes of political, cultural and economic 'globalization.'

HIST 5530 Global Environmental History: 3 semester hours.
Comparative examinations of historical interactions between humans and environmental factors in various time periods and regions throughout the world, and an assessment of their impacts on historical change.

HIST 5531 Topics in Global History: 3 semester hours.
Examines from a transregional or transnational perspective topics and themes in global history not covered in the survey. Topics may include revolutions, culture and art, imperialism, and approaches to world history. Repeatable with different topics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5535 Colonial Frontiers in America and Africa: 3 semester hours.
A comparative examination of exploration, conquest, and resistance, and the interaction of cultures in frontier settings. Examines both the realities of the frontier and their impact on Western thought and imagination.

HIST 5537 Families in Former Times: 3 semester hours.
History of the family, marriage patterns, domestic lives. May be theme- or topics-based. Examines changes in the relationships within families and the changing role of the family in society. Repeatable with different topics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5538 Women in Pre-Industrial Europe: 3 semester hours.
Compares and contrasts the social, cultural, and economic roles of women in Europe pre-1700. May be theme- or topics-based. Repeatable with different topics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5539 Feminism and Equality in World History: 3 semester hours.
Comparative study of the history of feminism and women's rights in different world regions, involving the social constructs of gender, race, and class. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5543 Topics in European History: 3 semester hours.
An examination of periods or topics in European social, cultural, and economic history and their transnational or global impacts. Repeatable with different topics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5546 Topics in Ancient History and Culture: 3 semester hours.
Examines themes or topics in Ancient History not covered in other courses. Repeatable with different topics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5548 Topics in Medieval History and Culture: 3 semester hours.
Examines themes or topics in Medieval history and culture in greater depth than or not covered in other courses. Repeatable with different topics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5551 Topics in Latin American History and Culture: 3 semester hours.
Examines topics and themes in Latin American history and culture, not covered in the survey. Topics may include Latin American environmental history, indigenous movements, revolutions, culture and art, and cultural movements in Latin America. Repeatable with different topics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5552 Topics in Asian History and Culture: 3 semester hours.
Examines topics and themes in Asian history and culture not covered in other classes. Repeatable with different topics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5553 Renaissance Creativity: 3 semester hours.
Examination of the conditions promoting individual creativity among Europeans in the first global age, 1400-1700. Special emphasis on geospatial research on the history of printing.

HIST 5554 Topics in Middle East History and Culture: 3 semester hours.
Examines topics and themes in Middle East history and culture not covered in other classes. Topics may include Iraq and Iran, intellectual history of Islam, early modern empires. Repeatable with different topics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5555 Topics in African History and Culture: 3 semester hours.
Examines topics and themes in African history and culture not covered in other classes. Topics might include wars and revolutions, African intellectuals, or colonialism. Repeatable with different topics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5556 US Political History: 3 semester hours.
Study of the political history of the United States involving a discussion of theories of popular voting behavior, critical elections, and political party systems. Equivalent to POLS 5565.

HIST 5557 Historical Geography of Idaho: 3 semester hours.
Influences of geography and geology on Idaho's economic, political and cultural history. May be team taught, and includes field trips, discussion sections. Equivalent to GEO 5571 and POLS 5571.

HIST 5574 Islam in the Modern World: 3 semester hours.
This course covers Islamic trends and movements in a global setting from the eighteenth century to the present. Islam will be considered in a wide range of national and transnational contexts with special attention on the interaction between Islam, society, and politics. Repeatable with different topics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5578 Imperialism and Progressivism: 3 semester hours.
A study of the world 1880-1920. Movements of change within the West, Third World responses to the Western challenge, and global crisis.
HIST 5579 History of Disease, Medicine, and Society: 3 semester hours.
Topics or theme-based course in the history of medicine, disease, and public health, and the associated perceptions, treatments, policies, and effects on society both within the medical community and by the public at large in Europe and the Americas since the 16th century. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HIST 5586 History Field Seminar: 3-9 semester hours.
Combines historical study with experiential learning involving intensive on-location study or multiple site or archive visits. Repeatable with different topics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor.

HIST 5589 GIS for Social Sciences: 3 semester hours.
An introduction to geographic information systems theory and applications focusing on subjects related to human systems in historical context (census, health, urban communities, etc.). Students will work directly with GIS software and learn foundational data management and processing skills along with introductory spatial analysis. Requires competence in computer operating systems. S

HIST 5590 Cartography History and Design: 3 semester hours.
History of how map-makers represent geographic, spatial data. Special attention to the elements of successful cartographic design. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: HIST 5590L

HIST 5590L Cartography Lab: 1 semester hour.
Focuses on the application of Cartographic design concepts and techniques discussed in lecture. Provides students with hands-on practice designing map products of publication quality. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: HIST 5590.

HIST 5591 Seminar: 3 semester hours.
Reading, discussion, and preparation for research papers on selected topics.

HIST 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. May be graded S/U.

HIST 5599 Experimental Course: 1-6 semester hours.
This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

HIST 6600 Graduate Proseminar: 3 semester hours.
Introduction to graduate studies. Focus on contemporary historiographical debates, with emphasis on understanding significant developments in the profession. May be repeated with different topics. PREREQ: Admission to the Historical Resources Management Program.

HIST 6605 Introduction to Graduate Studies in History: 3 semester hours.
An introduction to major trends, theories, approaches, and shifts in the discipline of History. Also introduces graduate-level research methods and topics in professionalization, such as conference applications and presentations. PREREQ: Classified Graduate Status or permission of the instructor.

HIST 6610 History in the Digital Age: 3 semester hours.
Seminar exploring the developing field of digital history and investigating multiple tools for analysis and presentation. The course examines how geographic information systems and other digital tools are changing the field of history. Emphasis placed on students developing their own project proposals.
Idaho Museum of Natural History

Director: Dr. Leif Tapanila

Mission Statement

The mission of the Idaho Museum of Natural History is to acquire, preserve, study, interpret, and display objects relating to the natural history of Idaho and the Northern Intermountain West for research and education. The Museum seeks to enhance in the citizens of Idaho and visitors an understanding of Idaho’s natural and cultural heritage. Specific areas of interest encompass the anthropology, botany, geology, paleontology, and zoology of Idaho and the Northern Intermountain West. Audiences served include citizens of Idaho, visitors, and the national and international community of students and scholars. Information is disseminated through exhibitions, public and professional presentations, publications, formal and informal education, telecommunications, and other interpretive programs.

Curators in Anthropology, Earth Science and Life Science lead national and international research. Our active research profile supports acquisition and use of collections for all areas of natural history research and education. ISU faculty and students have access to Museum collections for instruction, training, and graduate theses and dissertations.

Our Public Programs Division develops and implements programs and exhibitions on a wide range of science topics, emphasizing current Museum research and environmental and ecological themes. These programs are both university level and for K-12 education.

The Museum offers undergraduate and graduate students educational credits under the Museum subject code and through courses in Anthropology, Biology, Education, Geosciences, History, and other affiliate Idaho State University departments. See Museum course descriptions (http://coursecat.isu.edu/undergraduate/allcourses/muse) in the All Courses section of the catalog.

For more information, please visit the Idaho Museum of Natural History’s website at: imnh.isu.edu.

Courses

MUSE 5550 Independent Study in Museum Methods: 1-3 semester hours.
Individual projects based on student's background and interests. Could include, but not limited to, advanced work in collections management, exhibit design and construction, museum education, or administration. May be repeated up to 6 credits. PREREQ: MUSE 4411 or permission of instructor.
Music

Chair and Professor: Thomas Hasenpflug

Professors: Anderson, Bond, Brooks, Earles, Lane, Livingston Friedley,

Associate Professors: S. Helman

Assistant Professors: Armstrong, Cha, Harville, Kloss

Adjunct Faculty: G. Adams, M. Adams, Attebery, Banyas, Colby, Cox, Drake, G. Friedley, M. Helman, Hughes, Neiwirth, O’Brien, Sorensen

Master of Education in K-12 Education / Music Education

The master's degree in Music Education is a degree program housed in the College of Education and presented in collaboration with the Department of Music. For admission into this program, apply first to the College of Education Department of Educational Foundations. Music content courses are listed in this section.

The master's degree in Music Education is designed to strengthen the student’s understanding, knowledge, and skills in three major areas — Core Professional Studies, Specialty Studies, and Integrative Field Research Studies — as they relate to music education. The program is designed to meet the needs of music education specialists who work in the public school system (grades K-12) or who aspire to further graduate study and teaching in music education.

Admission Requirements

The student must apply to, and meet all criteria for, admission to the Graduate School. In addition to the general requirements of the Graduate School, individuals applying for admission to the Master of Education/Music Education, must meet the following admission requirements:

- Bachelor’s degree in music from an accredited college or university.
- Completion of entrance examinations in music history and music theory. Students whose examination indicate deficiencies will be granted Classified (w/PR) status. Any course used to remove deficiencies does not count toward the degree. When deficiencies have been removed, the student may seek Classified status.
- It is expected that students will meet basic requirements for public school certification.

General Requirements

Students complete a minimum of 32 semester credit hours for the master’s degree. Students seeking Idaho Certification in the area of their training must meet any requirements of the State Board of Education for certification. It is recommended that students have professional experience in an education context.

Thesis Project (or additional Music Electives): 3

Total Hours: 32

2017-18 Idaho State University Graduate Catalog 95
MUSP 5577 Symphonic Band: 1 semester hour.
Rehearsal and performance of traditional and contemporary wind literature in on-and off-campus concerts.

MUSP 5578 Jazz Band: 1 semester hour.
Rehearsal and performance of standard and contemporary big-band literature. One or two concerts are given each semester.

Music Courses

MUSC 5506 Opera Literature: 3 semester hours.
Masterworks of operatic literature.

MUSC 5507 Symphonic Music Literature: 3 semester hours.
Masterworks of symphonic literature.

MUSC 5508 Chamber Literature Music: 3 semester hours.
Masterworks of chamber music literature.

MUSC 5511 Instrument Literature: 2 semester hours.
A study of instructional materials and literature for an orchestral instrument or guitar. PREREQ: Junior level standing in applied music or permission of instructor.

MUSC 5512 Instrument Pedagogy: 2 semester hours.
A survey and comparative study of pedagogical materials, principles and procedures. Application of pedagogical techniques in teaching situations.

MUSC 5513 Piano Literature: 2 semester hours.
A study of instructional materials and literature for piano.

MUSC 5514 Piano Pedagogy: 2 semester hours.
A survey and comparative study of pedagogical materials, principles and procedures for piano. Application of pedagogical techniques in teaching situations.

MUSC 5515 Seminar in Band Music: 2 semester hours.
Analysis and study of instrumental works from the Baroque to the present era with particular attention to performance practice.

MUSC 5516 Seminar in Choral Music: 2 semester hours.
Analysis and study of choral works from the Renaissance through the present era with particular attention to performance practice.

MUSC 5517 Advanced Conducting: 2 semester hours.
Designed for secondary school music teachers, this course provides opportunity to discover and analyze technical conducting problems in music of the various historical eras.

MUSC 5518 Seminar in Orchestral Music: 2 semester hours.
Analysis and study of orchestral works from the Baroque to the present era with particular attention to performance practice. PREREQ: MUSC 3305 and MUSC 3306 or equivalent.

MUSC 5519 Voice Literature: 3 semester hours.
Instructional materials and literature for voice.

MUSC 5520 Voice Pedagogy: 3 semester hours.
A survey and comparative study of pedagogical materials, principles, and procedures for voice, with application.

MUSC 5524 Music in the Baroque Era: 3 semester hours.
Intensive study of music from Monteverdi through J.S. Bach.

MUSC 5525 Music in the Classical Era: 3 semester hours.
Intensive study of music in the Classical era, principally 1730 through Beethoven.

MUSC 5526 Music in the Romantic Era: 3 semester hours.
Intensive study of music in the Romantic era, principally 1800 to 1900.

MUSC 5527 Music in the Modern Era: 3 semester hours.
Intensive study of music in the Modern era, principally since 1900.

MUSC 5529 Advanced Music History Survey: 3 semester hours.
Study of music history topics, including vocal and instrumental forms and styles.

MUSC 5532 Instrumental Arranging: 2 semester hours.
Arranging music for different instrumental combinations and various textures.

MUSC 5533 Composition: 2 semester hours.
Individual instruction in the organization of musical ideas into logical and homogeneous forms with an emphasis on contemporary styles. May be repeated up to 12 credits.

MUSC 5535 Analysis of Musical Styles: 2 semester hours.
The techniques of stylistic analysis of music from the Baroque period through the 20th century.

MUSC 5538 Special Topics in Music Theory: 2 semester hours.
Advanced studies in selected topics in music theory. May be repeated up to 6 credits with change of topic.

MUSC 5539 Advanced Music Theory Survey: 3 semester hours.
Study of music theory methods, including harmonic and formal analysis.

MUSC 5545 Advanced Instrumental Conducting: 2 semester hours.
Designed for secondary school music educators. Practical experience in analyzing and rehearsing instrumental conducting techniques for a wide variety of instrumental music. PREREQ: MUSC 3320.

MUSC 5546 Advanced Choral Conducting: 2 semester hours.
Designed for secondary school music educators. Practical experience in analyzing and rehearsing choral conducting techniques for a wide variety of choral music. PREREQ: MUSC 3319.

MUSC 5562 Studies in Music Curricula: 3 semester hours.
Study of historical, philosophical, and current issues in school music curricula.

MUSC 5563 Psychology of Music: 3 semester hours.
Overview of music learning through concepts and trends in psychology such as perception, identity, and culture.

MUSC 5591 Independent Study: 1-4 semester hours.
Supervised study in selected areas, primarily research, writing, or analysis. May be repeated to a maximum of 7 credits. PREREQ: Permission of instructor and Department Chair.

MUSC 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees, 1-3 credits. May be repeated. May be graded S/U.

MUSC 5598P Prof Development Workshop: 3 semester hours.
New methods and opportunities to enhance and supplement skills. Subject to the approval of the Dean of the student's college, a maximum of eight credits earned in workshops may be applied toward a degree; students taking the courses only for personal development may choose the 0-credit option; those seeking professional development must choose a for-credit option.

MUSC 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

MUSC 6601 Foundations in Music Education: 3 semester hours.
Historical, philosophical, and psychological foundations of music education, with their application to current instruction and evaluation.

MUSC 6610 Practicum in Rehearsal Techniques: 2 semester hours.
Advanced techniques of ensemble rehearsal, including procedures, diagnostic and achievement evaluation, planning and pedagogy. PREREQ: MUSC 5515 or MUSC 5516, MUSC 5517.
**MUSC 6650 Thesis Project: 1-4 semester hours.**
The student will present a public graduate recital, supervised by a faculty member in the music department. In addition to the recital, a paper will be submitted demonstrating extensive familiarity with research relative to the music performed in the recital. This paper will be written under the supervision of a faculty member from the College of Education and faculty members from the Music Department. The completed paper and recital are to be accepted by the examining committee and the paper filed with the dean of the College of Education. A recording of the recital will be filed with the music department. Graded S/U.

**MUSC 6671 Music Education Seminar: 3 semester hours.**
Advanced examination of concepts, principles, models, and theories of instruction in music education. Seminar format requires active participation in readings, discussion, presentations, and written assignments. **PREREQ:** MUSC 6601 and MUSC 6610.

**MUSC 6695 Graduate Recital: 2 semester hours.**
Public recital culminating from applied music study at the graduate level. Graded S/U.

**MUSC 6699 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.
Theatre

Director and Professor: Thomas Hasenpflug
Professors: Dienstfrey-Swanson, Gross, Schroder, Young
Associate Professors: Harwood
Assistant Professors: Ballam
Lecturer: Espinosa
Affiliate Faculty: Romine-Gabardi

Goals
The primary objectives related to the graduate Theatre program are to help students develop the following competencies:

1. A highly developed understanding of the history and literature of the art.
2. The ability to read, understand, and critique scholarly theatre-related essays and books.
3. The ability to contribute to general theatre scholarship.
4. The demonstrated ability to continue with graduate work toward a terminal degree, whether a master's degree or doctorate.
5. To develop pedagogical skills enabling the students to pass on their knowledge to others.
6. Knowledge of theatre as a social and aesthetic experience.
8. Competence in basic acting and directing skills.
10. Competence in study skills.
11. Competence in research skills.
12. Competence in thinking clearly, logically, and independently.
13. Ability to effectively communicate and work within a collaborative art.

Master of Arts in Theatre
Admission Requirements
The student must apply to, and meet all criteria for, admission to the Graduate School.

The minimum total credits required for the Master of Arts in Theatre degree is 30 semester hours. The Theatre electives may be selected from 5000- and 6000-level courses in Theatre or other graduate courses approved by the Theatre Director of Graduate Studies. Students may not register for a 5000-level course if they have already earned undergraduate credit in the equivalent 4000-level course, unless approval is obtained from the Theatre Director of Graduate Studies.

Courses

THEA 5500 Theatre Backgrounds I: 3 semester hours.
Theatre and drama, from their origins through the Jacobean period.

THEA 5501 Theatre Backgrounds II: 3 semester hours.
Study of the theatre and drama from the Spanish Golden Age through the well-made play.

THEA 5502 Stage Costume History: 3 semester hours.
A survey of the history of western clothing from Ancient Egypt through the present. Study of the social context and motivations behind the evolution of clothing, silhouette, and costume components.

THEA 5503 Stage Costume Design: 3 semester hours.
Costume design for the theatre incorporating the influence of period, concept, and mood. Course work includes text analysis, research, drawing, painting, and collage.

THEA 5504 Problems in Acting: 3 semester hours.
Focuses on special acting problems such as characterization, movement, voice, pantomime, and film and television acting. Content varies from year to year. May be repeated once with the consent of the instructor.

THEA 5505 Advanced Costume Construction: 3 semester hours.
A study in period corset and millinery construction. A lab course in which students gain practical experience and skills crucial to a career in costume technology.

THEA 5506 Advanced Light Design: 3 semester hours.
Study of lighting design in performing arts. Students gain knowledge through actualized projects, study of television and film lighting, and exploration of the Controllable properties including color.

THEA 5512 Scenic Painting: 3 semester hours.
A study of painting techniques as used in theatrical scenery; theory, practice, and equipment will be investigated as they apply to the art of stage painting.

THEA 5519 Modern European Theatre: 3 semester hours.
Continental and British theatre and drama from 1850 to mid-twentieth century.

THEA 5520 American Theatre: 3 semester hours.
American theatre and drama from the beginning to mid-twentieth century.

THEA 5521 Basic Pattern Drafting for Stage Costuming: 3 semester hours.
Cutting patterns from measurements. Adjusting various patterns to designs. Alterations and fittings.

THEA 5522 Period Pattern Drafting for Stage Costuming: 3 semester hours.
Use of the basic patterns to reproduce historical costumes from the 12th century to 1950.

THEA 5524 Advanced Acting Styles: 3 semester hours.
Study of the various period styles of acting including Greek, Medieval, Elizabethan, Restoration, and 19th century melodrama. The student will act in a series of special projects encompassing a variety of styles.

THEA 5526 Advanced Scene Design: 3 semester hours.
Study of scene design in performing arts and beyond. Students work toward portfolio-quality work in realized and non-realized projects in theatre, television, film, and design areas.

THEA 5555 Beginning Stage Direction: 3 semester hours.
Consideration of aesthetics of dramatic production and the relationship of basic techniques of stage direction. Includes the direction of scenes and short one-act plays. PREREQ: Permission of instructor.

THEA 5556 Advanced Stage Direction: 3 semester hours.
Advanced theories in techniques of stage direction including consideration of period styles. The student will direct a series of advanced projects including scenes and a complete one-act play. PREREQ: THEA 5555 or permission of instructor.
THEA 5570 Contemporary Theatre: 3 semester hours.
World drama and theatre during the five most recent decades.

THEA 5590 Practicum Theatre Arts II: 1-3 semester hours.
Integrated projects for advanced students in various areas of theatre arts emphasizing analysis and presentation of experimental work. May be repeated for a maximum of four credits, with different content.

THEA 5591 Independent Research Project II: 1-2 semester hours.
Under the supervision of the drama faculty, students will undertake special research projects in theatre. May be repeated once with different content.

THEA 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. May be graded S/U.

THEA 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

THEA 6601 Introduction to Research in Drama: 3 semester hours.
Research in Drama.

THEA 6641 Seminar in Drama Theory: 3 semester hours.
Drama theory.

THEA 6642 Seminar in Drama Theory: 3 semester hours.

THEA 6650 Thesis: 1-6 semester hours.
Thesis. 1-6 credits. May be repeated.

THEA 6660 Graduate Degree Papers: 1-2 semester hours.
1-2 credits. May be repeated. Graded S/U.

THEA 6691 Independent Study in Drama: 1-4 semester hours.
Supervised individual study in drama. Instructor's consent required. May be repeated for a maximum of 4 credits.

THEA 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.
Political Science

Chair: Lybecker
Professors: Anderson, Gabardi, Lybecker, McBeth
Assistant Professors: Callen, Gleason, Kirkpatrick, Stoutenborough
Adjunct Faculty: Phillips
Emeritus Faculty: Burns, Foster, Hjelm, Maughan, Nilson

Doctor of Arts in Political Science

This program is intended for students interested in careers teaching political science in a variety of higher education settings ranging from community colleges to universities. Doctor of Arts recipients are prepared to teach a variety of political science courses including those in American politics and in two additional specialties selected from among the fields of public law, political theory, comparative/international politics, and public administration.

Doctor of Arts students will have three interdisciplinary options to choose from:

Option #1: Doctoral students will take 9 credits each in TWO of the following five cooperating social science departments: Anthropology, Economics, History, Psychology, and Sociology.

Option #2: Doctoral students will take 18 credits in ONE of the following five cooperating social science departments: Anthropology, Economics, History, Psychology, and Sociology.

Option #3: Doctoral students will take 18 credits from at least two of the five cooperating social science departments: Anthropology, Economics, History, Psychology, and Sociology.

The doctoral degree is generalist in nature. The emphasis is on a thorough grounding in political science supported by work in committee-approved social science disciplines. The program places emphasis on teaching political science rather than on the development of a narrow research specialty. A nine-credit-hour component of the program includes the development of pedagogical skills as well as sustained experience in the classroom.

Goals

1. Graduates will master literature-based knowledge in two areas of political science.
2. Graduates will gain this knowledge of political science through an interdisciplinary approach that includes course work in one or two cognate social science disciplines.
3. Graduates will have extensive training in pedagogy, craft a distinct teaching philosophy, and demonstrate a variety of pedagogical techniques and skills.
4. Graduates will demonstrate their research skills by presenting their work at professional conferences and/or submitting their work for publication review.
5. Graduates will gain employment and establish their careers in higher education.

Objectives

1. Graduates will pass comprehensive examinations.
2. Graduates will present papers at professional conferences.
3. Graduates will be accepted into doctoral graduate programs.
4. Graduates will find employment in education, public service, and business.

Thesis/non-thesis options are available.

Areas of emphasis in the master’s program are limited, because of the research nature of the degree, to American governmental institutions and political behavior, public law, political theory, public administration and comparative/international politics.

Master of Public Administration

The Master in Public Administration degree is an inter-university cooperative graduate program offered jointly by Boise State University, Idaho State University and the University of Idaho. The purpose of the program is to provide present and prospective public administrators with the basic intellectual preparation necessary to understand and to adjust to a changing and challenging environment, through an introduction to the theories and practices of administration, management and social science research as these relate to effective performance in public organizations.

The inter-university master’s program has been designed in accordance with the Guidelines and Standards for Professional Master’s Degree Programs in Public Affairs and Public Administration prescribed through the National Association of Schools of Public Affairs and Administration (NASPAA).

Goals

1. Graduates will develop an appreciation of serving the public interest.
2. Graduates will respect the law and the Constitution.
3. Graduates will demonstrate personal integrity.
4. Graduates will promote ethical organizations.
5. Graduates will develop distinctive public administration skills.
6. Graduates will strive for professional excellence and updating of skills throughout their professional careers.

Doctor of Arts in Political Science

Admission Requirements
For full admission to the Doctor of Arts program, the applicant should have a cumulative GPA of 3.0 for the last two years of undergraduate study, an average score in the 50th percentile or above on any one of the three sections of the GRE exam, and a 3.5 GPA in all previous graduate study. The candidate must also submit to the Department of Political Science three letters of recommendation and a statement of his/her personal goals that will be weighted equally with the applicant’s GPA and GRE scores.

The program also employs an admission scoring system which awards D.A. applicants points based on the evaluation and scoring of four components:

1. Upper-division undergraduate GPA or GPA in an MA program
2. Scores on the Graduate Record Exam (GRE)
3. The quality of letters of recommendation
4. The quality of the applicant’s goal statement. Applicants who are slightly under official admission requirements may be admitted if they are given an overall favorable admissions score.

General Requirements
An applicant entering with a B.A. or B.S. degree must fulfill a minimum of 79 credit hours including the teaching internship and up to a maximum of six dissertation credits. No more than 18 interdisciplinary credit hours (exclusive of interdisciplinary seminars) count toward the 79 credit hour minimum requirement. Candidates have the option of completing the M.A. or M.P.A. in political science en route to the D.A.; if they choose the non-thesis M.A. or M.P.A. program, only 30 hours of course work from the M.A. or M.P.A. will apply to the Doctor of Arts program. Candidates entering the Doctor of Arts program with M.A. degrees must complete a minimum of 49 credit hours, including two full-time consecutive semesters in residence, including a maximum six hours of dissertation credit. The total length and number of credit hours of a student’s program, above the minimum, is dependent upon the student’s academic preparation and his/her committee’s recommendations.

Political Science
Doctoral students are examined in three fields of political science. For all doctoral students, the major field of American politics is required.

1. American Politics, and
2. Any two of the following fields:
   a. Public Law
   b. Political Theory
   c. Comparative/International Politics
   d. Public Administration

Doctor of Arts students are required to take nine hours of 6600-level seminar courses (not including POLS 6694 Seminar in College Teaching) selected from the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLS 6611</td>
<td>Seminar Political Theory</td>
<td>3</td>
</tr>
<tr>
<td>POLS 6612</td>
<td>Seminar State and Local Politics</td>
<td>3</td>

<td>Seminar Public Administration and Public Policy</td>
<td>3</td>
</tr>
</tbody>
</table>

Students may repeat these courses, even from the same professor, as long as the subject matter is different. Each course can only be repeated once. D.A. students are required to complete POLS 5519 Political Research Methods, POLS 5519L. Doctor of Arts students are also required to take POLS 8850 Dissertation, for a minimum of 3 credits.

Doctor of Arts students write a doctoral dissertation that may deal with either substantive disciplinary issues or pedagogical innovations or techniques. The D.A. student committee will consist of two political science faculty and a Graduate Faculty Representative (GFR). The student may request a professor from his/her interdisciplinary area to serve as the G.F.R.

After the successful completion of written comprehensive examinations, the D.A. student is required to present and defend a dissertation prospectus to the doctoral committee. The D.A. student may elect to have a public presentation of the dissertation prospectus (a colloquium) separate from the prospectus defense. When the candidate’s committee determines that the dissertation is ready for a defense, there will be a public presentation by the student followed by a closed and balloted defense of the dissertation with the candidate and the committee.

Pedagogy
Students must complete a nine-credit component of pedagogy to include POLS 6694, POLS 7702, and POLS 7703.

Interdisciplinary Component
Option #1
D.A. students will take 9 credits each in TWO of the following five cooperating social science departments: Anthropology, Economics, History, Psychology, and Sociology.

Option #2
D.A. students will take 18 credits in ONE of the following five cooperating social science departments: Anthropology, Economics, History, Psychology, and Sociology.

Option #3
D.A. students will take 18 credits from at least two of the five cooperating social science departments: Anthropology, Economics, History, Psychology, and Sociology built around an interdisciplinary theme such as methodology or theory (courses and theme must be pre-approved by the chair of the student’s D.A. committee).

Interdisciplinary Classes
D.A. students must take POLS 6620 Seminar Philosophy of Social Science, and POLS 6621 Seminar Interdisciplinary Topics in Social Science.

Examinations
Comprehensive written examinations are administered at the conclusion of the program of study that test the candidate’s knowledge of three fields of political science. This occurs after all course work is completed and before the dissertation prospectus is defended.
Master of Arts in Political Science

Admission Requirements
The student must apply to, and meet all criteria for admission to the Graduate School. In addition to the general requirements of the Graduate School, a student must have achieved a cumulative GPA of 3.0 in upper-division undergraduate study, and submit official GRE scores. The applicant must also submit to the Department of Political Science three letters of recommendation and a statement of his/her personal goals that will be weighted equally with the applicant’s GPA and GRE scores.

The program employs an admission scoring system that awards M.A. applicants points based on the evaluation and scoring of four components:

1. upper-division undergraduate GPA;
2. scores on the Graduate Record Examination (GRE);
3. the quality of letters of recommendation; and
4. the quality of the applicant’s goal statement.

Students may choose a thesis or non-thesis program. The requirements for these respective options are detailed below.

Thesis Program
Requirements include a total of 36 credits in graduate level courses approved by the Department of Political Science and the Graduate School. Internship credits are not counted as part of the 36 total credit requirement. Required courses are POLS 5519 and POLS 5519L (Political Research Methods, 4 credits) and POLS 6650 (Thesis, 6 credits). Students must also complete course work in two sub-fields. Other requirements include a minimum of 15 credits (other than POLS 6650) taken at the 6000-level; a maximum of 9 credits of directed reading courses; a comprehensive oral examination that covers the student’s graduate course work and the literature in two sub-fields; and the M.A. thesis. The thesis may be defended a second time if the first defense is not satisfactory and further revisions are required.

Non-thesis Program
POLS 5519 Political Research Methods and POLS 5519L, are required. Other requirements include a total of 36 credits in graduate level courses approved by the Department of Political Science and the Graduate School; a minimum of 15 credits taken at the 6000-level; a maximum of 9 credits of directed reading courses; a comprehensive written examination that covers the student’s graduate course work and the literature in two sub-fields; and a final oral examination, which, like the final written examination, may be taken no more than twice. Internship credits are not counted as part of the 36 total credit requirement.

Masters of Public Administration

Admission Requirements
The student must apply to, and meet all criteria for, admission to the Graduate School. In addition to the general requirements of the Graduate School, the student must comply with departmental requirements. Students may enroll in the MPA program by applying to one of the participating universities. Acceptance by any one of the three universities admits a student into the MPA program. A matriculated student should complete graduate studies at the institution that offers the area of specialization that she/he wishes to emphasize. Each student’s program will be established by an advisory committee consisting of three faculty members. It is anticipated that students will come from widely differing academic preparations, since no specific undergraduate program is required in preparation for the MPA program. However, some course work in humanities and social sciences is essential to the foundation of the MPA program for all students.

In addition to the general requirements of the Graduate School, students seeking admission must have completed a baccalaureate degree from an accredited institution, demonstrate satisfactory academic competency by attaining a cumulative GPA of 3.0 in upper-division undergraduate course work, or a 3.5 GPA in previous graduate courses, submit official GRE scores, submit three letters of recommendation from individuals who are qualified to evaluate the applicant’s academic potential, and submit a statement of the student’s personal goals. The letters and statement of goals will be weighted equally with the applicant’s GPA and GRE scores. Please contact the Department for specific guidelines for letters of recommendation and statement of goals.

The program employs an admission scoring system that awards MPA applicants points based on the evaluation and scoring of four components:

1. upper-division undergraduate GPA or GPA in an M.A. program;
2. scores on the Graduate Record Examination (GRE);
3. the quality of letters of recommendation; and
4. the quality of the applicant’s goal statement.

General Requirements
The MPA degree may be achieved through the successful completion of at least 36 semester credit hours of approved course work with an additional 3 credits of public service internship for students who are not mid-career. The internship requirement may be waived for students who have substantial professional work experience in public service or the not-for-profit sector. The MPA director will determine if a student’s experience is substantial, and if so can approve waiver of the internship requirement. Twenty-four credit hours must be completed in courses selected from prescribed “core areas” with 12 additional credit hours completed in designated optional areas of emphasis. Students may follow a thesis or non-thesis option in pursuing the MPA. Students choosing to write a thesis (POLS 6650 - 6 credits) do so in addition to normal MPA course work and internship requirements. Students must have completed 21 credit hours of core course work before taking the Capstone in Public Administration course. Those following the thesis option will complete an oral examination covering the thesis and program course work. The academic program of each student must satisfy the general requirements of an integrated program designed to meet career objectives of the student in public administration.

Core and Optional Area Requirements
The specific course requirements of the MPA program are set forth in a list of courses that has been approved by the inter-university committee.

This list is available through each of the cooperating universities. Courses are available at each institution in the “core areas.” The optional “areas of emphasis” may vary among the universities according to the resources and competence that exist in the respective departments. A description of those areas of emphasis that are presently operational at each institution and admission forms to the MPA program are available through the Political Science Department at Idaho State University or the Departments of Political Science at Boise State University or the University of Idaho.

Interdisciplinary Specialized Area in Criminal Justice
For the specialized area in Criminal Justice, students need to take the 9 core courses (27 credits) and three credits of internship (for students without career experience) required for the MPA program and take additional 12 credits from the courses listed below to fulfill the elective requirements. The specialized area is an interdisciplinary curriculum shared between the Department of Political Science and the Department of Sociology, Social Work and Criminal Justice. Other courses appropriate to the Criminal Justice emphasis may be offered by both departments and can be taken by the student with permission of the MPA advisor.
SOC 5531  Criminology  3
SOC 5592  Topics in Criminal Justice  3
SOC 5536  Elite Deviance and Crime  3
SOC 5538  Sexual Crimes  3
POLS 5542  Constitutional Law  3
POLS 5543  Civil Rights and Liberties  3

Other courses with variable topics such as SOC 6601, SOC 6621, SOC 6613, or SOC 6605 may be taken if these courses are offering a Criminal Justice theme.

I. Core Area Requirements

All students must take 27 credit hours of core area courses. Students must choose nine courses from this list, one of which is POLS 6680 Capstone in Public Administration.

POLS 6680  Capstone in Public Administration  3
Select eight of the following: 24
   POLS 5505  Democracy and Governance
   POLS 5541  Administrative Law
   POLS 5551  Public Organizational Theory
   POLS 5552  Public Budgeting and Finance
   POLS 5553  Public Policy Analysis
   POLS 5554  Public Workplace Issues
   POLS 5558  Public Administration Ethics
   POLS 6622  Advanced Topics in Research
   POLS 6623  Program Assessment
   POLS 6680  Capstone in Public Administration
   POLS 5519  Political Research Methods

Total Hours  27

Methods/Assessment (take 1 course for 3 credits)
   POLS 6622  Advanced Topics in Research  3
   POLS 5519  Political Research Methods  3
   POLS 6623  Program Assessment  3

Organizations, Management, and Analysis (take 2 courses for 6 credits)
   POLS 5551  Public Organizational Theory  3
   POLS 5553  Public Policy Analysis  3
   POLS 5554  Public Workplace Issues  3

Public Finance, Budgeting and Planning (take 2 courses for 6 credits)
   POLS 5552  Public Budgeting and Finance  3
   POLS 5509  Community and Regional Planning  3

Administrative Overview (take 2 courses for 6 credits)
   POLS 5505  Democracy and Governance  3
   POLS 5558  Public Administration Ethics  3

Capstone (take 1 class for 3 credits)
   POLS 6680  Capstone in Public Administration  3

II. Specialized Areas

All students must take 12 credit hours from the list below. Courses used to fulfill a core requirement cannot also be counted here.

Specialized Area #1: State, Local, and Non-Profit Administration (Take 4 courses)
   POLS 5567  State and Local Administration (required)
   POLS 5505  Democracy and Governance
   POLS 5506  Intergovernmental Relations
   POLS 5508  Urban Spaces
   POLS 5509  Community and Regional Planning
   POLS 5541  Administrative Law
   POLS 5552  Public Budgeting and Finance
   POLS 5553  Public Policy Analysis
   POLS 5554  Public Workplace Issues
   POLS 5558  Public Administration Ethics
   POLS 5566  Public Lands Policy
   POLS 5578  Federal Indian Law
   POLS 5579  Tribal Government
   POLS 6612  Seminar State and Local Politics
   POLS 6616  Seminar Public Administration and Public Policy
   POLS 6623  Program Assessment
   POLS 5557  Grantwriting
   CMP 5522  Conflict Management
   CMP 5524  Management Communication
   ECON 5533  Economic Development
   ECON 5539  State and Local Finance
   HIST 5589  GIS for Social Sciences
   SOC 5567  Community Networking:Cultivating the Sociological Imagination
   SOC 6615  Social Institutions

Specialized Area #2: Environmental Administration (Take 4 courses)
   POLS 5555  Environmental Politics and Policy (required)
   POLS 6606  Environmental Law and Regulation
   POLS 5505  Democracy and Governance
   POLS 5506  Intergovernmental Relations
   POLS 5508  Urban Spaces
   POLS 5509  Community and Regional Planning
   POLS 5553  Public Policy Analysis
   POLS 5558  Public Administration Ethics
   POLS 5566  Public Lands Policy
   POLS 6623  Program Assessment
   POLS 5557  Grantwriting
   CMP 5522  Conflict Management
   HIST 5589  GIS for Social Sciences

Specialized Area #3: Public Health Administration (Take 4 courses)
   MPH 6609  Seminar in Public and Community Health (required)
PHIL 6600 Ethics in Health Care
POLS 5505 Democracy and Governance
POLS 5506 Intergovernmental Relations
POLS 5509 Community and Regional Planning
POLS 5553 Public Policy Analysis
POLS 5558 Public Administration Ethics
POLS 6623 Program Assessment
POLS 5557 Grantwriting

Specialized Area #4: Criminology (Take 4 courses)
SOC 5531 Criminology
SOC 5592 Topics in Criminal Justice
SOC 5536 Elite Deviance and Crime
SOC 5538 Sexual Crimes
POLS 5542 Constitutional Law
POLS 5543 Civil Rights and Liberties
POLS 5557 Grantwriting

Internship (3 Credits - waived for mid-career)
Appropriate courses in the Master Public Health program may be substituted with consent of the Master of Public Administration program director.

III. Public Administration Internship
Each student must complete at least 3 and no more than 9 credit hours of an approved internship. Three credit hours of internship are equal to 200 hours of work as an intern. The internship requirement may be waived for students who have substantial professional work experience in public service of the not-for-profit sector. The MPA director may waive internship requirement for students with substantial professional work experience in public service of the not-for-profit sector will determine if a student's experience is substantial and be allowed to waive the internship requirement.

Courses
POLS 5501 Political Parties and Groups: 3 semester hours.
The nature and development of political parties and pressure groups.
POLS 5503 The Presidency: 3 semester hours.
Evolution and development of the office of the president; its major responsibilities in domestic and foreign affairs, with emphasis on particular power problems that confront the president.
POLS 5504 The Legislative Process: 3 semester hours.
Nature and functions of the U.S. Congress. Topics covered: Legislative campaigns, the politics of law-making, congressional investigations, and major problems facing the Congress.
POLS 5505 Democracy and Governance: 3 semester hours.
Critical exploration into theories and practices of governance in the contemporary United States. The class is intended for all students who have interest in the non profit and public sectors. Topics include public service, leadership, civic engagement, and participatory democracy.
POLS 5506 Intergovernmental Relations: 3 semester hours.
Looks at federalism from a historical perspective with a focus on the institutions developed in the United States. The role of the federal government will be considered alongside the role of the states as it was initially conceptualized and how it is practiced today. The role of local governments in relation to the states is also considered.
POLS 5508 Urban Spaces: 3 semester hours.
Interdisciplinary survey course of urban studies. Intended for students who have interest in local and urban politics, public art, social movements, sustainability, development, and social and democratic theory.
POLS 5509 Community and Regional Planning: 3 semester hours.
The course engages students in discussion on planning topics ranging from the theoretical level to specific issues in planning. The course provides a firm understanding of contemporary thinking on planning issues so that current or future professional planners and academics can engage with the issues facing their community in a proactive and productive way.
POLS 5511 American Political Theory: 3 semester hours.
Political ideas in the United States from Colonial and Revolutionary times through the controversies of the Civil War to the present.
POLS 5512 Modern Political Analysis: 3 semester hours.
Methods of political inquiry and theories and doctrines of politics, with emphasis on modern developments.
POLS 5518 Topics in Political Theory: 3 semester hours.
This course requires examination, analysis and investigation of selected texts and topics in political philosophy. May be repeated for a maximum of 6 credits.
POLS 5519 Political Research Methods: 3 semester hours.
This class investigates the theory and application of various research methods and statistical techniques common to the social sciences, with particular reference to their use in political inquiry.
POLS 5519L Political Research Methods Lab: 1 semester hour.
Application of, and practice in, research methods.
POLS 5520 Contemporary Political Theory: 3 semester hours.
Recent political philosophies and theories ranging from democratic, Marxist, and existentialist thought to Critical Thought and post-modernism.
POLS 5521 Democratic Political Thought: 3 semester hours.
Historical and contemporary models of democracy as well as contemporary debates in democratic thought. Democracy is treated as a contested idea.
POLS 5525 Topics in International Politics: 3 semester hours.
This course requires examination, analysis and evaluation of selected topics in international politics. May be repeated for a maximum of 6 credits.
POLS 5527 Voting and Public Opinion: 3 semester hours.
Analysis of the way citizens and government communicate with each other. Elections, public opinion, and media influence are studied.
POLS 5528 Women and Politics: 3 semester hours.
The objective of this course is to familiarize students with a broad range of issues involving gender and politics in the U.S. and around the world including the history of women's movements, the political participation of women, voting behavior of women and men, the political divisions that exist among women, women's roles in society, and a variety of "women's issues." Because women's involvement in the political arena is informed by their roles and status in society at large, we will also discuss such topics as inequality, power, discrimination, social norms and employment practices. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.
POLS 5532 Comparative Politics Change and Political Order: 3 semester hours.
The nature of political change is examined in a multifaceted framework consisting of concepts such as political order, progress and decay, revolutionary violence, and political culture. The technological and post-industrial revolutions are examined as they relate to political change and stability in developed societies.
POLS 5533 Politics of Developing Nations: 3 semester hours. Study of problems in the political analysis of rapidly changing and unstable "developing" nation states with an emphasis on problems of political, economic, and social development.

POLS 5534 Terrorism and Political Violence: 3 semester hours. A survey of forms of domestic and transnational terrorism, other forms of political violence, and problems of counter-terrorism.

POLS 5535 Topics in National or Regional Studies: 3 semester hours. Surveys the political, economic, and social issues of a nation or regions. May be repeated once for different topics.

POLS 5541 Administrative Law: 3 semester hours. Introductory survey of the legal principals defining governmental administrative processes. Topics include judicial review, tort liability of governments and offices, rules and rule-making, due process, and the limits of administrative discretion.

POLS 5542 Constitutional Law: 3 semester hours. Explores the way in which the three branches interact with each other and the state governments through the lens of Supreme Court decisions. While historical cases are examined, special emphasis is put on contemporary Court decisions.

POLS 5543 Civil Rights and Liberties: 3 semester hours. Explores the provision of civil rights and liberties, including First Amendment freedoms and criminal rights, through the lens of Supreme Court decisions. While historical cases are examined, special emphasis is put on contemporary Court decisions.

POLS 5544 Law and Society: 3 semester hours. This class explores the people, politics, and social institutions which shape both law and society. Emphasis is placed on current political and social movements. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

POLS 5545 Jurisprudence: 3 semester hours. Nature, source, and theories of law; the role of law in modern society; and the application of legal philosophy to the political system.

POLS 5550 Special Topics in Law: 3 semester hours. Examine and analyze selected topics in constitutional law and legal philosophy. Topics may include the constitution and foreign affairs, women and the law, law and literature, and law and film. May be repeated for up to 6 credits.

POLS 5551 Public Organizational Theory: 3 semester hours. Introduction to the study of complex organizations and organizational behavior in the administration of public policy. Emphasis on public and non-profit organizations.

POLS 5552 Public Budgeting and Finance: 3 semester hours. This course explores the dynamics of the budget process in government as well as detailed issues in budgeting and finance. The main objective is to provide the class with a thorough analysis of budgeting terms, methods and problems. The course covers general issues in budgeting, sources of revenues for government, economic development, and citizen participation.

POLS 5553 Public Policy Analysis: 3 semester hours. Theoretical and practical analyses of public policies, including theories of policy formation and their political implementation through governmental institutions. Case studies will provide the means of analyzing specific policy problems.

POLS 5554 Public Workplace Issues: 3 semester hours. Management of public and non-profit employees. Major topics include public employee rights, affirmative action, sexual harassment, disability, the political environment of public and non-profit organizations, and the impact of professionalism, technology, and participatory democracy on the management of public and non-profit employees.

POLS 5555 Environmental Politics and Policy: 3 semester hours. Study of the political forces affecting environmental policy and investigation of several specific policies affecting the environment, such as pollution control, energy production, hazardous chemicals, and the public lands.

POLS 5556 Labor Organization: 3 semester hours. Evolution of economic systems and labor's response to changing patterns of production is studied, and a counter perspective to traditional management views of "efficiency" is presented. Emphasis is on governmental employee unions.

POLS 5557 Grantwriting: 3 semester hours. Steps involved in the grantwriting process from strategic planning, research, writing, to finding appropriate grant sources.

POLS 5558 Public Administration Ethics: 3 semester hours. A course in applied ethics serving to educate students from a theoretical and a practical point of view. The course provides a historical and social perspective of ethics in public administration.

POLS 5559 Public Service Internship: 1-9 semester hours. Directed student internship related to public service in non-profits and community organizations, or state and local government. The student will be placed in a supervised position commensurate with their abilities as determined and approved by faculty in the department. Internships should be designed to compliment a student's research interest and be directed toward a future project or desired field of employment.

POLS 5565 US Political History: 3 semester hours. Study of the political history of the United States involving a discussion of theories of popular voting behavior, critical elections, and political party systems. Equivalent to HIST 5565.

POLS 5566 Public Lands Policy: 3 semester hours. Analysis of the historical and contemporary use and disposition of the federal public lands. The agencies that manage the public lands, major laws, and regulations and the political conflict that surrounds their use and conservation.

POLS 5567 State and Local Administration: 3 semester hours. Seminar in the practice and principles of state, municipal, and sub-state management. Emphasis is given to the evolution of interaction between different branches of sub-national government.

POLS 5571 Historical Geography of Idaho: 3 semester hours. Influences of geography and geology on Idaho's economic, political and cultural history. May be team taught, and includes field trips, discussion sections. Equivalent to HIST 5571 and GEOL 5571.

POLS 5578 Federal Indian Law: 3 semester hours. Examination of tribal governments; their relationship with the federal government; sovereignty, jurisdictional conflicts over land and resources; and economic development. Equivalent to ANTH 5578.

POLS 5579 Tribal Government: 3 semester hours. Complex legal position of Indian tribes as self governing entities; principles of inherent powers; governmental organization, lawmaking, justice, relation to state and federal government. Equivalent to ANTH 5579.

POLS 5591 Seminar: 1-3 semester hours. Research, reading, discussion, and the preparation of reports on selected topics. Ordinarily for seniors majoring in political science and having the instructor's consent. Each course may be repeated for a total of 6 credits.

POLS 5592 Seminar: 1-3 semester hours. Research, reading, discussion, and the preparation of reports on selected topics. Ordinarily for seniors majoring in political science and having the instructor's consent. Each course may be repeated for a total of 6 credits.
**POLS 5597 Professional Education Development Topics:** 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. May be graded S/U.

**POLS 5598P Prof Development Workshop:** 3 semester hours.
New methods and opportunities to enhance and supplement skills. Subject to the approval of the Dean of the student's college, a maximum of eight credits earned in workshops may be applied toward a degree; students taking the courses only for personal development may choose the 0-credit option; those seeking professional development must choose a for-credit option.

**POLS 5599 Experimental Topics:** 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**POLS 6606 Environmental Law and Regulation:** 3 semester hours.
Federal, state, and local environmental regulations addressing environmental impact assessment; water and air pollution control, hazardous waste, resource recovery, reuses, toxic substances, occupational safety and health radiation, siting, auditing, liability. Equivalent to ENGR 6606. PREREQ: Permission of instructor.

**POLS 6608 Environmental Case Law:** 3 semester hours.
The legal analysis of regulation as a method of controlling pollution and hazardous waste. PREREQ: POLS 6606.

**POLS 6609 Environmental Law Natural Resources:** 3 semester hours.
Federal and Idaho statutes and regulations as they apply to natural resources such as public lands, endangered species, and the EIS process. PREREQ: POLS 6606.

**POLS 6611 Seminar Political Theory:** 3 semester hours.
Review of the primary and recent literature of political theory.

**POLS 6612 Seminar State and Local Politics:** 3 semester hours.
Analysis of state, local and regional political institutions and processes from the federal and comparative perspectives.

**POLS 6613 Seminar American Politics Behavior:** 3 semester hours.
Micro inquiry and analysis into political behavior. Areas relevant to such inquiry may include but are not limited to, political psychology, political socializations, attitude and opinion formation, and voting behavior.

**POLS 6614 Seminar American Politics Institutions:** 3 semester hours.
Macro inquiry and analysis into the basic institutional structures and processes of the American political system. Areas of emphasis include, but are not limited to, executive, legislative and judicial processes, political parties and interest groups.

**POLS 6615 Seminar World Politics:** 3 semester hours.
World politics is analyzed both from the perspective of relationships between nation-states and the domestic political sources which influence and determine these relationships.

**POLS 6616 Seminar Public Administration and Public Policy:** 3 semester hours.
Analysis of selected topics and academic literature in public administration and public policy.

**POLS 6620 Seminar Philosophy of Social Science:** 3 semester hours.
The application of mathematical and scientific methods to the study of social, economic, and political life will be considered through the reading of certain seminal writings. Attention will be given to the fundamental assumptions about the nature of scientific rationality. Required of all D.A. students.

**POLS 6621 Seminar Interdisciplinary Topics in Social Science:** 3 semester hours.
Examination of selected topics in the social sciences from the analytic orientations and perspectives common and peculiar to the disciplines of political science economics and sociology. Required of all D.A. students.

**POLS 6622 Advanced Topics in Research:** 3 semester hours.
Emphasis on the role of research methodology in administrative decision-making. Topics to be covered include modeling, evaluation design, ethics, sampling, data collection, data processing, data analysis, and report writing.

**POLS 6623 Program Assessment:** 3 semester hours.
Techniques and analytical methods of assessing governmental program success. Emphasis is given to program designs, data collection, ethics, and quantitative applications.

**POLS 6649 Research Problems:** 1-6 semester hours.
Independent research on non-thesis and non-dissertation disciplinary questions. Credit hours and subject must be approved by instructor. May be repeated to a maximum of 6 credits. Graded S/U.

**POLS 6650 Thesis:** 1-6 semester hours.
1 to 6 credits. May be repeated. Graded S/U.

**POLS 6669 Independent Problems-Tutorial:** 1-3 semester hours.
A directed project emphasizing individual study, research, or the development of expository writings according to the needs of the individual student. May be repeated. Graded S/U.

**POLS 6680 Capstone in Public Administration:** 3 semester hours.
Should be one of the last core courses taken in the MPA program. Integration of all core material into discussion around a number of cases; individual papers, small group projects and presentations.

**POLS 6694 Seminar in College Teaching:** 3 semester hours.
Literature-based review of theory and practice for effective college teaching. Required of all DA candidates and must be successfully completed prior to matriculation in POLS 7702 or POLS 7703.

**POLS 6699 Experimental Course:** 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**POLS 7701 Supervised Administrative Internship in Higher Education:** 1-6 semester hours.
Supervised Administrative Internship in Higher Education variable up to 6 credits. May be repeated.

**POLS 7702 Team Teaching:** 3 semester hours.
Doctor of Arts candidates team teach an entire course with a faculty member. PREREQ: POLS 6694.

**POLS 7703 Solo Teaching:** 3 semester hours.
Doctor of Arts candidates assume total responsibility for teaching a class. PREREQ: POLS 6694 and POLS 7702.

**POLS 8850 Dissertation:** 1-9 semester hours.
Variable credits. May be repeated. Graded S/U.
Psychology

Chair and Professor: Lynch
Professors: Lawyer, Letzing, Rasmussen, Turley-Ames, Wong
Associate Professors: Brumley
Assistant Professors: Aubuchon-Endsley, Fulton, McCarrey, Rieske, Swift, Xu
Visiting Assistant Professor: Miyake
Adjunct Faculty: Landers, Pongratz, Staley
Emeritus: Enloe, Hatzenbuehler, Joe, Roberts

Doctor of Philosophy in Clinical Psychology

Doctoral training in clinical psychology is fully accredited by the American Psychological Association. All educational experiences needed to obtain a license to practice psychology in Idaho, and most other states and provinces, are offered. Theory, research, and practice are integrated into a comprehensive, five-year program. It is the goal of the doctoral training program to produce clinical psychologists who are well trained in the science of human behavior and its application to diverse clinical populations. All students are required to participate in course work and practica that emphasize assessments and treatments in all major areas of child and adult psychopathology. Evaluations of each student’s clinical-professional development and scholarship-research skills are continuous.

Goals
Five program goals have been defined:

• research knowledge and skills;
• professional knowledge and skills;
• integration of science and practice;
• professional identification and ethical practice; and
• appreciation of individual differences, cultural differences, and diversity of practice.

Each goal has associated objectives and competencies.

Doctor of Philosophy in Experimental Psychology

Doctoral training in Experimental Psychology provides students with education and research training in the core areas of psychological science, e.g., personality, social psychology, learning, cognition, developmental psychology, and behavioral neuroscience. Students who complete the doctoral program may pursue academic or non-academic careers. To prepare for their future careers, students need to (i) have a solid foundation in basic areas of psychology (breadth of knowledge) and also (ii) develop an expertise in their research areas (depth of knowledge). Our program offers a variety of courses to help students accomplish their career goals.

Goals
Four program goals have been defined: research knowledge and expertise; breadth of knowledge and integration of core areas in psychology; competencies in scientific methodology and analysis; and effective communication skills. Each goal has associated objectives and competencies.

Master of Science in Psychology

Goals
To ensure that students who receive a master’s degree in psychology will be prepared for further post-graduate study and for careers in related areas, the department has identified the following goals: an understanding of core areas and the breadth of the field of psychology and its applications; ability to integrate knowledge and theories across, and to think critically about, topics within the domains of psychology; competence in library information technology and computer applications related to the study of psychology; competence in scientific methodology and analysis as they apply to the study of psychology; ability to communicate effectively, in both oral and written form, about issues within the field of psychology; active participation in the research process; and understanding and compliance with the APA code of ethics pertaining to research conduct. Each goal has associated objectives and competencies.

Doctor of Philosophy in Clinical Psychology

Admission Requirements
Admission requirements are as stated for the Master of Science in Psychology with the following additions: all students must have been recommended by the Clinical Admissions Committee of the Psychology Department.

General Requirements
All doctoral students must complete the Master of Science in Psychology, or its equivalent, as noted below. Students entering the doctoral training program at Idaho State University with a master’s degree from another institution will receive full or partial credit, based on an examination of completed course work and research. The department chair, the director of clinical training, and the departmental subject matter expert(s) will review all relevant documents and determine the course work and research, if any, that will be required to compensate for omissions and/or non-equivalency.

The following requirements are all in addition to the Master of Science requirements.

Training Committee. Concurrent enrollment at Idaho State University in 1
Centers or comparable supervised clinical practice approved by the Clinical
All students must satisfactorily complete a one-year full-time clinical internship
requirement.

Progress in the development of professional skills is evaluated by faculty
members of the Department of Psychology, including at least one clinical
advisor. Three members of the doctoral committee must be full-time equivalent
(PSYC 8850 Dissertation) until admitted to candidacy.

Exam. Candidates for the doctoral degree may not propose a dissertation
completion of the Master of Science degree (or its equivalent) and the Qualifying
Exam. Students may be admitted to candidacy for the doctoral degree upon satisfactory
from an individualized and focused area of scholarly research.

Students may complete 3 additional graduate credits in psychology.
Students may request the Clinical Training Committee to approve
graduate credits in other departments to satisfy this requirement.

Students must complete an additional 3-credit course in advanced
statistics acceptable to the Clinical Training Committee.

Students must complete 3 additional graduate credits in psychology.
Students must complete 3 additional graduate credits in psychology.

Admission requirements are as stated for the Master of Science in Psychology
with the following additions: all students must be recommended by the
Experimental Admissions Committee of the Psychology Department.

Admission Requirements

All doctoral students must complete the Master of Science in Psychology, or
its equivalent. Students entering the doctoral training program at Idaho State
University with a master’s degree from another institution will receive full or
partial credit, based on an examination of completed course work and research.
The department chair, the director of experimental training, and the department
subject matter expert(s) will review all relevant documents and determine
the course work and research, if any, that will be required to compensate for
omissions and/or non-equivalency. The following requirements are all in addition
to the Master of Science requirements.

Required Courses

Research

Electives

Total Hours (36 from the M.S. degree + 31 additional credits)

1 Students must complete 18 credits of elective classes. Up to nine credits of
these electives may be taken outside the Psychology Department. Electives
should be approved by the student’s faculty advisor. The 12 elective credits
earned for the Master of Science degree will satisfy course requirements
for the Doctor of Philosophy degree, subject to approval of the Department
Chair.

Scholarship - Research Development

Upon completion of Area Requirements plus PSYC 6627 Statistics and Research
Design I and PSYC 6632 Statistics and Research Design II, and the thesis
prospectus, doctoral students are required to pass a Qualifying Exam to be
admitted to doctoral candidacy. The exam samples each student’s integrative
writing skills and conceptual abilities. Students write independently on
integrative topics from across the foundational areas of general psychology or
from an individualized and focused area of scholarly research.

Students may be admitted to candidacy for the doctoral degree upon satisfactory
completion of the Master of Science degree (or its equivalent) and the Qualifying
Exam. Candidates for the doctoral degree may not propose a dissertation
(PSYC 8850 Dissertation) until admitted to candidacy.

A five-member doctoral committee will be formed by the student and his/her
advisor. Three members of the doctoral committee must be full-time equivalent
faculty members of the Department of Psychology, including at least one clinical
and one experimental faculty member. The fourth and fifth members must meet
Graduate School requirements and include the Graduate Faculty Representative.
Students will present findings and implications of the dissertation to departmental
faculty, students, and community members at an open forum.

Clinical - Professional Development

All students must complete 7 credits of PSYC 7725 Psychology Clinic Practicum
and 1 credit of PSYC 5517 Interdisciplinary Evaluation Team. Up to 3 credits of
PSYC 7724 Community Practicum may be substituted for credits of PSYC 7725
All students must perform 5 disability evaluations at the ISU Psychology Clinic
and complete at least 3-credits of PSYC 7727 (Psycho-educational evaluation).
Progress in the development of professional skills is evaluated by faculty
supervisors and the Clinical Training Committee. Satisfactory evaluations
of professional development by the Clinical Training Committee is a degree
requirement.

All students must satisfactorily complete a one-year full-time clinical internship
at a site belonging to the Association of Psychology Postdoctoral and Internship
Centers or comparable supervised clinical practice approved by the Clinical
Training Committee. Concurrent enrollment at Idaho State University in 1
credit of PSYC 7749 Clinical Internship is required. Students enrolled in
PSYC 7749 will be considered full-time Idaho State University students.
Application to clinical internships and acceptance into clinical internships
requires completion of the dissertation prospectus and the approval of the Clinical
Training Committee.

Doctor of Philosophy in Experimental Psychology

Admission Requirements

**Master of Science in Psychology**

**Admission Requirements**

1. In addition to the general requirements of the Graduate School, the applicant must have: minimum entrance requirements include a 3.0 grade point average during the last two years of undergraduate study, Graduate Record Exam scores of the 50th percentile or higher are preferred on two of the three aptitude tests (verbal, quantitative, or analytical writing).

2. An undergraduate major in psychology or the equivalent.

3. Recommendation by the Experimental or Clinical Admissions Committee of the Department of Psychology. The Clinical and Experimental Admissions Committees only admit students into the combined Master of Science and Doctor of Philosophy course of study.

**General Requirements**

Area requirements assume the satisfactory completion of undergraduate courses that prepare the student for advanced study. Specifically, students must have completed undergraduate courses in research methods, neuroscience, sensation, perception, learning, social psychology, developmental psychology, personality, history and systems, or the equivalent of these topic areas. Each student’s record will be reviewed by the departmental chair in consultation with departmental staff. Students deficient in area prerequisites may be required to enroll in additional course work and/or experience limitation of choices. An Area Requirement Plan of Completion must be finalized during the student’s first semester following matriculation. The department chair, the student, and one or more faculty appointed by the chair will meet and approve each student’s Plan of Completion. Students admitted by the Clinical Admissions Committee must complete the Clinical Area Requirements; students admitted by the Experimental Admissions Committee must complete the Experimental Area Requirements.

**Electives**

Students must also complete 12 credits of elective classes. Up to six credits may be taken outside the Psychology Department. Electives should be approved by the faculty advisor.

**Total Hours**: 36

**Courses**

**PSYC 5501 Theories of Personality: 3 semester hours.**

Study of the main theories of personality from both historical and contemporary perspectives, including trait theory, biological, psychoanalytic, humanistic, cross-cultural, behavioral, and social learning. Emphasis will be given to applying theories with the goal of understanding personality and predicting behavior. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**PSYC 5502 Teaching of Psychology: 1-2 semester hours.**

Prepare students to teach independently. Pedagogy, use of technology, and problem solving skills related to teaching psychology courses will be discussed. Supervised teaching will be treated as a separate module. Repeatable up to 4 credits. Graded S/U.

**PSYC 5504 Sensation and Perception: 4 semester hours.**

The anatomical and physiological basis of sensation will be reviewed. Moreover, traditional and contemporary theories of perception will be critically considered. Students will be expected to do laboratory work illustrating basic concepts of sensory and perceptual function. PREREQ: PSYC 4431 or PSYC 4446.

**PSYC 5508 Science Pseudoscience and Psychology: 3 semester hours.**

Designed to teach scientific thinking and how to critically evaluate fringe-science, paranormal, and other unproven claims. The psychological processes underlying pseudo-scientific thinking and beliefs also are introduced.

**PSYC 5512 Ethical and Professional Issues in Psychology: 2 semester hours.**

An introduction to ethical and professional standards in the field of psychology including a historic and contemporary framework. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**PSYC 5517 Interdisciplinary Evaluation Team: 1 semester hour.**

**PSYC 5531 Behavioral Neuroscience I: 3 semester hours.**

Introduction to behavioral neuroscience with an emphasis on the relation between the central nervous system and behavior. Topics include: basic neuroanatomy, neurophysiology, hormones, sensory systems, motor systems, learning, memory, homeostatic regulation, and evolution. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: PSYC 5531 or permission of instructor.

**PSYC 5532 Behavioral Neuroscience II: 3 semester hours.**

Critical evaluation of contemporary research in behavioral neuroscience. Emphasizes current research and theories concerning neural mechanisms of behavior. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: PSYC 5531 or permission of instructor.
PSYC 5535 Animal Behavior: 3 semester hours.
Study of experiments in animal learning that have thrown light upon the problem of understanding human learning. Course is concerned with both observation and experimental studies of habit formation, conditioning, related endocrinology, and nerve structure as they are associated with behavior capabilities. PREREQ: Six hours of psychology beyond PSYCH 1101.

PSYC 5545 Learning and Behavior: 3 semester hours.
Survey of the major principles of learning, including the processes underlying operant and classical conditioning. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

PSYC 5563 Clinical Psychology and the Law: 3 semester hours.
An introduction to the field of forensic psychology by exposing students to the primary areas in which clinical psychology relates to the legal system. Emphasis will be on expert testimony by clinicians in matters of criminal responsibility, mental competency, civil commitment, and child custody. PREREQ: Permission of instructor.

PSYC 5565 Behavioral Medicine: 3 semester hours.
Psychological issues of health, disease states, and prevention. Critical evaluation of clinical research and practice including nontraditional healing techniques and current models used to understand health and disease.

PSYC 5567 Topics in Psychology: 1-6 semester hours.
Selected topics in psychology. Contents vary. May be repeated with different content and departmental approval for a total of 6 credits.

PSYC 5570 Advanced Topics in Learning: 3 semester hours.
In-depth study of the major theories, principles, and research in learning. Areas of emphasis include the experimental analysis of behavior, stimulus control, schedules of reinforcement, aversive control, and the quantitative analysis of behavior. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: PSYC 4445 or 5545 or permission of instructor.

PSYC 5583 Special Problems: 1-3 semester hours.
Research or readings in a special area of interest to be arranged on an individual basis with individual faculty. May be repeated to a maximum of 12 credits. PREREQ: Permission of Instructor.

PSYC 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. May be graded S/U.

PSYC 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

PSYC 6620 Psychodiagnosis I: 3 semester hours.
Theory, measurement development, and current use and limitations of major tests of intelligence, academic achievement, development, and neurological function. Practice in test administration is included.

PSYC 6621 Psychodiagnosis II: 3 semester hours.
Theory, measurement development, and current use and limitations of major tests of personality, both objective and projective, with an emphasis on classification decisions. Practice in test administration is included.

PSYC 6623 Advanced Psychological Measurements: 3 semester hours.
Psychological measurement theory, the mathematical basis of reliability and validity constructs, and test construction strategies are introduced. Measurement principles are then generalized across response modes and methods, focusing on direct observation technologies.

PSYC 6627 Statistics and Research Design I: 3 semester hours.
Critical review of the theory and the methods used to evaluate the outcome of empirical research in the life and social sciences. Chi square, correlation, regression, analysis of variance designs are considered and related to the theoretical distributions basic to statistical inference. PREREQ: Psychology Graduate Student.

PSYC 6632 Statistics and Research Design II: 3 semester hours.
Basic assumptions in the philosophy of scientific investigation, principles of design and analysis of experiments, including tests of significance and factorial designs, and reporting of research, in which the student is required to prepare reports of his/her own work as if for publication. PREREQ: Psychology Graduate Student.

PSYC 6634 Cultural Diversity and Individual Differences: 3 semester hours.
Critical evaluation of scholarship on and social representations of cultural diversity and individual differences. Review of current theory, research, assessment, and intervention practices with diverse populations.

PSYC 6636 Neuropsychological Assessment: 3 semester hours.
Introduction to the selection, administration, scoring, and interpretation of commonly used neuropsychological tests, including tests of conceptual, perceptual, and linguistic ability. PREREQ: PSYC 6620 and PSYC 6621.

PSYC 6637 Multivariate Statistics and Research Design: 3 semester hours.
Continuation of research principles in design and analysis, emphasizing the use of multiple dependent variables, strategies for investigating latent variables, and testing complex causal models.

PSYC 6641 Special Problems: 1-3 semester hours.
The individual works under faculty guidance. The student will pursue original research in some area of psychology of particular interest to him or her and write a report of his or her work in a form suitable for publication. Repeatable up to 12 credits. PREREQ: Permission of instructor.

PSYC 6642 Cognitive Psychology: 3 semester hours.
Examines cognitive processes underlying perception, attention, mental imagery, memory, language, and problem solving/decision making. Cognitive development and individual differences are discussed. Both theory and experimental findings are emphasized in each area.

PSYC 6643 Advanced Social Psychology: 3 semester hours.
Review of current research and major theories of social psychology. Areas of emphasis include attitude, persuasion, prejudice and stereotyping, attraction, aggression, helping, and social cognition.

PSYC 6644 Advanced Developmental Psychology: 3 semester hours.
Study of developmental theories, issues, and research across the lifespan. Emphasis is on current empirical research, highlighting the interaction of biological, cognitive, and social domains of development within and between individuals.

PSYC 6645 Adult Psychopathology and Treatment I: 3 semester hours.
Exposure to fundamental issues in etiology and assessment of adult psychopathology, including advancements in diagnostic classification, focusing on Axis I disorders such as anxiety and mood disorders. Empirically supported treatment methods are emphasized.

PSYC 6646 Adult Psychopathology and Treatment II: 3 semester hours.
Continued review of theories and forms of adult psychopathology, diagnostic categories, and models of treatment. Empirically supported treatment models that consider the therapeutic process, therapeutic relationship, and sociocultural context are emphasized. PREREQ: PSYCH 6645 or permission of instructor.

PSYC 6647 Advanced Personality: 3 semester hours.
This course will explore contemporary personality theory, as well as significant areas and trends in the current empirical literature.
PSYC 6649 Child Psychopathology and Treatment: 3 semester hours.
Review of the psychopathology, assessment, diagnosis, and treatment of major psychological disorders of childhood, including mental retardation, autism, learning disability, attention deficit hyperactivity disorder, oppositional defiant disorder, and conduct disorder.

PSYC 6650 Thesis: 1-6 semester hours.
Thesis. May be repeated. Graded S/U.

PSYC 6672 History and Systems: 3 semester hours.
Survey of historical and philosophical bases of theories of psychology presently used. Emphasis on understanding impact of political, cultural, and historical forces on ideas and methods used in psychology. PREREQ: Passage of qualifying examination.

PSYC 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

PSYC 7701 Clinical Psychology: 2 semester hours.
Orientation to professional training, evaluation, diagnosis, and treatment. Orientation to the ISU Psychology Clinic procedures and report writing requirements. Introduction to clinical interviewing, crisis management, supervision, and consultation.

PSYC 7702 Introduction to Psychotropic Medication: 2 semester hours.
Introduction to clinical psychopharmacology meeting American Psychological Association guidelines for Level 1 predoctoral training. Disorders of substance abuse, psychosis, mood, anxiety, and development are highlighted. PREREQ: PSYC 5532.

PSYC 7703 Advanced Ethics and Professional Issues: 1 semester hour.
Systematic review of ethical decision-making emphasizing analysis of complex ethical issues. Professional topics include supervision, post-doctoral training, licensure, management of high-risk patients, self-care, and emerging models of behavioral health consultation. PREREQ: PSYC 5512.

PSYC 7724 Community Practicum: 1-2 semester hours.
Students work in public or private mental health agencies under qualified supervisors. Professional activities include evaluation and therapy. Six hours per week per credit. May be repeated. PREREQ: Approval of Clinical Training Committee.

PSYC 7725 Psychology Clinic Practicum: 1-2 semester hours.
Students are supervised in the evaluation and treatment of clients served by the Psychology Department Clinic. Six hours per week per credit. May be repeated. PREREQ: Approval of Clinical Training Committee.

PSYC 7726 Supervision Practicum: 1-2 semester hours.
Guided supervisory experiences with junior colleagues in the ISU Psychology Clinic. Graded S/U. May be repeated. PREREQ: Approval of Clinical Training Committee.

PSYC 7727 Psycho-Educational Evaluations: 1 semester hour.
Interviewing, test selection, test administration, case conceptualization, report writing, and interpretation skills are performed under supervision. May be repeated. PREREQ: Approval of Clinical Training Committee.

PSYC 7736 Clinical Proseminar: 1-3 semester hours.
Specific areas of psychopathology, assessment, diagnosis, intervention, and/or associated theoretical models are reviewed in a seminar format with subject matter experts. May be repeated with different content.

PSYC 7749 Clinical Internship: 1 semester hour.
Predoctoral internship, 11-12 months, at a member site of the Association of Psychology Postdoctoral and Internship Centers, or comparable supervised clinical practice approved by the Clinical Training Committee. Repeatable up to 3 credits. Graded S/U. PREREQ: Approval of Clinical Training Committee.

PSYC 8850 Dissertation: 1-12 semester hours.
Sociology, Social Work and Criminology

Faculty

Associate Professors
Gesine Hearn
Anthony Hoskin
DJ Williams

Assistant Professors
Jeehoon Kim
Katrina Running
Jeremy Thomas

Professors Emeriti
James Aho
Cliff Bryan
Ann Hunter
Don Pierson

Chair and Associate Professor: Hearn

Associate Professors: Hearn, Hoskin, Williams
Assistant Professors: Kim, Running, Thomas
Emeritus Faculty: Aho, Bryan, Hunter, Pierson

Goal and Mission

The goal and mission of the master’s program are to prepare graduates for positions as sociological researchers in charitable non-governmental organizations, business, or government. This is accomplished by providing them with the theories, findings, and methods distinctive to sociology. Some graduates choose to pursue a sociology doctorate with the hope of college teaching, others go on to law school, still others into counseling or private consulting.

Objectives

1. Graduates will master literature in one substantive area of sociology.
2. Graduates will develop an understanding of sociological theories, related findings, research design and statistics.
3. Graduates will further their professional careers by either continuing education at the doctoral level or finding employment in public service utilizing their advanced degree.

Master of Arts in Sociology

Admission Requirements

The student must apply to, and meet all criteria for, admission to the Graduate School. In addition to the general requirements of the Graduate School, the student must comply with the following departmental requirements:

- Students must score a minimum of the 40th percentile in one of the three sections of the GRE
- Have a grade point average of 3.0 or higher (on a 4.0) for the last 60± credits taken as an undergraduate, or permission of the Graduate Director.
- Include a statement of interest and career goals.
- Three letters of recommendation must accompany the application.

For full admission to the graduate program in Sociology, the student must have completed the following courses or their equivalent:

- Introduction to Sociology.
- Social Theory,
- Social Statistics, and
- Social Science Research Methods.

In cases of deficiencies, students may be granted waivers, alternative courses, or Classified with Performance Requirements (w/PR) admission at the discretion of the Sociology Graduate Director.

Total Hours: 33

The Sociology electives may be selected from 5500- and 6600-level courses in Sociology or other graduate courses approved by the Sociology Graduate Director. If SOC 4408 Advanced Sociological Methods was taken as an undergraduate, 3 credit hours of electives will be substituted for SOC 5508 Statistical Analysis. If SOC 4402 Proseminar was taken as an undergraduate, the student is not required to take SOC 5502 at the graduate level.

Other requirements include the successful completion of a written comprehensive examination, a thesis proposal presentation and an oral defense of the completed thesis.

For more information, please consult the Sociology Graduate Student Handbook and Sociology Graduate Director.

Interdisciplinary Specialized Area in Criminal Justice

For the specialized area in Criminal Justice, students need to take the 5 courses (18 credits) required for the MA program in Sociology, and take additional 15 credits from the courses listed below to fulfill the elective requirements. Other requirements include the successful completion of a written comprehensive examination, a thesis proposal presentation, and an oral defense of the completed thesis. The specialized area is an interdisciplinary curriculum shared between the Department of Political Science and the Department of Sociology, Social Work and Criminal Justice. Other courses appropriate to the Criminal Justice emphasis may be offered by both departments and can be taken by the student with the permission of the advisor.

MA in Sociology with Interdisciplinary Specialized Area in Criminal Justice

Courses

SOC 5502 Proseminar in Sociology: 3 semester hours.
An overview of the field of sociology, with emphasis on the teaching of sociology, orientation to graduate education, major sociological theories, issues, research approaches, and ethical problems in the field today. PREREQ: Permission of instructor.

SOC 5503 Contemporary Sociological Theory: 3 semester hours.
Survey and appraisal of sociological theories since 1945: structural functionalism, rational choice, conflict, symbolic interactionism, and phenomenology.

SOC 5508 Statistical Analysis: 3 semester hours.
Emphasizes advanced techniques in research design, data measurement, and multivariate analysis utilizing computer application.

SOC 5513 Mind Body and Society: 3 semester hours.
Symbolic interaction and its relation to selfhood, sympathy, illness, sexuality, and addiction; and to groupings like enemies, communities, and associations.

SOC 5531 Criminology: 3 semester hours.
Analysis of criminal law, law enforcement, judicial roles and processes, correctional approaches, the criminal offender and societal reactions. Theory and research as applicable to behavior and institutional relationships.

SOC 5536 Elite Deviance and Crime: 3 semester hours.
Explores the types of criminal behaviors engaged in by the American socioeconomic and corporate elite. The course first explores and identifies who this elite is and then examines their ideological and economic history in American society. Specific examples of elite and corporate crime are presented and discussed in class. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

SOC 5538 Sexual Crimes: 3 semester hours.
Complex relationships of human sexuality to law and crime. A range of sexual attitudes, practices and lifestyles will be discussed in the context of cultural norms, legal parameters and personal expression. Students will be introduced to cultural variations in defining and addressing sexuality and crime. Current theoretical explanations of sexual offending and U.S. social policies and clinical interventions for sexual offenders. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

SOC 5559 MA Sociology Internship: 1-3 semester hours.
The MA sociology internship will give eligible graduate students the opportunity to explore the applied work of sociology in public and private agencies and organizations, private firms and foundations. Students will be placed in supervised internship positions commensurate with their skills, abilities and career goals. Only classified students with satisfactory academic progress are eligible for this course. May be repeated for a total of 6 credits. PREREQ: Permission of instructor.

SOC 5562 Power Class and Prestige: 3 semester hours.
Theories and methodology of status systems; the relation of class to the social structure; analysis of class in different societies, with emphasis upon the class system and power. PREREQ: Permission of instructor.

SOC 5567 Community Networking: Cultivating the Sociological Imagination: 3 semester hours.
Advanced study of the sociology of community through readings, class discussions, lectures, and a community networking internship.

SOC 5583 Independent Problems in Sociology: 1-4 semester hours.
Readings, observations, applied work, or data analysis in content area not offered in our curriculum. May be repeated up to 6 credits.

SOC 5591 Topics in Sociology: 3 semester hours.
Readings, discussion, and preparation of reports on selected topics. May be repeated with different content.

SOC 5592 Topics in Criminal Justice: 3 semester hours.
Readings, discussion, and preparation of reports on selected topics. May be repeated with different content. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

SOC 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

SOC 6600 Comparative Sociological Theories: 3 semester hours.
Comparative analysis of various theoretical perspectives in sociology with special emphasis on structural functionalism, symbolic interactionism, exchange theory, conflict theories, phenomenology, and ethnomethodology. Primary emphasis will be placed on the major propositions of each perspective and the significant contributions of scholarship in each area. PREREQ: SOC 4403 or SOC 5503 or equivalent.

SOC 6601 Sociological Theories: 3 semester hours.
A seminar in selected topics in theory which will focus on either historical, comparative or contemporary theories. May be repeated for up to 9 credits.

SOC 6603 Topics in Methods: 3 semester hours.
In depth focus on methodological topics relevant and timely to students' needs and interests. May be repeated up to 6 credits.

SOC 6605 Social Organization: 3 semester hours.
A seminar in selected topics of social organization and disorganization which will include such themes as complex organization, industrial sociology, community, and urban studies. May be repeated for up to 6 credits.

SOC 6607 Topics in Diversity: 3 semester hours.
A seminar in selected topics of social differentiation such as stratification, minorities, etc. May be repeated for up to 6 credits.

SOC 6613 Social Behavior: 3 semester hours.
A seminar in social interaction which will consider such themes as collective behavior, social psychology, deviance, ethnography, and neo-positive approaches to behavioral analysis. May be repeated up to 6 credits.

SOC 6615 Social Institutions: 3 semester hours.
A seminar in selected aspects of medicine, law and crime, media, corporations, sports, religion, family, education, and political society. May be repeated up to 9 credits.

SOC 6620 Seminar Philosophy of Social Science: 3 semester hours.
The application of mathematical and scientific methods to the study of social, economic, and political life will be considered through the reading of certain seminal writings. Attention will be given to the fundamental assumptions about the nature of scientific rationality. Required of all D.A. students.
SOC 6621 Seminar Interdisciplinary Topics in Social Science: 3 semester hours.
Examination of selected topics in the social sciences from the analytic orientations and perspectives common and peculiar to the disciplines of political science, economics and sociology. Required of all D.A. students.

SOC 6649 Independent Studies: 1-4 semester hours.
Consultation course consisting of independent student effort under the guidance of the instructor. Students are assigned to, or request assignment to, specific independent problems on the basis of interest and preparation. This may include preparation and presentation of a major research project, directed readings, or tutorial study. May be repeated.

SOC 6650 Thesis: 1-6 semester hours.
Research, analysis, and writing of master's thesis. 6 credits of SOC 6650 are required for graduation. Continuous enrollment at a minimum of 1 credit must be maintained until the thesis is defended. May be repeated. Graded S/U.

SOC 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.
Business

Tom Ottaway, Ph.D., Dean and Professor
Daniel Ames, Ph.D., Associate Dean

Department of Accounting
Chair and Associate Professor: Ames
Professors: Picard
Associate Professor: Rodriguez, Konicek

Associate Professor: Ruling Guo, D.H.A., M.P.H., M.L.I.S., AHIP

Master of Business Administration
The College of Business (COB) at Idaho State University (ISU) offers a program leading to the degree of Master of Business Administration (MBA) to holders of business and non-business bachelor’s degrees. The MBA program is accredited by AACSB International, the Association to Advance Collegiate Schools of Business. In addition to the traditional MBA degree, the program offers MBA degrees with emphasis areas in Accounting, Informatics, Finance, Health Care Administration (HCA), Project Management, and Marketing. The MBA program at Idaho State University was the first to be accredited by the AACSB in the State of Idaho and remains committed to the delivery of a high quality, rigorous program.

The traditional MBA provides a broad general degree particularly suited to those pursuing a managerial focus in their careers. The Accounting, Informatics, Finance, Health Care Administration, Project Management, and Marketing options provide specialized knowledge relating to their respective fields. The Accounting emphasis meets the needs of students who wish to satisfy requirements for certification as public accountants (CPA) or certification as management accountants (CMA).

In the interest of a more diverse student body, the college encourages and attracts a number of full-time students from other parts of the United States and foreign countries.

Mission and Goals
The Idaho State University MBA program’s mission is to develop and deliver programs that address the diverse needs of stakeholders.

Our primary mission is to offer an MBA program that enhances our students' competence in business management, fosters their intellectual curiosity, and develops the personal skills necessary to be an effective manager. The MBA program prepares students for leadership roles in all areas of business requiring skilled and ethical decision making and analytical abilities.

Program Goals
MBA Students should develop:

- Communication and collaboration skills.
- Skill in critical analysis, problem solving, and decision making.
- Competency in key business concept areas.
- Insight into cultural, global, and ethical issues in business.

The MBA Program
The MBA program consists of eight graduate core courses (MBA-I) covering basic knowledge skills and concepts, a core of eight broad integrative courses (MBA-II), plus six to nine hours of additional graduate level courses depending upon the student's program of study.

The MBA-I core develops a broad competence in the functional fields of business: Accounting, Economics, Management, Marketing, Operations, and Finance. The core also examines behavioral, international, ethical, industry analysis, and strategic issues that cut across the functional boundaries and provide a basic educational background. Students with undergraduate degrees in business may have MBA-I classes waived.

The MBA-II core consists of eight required courses which, although anchored in traditional functional fields, are designed to provide a strong integrative focus building upon the competencies developed in MBA-I courses.

The traditional MBA degree requires six credit hours of graduate course work beyond the MBA-II core courses. The various emphases require nine credit hours of graduate course work beyond the MBA-II core courses. The courses in the Accounting, Informatics, Economics, Finance, Health Care Administration, Project Management, and Marketing areas of emphasis are designed to provide specialized knowledge specific to each of their respective fields.

Master of Accountancy
The Master of Accountancy (MAcc) provides students with advanced analytical and technical skills and tools required for success in the complex world of accounting today. The program develops skills and competencies well beyond that of an undergraduate accounting degree and will prepare students to enter the public accounting profession and provide a solid foundation for passing the rigorous CPA professional examination.
Master of Science in Health Informatics

The Master of Science in Health Informatics degree makes it possible to apply your skills in information technology and information systems in health care, an area that directly impacts lives. The MSHI helps bridge the gap between the medical and administrative knowledge possessed by healthcare personnel and the information technology knowledge possessed by informaticists.

Master of Taxation

The Master of Taxation (MTax) provides students with advanced analytical and technical skills and tools required for success in the complex world of taxation. The program develops skills and competencies related to taxation well beyond that of an undergraduate accounting degree and will prepare students to enter the public accounting profession in a tax-related capacity and provide a solid foundation for passing the rigorous CPA professional examination.

Master of Business Administration

Admission Requirements

The student must apply to, and meet all criteria for, admission to the Graduate School, and all additional College of Business requirements.

Admission to the MBA program is granted only to students showing high promise of success. The College of Business uses various measures to determine this likelihood. However, the minimum requirement for admission is based on the following formula:

- The sum of 200 times the grade point average in upper-division course work (4.0 system) plus the total score on the Graduate Management Admission Test must equal at least 1150 points.

For applicants from schools with different grading systems a GPA will be inferred as accurately as possible. Also, graduate courses will be included in the upper-division GPA calculation. For applicants with a significant amount of recent upper-division academic course work versus course work that is considerably older, we may choose to consider only the recent GPA.

Individuals holding a current master’s degree from a regionally accredited institution may meet minimum requirements and be considered for admission if they meet the Graduate School requirements regarding GRE scores in which case the student is not required to take the GMAT for admission.

All applicants are required to submit a resume outlining work experience, a statement of purpose, and two letters of reference.

Please note that no individual can be admitted to classified status in the MBA program until the College of Business has received the applicant’s official transcripts and official GMAT/GRE scores.

Applications are accepted at any time. Complete applications are reviewed the first working day of each month up to the Graduate School deadlines for admission.

Locations

The MBA program serves Southeast Idaho’s need for part-time and full-time graduate education in business. The traditional MBA degree is offered in the evening in Pocatello and Idaho Falls to full-time and part-time students with some online options. The Economics, Finance, Marketing, and Project Management emphasis areas require that students be able to take some emphasis-area daytime courses in Pocatello, and are restricted to individuals who do not have an undergraduate major in the respective fields. The Informatics emphasis and Accounting emphasis elective courses are only daytime courses offered in Pocatello. The Health Care Administration emphasis courses are offered primarily in the evening in Pocatello or online.

Conduct

Academic integrity is expected by the College of Business. All forms of academic dishonesty, including cheating and plagiarism, are prohibited.

The penalties for students engaging in academic dishonesty, plagiarism, unprofessional or unethical conduct within the university community range from a failing grade to dismissal from the MBA program, and/or permanent expulsion from the university with notation on the student’s transcript. The Graduate Catalog explains the dismissal policy and the procedures for the appeal of dismissal. If you are unclear as to what constitutes academic dishonesty, you should consult the Graduate Catalog, then review the College of Business policy on Academic Integrity available from the College of Business Office in BA 202; from the College of Business website at http://www.isu.edu/cob/; or refer to the Idaho State University Faculty/Staff Handbook policy on academic dishonesty. If you are still in doubt about academic dishonesty, you’re encouraged to consult with a faculty member, the Graduate Studies Director, or the Dean.

MBA Degree Requirements

MBA Minimum Prerequisites

Mathematics Skills

The minimum level of mathematics required for the MBA program is college algebra. If students have not completed this course, they must do so early in their program prior to enrolling in MBA-II courses. College algebra may be waived if the student scores in the 50th percentile or higher on the quantitative section of the GMAT. If all MBA-I courses are waived, the student may enroll in MBA-II courses provided they are concurrently enrolled in courses to meet the math requirement.

Computer Skills

Computer literacy is an essential skill for success in the MBA program and success in a professional business career. The minimum skills required are the ability to use a word processor, a spreadsheet, the Internet, and Windows. Students are required to maintain e-mail and Internet accounts on the Idaho State University network.

Communications Skills

Good communication skills are fundamental for students and managers. Students are expected to have a high degree of proficiency in both oral and written communication skills. Students failing to demonstrate communications proficiency will be required to take remedial work.

MBA I

The following courses are prerequisite to any MBA II course:

<table>
<thead>
<tr>
<th>Course</th>

<td>Basic Marketing Management</td>
<td></td>
</tr>
</tbody>
</table>
Waiver of MBA-I Requirements

MBA-I courses may be waived for students with a business degree from an AACSB accredited institution. MBA-I courses may be waived for students with a business degree not accredited by AACSB subject to a transcript and program evaluation by the Graduate Studies Director. For students with non-business degrees or degrees from foreign universities, courses may be waived where equivalency of content with the Idaho State University MBA core can be established and the student has earned at least a grade of C- or equivalent. Individuals with degrees greater than 10 years old may be required to take selected MBA-I courses. Work experience is not a basis for waiving MBA-I course work; however, students with substantial work experience may demonstrate competence in a particular field through examination.

MBA-II

MBA-I requirements must be satisfied before enrolling in the MBA-II core component courses listed below. The MBA-II core consists of six required courses, plus two from the list below, for a total of 24 credits.

Students must take the following 6 courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MBA 6620</td>
<td>Quantitative Information for Business Decisions</td>

Exceptions to the requirement that all MBA-I courses be completed prior to enrolling in MBA-II courses may be made when most MBA-I courses have been taken and enforcement of this requirement would cause undue hardship for a student (i.e., a delay in his/her program).

A request for an exception to the MBA-I must be made to the Director of Graduate Studies. This request should state the MBA-I courses remaining to be taken in the student’s program, when those courses will be taken, and what hardships will be incurred if the exception is not granted.

Students may substitute MBA-II courses only with permission of the College of Business Director of Graduate Studies and the appropriate department chair or program director.

Additional Course Requirements

Students seeking the traditional MBA degree will complete six credit hours of additional graduate course work beyond the MBA-II core.

Students seeking the MBA with an emphasis in Accounting, Informatics, Economics, Finance, Project Management, Marketing or Health Care Administration will complete nine credit hours of graduate work in their selected emphasis area.

Students may select as electives any 5500-level or 6600-level courses offered by the College of Business that meet emphasis area requirements with the exception of courses numbered between MBA 6600 and MBA 6615 inclusive, and MBA-II courses. Students wishing to take elective courses outside the College of Business must have those courses approved by the Graduate Studies Director. The electives may include MBA 6650 Thesis (6 credit hours), or MBA 6639 MBA Paper (3 credit hours). Students may not take a 5500-level course for elective credit if a similar course has been taken at the undergraduate level.

The Traditional MBA degree (6 hours of electives)

Students pursuing the traditional MBA degree are required to meet the following requirements:

- Electives (6 credit hours). The traditional MBA degree requires six credit hours of College of Business electives at the 5500/6600 level approved by the Graduate Studies Director.

Accounting Emphasis (9 hours)

The MBA with an Emphasis in Accounting program produces graduates with the knowledge and skills for successful professional accounting careers. The goal of the accounting emphasis is to provide graduates with the following characteristics:

- Business and accounting knowledge.
- Capability and motivation for continued learning.
- Competence in learning skills (including research of data bases).
- Ability to analyze, critique, and communicate.
- Ability to work effectively with others.
- Rigorous ethical standards.

The Accounting Emphasis program enhances knowledge and skills for rapid advancement in either managerial or public accounting. MBA graduates should be prepared to pass certification examinations for both the Certified Public Accountant (CPA) and Certified Management Accountant (CMA).

Students choosing an emphasis in Accounting must select 9 hours of 5500/6600 level accounting courses. Appropriate undergraduate prerequisite courses are required. Courses at the 5500-level cannot be selected if a comparable undergraduate course has already been taken.

Informatics Emphasis (9 hours)

The MBA with an Emphasis in Informatics is focused on providing managerial-level knowledge of information technology for MBA students. The Informatics emphasis provides general business managers with a curriculum focused on building their knowledge of informatics and the opportunity to develop technical skills in this field.

Electives (9 credit hours). The MBA with an emphasis in Informatics requires 9 credit hours of 5500/6600-level elective course work in the field of informatics.

Economics Emphasis (9 hours)

The MBA with an emphasis in Economics is not open to students who have a previous undergraduate major in
economics. The Economics emphasis requires that students must be able to take some daytime courses in Pocatello.

The MBA with an emphasis in Economics requires 9 credits of elective course work in economics, or 6 credits of elective course work in economics and 3 credits in finance.

**Finance Emphasis (9 hours)**

The MBA with an emphasis in Finance is not open to students who have a previous undergraduate major in Finance. The Finance emphasis requires that students must be able to take some daytime courses in Pocatello.

The MBA with an emphasis in Finance requires FIN 5578 Investments (3 credits) plus 6 more credits of 5500/6600-level elective course work in the field of finance.

**Project Management Emphasis (9 hours)**

</tbody>
</table>

Total Hours 9

Students who have taken these courses as undergraduates are not eligible to repeat them as graduate students. Students who have already taken one or more of these classes must have an appropriate alternative course approved by the Graduate Studies Director or Management Department Chair.

**Marketing Emphasis (9 hours)**

The MBA with an emphasis in Marketing is not open to students who have a previous undergraduate major in Marketing. The Marketing emphasis requires that students must be able to take some daytime courses in Pocatello.

The MBA with an emphasis in marketing requires 9 credit hours of 5500/6600-level elective course work in the field of marketing. Marketing courses are labeled MKTG.

**Health Care Administration Emphasis (9 hours)**

The MBA with an emphasis in Health Care Administration requires at least 9 credit hours of 5500/6600-level elective work in Health Care Administration (HCA). Students may not repeat classes they have taken as undergraduates at the 4400-level.

**Program of Study**

All MBA students are required to meet with the Graduate Studies Director, who serves as the program advisor, prior to or during their initial term in the program in order to develop an approved program of study. Students will be blocked from registering for the next term until this program of study is approved. Once students have successfully met all the requirements of the program of study, they are eligible to graduate in the corresponding semester.

**Academic Requirements**

Any student who, after admission to the College of Business graduate program, falls below a 3.0 GPA or receives two C (C+, C, or C-) grades or a grade of D+ or lower in the MBA program (MBA-I, MBA-II, and elective courses) is deemed to be doing unsatisfactory work and is subject to review by the College of Business MBA Administrative Committee and to dismissal from the program. A student dismissed for academic reasons may apply for readmission to the MBA program no earlier than four months following his/her dismissal. Requests for readmission will be denied unless the student can demonstrate that the reasons for the previous unsatisfactory work have been rectified and can show evidence of ability to perform satisfactorily in the MBA program.

Courses in which a grade of D+, D, D- or F has been earned will not be counted toward fulfillment of MBA-I or MBA-II program requirements. Students may not use more than two courses with a grade of C+, C, or C- to satisfy graduation requirements. Students must achieve a 3.0 or better GPA in order to graduate.

**MBA and PharmD Joint Degree Program**

Students enrolled in the PharmD Program at Idaho State University may combine that degree program with an MBA degree with approximately one year of additional effort. The program is essentially the traditional MBA degree program with the use of some PharmD courses to meet MBA requirements. Program requirements include:

During the two years of prepharmacy course work, the student should take:

- ECON 2201 Principles of Macroeconomics 3
- ECON 2202 Principles of Microeconomics 3
- ACCT 2201 Principles of Accounting I 3
- ACCT 2202 Principles of Accounting II 3

During the third year profession year in the Pharm.D. program and the summer preceding that year, the student should take:

- MBA 6613 Marketing 3
- MBA 6614 Operations Management 3
- MBA 6615 Finance 3

During the fourth professional year in the Pharm.D. program, students should take:

- PHAR 9981 Advanced Pharmacy Practice Experience 7

1. These courses will satisfy four hours of electives required in the spring semester of the third professional year of the Pharm.D. curriculum. In addition, the completion of MBA 6612 Human Behavior in Organizations will substitute for PPRA 9945 required in the third professional year of Pharm.D. curriculum.

2. Six hours of specified experiential courses will satisfy the six elective hours required in the MBA curriculum.

Throughout and following the professional Pharm.D. program, the student must complete the second year of MBA curriculum, which includes:

**Students must take the following 6 courses:**

- MBA 6620 Quantitative Information for Business Decisions 3
- MBA 6621 Managerial Decision Making and Negotiation 3
- MBA 6622 Financial Management 3
- MBA 6623 Marketing Management 3
- MBA 6626 Business Policy and Strategy 3
- MBA 6628 Applied Business Solutions 3

Total Hours 18
In addition, students must take 2 courses from the following list:

<table>

<td>3</td>
</tr>
</tbody>
</table>

Total Hours: 6

Upon completion of all required MBA classes, the student may take the MBA final oral exam.

Award of the MBA degree requires successful completion of the Pharm.D. degree or a bachelor’s degree at Idaho State University.

**Admission Requirements**

Admission to the MBA program will normally take place at the end of the second professional year. PharmD students must meet the regular admission requirements of the MBA program except they are required to have completed only the equivalent of an undergraduate degree at the time of admission.

Applicants must request the College of Pharmacy to certify to the Graduate School that the student has completed 120 hours and that those 120 hours are equivalent to an undergraduate degree.

**Waiver of Requirements**

Course requirements will be waived for students who can demonstrate that they have taken equivalent courses within the last 5 years. If a course is waived, the student is required to substitute an alternative course in the field of study that was waived. Waiver of courses and substitutions must be approved by the MBA Director.

**Academic Requirements**

Any student who, after admission to the College of Business certificate program, falls below a 3.0 GPA or receives two C+ grades or a grade of D or F in any course is deemed to be doing unsatisfactory work and is subject to dismissal from the program. A student dismissed for academic reasons may apply for readmission to the certificate program no earlier than four months following his/her dismissal. Requests for readmission will be denied unless the student can demonstrate that the reasons for the previous unsatisfactory work have been rectified and he/she shows evidence of ability to perform satisfactorily in the certificate program. Courses in which a grade of D or F has been earned will not be counted toward fulfillment of program requirements. Students may not use more than two courses with a grade of C+ to satisfy certificate completion requirements.

**Master of Accountancy**

**Admissions Requirements**

The student must apply to, and meet all the criteria for, admission to the Graduate School, and all additional College of Business requirements.

Admission to the MAcc program is granted only to students showing high promise of success. The College of Business uses various measures to determine this likelihood. However, the minimum requirement for admission is based on the following formula:

- The sum of 200 times the grade point average in the last 60 credits of course work (4.0 system) plus the total score on the Graduate Management Admissions Test must equal at least 1150 points.

Applicants must hold a bachelor's degree in accounting or equivalent coursework if the degree is not in accounting.

For applicants from schools with different grading systems a GPA will be inferred as accurately as possible. Also, graduate courses will be included in the last sixty hours GPA calculation. For applicants with a significant amount of recent upper-division academic course work versus course work that is considerably older, we may choose to consider only the recent GPA.

Individuals holding a current master’s degree from a regionally accredited institution may meet minimum requirements and be considered for admission if they meet the Graduate School requirements regarding GRE scores, in which case the student is not required to take the GMAT for admission.

All applicants are required to submit a resume outlining work experience, a statement of purpose, and two letters of reference.

Please note that no individual can be admitted to classified status in the MAcc program until the College of Business has received the applicant’s official transcripts and official GMAT/GRE scores.

Applications are accepted at any time. Complete applications are reviewed the first working day of each month up to the Graduate School deadlines for admission.

Total Hours: 31

**Program of Study**

All MAcc students are required to meet with the Graduate Studies Director, who serves as the program advisor, prior to or during their initial term in the program in order to develop an approved program of study. Students will be blocked from registering for the next term until this program of study is approved. Once students have successfully met all the requirements of the program of study, they are eligible to graduate in the corresponding semester.

**Academic Requirements**

Any student who, after admission to the College of Business graduate program, falls below a 3.0 GPA or receives two C+ grades or a grade of D+ or lower in the MAcc program is deemed to be doing unsatisfactory work and is subject to review by the College of Business Graduate Administrative Committee and dismissal from the program. A student dismissed for academic reasons may apply for readmission to the graduate program no earlier than four months
Students without a degree in the computing sciences, such as business informatics, health informatics, computer information systems, or computer science will be admitted into the MSHI-2 requirements.

The MSHI-1 is a 36 credit hour program. Students can select from two options: 33 credits of coursework plus 3 credits of Informatics Project, or 30 credits of coursework plus 6 credits of thesis.

Required Courses to Complete the BBA/MS HI

**Program of Study**

All MSHI students are required to meet with the Graduate Studies Director or informatics advisor prior to or during their initial term in the program in order to develop an approved program of study. Students will be blocked from registering for the next term until this program of study is approved.

**Concurrent BBA and MS in Health Informatics**

Good students qualifying for advanced standing, who have at least a 3.0 GPA, and are within 30 credits of completion of the BBA can apply for the program. They need to formally apply, including submitting an application to the School of Graduate Studies, obtain three letters of recommendation, and take the Graduate Record Examination (GRE) General Test, GMAT, or MCAT. If their qualifications are satisfactory, students can be admitted to the MS program.

Applicants must submit a 2-year plan and a Master’s Check Sheet with the application. This plan will include the courses that will finish the requirements for the BBA degree and the courses to fill the requirements for the MSHI degree. The Master’s Check Sheet outlines the courses you will take to fill the requirements for the Master's degree.

If you are accepted, you will become a Concurrent Candidate. Students will be allowed to enroll in 5000 level classes upon acceptance. You will NOT receive EITHER degree until the ALL the requirements are completed.

**Master of Taxation**

The student must apply to, and meet all criteria for, admission to the Graduate School, and all additional College of Business requirements. Students are required to submit GMAT or GRE scores.

The minimum requirement for admission is defined by the following:

Undergraduate degree in accounting from an accredited institution. Must be a licensed Certified Public Accountant or have either passed the CPA exam or have taken the GMAT or GRE within the last five years. Previous academic or other experience must indicate a high probability of success in the program. Meeting the minimum formula requirement does not assure admission to the program since other factors may be considered if they are deemed important in the assessment of the applicant’s probable success. All applicants will be required to submit a resume outlining work experience and two letters of recommendation.

**Accounting Courses**

**ACCT 5500 Managerial Tax Planning:** 3 semester hours.

For prospective business managers, owners, or investors interested in important tax consequences of alternative financial transactions.

**ACCT 5503 Accounting Information Systems:** 3 semester hours.

A strategic approach to the use of accounting information in an organization. Tools for documentation of business processes and database design are introduced. Focuses on primary business cycles, interrelationship among them, and impact on accounting information. Includes assessment of risks involved in information processing and reporting. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: ACCT 3323.

**ACCT 5531 Advanced Tax Concepts:** 3 semester hours.

Specialized federal tax concepts and tax research principles for individuals, businesses, estates, and trusts. Elaborates on basic principles discussed in Principles of Taxation. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**ACCT 5533 Legal Environment of Accounting:** 3 semester hours.

Study of legal issues facing accountants, including business law, forms of organizations, and regulatory requirements.

**ACCT 5541 Management Control Systems:** 3 semester hours.

Focuses on strategic and managerial evaluation and control systems using financial and nonfinancial accounting information. PREREQ: ACCT 3341.
ACCT 5556 Auditing: 3 semester hours.
Concepts and practices of independent and internal auditing. Professional responsibilities, risk assessment, audit planning and reporting. PRE-or-COREQ: ACCT 4403 or ACCT 5503 or CIS 4403 or CIS 5503. PREREQ: ACCT 3324

ACCT 5557 Advanced Auditing: 3 semester hours.
Integration of financial statement auditing concepts in case discussions. Research into contemporary auditing literature.

ACCT 5560 Governmental and Not-for-Profit Accounting: 3 semester hours.
Accounting and reporting principles, standards and procedures applicable to governmental units and not-for-profit institutions, i.e. universities, hospitals. Special consideration to financial management problems peculiar to the not-for-profit sector. PREREQ: ACCT 3324.

ACCT 5561 Advanced Accounting: 3 semester hours.
Study of accounting problems arising in connection with partnerships, corporate affiliation; institutional, social, and fiduciary accounting; consignments; installment sales; and foreign exchange.

ACCT 5570 Contemporary Issues in Managerial Accounting: 3 semester hours.
Contemporary topics and emerging issues in managerial accounting. This field is rapidly evolving to meet the needs of enterprises competing in a dynamic global environment. PREREQ: ACCT 3341

ACCT 5571 Accounting Capstone 1: 1 semester hour.
Capstone course integrating accounting regulation topics. Emphasis on analytical, problem-solving and communication skills.

ACCT 5572 Accounting Capstone 2: 1 semester hour.
Capstone course integrating financial accounting and reporting topics. Emphasis on analytical, problem-solving and communication skills.

ACCT 5573 Accounting Capstone 3: 1 semester hour.
Capstone course integrating auditing and attestation topics. Emphasis on analytical, problem-solving and communication skills.

ACCT 5574 Accounting Capstone 4: 1 semester hour.
Capstone course integrating business environment and concept topics. Emphasis on analytical, problem-solving and communication skills.

ACCT 5580 Comparative International Accounting: 3 semester hours.
Study of systems that have proven to be problems in an international accounting context, particularly for corporate financial reporting. Also, the progress toward international harmonization of financial reporting and taxation.

ACCT 5590 Financial Reporting and Statement Analysis: 3 semester hours.
A financial accounting capstone course focusing on statement analysis from the point of view of the many users of financial statements: investors, creditors, managers, auditors, analysts, regulators, and employees through the case analysis of actual companies' financial statements. PREREQ: ACCT 4461 or ACCT 5561.

ACCT 5591 Seminar in Accounting: 3 semester hours.
Reading, discussion, and preparation of reports on selected topics. Restricted to senior and graduate students in business who have the consent of the instructor. Specialized evaluated graduate level activities and performances are identified in the course syllabus. May be repeated for up to 6 credits with permission of instructor.

ACCT 5592 Special Problems in Accounting: 1-3 semester hours.
Research and reports on selected problems or topics in accounting. Restricted to senior and graduate students in business who have the consent of the Dean. May be repeated under a different title for a maximum of 9 credits with the permission of the major advisor and the Dean.

ACCT 5593 Accounting Internship: 1-3 semester hours.
A program of significant business experience coordinated by the faculty to provide a broad exposure to issues. May be repeated up to a total of 3 credits.

ACCT 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

ACCT 6601 Tax Procedure: 3 semester hours.
Taxpayers' relationships with the Internal Revenue Service, including requests for rulings; conference and settlement procedures; deficiencies and their assessment; choice of forum; tax court practice; limitation periods and their mitigation, transferee liability; tax liens; and civil penalties.

ACCT 6611 Corporate Taxation I: 3 semester hours.
Tax considerations in corporate formations, distributions, redemptions, and liquidations. Some general consideration of the tax alternatives relating to the sales of corporate businesses.

ACCT 6612 Corporate Taxation II: 3 semester hours.
Corporate reorganizations; corporate acquisitions and divestitures, including transfer or inheritance of losses and other tax attributes; corporate penalty taxes; consolidated returns provisions. PREREQ: ACCT 6611.

ACCT 6621 Partnership Taxation: 3 semester hours.
Tax meaning of 'partnership' formation transactions between partner and partnership; determination and treatment of partnership income; sales or exchange of partnership interest; distributions; retirement; death of a partner; drafting the partnership agreement.

ACCT 6625 Managerial Control Systems and Corporate Social Responsibility: 3 semester hours.
The managerial and strategic use of control systems. Current practices in corporate social responsibility management and reporting practices. The interrelationship between management control systems and corporate social responsibility.

ACCT 6631 Accounting Theory: 3 semester hours.
Study of accounting conceptual framework and accounting principles. Case discussions and research into contemporary accounting literature.

ACCT 6632 Advanced Auditing: 3 semester hours.
Integration of auditing concepts in case discussions. Research into contemporary auditing literature and databases. PREREQ: ACCT 5556.

ACCT 6634 Seminar in Accounting: 3 semester hours.
Capstone course integrating special problems of financial, managerial, and tax accounting. Emphasis on analytical and communication skills. PREREQ: ACCT 5561.

ACCT 6635 Strategic Cost Management: 3 semester hours.
Critical examination of various cost management issues and techniques with emphasis on strategic, behavioral, and cultural issues. PREREQ: MBA 6611, MBA 6615 and MBA 6616.

ACCT 6641 Tax of Individuals and Property: 3 semester hours.
Taxation of Individuals and Property Transactions: Tax problems of individual taxpayers; problems incident to the sale, exchange, and other disposition of property, including recognition and characterization concepts.

ACCT 6645 Tax Research, Planning, and Policy: 3 semester hours.
Instruction in tax research techniques leading to a research project on a federal tax subject; examination of the principal criteria used to make choices on forms of taxation and the impact of tax provisions on type and location of business and investment activities.

ACCT 6646 State, Local, and International Taxation: 3 semester hours.
Nature and purpose of state taxation; comparison of property and excise taxes; uniformity of taxation; assessment and collection procedures; remedies available to taxpayers. Survey of international tax regimes and consequences of various cross-border business transactions.
ACCT 6647 Tax Exempt Organizations: 3 semester hours.
A study of the exemption from federal income tax accorded to a variety of public and private organizations and the tax treatment of contributions to such organizations; public policies underlying exemption from tax and deductibility of contributions.

ACCT 6648 Gift and Estate Tax Planning: 3 semester hours.
Taxation of trust and estate income, including simple and complex trusts, annuities, property distributions, income in respect of a decedent, grantor trusts. Planning lifetime and testamentary dispositions of property; postmortem planning; analysis of small and large estates; eliminating and offsetting complicating and adverse factors; selection of a fiduciary and administrative provisions.

ACCT 6660 Accounting for Governmental and Not-for-Profit Entities: 3 semester hours.
In-depth study of accounting and reporting principles, standards and procedures applicable to government and nonprofit entities with an emphasis on topics unique to these institutions.

ACCT 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

Economics Courses

ECON 5504 Game Theory: 3 semester hours.
Use game theory to model conflicts, cooperation and strategy, with applications in economics, business, political science, psychology, sociology, anthropology and biology. Equilibrium concepts, information structures, static and multi-period games will be discussed. PREREQ: ECON 2201 and ECON 2202 or ECON 6610/MBA 6610 or permission of instructor.

ECON 5509 Industrial Organization: 3 semester hours.
Industrial organization extends the theory of the firm to examine firms' strategic behavior, including methods to differentiate products and aggressive prizing schemes, and the government's response to these activities. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: ECON 2201 and ECON 2202 or MBA 6610.

ECON 5511 Political Economy: 3 semester hours.
A critical introduction to the relationship between economic institutions and social analysis. The social implications of different views on economic concepts, such as the division of labor, capital, and value, are investigated from a classical, neoclassical and an institutional perspective.

ECON 5531 Money and Banking: 3 semester hours.
The study of financial instruments, money, interest rates, the banking industry, and the structure and monetary policies of the Federal Reserve Bank. An examination of past and present monetary policy. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: ECON 2201 and ECON 2202 or MBA 6610.

ECON 5533 Economic Development: 3 semester hours.
Theories and principles of economic development, characteristics, and problems of underdeveloped and developing countries, alternative techniques and policies for the promotion of growth and development.

ECON 5534 International Trade: 3 semester hours.
Study government trade policies, trade laws, and national and international trade institutions. Study trade strategy from the perspective of governments and business. Understand the different levels of economic integration among countries and the political economy of trade policies and trade conflicts/cooperations. Specific evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: ECON 2201 and ECON 2202 or ECON 6610/MBA 6610 or permission of instructor.

ECON 5535 International Finance: 3 semester hours.
Study foreign exchange market and theories of exchange rate determination. Discuss the effectiveness of fiscal and monetary policies in an open economy and the implications of international macroeconomic policy coordination/conflict for government officials and business. Learn about foreign exchange hedging and risk management for country and business. Study lessons from recent international financial crises. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: ECON 2201 and ECON 2202 or ECON 6610/MBA 6610 or permission of instructor.

ECON 5538 Public Finance: 3 semester hours.
Study of government revenues, expenditures, and debt management, including an analysis of the effects of these governmental activities on the American economy. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: ECON 2201 and ECON 2202 or MBA 6610.

ECON 5539 State and Local Finance: 3 semester hours.
Study of taxation, borrowing and spending by state, city, county and other local governments. Taxing and spending patterns are evaluated and compared by states.

ECON 5572 Comparative Economic Systems: 3 semester hours.
Study and comparison of the theories and practices found in various economic systems. Includes a study of both the free market and socialistic planning.

ECON 5574 Senior Seminar: 3 semester hours.
Discussion-driven capstone class that integrates selected topics in economics. Students will be required to do economic research, and write on and discuss current economic issues. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor.

ECON 5581 Independent Study: 1-3 semester hours.
Individuals will be assigned independent problems for research under the supervision of a departmental faculty member. May be repeated up to 6 credits.

ECON 5585 Econometrics: 3 semester hours.
The application of statistical and mathematical methods to the analysis of economic data, with a purpose of giving empirical content to economic theories and verifying them or refuting them.

ECON 5591 Economic Seminar: 1-3 semester hours.
Seminar. May be repeated.

ECON 5592 Economic Seminar: 1-3 semester hours.
Seminar. May be repeated.

ECON 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. May be graded S/U.

ECON 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

ECON 6610 Applied Economics: 3 semester hours.
Applied principles and techniques of analysis in micro and macro economics. Equivalent to MBA 6610.

ECON 6620 Seminar Philosophy of Social Science: 3 semester hours.
The application of mathematical and scientific methods to the study of social, economic, and political life will be considered through the reading of certain seminal writings. Attention will be given to the fundamental assumptions about the nature of scientific rationality. Required of D.A. students.
ECON 6621 Seminar Interdisciplinary Topics in Social Sciences: 3 semester hours.
Examination of selected topics in the social sciences from the analytic orientations and perspectives common and peculiar to the disciplines of political science, economics and sociology. Required of D.A. students.

ECON 6650 Thesis: 1-6 semester hours.
The student will do research of an economic nature supervised by a faculty member in the Economics Department. The research project will be of an interdisciplinary nature and the student will be supervised by faculty members from the department(s) involved as well as from the Economics Department. 1-6 credits. May be repeated. Graded S/U.

ECON 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

Finance Courses
FIN 5505 Advanced Corporate Financial Management: 3 semester hours.
Evaluation and analysis for financial decision making. Asset valuation, cost of capital, leasing, dividend policy, mergers and acquisitions, IPOs, asset restructuring and additional topics related to firms' financial decisions and performance. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: FIN 3315 or MBA 6615.

FIN 5531 Financial Modeling: 3 semester hours.
Survey of interactive modeling with special applications of computer models. Includes topics from cash flow forecasting, mergers and acquisition, financial structure, and capital budgeting.

FIN 5545 Real Estate Finance: 3 semester hours.
Principles and methods of valuing business and residential land and improvements; analysis of sources and methods used in the financing of construction and development.

FIN 5548 Financial Management of Depository Institutions: 3 semester hours.
An analysis of the managerial issues which affect the financial performance of depository institutions such as capital adequacy, liquidity and asset/liability management techniques, profitability analysis, funding and investment decisions.

FIN 5551 Student-Managed Investment Fund I: 3 semester hours.
Management of the D.A. Davidson Student-Managed Investment Fund. Students act as financial analysts. Provides students with real-world knowledge and judgment crucial to sound investing. Students may apply either FIN 5551 or FIN 5552, but not both, toward their electives.

FIN 5552 Student-Managed Investment Fund II: 3 semester hours.
Management of the D.A. Davidson Student-Managed Investment Fund. Students act as financial analysts. Emphasis on security selection, portfolio management, and creation of an annual report. Students may apply either FIN 5551 or FIN 5552, but not both, toward their electives.

FIN 5564 Entrepreneurial Finance: 3 semester hours.
Course develops financial and managerial skills important to students who are interested in pursuing careers in an entrepreneurial setting. Topics include: financial issues unique to entrepreneurial firms, development of skills with wide application in entrepreneurial situations, and financing sources available to entrepreneurial companies.

FIN 5575 International Corporate Finance: 3 semester hours.
Study of financing investment projects abroad including the tapping of overseas capital markets, financing export transactions, hedging foreign exchange risks, and the control alternatives of international business.

FIN 5578 Investments: 3 semester hours.
Fundamental principles in the risk-return valuation of financial instruments. Topics include the institutional framework in which securities are traded, modern portfolio theory, asset pricing, derivatives, and portfolio management.

FIN 5580 Financial Analysis and Performance: 3 semester hours.
Modeling, measuring and interpreting financial and strategic management of firms for decision making from a short- and long-term perspective. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: FIN 3315 or MBA 6615.

FIN 5584 Options and Futures: 3 semester hours.
Examination of the pricing and use of options, financial futures, swaps, and other derivative securities.

FIN 5591 Seminar in Finance: 3 semester hours.
Reading, discussion and preparation of reports on selected topics. Restricted to senior and graduate students in business who have the consent of the instructor. May be repeated with instructor's permission for up to 6 credits.

FIN 5592 Special Problems in Finance: 2-3 semester hours.
Research and reports on selected problems or topics in finance. Restricted to senior and graduate students in business who have the consent of the Dean. May be repeated under different title for a maximum of 9 credits with the permission of the major advisor and the Dean.

FIN 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

FIN 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

Health Care Admin Courses
HCA 5515 Physician Practice Management: 3 semester hours.
The course will provide an overview of physician practice management concepts with an emphasis on business management concepts including revenue cycle management, supply chain management, business law, human resource management and marketing. Students will develop solutions to management cases peculiar to the practice management arena.

HCA 5550 Special Topics in Healthcare: 1-3 semester hours.
Topics relevant to health professionals. May be repeated for up to 9 credits with different titles or content. Graded S/U.

HCA 5553 Healthcare Finance: 3 semester hours.
The application of financial management principles, practices, and techniques used in healthcare organizations. An understanding and analysis of how these financial tools are used in decision making and how they are integrated into the healthcare organization's planning process. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: ACCT 2202 and FIN 3315 or equivalent.

HCA 5565 Health Care Operations and Quality: 3 semester hours.
This capstone course in health care administration addresses the application of managerial concepts and practices within various health care environments, including acute, ambulatory, mental health, and long-term care organizations. Topics include issues/trends and best practices related to governance, leadership, management; planning and marketing; quality assessment/operations improvement; and maximizing human resources and financial performance. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.
HCA 5573 Marketing for Health Care Organizations: 3 semester hours.
Introduction to basic marketing management issues as they pertain to healthcare. Current marketing trends in the health care marketplace. Consumer orientation, health care marketing plans, and strategy development. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HCA 5575 Health Law and Bioethics: 3 semester hours.
This course develops a roadmap to facilitate risk management in the provision of healthcare services. Issues addressed include regulation and licensure, liability, selected aspects of public programs, and ethical issues regarding death, reproduction, and research. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

HCA 5595 Administrative Internship: 4 semester hours.
During the internship experience, students work in a health or human services organization, performing various duties and being exposed to various aspects of managerial careers in health services management.* Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: HCA emphasis and permission of HCA department chair.

HCA 5599 Experimental Course: 1-6 semester hours.
This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

HCA 6610 Industry in Transition: 2 semester hours.
Current readings from the popular and academic literature are used to explore and to understand the critical aspects of access, cost, and quality healthcare delivery across all areas of the industry.

HCA 6615 Health Services Management: 3 semester hours.
Determination and fulfillment of mission, plans, and structure, motivating individuals, and managing activities to support people in their work and in the achievement of their goals.

HCA 6620 Economics and Reimbursement: 2 semester hours.
In-depth synthesis of the insurance and reimbursement practices in today's healthcare environment, and the economic foundations upon which they are based.

HCA 6625 Healthcare Law and Bioethics: 3 semester hours.
Comprehensive coverage of legal issues and the ethical implications of the law as applied to regulation and licensure, health care financing, Medicare and Medicaid, health care reform, and other relevant current issues.

HCA 6630 Financial Management: 3 semester hours.
The application of financial management principles, practices, and techniques used in healthcare organizations. Financial tools as decision making, strategy, and planning tools.

HCA 6635 Healthcare IT and Quality: 2 semester hours.
Healthcare IT management framework, hardware and software, project management, and the collection, use, security of health information, external accreditation processes, and internal quality improvement programs.

HCA 6640 Healthcare Policy: 2 semester hours.
The formulation of priorities, development of legislation, implementation of legislative provisions through administrative action, and their effect on population health.

HCA 6645 Strategic Management: 3 semester hours.
An integration of the principles of organization management, finance, and marketing. Market analysis and positioning including strategic planning and new program development. The leader's role in strategy formulation and implementation.

HCA 6651 Masters Project: 1-3 semester hours.
Under the guidance of a supervising committee, each student will conduct an in-depth project specific to a current issue or problem in healthcare management. Written documentation and an oral defense of the project are required. Must be taken for three credits the first time this course is taken. May be repeated for variable credit thereafter. 1 to 3 credits. Graded S/U.

HCA 6660 Applied Research: 3 semester hours.
Students will develop the knowledge and skills needed to investigate and address important issues in health organizations using the methods of health services research, as well as to effectively use and evaluate the published literature. How to identify and define a question that is researchable, appropriately use primary and secondary data, choose and execute appropriate research designs, and select and apply appropriate qualitative, quantitative, survey, and evaluation methods.

HCA 6665 Health Insurance and Reimbursement: 3 semester hours.
Introduction to, and analysis of, health insurance in the United States. Select topics include reimbursement systems, public and private health insurance; their impact on patients, organizations, society, care delivery modes, and clinical and managerial quality.

HCA 6680 Applied Topics in Health Care: 3 semester hours.
Advanced readings and analysis in the areas of health economics, health finance, social aspects of medicine, bioethics, public health, and epidemiology.

HCA 6682 US Health Systems and Policy: 3 semester hours.
An examination of US health industry, systems, and organizations from the four-point perspective of access, quality, finance, and policy.

HCA 6691 Independent Problems in Health Care Administration: 1-3 semester hours.
Individual work under faculty guidance. May be repeated for up to 6 credits.

HCA 6699 Experimental Course: 1-6 semester hours.
This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

Informatics Courses

INFO 5307 Intermediate Systems Analysis and Design: 3 semester hours.
Provides a general understanding of the systems development life cycle and develops the analytical skills required to thoroughly understand a problem and formulate the optimal solution. Projects will require the student to use process modeling techniques to assist in the analysis and design process. Requirements gathering is emphasized. The analysis and design of web-based systems is included.

INFO 5417 Statistical Methods for Data Analytics: 3 semester hours.
Encompasses data visualization, descriptive data analysis, ANOVA approaches, correlation and multiple regression and additional modeling topics. Emphasis will be based upon appropriate interpretation of statistical results. All data will include a business or health care context to acquaint students with current statistical practice.

INFO 5507 Database Design and Implementation: 3 semester hours.
Covers multi-user relational database management systems, stored procedures, SQL, transaction processing, etc. The course emphasizes Secure Software Design, which includes secure design elements, software architecture, secure design review, and threat modeling. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PRE-or-COREQ: INFO 5307.
INFO 5511 Intermediate Information Assurance: 3 semester hours.
Focuses on homeland security, information assurance, integrity, control, and privacy. Covers CNSS-4011, national policy, and international treaties. The course considers Access Control, Application Security, Business Continuity and Disaster Recovery Planning, Cryptography, Information Security and Risk Management, Legal, Regulations, Compliance and Investigations, Operations Security, Physical (Environmental) Security, Security Architecture. Includes security issues around steady state operations and management of software, as well as security measures taken when a product reaches its end of life. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: INFO 2285 or CS 2275 or INFO 3310, or permission of instructor.

INFO 5512 Systems Security for Senior Management: 1-3 semester hours.
Review of system architecture, system security measures, system operations policy, system security management plan, and provisions for system operator and end user training. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: INFO 5519. PREREQ: INFO 5511, INFO 5513, INFO 5514, INFO 5515, and INFO 5516 or permission of instructor.

INFO 5513 Systems Security Administration: 1-3 semester hours.
Outlines the basic principles of systems security administration. The student will be introduced to the methods and technologies associated with running a system to maintain privacy and security. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: INFO 5519. PREREQ: INFO 5511 or permission of instructor.

INFO 5514 Systems Security Management: 1-3 semester hours.
Establishes a framework for managing both systems and systems administrators operating in a secure and private computing environment. The course deals with facilities management, contingency plans, laws, standards of conduct and operations management. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: INFO 5519. PREREQ: INFO 5511 and INFO 5513 or permission of instructor.

INFO 5515 System Certification: 1-3 semester hours.
Describes techniques and methods for certifying a system is in compliance with national and governmental information assurance standards. Evaluates various certification methodologies. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: INFO 5519. PREREQ: INFO 5511, INFO 5513, and INFO 5514 or permission of instructor.

INFO 5516 Risk Analysis: 1-3 semester hours.
Develops techniques to characterize and provide perspective on the likelihood of adverse events. Explains methods to characterize the consequences and general costs associated with the various adverse events occurring. The analysis provides insights into various likelihood and consequence combinations. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: INFO 5519. PREREQ: INFO 5511, INFO 5513, INFO 5514, and INFO 5515 or permission of instructor.

INFO 5517 Information Assurance Engineer: 1-3 semester hours.
Focuses on the practical application of systems design and engineering principles and processes to develop secure systems. Topics include analysis of organizational needs, definition of security requirements, designing systems architectures, developing secure designs, implementing system security, and support of systems security assessment/authorization for organizations. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: INFO 5511, INFO 5513, INFO 5514, INFO 5515, and INFO 5516.

INFO 5519 Advanced Informatics Practicum: 1-3 semester hours.
Significant informatics experience including research coordinated by the faculty designed to provide broad exposure to issues in Information Assurance. Does not fulfill major/minor requirements. May be repeated for up to 6 credits. Graded S/U. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor.

INFO 5520 Health Informatics: 3 semester hours.
Presents an overview of the evolution of health care informatics. Students will learn health care informatics history, concepts, theories, legal and ethical implications, and applications within the health care industry. This course will introduce the student to human factors issues in health care informatics; critical issues affecting the development and implementation of information technologies (clinical, administrative, and learning), knowledge management principles, professional practice trends, and explore some of the emerging information technology in health care. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

INFO 5522 Health Information Governance: 3 semester hours.
The aim of this course is to provide a broad base of understanding of the range of issues that IT professionals must be aware of upon entering the healthcare industry. Students will be exposed to the current state of healthcare industry security environments and the larger regulatory environment in which healthcare organizations operate. This is important in light of the recent move towards cloud-based electronic health records (EHRs) and third party-developed health applications. Further, issues relating to privacy/security, information governance and information risk assessment will also be covered. Finally, students will be exposed to interventions that can help mitigate the risks identified. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

INFO 5524 Healthcare Workflow Process Analysis and Redesign: 3 semester hours.
The aim of this course is to provide a broad-based understanding of workflow processes in the healthcare industry. In particular, the course will develop skills necessary to critically analyze and redesign the patient flow processes and utilize health IT systems both in the administrative and clinical landscape to achieve greater operational efficiency and provide higher quality of care to patients. Quality improvement methods and tools as well as process change implementation, improvement, and management will also be discussed in this course. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ or COREQ: INFO 5520.

INFO 5526 Health Data Analytics: 3 semester hours.
Introduction to and the use of intermediate analytical skills to identify trends, correlations to predict outcomes and provide meaningful recommendations. Variety of data sources and structures are identified and transformed into relevant information in the clinical context to improve effectiveness and efficiency, design and plan policy and programs, improve service delivery and operations, enhance sustainability, mitigate risk, and provide a means for measuring and evaluating critical organizational data that helps the healthcare organization to achieve increased quality of care and patient satisfaction. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: INFO 5520 and INFO 5417.

INFO 5530 Web Application Development: 3 semester hours.
Focuses on the development of dynamic, online applications using a programming language like PHP or ASP.Net and a relational database. The course will consider Secure Software Implementation/Coding, which involves secure coding practices, avoiding vulnerabilities, and reviewing code to ensure that there are no errors in the code or security controls. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: INFO 3307
INFO 5532 Mobile Application Development: 3 semester hours.
This course will introduce mobile app programming and provide theoretical and practical knowledge to design and build mobile applications. Students will learn various techniques in mobile app development using a programming language like Java. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: INFO 5507.

INFO 5571 Computer Forensics Essentials: 1-3 semester hours.
Introduction to issues of both in data privacy and computer forensics - using available tools, learners can reveal the stored passwords on their computer and access previously deleted data. Explains the role of computer forensics in both the business and private world, identifies the current techniques and tools for forensic examinations; describes and identifies basic principles of good professional practice for a forensic computing practitioner; develops familiarity with forensic tools and application in different situations. Risk exposure for electronic commerce businesses; offenders and abuses; criminal opportunities; evidential aspects, case studies, E-discovery, forensic readiness corporate planning and response, from evidence collection to business continuity; testing vulnerabilities; reverse engineering. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: INFO 5507 and INFO 3380 or permission of instructor.

INFO 5572 Cloud Security Essentials: 1-3 semester hours.
Cloud computing provides for distributed computing and data storage capabilities. Instead of buying large servers to store data and being saddled with the cost of building and maintaining those systems, users can now purchase those servers from a third party with the ability to expand or contract those needs as necessary. This course will look at current research results in cloud security in order to identify opportunities for continued research in this field. PREREQ: INFO 5507 and INFO 3380 or permission of instructor.

INFO 5573 Continuous Monitor, Intrusion Analysis, Response: 1-3 semester hours.
Using principles continuous monitoring and baselines, develop knowledge and understanding of the strategies, techniques, and technologies used in attacking and defending networks and how to design secure networks and protect against intrusion, malware and other hacker exploits. Introduces methods of attacking and defending a network; design of secure information infrastructure; servers, networks, firewalls, workstations, and intrusion detection systems. Intrusion detection and network monitoring techniques; worms, viruses and other malware; operation, detection and response; principles of penetration testing for assessment of system security; hacker exploits, tools and countermeasures. Investigative techniques, ethical, legal and privacy issues. PREREQ: INFO 5507, INFO 5511, and INFO 3380 or permission of instructor.

INFO 5574 SCADA Management and Lab: 1-3 semester hours.
Supervisory control and data acquisition systems are used to control many utility networks, chemical plants, pipelines and many other types of industries. This course will examine the vulnerabilities associated with these systems and discuss how they can be made secure from outside attack. Fundamentals of software-controlled processes will also be discussed. PREREQ: INFO 5511, INFO 5507, and INFO 3380 or permission of instructor.

INFO 5582 Systems Development and Implementation Methods: 3 semester hours.
This course presents the process of software development and the methodologies to lower development costs, increase software reliability, decrease development time and ensure application development success. An overview and comparison of traditional and modern methods of software development are presented. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: INFO 5507.

INFO 5584 Secure Software Life Cycle Development: 3 semester hours.
In today's interconnected world, security must be included within each phase of the software lifecycle. This course contains the largest, most comprehensive collection of best practices, policies, and procedures to ensure a security initiative across all phases of application development, regardless of methodology. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

INFO 5586 Data Analytics: 3 semester hours.
Provides an overview of the fundamentals of analysis to support decision makers in achieving organizational results. Students become familiar with the tools needed to frame problems, analytical techniques to generate and test hypotheses, and the skills to interpret the results into meaningful information. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: INFO 5507 and INFO 3380 or permission of instructor.

INFO 5587 Software Systems Study: 3 semester hours.
In addition to system optimization techniques, management strategies will be discussed. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: INFO 5507 and INFO 3380 or permission of instructor.

INFO 5591 Seminar in Informatics: 3 semester hours.
Reading, discussion, and reporting on selected topics. May be repeated for up to 6 credits with permission of instructor. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Graduate status in Business and permission of instructor.

INFO 5592 Special Problems in Informatics: 1-3 semester hours.
Research and reports on problems or topics in informatics. May be repeated for up to 9 credits with different content. PREREQ: Graduate status in Business and permission of the Chair.

INFO 5593 Informatics Internship: 1-3 semester hours.
Significant business experience coordinated by the faculty to provide broad exposure to informatics issues. Letter grade assigned. May be repeated for a total of 3 credits.

INFO 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

INFO 6528 Electronic Health Records: 3 semester hours.
Introduces students to Electronic Health Records (EHR), which aggregate patient health information across healthcare organizations, providers, and consumers. Students will learn the technical infrastructure required for EHRs including distributed architecture, network and security design, and configuration approaches to support these designs. The course may also discuss vendor and product selection along with best practices for deploying and the transition to EHRs. Students will have hands-on learning experience through simulated EHR activities in different roles within an ambulatory care setting. PREREQ: INFO 5507.

INFO 6540 Health Clinical Practicum: 3 semester hours.
Provides the students with the opportunity to observe and perform various supervised health informatics-related activities in one or more clinical departments. 8 hours per week. NOTE: Some facilities may require a background check. When required, this check will be conducted at the student's expense.

INFO 6610 Advanced Information Assurance: 3 semester hours.
Network and IS security issues, risk assessment, technological, and procedural security measures; computer fraud and privacy issues; hacker attacks, phone fraud, denial of service, and virus and worm attacks; laboratory and professional practice.
INFO 6620 Advanced Systems Analysis and Design: 3 semester hours.
This course builds on basic system analysis and design concepts including distributed systems analysis and design. Use cases, quality assurance, and performance metrics are investigated. The course will also introduce students to some of the most significant trends, issues, and research results in system architecture, and design.

INFO 6630 Advanced Data Management: 3 semester hours.
This course builds on basic database design and implementation concepts. New developments in database technology are discussed. Students examine the impact of emerging database standards and evaluate the contribution of new approaches to practical implementations of data management. PREREQ: INFO 5507.

INFO 6640 Advanced Data Analytics: 3 semester hours.
This course covers advanced analytical techniques and methods designed to resolve key management issues. Students will learn to resolve issues involving risk and sensitivity and learn to identify patterns of performance, working toward a goal of recognizing insights into the data that will support good decision making. Students may work with a large dataset to convert it to meaningful information by using the analytical tools learned in class.

INFO 6650 Thesis: 1-6 semester hours.
1-6 credits. Graded S/U. May be repeated.

INFO 6660 Informatics Project: 1-3 semester hours.
A significant project involving informatics toward the completion of the M.S. program with non-thesis option. Includes a report and oral examination. Graded S/U. May be repeated.

INFO 6670 Management of Informatics Projects: 3 semester hours.
This course provides an informatics orientation for project management. Students learn techniques for planning, organizing, scheduling, and controlling informatics projects, including software cost estimation and software risk management. Establishing project communications, change management, quality assurance, and managing distributed software teams and projects are among the topics discussed.

INFO 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

Management Courses

MGT 5510 Entrepreneurship: 3 semester hours.
Developing new business ideas, initiating a new enterprise, bringing new technology to the market; applying sound business practices involving management, marketing, accounting, finance, and informatics to accommodate changing market conditions.

MGT 5520 Native American Organizational Systems: 3 semester hours.
Analysis of factors and dimensions to be considered in the structure and design of contemporary Native American organizations. Comparison of contemporary Native organizational systems with traditional Native organizational approaches and contemporary non-Native organizations. Specific graduate level activities and/or performances will be identified in the course syllabus.

MGT 5522 Native American Enterprise: 3 semester hours.
Approaches, strategies, and models utilized in developing tribally-owned and privately-owned Native American businesses across the U.S. and Canada. Analysis of social, economic, and environmental contingency factors that contribute to successful establishment of Native American businesses. Specific graduate level activities and/or performances will be identified in the course syllabus.

MGT 5530 Advanced Operations and Production Management: 3 semester hours.
Study of problems on line management in organizations. Major sections include strategy, process analysis, personpower planning, inventories, scheduling, and control of operations. Emphasizes both behavioral and technical aspects of problem solving in the area of operations management.

MGT 5534 Productivity and Quality: 3 semester hours.
Study of the factors involved in an organization's productivity and quality of product or service.

MGT 5541 Organizational Behavior: 3 semester hours.
Case study approach designed to encourage independent thought in the application of behavioral theories and concepts of organizational problems. Emphasis on integrating theoretical concepts with patterns of organizational direction, control, communications and decision-making. PREREQ: MGT 3312 or MBA 6612.

MGT 5550 Manufacturing Strategy: 3 semester hours.
Study of the various production alternatives as critical factors in a company's competitive strategies.

MGT 5561 Business Law: 3 semester hours.

MGT 5562 Issues in Business and Society: 3 semester hours.
Seminar course designed to focus thinking on critical issues facing managers in making decision choices regarding employees and other stakeholder groups, the community, and the environment.

MGT 5563 Business Law Concepts: 1 semester hour.
Legal and regulatory environment of business. Topics include: tort law, product liability, contracts, sales of goods, employment law, securities regulation, and bankruptcy.

MGT 5565 International Business: 3 semester hours.
Special emphasis on managerial functions and critical elements of the management process in a firm operating under foreign economic, technological, political, social and cultural environments.

MGT 5573 Human Resource Management: 3 semester hours.
Introduction to the methodology of employee selection, employment and development; personnel supervision and management; financial compensation; job analysis; behavioral tools and techniques employed to deal with personnel problems and contemporary problems of personpower management.

MGT 5574 Advanced Human Resource Management: 3 semester hours.
In-depth study of selected personnel/human resources management topics, including employee selection, performance evaluation, and compensation administration. PREREQ: MGT 4473 or MGT 5573, and MGT 2217.

MGT 5580 Labor and Employment Law: 3 semester hours.
Study of state and federal laws, domestic and foreign, governing employment relationships, including labor-management relations, discrimination and employee rights, work-place safety, compensation and benefits, and related topics.

MGT 5582 Project Management: 3 semester hours.
Philosophy and tools of project management focusing on applied methodologies. Addresses project scope, breakdown structure, schedules, and closure following professionally accepted industry standards.

MGT 5583 Industrial Relations: 3 semester hours.
Integrated study of principles and practices of collective bargaining and industrial relations. Discussion of methods and techniques in dealing with labor-management problems arising out of contract negotiations and administrations.
MGT 5584 International Collegiate Business Strategy Competition: 3 semester hours.
Students apply to compete in an international strategy team competition. Early rounds of the competition take place on campus. The final rounds typically take place over an intensive weekend in Anaheim, CA. PREREQ: Permission of instructor.

MGT 5591 Seminar in Management and Organization: 3 semester hours.
Reading, discussion, and preparation of reports on selected topics. Restricted to senior and graduate students in business who have the consent of the instructor. May be repeated with instructor's permission for up to 6 credits. May be graded S/U.

MGT 5592 Special Problems in Management and Organization: 2-3 semester hours.
Research and reports on selected problems or topics in management and organization. Restricted to senior and graduate students in business who have the consent of the Dean. May be repeated under a different title for a maximum of 9 credits with the permission of the major advisor and the Dean.

MGT 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

MGT 6675 Environmental Management: 3 semester hours.
The study of environmental issues in managerial decision-making. Total cost/benefit analysis, political ramifications, publicity, ethical considerations, global issues. Analysis of various business functions and their impact on short- and long-term concerns.

MGT 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

Marketing Courses

MKTG 5505 Personal Selling and Sales Force Management: 3 semester hours.
Attention given to product features, buying motives, selling points, principles and practices of selling, psychology of salesmanship, sales problems, personal requirements, opportunities. Determination of the amount and allocation of personal sales effort to be applied to the market and methods of organizing, evaluating, and controlling this effort. PREREQ: MKTG 2225 or MBA 6613.

MKTG 5510 Entrepreneurship: 3 semester hours.
Developing new business ideas, initiating a new enterprise, bringing new technology to the market; applying sound business practices involving management, marketing, accounting, finance and informatics to accommodate changing market opportunities. Equivalent to MGT 5510. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

MKTG 5521 Services Marketing: 3 semester hours.
Examines the development, promotion, and management of services. Topics covered include strategic planning, delivery channels and promotional challenges inherent to services.

MKTG 5526 Marketing Research: 3 semester hours.
Evaluation and study of providing relevant marketing information to management. Emphasizes problem formulation, consideration of data sources, means of acquiring information, sampling, interpretation of results.

MKTG 5527 Consumer Behavior: 3 semester hours.
In-depth analysis of the internal and external influences of consumer behavior and decision-making, including learning, perception, cultural values, group influences, and a range of psychological and sociological concepts. This advanced study of consumer behavior will include analysis of a consumer dataset, as well as case studies highlighting concepts under investigation, and a consumer behavior audit. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: MKTG 2225 or MBA 6613.

MKTG 5528 Integrated Brand Promotion: 3 semester hours.
Planning and execution of advertising, sales promotion, and public relations programs developed into an integrated brand promotion program. Includes development of Integrated Brand Promotion plan. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: MKTG 2225 or MBA 6613.

MKTG 5532 New Product Management: 3 semester hours.
Analysis of new product ideas: screening, business analysis, prototype development, market testing, and commercialization of goods and services. Includes diffusion of innovation issues in consumer and industrial markets.

MKTG 5565 International Marketing: 3 semester hours.
Comparative marketing arrangements are examined. Covers factors which need to be recognized by international marketing managers in analyzing markets, covering foreign operations, and assessing economic, cultural, and political aspects of international markets.

MKTG 5575 Competitive Intelligence: 3 semester hours.
How to use competitive intelligence to gain strategic advantage. Includes understanding of information gathering techniques, the conversion of information into intelligence, various analysis methodologies, and intelligence dissemination processes.

MKTG 5580 Marketing on the Internet: 3 semester hours.
Understanding and using the Internet for marketing communications. Includes evaluating current sites, developing skills for authoring HTML pages, and developing an Internet marketing strategy and site for an organization.

MKTG 5591 Seminar in Marketing: 3 semester hours.
Reading discussion, and preparation of reports on selected topics. Restricted to senior and graduate students in business who have the consent of the instructor. May be repeated with instructor's permission for up to 6 credits.

MKTG 5592 Special Problems in Marketing: 2-3 semester hours.
Research and reports on selected problems or topics in marketing. Restricted to senior and graduate students in business who have the consent of the Dean. May be repeated under a different title for a maximum of 9 credits with the permission of the major advisor and the Dean.

MKTG 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

MKTG 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

Master of Bus Admin Courses

MBA 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.
MBA 6610 Applied Economics: 3 semester hours.
Applied principles and techniques of analysis in micro and macro economics. Equivalent to ECON 6610.

MBA 6611 Financial Reporting and Managerial Accounting: 3 semester hours.
Integrates study of accounting concepts with understanding of financial reports. Use of accounting information in managerial decision making and control.

MBA 6612 Human Behavior in Organizations: 3 semester hours.
Study of human behavior in organizations. Decision-making and problem-solving, interpersonal relations and communications, and negotiations.

MBA 6613 Marketing: 3 semester hours.
Analysis of forces producing changes in general business conditions. Principles of market-driven decision-making. Application to marketing management decisions and marketing strategy.

MBA 6614 Operations Management: 3 semester hours.
Decision-making techniques for analysis of operational systems. Topics include operations/production planning, process analysis, project planning and control, and quality control. Include GC, MBA.

MBA 6615 Finance: 3 semester hours.
Study of the allocation of scarce resources, domestic and international financial management.

MBA 6616 Business Policy: 3 semester hours.

MBA 6619 Statistical Tools for the MBA: 1 semester hour.
This course provides a review of basic statistics for MBA students. Because it is a tools' course that is applicable to other courses in the MBA program, it should be taken early in the student's program. The course covers summary statistics, descriptive measures, basic probability theory, normal distributions, confidence intervals, and simple and multiple linear regressions. Microsoft Excel will be used to analyze data.

MBA 6620 Quantitative Information for Business Decisions: 3 semester hours.
Development and use of financial and non-financial information to support business analysis and decision-making. Develops and applies analytical tools and framework through readings and case analysis.

MBA 6621 Managerial Decision Making and Negotiation: 3 semester hours.
Students will engage with the concepts and skills required by systematic approaches to decision making and negotiation. Topics include full-cycle decision making and implementation, collective deal-making, and dispute resolution in dyads and with multiple parties.

MBA 6622 Financial Management: 3 semester hours.
Integrated analysis of a firm's decisions with emphasis on the financial aspects of these decisions. Topics include advanced capital budgeting, working capital management, modern portfolio theory, the cost of capital, and international corporate finance.

MBA 6623 Marketing Management: 3 semester hours.
Course focus is on the critical skills marketers need to successfully manage the marketing function in a customer-driven firm.

MBA 6624 Information Systems for Business: 3 semester hours.
Course aims to present students with an understanding of major areas of business information systems and technologies that support enterprise strategies and objectives, facilitate business operations and decision making, and allow organizations to achieve a sustainable competitive advantage in the market. Topics include major areas of business information systems and technologies that support enterprise strategies and objectives, facilitate business operations and decision making, and allow organizations to achieve a sustainable competitive advantage in the market. Topics include database management; enterprise information systems and their applications in different industries; electronic commerce; research; implementation, and management; and information systems development processes and methodologies. Behavioral, social, and ethical implications of information technology adoption and use in different domains will also be discussed.

MBA 6625 Managerial Control Systems: 3 semester hours.
The managerial and strategic use of control systems. The impact of control systems on organizational behavior and decision making.

MBA 6626 Business Policy and Strategy: 3 semester hours.
Strategic management of the firm, with emphasis on strategic direction, governance, external and internal analysis, strategy formulation, and implementation. Includes coverage of strategy and ethics and strategy in a global environment.

MBA 6628 Applied Business Solutions: 3 semester hours.
Student teams participate in applied business projects or manage a simulated company's operations. Focus is on enhancing broad-based skills developed in other MBA courses. This course must be taken in the last semester in which a student is enrolled. PREREQ: MBA 6623. PRE-OR-COREQ: MBA 6626.

MBA 6629 Productivity Management: 3 semester hours.
This course is directed at improving a firm's efforts to increase performance and competitiveness through developing and managing the elements of the value chain.

MBA 6637 Introduction to Business Analytics: 3 semester hours.
Survey course that includes topics from major areas of business use of data analytics: modeling, predictive analytics, and data mining. The course will also include discussion of data warehousing and data cleaning. Using software, students will be expected to do case work with data providing an executive summary with supporting statistical analyses for business decision making.

MBA 6639 MBA Paper: 3 semester hours.
May be repeated.

MBA 6641 Relational Leadership: 3 semester hours.
Students build knowledge and skills in leading others through a relational lens. Topics include self-management, leading teams; managing conflict constructively, facilitating change, and coaching and motivating others.

MBA 6650 Thesis: 1-6 semester hours.
May be repeated. Graded S/U.

MBA 6692 Special Problems in Business Administration: 2-3 semester hours.
Research readings or reports on selected problems and topics. May be repeated under a different title for a maximum of 6 hours credit. Requires the consent of the instructor.

MBA 6693 Graduate Internship: 1-3 semester hours.
A program of significant business experience coordinated by the faculty to provide broad exposure to issues. May be repeated for up to 3 credits. Graded S/U.

MBA 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.
**Conceptual Framework**

The College of Education conceptual framework guides the curriculum, instruction, and assessment for all initial and advanced professional education programs in the College of Education. This framework comprises a standards-driven, learner-centered, assessment-informed, collaborative approach through which teachers, administrators and other school personnel develop the knowledge, dispositions, and skills deemed essential for effective professionals.

**Standards for Advanced Professionals:** The College of Education Standards for Advanced Professionals address the knowledge, dispositions, and skills required for school personnel completing initial and advanced/administrative preparation. These standards present the advanced professional as reflective, inquiry-oriented, cognizant of cultural diversity and individual differences, able to communicate effectively, aware of the research in his/her field, and able to assume leadership responsibilities.

**Professional Studies and Research:** The professional accesses, reads, and interprets the literature in his/her field and applies information from the research to professional practice.

**Theoretical Foundations:** The professional understands the theoretical foundations of the profession and applies knowledge of theoretical foundations to professional practice.

**Professional Practice:** The professional recognizes and addresses current issues in the profession, solves problems encountered in professional practice, and reflects on his/her professional practice and its effects.

**Exceptionality and Diversity:** The professional addresses issues of exceptionality and cultural diversity in his/her professional practice.

**Technology:** The professional uses technology in his/her professional practice.

**Assessment:** The professional uses a variety of formal and informal assessments to evaluate his/her performance and the performance of others.

**Management of the Work Environment:** The professional creates and maintains a safe and productive work environment.

**Leadership:** The professional assumes leadership roles in the profession and shares knowledge and expertise with others in the profession and community.

**Interpersonal Skills:** The professional fosters and maintains positive work relationships and models effective oral and written communication.

**Personal Characteristics:** The professional displays the beliefs, values, and behaviors that guide the ethical dimensions of professional practice.

**Organization of the College of Education**

To facilitate student access to advising and other academic support services, the College of Education is organized into four departments: Organizational Learning and Performance, School Psychology and Educational Leadership, Sport Science and Physical Education, and Teaching and Educational Studies. Program descriptions, admission requirements, and program standards for each department are described in the following sections. However, the following are common elements to all master’s programs within the College of Education.

**Requirements for doctoral programs and educational specialists are listed with those programs.**

**Admission to College of Education Master’s Programs**

At the time of application, the applicant must specify a single Master of Education program area to which admission is requested (i.e., Educational Administration, Elementary Education, Secondary Education, Literacy, Instructional Technology, K–12 Education/Music Education Emphasis, Child and Family Studies, School Psychology, Special Education, Human Exceptionality, or Physical Education/Athletic Administration). Should a student wish to change his/her program area, he/she must reapply to the Graduate School and to the new program area for admission.

The following are required for admission by all Master of Education program areas:

- The student must apply to, and meet all criteria for, admission to the Graduate School.
- Bachelor’s degree from a college or university accredited in the United States or its equivalent from a school in another country.
- Grade point average of 3.0 or higher for all upper division credits taken at the undergraduate level.
- Fulfill any additional requirements of the proposed master’s program area (e.g., successful completion of an admission interview with the master’s program faculty).

**Program Requirements:**

No more than 9 credits of unclassified graduate coursework may be applied to the student’s program. The student is responsible for meeting the requirements of, and being admitted to, the program as a classified student before taking additional coursework.

Master of Education students are strongly encouraged to sequence the master’s core courses as follows:

- EDUC 6601 within the first 9 credit hours
- EDUC 6602 within the first 18 credit hours
- EDUC 6610 within the first 24 credit hours

Additional program requirements specific to the Master’s of Education and the Master’s of Physical Education are listed with each program description.

**Retention in College of Education Graduate Programs:**

Students must meet university, college, and department standards for grades, residency, time limits, and continuing registration (refer to the General Information section at the front of the Graduate Catalog and program descriptions that follow).
Courses

EDMT 5570 Teaching Mathematical Thinking Data Analysis and Statistics: 3 semester hours.
This course will explore the mathematical theory underlying data analysis and statistics and student reasoning of data analysis and statistics topics. Topics will include the nature and uses of data, categorical and measurement data, appropriate representations of data, basic concepts of probability, and drawing conclusions from data. Emphasis on enhancing student mathematical development, and increasing participants' content knowledge and instructional practices that promote student understanding.

EDMT 5571 Teaching Mathematical Thinking Geometry and Measurement: 3 semester hours.
This course will explore the fundamental mathematical theory underlying the content area of geometry and measurement and student reasoning of geometrical topics. Topics will include geometric visualization, composing and decomposing, congruency and similarity, geometric measurement, common units in geometry, basic geometric figures in different dimensions, plane coordinates, transformations, and geometric constructions. Emphasis will be given to enhancing student mathematical development and increasing content knowledge and instructional practices that promote student understanding.

EDMT 5572 Teaching Mathematical Thinking Algebraic Reasoning: 3 semester hours.
This course will explore the fundamental mathematical theory underlying the teaching and learning of number and operation as a foundation for algebra as well as structures of algebraic reasoning. Topics will include meanings of operations and how they relate to one another, computation within the number system as a foundation for algebra, the use of mathematical models, and focusing on student thinking. Emphasis will be given to developing concepts for teaching multiplicative thinking, proportional reasoning, and algebraic reasoning.

EDMT 5573 Teaching Mathematical Thinking Numbers and Operation: 3 semester hours.
This course will explore the fundamental mathematical theory underlying the content area of number and operation and student reasoning of number and operation topics within a framework of a student-centered, problem-based classroom. Topics will include number systems, ways of representing numbers, meanings of operations and how they relate to one another, and computation within the number system. Pedagogical topics will focus on attending to student thinking and reasoning through the use of discourse and questioning, professional noticing, and the effective use of manipulatives or other mathematical tools.
Emphasized areas within the HRD discipline are:

- Student's understanding, knowledge, and skills in three major areas—development, performance improvement, strategic planning, and leadership.
- Human resource development discipline principles and practices of learning and performance professionals with high-demand management expertise in the human resource development discipline.

The Master of Science in Human Resource Development is designed to strengthen the student's understanding, knowledge, and skills in three major areas—development, performance improvement, strategic planning, and leadership.

While research is an integral component of the Instructional Design doctoral program, candidates are provided primarily with courses and experiences preparing them to function more effectively as leaders in guiding instruction to meet specific educational outcomes.

### Master of Education in Instructional Design & Technology

The Master of Education in Instructional Design & Technology (MEd-ID&T) prepares instructional designers and educators with the knowledge, skills, and abilities for designing, developing, implementing, and evaluating technology-based solutions to instructional problems. Graduates of the MEd-ID&T degree practice in K-12, post-secondary, business, industry, and performance learning environments, and may also prepare for doctoral study. Candidates in the MEd-ID&T degree pursue advanced study in Instructional Technology core, specialty, and field studies.

### Master of Science in Human Resource Development

The Master of Science in Human Resource Development (MS HRD), in the College of Education at Idaho State University prepares organizational learning and performance professionals with high-demand management expertise in the human resource development discipline principles and practices of learning and development, performance improvement, strategic planning, and leadership. The curriculum of this 30-credit masters is delivered fully online and can be completed in 18 months. The project-based coursework and research component address workplace problems with innovative, evidence-based HRD solutions. The Master of Science in Human Resource Development is designed to strengthen the student’s understanding, knowledge, and skills in three major areas—

1. MS HRD Course Requirements
2. HRD Studies or the Professional-Technical Studies

Emphasized areas within the HRD discipline are:

- Human performance improvement
- Learning effectiveness

### Doctor of Philosophy in Instructional Design

Admission Requirements

Admission to the Instructional Design Ph.D. program is based on a cohort model. Cohort cycles depend on the start date of the particular cohort (contact department chair for specific details). However, there is a specific sequencing of curriculum, and this may strongly influence the start date of a particular cohort. Applications for cohort admission are accepted at any time, in accordance with the deadlines set by the Graduate School. Every effort is made to accommodate the doctoral program of study for non-cohort students who enroll in full-time doctoral studies. In addition to the Graduate School general requirements, individuals applying for admission to the Instructional Design Ph.D. program will be reviewed using the following criteria for admission. Preference will be given to applicants who have:

1. A master's degree in instructional technology, instructional design, or a related field.
2. An academic record of at least 3.0 Grade Point Average (GPA) in the last two years of undergraduate course work and 3.5 GPA at the graduate level.
3. A minimum of 40th percentile on both the Verbal and Quantitative Reasoning portions of the GRE. One of these scores must be at or above the 50th percentile. Alternatively, an MAT score at the 45th percentile or higher may be substituted for the GRE.
4. Submitted a current curriculum vitae.
5. Submitted a letter of application that makes clear the candidate's interest in, and suitability for, this program.
6. Successfully interviewed with faculty from the Graduate Department of Educational Leadership and Instructional Design.
7. Successfully completed a proctored writing sample.
8. In addition to the above, international students must meet Graduate School requirements for admission, including evidence of English language capabilities at the graduate studies level.

General Requirements

The Doctor of Philosophy in Instructional Design requires a minimum of 67 semester credits:

- Of the 67 semester credits required for the Ph.D. in Instructional Design, at least 30 semester credits of course work must be taken at Idaho State University.
- Dissertation credits may not be transferred from another institution.

Upon initial enrollment, all Instructional Design Ph.D. students will be required to maintain continuous enrollment, with at least one semester credit of work each semester (including summers) from matriculation to completion of the program, including completion of the dissertation and oral defense. Failure to maintain continuous enrollment can result in dismissal from the program.

A GPA less than 3.5 in the program or two grades of C+, or below, will result in the Graduate Department of Educational Leadership and Instructional Design reviewing the student's performance within the program. The result of this review may lead to dismissal. Any additional grading policies are set by the Graduate School.
Program of Study
A Program of Study will be drafted during the first semester of course work. This plan of study will be filed with the Graduate School. Programs of Study will be updated each semester. A current Program of Study must be submitted with the Comprehensive Examination Notice of Intent and routed through the student's advisor, the Department, and the Dean of the College of Education. Upon successful completion of the comprehensive examination, the Dissertation Committee, including the Graduate Faculty Representative (GFR), is established and the student is advanced to candidacy.

All doctoral requirements must be completed within five years of passing the Comprehensive Examination. Doctoral students must also meet appropriate residency requirements.

Doctor of Instructional Design Program Course Work
All course work is subject to the approval of the student's academic advisor, Instructional Design Ph.D. program leader, and program faculty.

Courses that meet the program requirements are listed on the Instructional Design PhD web site and in the program handbook.

Instructional Design Core Studies (12 credits)
The intent of the core area is to promote essential competencies of Instructional Design, including communication, learning theory, implementation, assessment, and management. A prerequisite for the core curriculum includes or demonstration of equivalent knowledge.

Advanced Research and Statistics for Instructional Design (15 credits)
The intent of this area is to provide depth of knowledge of quantitative and qualitative research designs and the statistical procedures that support them. Candidates will complete courses in advanced quantitative research design, qualitative research design, intermediate statistics, and advanced statistics, as well as one additional course that provides depth of knowledge in a particular area of research design or statistics. Prerequisites for the research curriculum include , or demonstration of equivalent knowledge.

Instructional Design Specialty Area (30 credits)
The intent of the Instructional Design Specialty Area is to provide depth of knowledge and skills applicable to a wide array of professional contexts. Practical application and research in current and emerging learning technologies are emphasized. Instructional Design Specialty Area courses meet advanced standards in planning and analysis; design and development; and implementation, assessment, and management.

Dissertation (10 credits)
A minimum of 10 semester credits for dissertation work is required. Please note that some students may require more than 10 semester credits in order to successfully complete the dissertation investigation.

Points of Assessment
Candidates in the Ph.D. in Instructional Design complete two examinations during the program of study, the Qualifying Examination and the Comprehensive Examination. The Qualifying Examination assesses the candidate's capability to synthesize Instructional Design Specialty, Core, and Research content. A passing score on the Qualifying Examination is required in order to continue in the program. The Comprehensive Examination is taken after the completion of all coursework and the Instructional Design practicum. It is a significant aspect of the student's total doctoral program and provides evidence that the candidate meets advanced Instructional Design standards. A passing score on the Comprehensive Examination is required in order to continue in the program.

Dissertation and Oral Defense
Upon successful completion of the Comprehensive Examination and approval of the dissertation proposal by his or her Dissertation Committee, the student is authorized to complete the dissertation in preparation for the final oral defense.

Master of Education in Instructional Design & Technology
Graduates of the M.Ed. in Instructional Design & Technology are professionals who facilitate learning and performance through the systematic planning, creation, and assessment of technological solutions in a broad range of instructional settings and environments. MEd-ID&T candidates take courses emphasizing instructional technology and design principles, theories, methods, and applications. Mastery is demonstrated through course and program-based phase outcomes, as well as in a final field/research project for the defense of the MEd-ID&T degree. The MEd-ID&T is designed for individualized programs of study for K-12 face-to-face, blended, and online environments; post-secondary and higher education settings; and business/industry entities in support of training and consulting endeavors.

General Admission Requirements
Applicant must meet all criteria for admission to the Graduate School (application available online). In addition, the following should be submitted to the MEd-ID&T program coordinator to complete the application process:

- Letter of interest to the MEd-ID&T program coordinator
- Current Curriculum Vitae or Resume including names and contact information for three references
- GRE or MAT scores if the Graduate School computed undergraduate GPA is below 3.50
- An interview with program area faculty via in-person or video conferencing may be requested.

International Student Admission Requirements
International students must apply to the Idaho State University Graduate School and meet all criteria for admission. Typically, international students cannot begin their enrollment at Idaho State University in the summer semester. International students should refer to the Admission of International Students section of the Graduate catalog for TOEFL and other requirements for those whose native language is not English.

General Requirements (33 credits)
Students should begin their coursework in the fall semester. It is recommended students register for two courses per semester in order to complete the degree in a timely manner. Candidates should establish a Plan of Study with their advisor prior to registering for classes. It is important to work closely with the advisor to assure a smooth progression from start to completion of the MEd-ID&T degree.

All students must complete a minimum of 33 credits in order to be granted the MEd-ID&T degree. No more than 9 credits of graduate work may be transferred from another program or university; transferred credits must meet ISU Graduate School guidelines and be approved by program area faculty. The 33 credits are distributed as follows:

- 12 credits in Instructional Design & Technology Foundations
- 15 credits of Instructional Design & Technology Specialty Studies, including 6 credits of electives
Admission Requirements

The Online Teaching Endorsement (OTE) focuses on the preK-12 educator in acquiring the techniques for integration of multiple types of technologies into the online curriculum. State of Idaho certified educators complete five graduate courses and an online internship, all of which align with Idaho Online Teaching Standards and National Standards for Quality Online Teaching by iNACOL (International Association for K-12 Online Learning.)

The skills, knowledge, and products developed through the OTE are readily transferable to work settings in both education and business/industry. Five of the six OT courses are contained in the Master of Education in Instructional Technology degree. Those who attain the OTE, if accepted into the MEd-IT degree program, can transfer the 21 credit hours from the OTE toward the 30-credit hours required to complete the MEd-IT degree.

**Admission Requirements**

- 6 credits of Instructional Design & Technology Applied Field Study, including Field Project and/or Thesis

**Program Assessments:** At the end of 12 credits, students submit the Phase I Program Assessment that illustrates the ability to conduct analysis and design for a technological solution for an instructional issue. At the end of 24 credits, students submit the Phase II Program Assessment that illustrates the ability to develop a technological solution for an instructional issue. During the final 9 credits, students submit the Phase III Program Assessment that illustrates the ability to use recognized instructional design and technology methods to implement and evaluate a project as a solution for an instructional issue.

**Instructional Design & Technology Core Studies (12 credits)**

The intent of the Instructional Design and Technology Core Studies (IDTCS) area is to promote essential and common competencies within instructional technology and design, including theories related to the instructional design knowledge base, assessment and measurement, research and writing, and statistical methods. Candidates for the MEd-ID&T degree should work closely with their Academic Advisor to identify specific content and sequencing of courses.

**Instructional Design & Technology Specialty Studies (15 credits)**

The intent of Instructional Design and Technology Specialty Studies (IDTSS) is to provide depth of knowledge and skills applicable to a wide array of professional contexts. Practical application and research in current and emerging learning technologies are emphasized. IDTSS courses meet advanced standards in planning and analysis; design and development; and implementation, assessment, and management within technology-driven environments; these courses prepare the candidate to complete the applied field studies for the MEd-ID&T degree.

**Instructional Design & Technology Applied Field Studies (6 credits)**

The intent of Instructional Design and Technology Applied Field Studies (IDTAFS) is to allow the candidate to demonstrate mastery of analysis and planning, creation and assessment, and evaluation and research through an independent technological project. Candidates work closely with their Academic Advisor to identify a professional context (K-12, post-secondary education, business/organization) for which they will create and apply an instructional design/technology intervention. In addition, candidates will base the intervention on instructional design theories and principles as evidenced in their culminating field project or thesis.

**Online Teaching Endorsement**

Applicants must meet all criteria for admission to the Graduate School (application available online). In addition, the following should be submitted to the OTE coordinator to complete the application process:

- Letter of interest
- Current curriculum vitae/resume with contact information for three professional references
- GRE or MAT scores if the Graduate School computed GPA is below 3.50
- An interview with program area faculty via in-person or video conferencing may be requested.

**General Requirements (21 credits)**

Students should begin their coursework in the fall semester. Students should register for at least two courses per semester in order to complete the endorsement in a timely manner. Students should establish a Plan of Study with their Academic Advisor prior to registering for classes. It is important to work closely with the Academic Advisor to assure a smooth progression from start to completion of the OTE.

Seniors who are Education majors and are in residence at ISU may register for courses listed with the 55xx numbers (up to six graduate credits) in the OTE in the semester during which the bachelor’s degree will be attained.

**Technology content (15 credits)**

**Internship (6 credits)**

Candidates for the Online Teaching Endorsement must fulfill a six-credit internship in an online setting during the last semester of study. Placement is established with the candidate’s advisor in coordination with an appropriate K-12 educational institution.

**Master of Science in Human Resource Development**

**Admission Requirements**

Individuals applying for admission to the Master of Science in Human Resource Development (MS HRD) program must meet the following admission requirements:

- The student must apply to, and meet all criteria for, admission to the Graduate School.
- Bachelor’s degree from a college or university accredited in the United States or its equivalent from a school in another country.
- Grade point average of 3.0 or higher for all upper division credits taken at the undergraduate level.
- The student must write a proctored Statement of Intent for the Master of Science in Human Resource Development.

**General Requirements**

Students must complete a minimum of 30 semester credit hours for the Master of Science in Human Resource Development, featuring MS HRD Course
Requirements (12 credits) for all MS HRD majors. Student electing the MS HRD will complete the HRD Studies (12 credits). Students electing the MS HRD, PTE Emphasis will complete the PTE Studies (12 credits). All MS HRD students will complete the Research studies and capstone. The Research Studies, Thesis option includes two research courses and thesis capstone (9-12 credits); the Field Research Studies option includes one research course and a research project (6 credits); the Capstone in HRD option includes a research course, another course, and a capstone project. Students will orally defend the findings of their research. Students seeking Idaho CTE certification must meet the Idaho Division of Career and Technical Education requirements for certification. (See https://cte.idaho.gov/).

Select either the HRD Studies or the Professional-Technical Studies option: 6

**HRD Studies (minimum of 12 credits)**

With advisor approval, student may select other courses from other programs.

- OLP 6603 Psychology of Leadership
- OLP 6604 Leadership Scholarship
- OLP 6605 Organizational Development
- OLP 6606 Contemporary Theories of Motivation
- OLP 6607 Workplace Evaluations and Assessments
- OLP 6608 Needs Analysis
- OLP 6609 Intervention Design and Development
- OLP 6610 The Chief Learning Officer
- OLP 6611 The Chief Diversity Officer
- OLP 6612 The Performance Consultant
- OLP 6613 Learning Technologies in HRD
- OLP 6614 The Contemporary Supervisor
- OLP 6615 Global Aspects of HRD
- OLP 6616 Theories of Adult Development
- OLP 6617 Advanced Scholarship Studies
- OLP 6618 Advanced Topics in Facilitation
- OLP 6619 Advanced Topics in Evaluation
- OLP 6620 Applied Organizational Research
- OLP 6633 Needs Assessment and Evaluation
- OLP 6634 Leadership of Learning, Development, and Change
- OLP 6636 Strategic Planning and HRD
- OLP 5501 Foundations of Human Resource Development
- OLP 5502 Occupational Analysis and Course Construction
- OLP 5503 Methods of Training
- OLP 5504 Evaluating Training and Development
- OLP 5506 Grantwriting
- OLP 5507 Instructional Technology in HRD
- OLP 5508 Professional Readings and Writing in Human Resource Development
- OLP 5510 Principles of Change
- OLP 5531 Workplace Leadership
- OLP 5544 Ethics and Diversity in the Workplace
- OLP 5564 Facilities Management

**Professional-Technical Studies (minimum of 12 credits)**

- OLP 6620 Professional Technical Education
- OLP 6621 Professional-Technical Education
- OLP 6622 Professional-Technical Education

**Research Studies coursework and capstone includes 6-12 semester hours depending upon selection of either the Thesis or Field Research Project Option.**

**Research Studies: Thesis Option** 9-12

- EDUC 6601 Research and Writing
- EDUC 6632 Research in Organizations
- EDUC 6610 Applied Educational Statistics
- OLP 6650 Thesis

*OR*

**Research Studies: Field Research Project Option** 6

- OLP 6632 Research in Organizations
- OLP 6645 Field Research Project in HRD

*OR*

**Comprehensive Exam Option (4 credits, total degree minimum 31 credits)**

- OLP 6632 Research in Organizations
- OLP 6644 Capstone in HRD

**Total Hours** 30-36

**Instr Tech Courses**

**EDLT 5516 Integration of Technology into School Curriculum: 3 semester hours.**

Examination of appropriate and effective uses of technology in K-12 environments; focus on research-proven methods and integration strategies for online and hybrid teaching/learning environments that incorporate current and emerging digital tools.

**EDLT 5555 Fundamentals of Instructional Design: 3 semester hours.**

Introduction to recognized, standard instructional design models in the field as well as design principles that guide the development of instructional materials. Students will create an instructional unit for online delivery incorporating appropriate multimedia materials. Principles related to ADA Section 508, Assistive Technology, and Universal Design for Learning will be emphasized in designing for the teaching/learning environment. PRE-or-COREQ: EDLT 5516 or EDLT 6616.
EDLT 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. Must be graded S/U.

EDLT 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

EDLT 6601 Foundations of Instructional Design and Technology: 3 semester hours.
Introduction to the foundations of instructional design and technology, including principles, models, and theories that guide the development of formal and informal learning.

EDLT 6611 Planning Instruction for Digital Formats: 3 semester hours.
Application of ID&T principles, learning theories, and research processes related to planning and analysis of technological products for formal and informal learning contexts.

EDLT 6612 Designing Instruction for Digital Formats: 3 semester hours.
Application of ID&T principles, learning theories, and research processes related to the design of technological products for formal and informal learning contexts focusing on sequencing and strategies. PREREQ: EDLT 6601 and EDLT 6611.

EDLT 6613 Developing Instruction for Digital Formats: 3 semester hours.
Application of ID&T principles, learning theories, and research processes related to the development and formative evaluation of technological products for formal and informal learning contexts. PREREQ: EDLT 6612.

EDLT 6614 Implementing Instruction for Digital Formats: 3 semester hours.
Application of ID&T principles, learning theories, and research processes related to the implementation of technological products for formal and informal learning contexts including assessment of outcomes. PREREQ: EDLT 6613.

EDLT 6616 Integration of Technology into School Curriculum: 3 semester hours.
Examination of appropriate and effective uses of technology in K-12 environments; focus on research-proven methods and integration strategies for online and hybrid teaching/learning environments that incorporate current and emerging digital tools.

EDLT 6621 Issues and Trends in Instructional Design and Technology: 3 semester hours.
Examination and discussion of current issues and innovations in instructional design and technology. Includes analysis of relevant historical and current trends and issues. PREREQ: EDLT 6616.

EDLT 6622 Assessment for Digital Formats: 3 semester hours.
In-depth study of assessment methods and instruments focusing on learner outcomes in digital environments. Students will develop test blueprints, surveys, selected response items, and rubric; conduct item analyses; and, collect reliability and validity evidence.

EDLT 6626 Instructional Technology and Staff Development: 3 semester hours.
Examination of in-service models for integrating technology into the K-12 curriculum, emphasizing integration of online and hybrid training environments that use current and emerging digital tools for professional development. PREREQ: EDLT 6655.

EDLT 6639 Delivering Instruction in Electronic Formats: 3 semester hours.
In-depth study of distance education; emphasis on various models of online delivery, content organization and presentation, graphic design principles, and incorporation of current and emergent technology tools for online environments. Students will conduct a field test of an online instructional module and present a report of the instructional design process. PREREQ: EDLT 6656.

EDLT 6646 Information Systems: 3 semester hours.
Investigation and application of computer software programs that reinforce administrative practices. Application of programs that promote effectiveness and efficiency through the appropriate development and use of data.

EDLT 6648 Independent Problems in Education: 1-3 semester hours.
Individual work under staff guidance. Field and/or library research on specific educational problems of interest to graduate students in education. Experience in research composition. May be repeated.

EDLT 6649 Seminar: 1-3 semester hours.
Critical analysis of the literature in one or more areas of instructional design and technology. Enrollment limited. May be repeated.

EDLT 6650 Thesis: 1-6 semester hours.
1-6 Credits. May be repeated. Graded S/U.

EDLT 6651 Field Project or Case Study in Education: 1-6 semester hours.
A Field Project or Case Analysis is completed in conjunction with the field practicum/internship and/or an educational setting scenario. Written report and oral explication required. May be repeated. Graded S/U.

EDLT 6652 Field Practicum in Education: 1-6 semester hours.
Individually designed practicum in an educational setting. The length, placement, and learning experiences will be determined in consultation with the major advisor. May be repeated. Graded S/U.

EDLT 6655 Fundamentals of Instructional Design: 3 semester hours.
Introduction to recognized, standard instructional design models in the field as well as design principles that guide the development of instructional materials. Students will create an instructional unit for online delivery incorporating appropriate multimedia materials. Principles related to ADA Section 508, Assistive Technology, and Universal Design for Learning will be emphasized in designing for the teaching/learning environment. PRE-or-COREQ: EDLT 6616.

EDLT 6656 Fundamentals of Multimedia Development in Education: 3 semester hours.
Exploration of the use of multimedia technology for designing digital learning content; emphasis is on online design, delivery, and evaluation. Students will conduct a field test of a multimedia instructional module and present a report of the instructional design process. PREREQ: EDLT 6655.

EDLT 6659 Online Teaching Internship: 6 semester hours.
Candidates assume instructional and management responsibilities in supervised online elementary/secondary settings. Includes weekly professional development consultations. All coursework as indicated in the Online Teaching Endorsement program of study must be completed prior to enrollment in the Online Teaching Internship course. Graded S/U. PREREQ: EDLT 6616, EDLT 6626, EDLT 6639, EDLT 6655, EDLT 6656.

EDLT 6680 Special Topics in Instructional Design and Technology: 3 semester hours.
Investigation at an advanced level in an area of instructional design and technology research, development, implementation, evaluation, or management. Content intentionally varies depending on the degree cohort and instructor. May be repeated for up to 6 credits.
EDLT 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

EDLT 7737 Practicum: 3 semester hours.
This is an individually designed field experience in an area of technology, supporting and extending course work within this area of concentration. The length, placement, and prescribed learning experiences will be determined in consultation with the Educational Technology advisor. May be repeated for maximum of 12 credits.

EDLT 7740 Instructional Systems Design I: 3 semester hours.
Examination of the instructional design process; applications of current research related to development of instructional multimedia materials. PREREQ: EDLP 7706.

EDLT 7742 Multimedia Authoring I: 3 semester hours.
Use of Macromedia Director as the main authoring system for designing instruction. PREREQ: EDLT 7740.

EDLT 7743 Multimedia Authoring II: 3 semester hours.
Advanced use of Macromedia Director as an authoring system. Includes creation of digital sound graphics, animation, and movies. Student will produce a multimedia project. PREREQ: EDLT 7742.

EDLT 7744 Instructional Systems Design II: 3 semester hours.
Advanced study of instructional design process. Includes consideration of current research related to formative and summative evaluation techniques for multimedia design. PREREQ: EDLT 7740.

EDLT 7745 Instructional Design for Distance Learning Delivery: 3 semester hours.
Exploration of effective uses of multimedia materials in the distance learning environment. Includes investigation of skills needed for creating instructional media for distance learning. PREREQ: EDLT 7742 and EDLT 7744.

EDLT 7748 Independent Problems in Instructional Design: 1-3 semester hours.
Individual field work and/or library research under staff guidance on specific instructional design problems of interest to doctoral students in the Instructional Design program. May be repeated. PREREQ: Permission of instructor.

EDLT 7749 Instructional Design Seminar: 3 semester hours.
Critical analysis of research and emerging issues and trends in Instructional Design. May be repeated up to 6 credits. PREREQ: Membership in Ph.D. Doctoral Cohort.

EDLT 7780 Spec Topics Instruct Design: 3 semester hours.
Investigation at an advanced level in an area of Instructional Design research, development, implementation, evaluation, or management. Content intentionally varies depending on the doctoral cohort and faculty. May be repeated up to 6 credits. PREREQ: Membership in Ph.D. Doctoral Cohort. Graded S/U.

EDLT 7799 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times with the same title and content.

EDLT 8850 Dissertation: 1-10 semester hours.
Variable credits. Graded S/U.

Org Learning and Performance Courses

OLP 5501 Foundations of Human Resource Development: 3 semester hours.
Acquaints the student with the various aspects of human resource development: history, philosophy, and theory of HRD. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

OLP 5502 Occupational Analysis and Course Construction: 3 semester hours.
Analysis of components of occupations to determine instructional content. Development of instructional materials based on performance objectives and competency identification. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

OLP 5503 Methods of Training: 3 semester hours.
Training methods and techniques designed to workplace issues. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

OLP 5504 Evaluating Training and Development: 3 semester hours.
Designing and conducting evaluations for business and industry training, including data analysis and preparation of evaluation reports. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

OLP 5505 Learning Fundamentals: 3 semester hours.
Examination of the research related to learning fundamentals and implications for curriculum and instruction. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

OLP 5506 Grantwriting: 3 semester hours.
Reasons for requesting a grant, goal setting, sample projects, identifying funding agencies, submitting a request for proposal (RFP), elements of a good proposal, library resources, web sites, and other references for grantwriting. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

OLP 5507 Instructional Technology in HRD: 3 semester hours.
Applying evidence-based instructional principles to design, development, and evaluation of synchronous and asynchronous e-learning. Includes development of online multi-media materials for professional, industry, and educational application. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

OLP 5509 Professional Readings and Writing in Human Resource Development: 3 semester hours.
Exposure to the professional literature of human resource development, including practice in writing abstracts of journal articles using APA Style. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

OLP 5510 Principles of Change: 3 semester hours.
Critical analysis and discussion of change management theory, principles of leadership and change, and an in-depth review of principles related to personal change. Includes a review of current issues in managing transitions, leading change. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

OLP 5531 Workplace Leadership: 3 semester hours.
Supervising in a professional-technical education or corporate training setting. Study human relation factors: planning, organizing, evaluation, staff development, labor relations, and personnel policies/practices. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

OLP 5544 Ethics and Diversity in the Workplace: 3 semester hours.
A contemporary exploration of issues related to both ethics and diversity in the workplace. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

OLP 5550 Adult Learning Theory: 3 semester hours.
Provides an understanding of adult learning theory as a body of academic inquiry and as applied in professional practice. Examines current and past theory and practice of adult learning. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.
OLP 5557 Facilitating Adult Learning: 3 semester hours.
Study of the needs and interests of adult learners in business and industry using Andragogy. Planning of conferences and workshops for adult learners. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

OLP 5561 Directed Studies: 1-4 semester hours.
Individual work under staff guidance. Field research on specific occupational advances in technology. May be repeated. PREREQ: Permission of instructor required prior to registration.

OLP 5564 Facilities Management: 3 semester hours.
Organization, safety, and management of facilities. An in-depth study of laboratory requirements and total facility planning. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

OLP 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. Graded S/U.

OLP 5598P Prof Development Workshop: 3 semester hours.
New methods and opportunities to enhance and supplement skills. Subject to the approval of the dean of the student's college, a maximum of eight credits earned in workshops may be applied toward a degree; students taking the courses only for personal development may choose the 0-credit option; those seeking professional development must choose a for-credit option. Graded S/U. May be repeated.

OLP 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

OLP 6601 HRD Literature for the Practitioner-Scholar: 3 semester hours.
This course introduces the career practitioner to the literature and scholarship published by researchers aimed to improve practice in the workplace. Students will learn how scholarship can be used in their respective professions to address workplace issues.

OLP 6602 Principles of HRD: 3 semester hours.
Designed to be one of the first courses students take, this course introduces foundational principles of the human resource development discipline that should serve as an integrative thread throughout the M.OLP program. This course introduces research, performance, change, and learning and development concepts.

OLP 6603 Psychology of Leadership: 3 semester hours.
Building upon leadership theories and models, this course looks at research and pertaining specifically to the psychological aspects of leadership as well as followership.

OLP 6604 Leadership Scholarship: 3 semester hours.
A review of current and emerging research specifically around the topic of leadership, as well as implications for practice.

OLP 6605 Organizational Development: 3 semester hours.
Through an organizational lens, rather than an individual lens, students will explore the research and practices related to building and sustaining organizational performance.

OLP 6606 Contemporary Theories of Motivation: 3 semester hours.
A rich, cross discipline view of historical and contemporary motivation research.

OLP 6607 Workplace Evaluations and Assessments: 3 semester hours.
An advanced look at organizational evaluation practices, as well as assessment and analysis tools.

OLP 6608 Needs Analysis: 3 semester hours.
An in-depth look at the processes and practices of conducting needs and cause analyses. This course utilizes systematic processes to more clearly and accurately identify performance gaps.

OLP 6609 Intervention Design and Development: 3 semester hours.
The practice of addressing performance gaps too often leads to insufficient or inaccurate efforts due to a lack of understanding of the variables influencing or affecting the gap. In this course, students will learn how to diagnose the performance gaps and address them through specific and appropriate interventions.

OLP 6610 The Chief Learning Officer: 3 semester hours.
This course specifically looks at the issues, opportunities, and experiences of people working in CLO or equivalent positions.

OLP 6611 The Chief Diversity Officer: 3 semester hours.
This course specifically looks at the issues, opportunities, and experiences of people working in CDO or equivalent positions.

OLP 6612 The Performance Consultant: 3 semester hours.
This course specifically looks at the issues, opportunities, and experiences of people working in consulting roles, both internal and external.

OLP 6613 Learning Technologies in HRD: 3 semester hours.
This course examines the practice and scholarship supporting the use of current technologies to support learning.

OLP 6614 The Contemporary Supervisor: 3 semester hours.
An examination of the evolution of supervisory issues and practices over time.

OLP 6615 Global Aspects of HRD: 3 semester hours.
An examination of the literature, issues, and challenges of leading and working in HRD in a global environment.

OLP 6616 Theories of Adult Development: 3 semester hours.
An examination of the literature and theories of learning motivations across adulthood and their impact on personal and professional efficacy, pursuits, and contributions.

OLP 6617 Advanced Scholarship Studies: 3 semester hours.
This course will benefit students who have research and topical interests that they want to explore, leading towards mastery in a certain aspect of HRD.

OLP 6618 Advanced Topics in Facilitation: 3 semester hours.
This course examines the literature and advanced practice of facilitation in a variety of learning settings.

OLP 6619 Advanced Topics in Evaluation: 3 semester hours.
An examination of the literature and advanced practices of evaluation in a variety of settings.

OLP 6620 Applied Organizational Research: 3 semester hours.
Under the direction of the instructor, the class will collectively work on an organizational research problem.

OLP 6621 Theories of Adult Learning: 3 semester hours.
Explores theories of adult learning as a body of academic inquiry and as applied in professional practice within organizations. Examines cross-cultural theories and practice of learning, including practice developing and interpreting theoretical lenses within scholarly literature.

OLP 6632 Research in Organizations: 3 semester hours.
Examination of methods for designing and conducting research for organizations. Compares methods and models of addressing real world workplace problems with evidence-based approaches. Introduction to procedures for data collection and analysis of quantitative and qualitative data, and style and format requirements for formal report writing. PREREQ: OLP 6601 and OLP 6602 or permission of instructor.
OLP 6633 Needs Assessment and Evaluation: 3 semester hours.
Review of practical needs assessment and evaluation models, frameworks, and best practices that guide the design and implementation of learning and development programs for organizations in a variety of learning environments.

OLP 6634 Leadership of Learning, Development, and Change: 3 semester hours.
Exploration of leadership influences on learning and development, with a focus on effective change leadership and the development of change agents within organizations. Learning will be defined as an overarching process within an organization's structure that enables knowledge sharing, including training. Development will address talent management and motivation in a context of change initiatives.

OLP 6635 Practicum in HRD: 3 semester hours.
An individually designed field experience under the supervision of the faculty and an experienced professional. PREREQ: Permission of instructor required prior to registration.

OLP 6636 Strategic Planning and HRD: 3 semester hours.
Examination of HRD frameworks and approaches for developing effective strategic plans. This course develops organizational learning and performance professionals who can facilitate strategic planning and decision-making toward advancing the organizational enterprise.

OLP 6637 Internship in HRD: 1-3 semester hours.
An individually designed professional experience under the supervision of the faculty and an experienced practitioner in the field. May be repeated up to 6 credits. Graded S/U. PREREQ: Permission of instructor required prior to registration.

OLP 6640 Seminar in HRD: 1-3 semester hours.
Current topics in the management of human resource development presented by department faculty and visiting lecturers. Maximum of 3 credits applied to the degree. Graded S/U.

OLP 6644 Capstone in HRD: 1 semester hour.
An individual non-research exit strategy capstone project integrating the content, concepts, and theory learned across the MS HRD program through a written report supported by scholarship and defended in an oral explanation. May not be repeated. Graded S/U. PREREQ: Permission of instructor required prior to registration.

OLP 6645 Field Research Project in HRD: 1-6 semester hours.
An individual field research project must be completed; a written report and oral explanation of the report will be required. May be repeated up to 6 credits. Graded S/U. PREREQ: Permission of instructor required prior to registration.

OLP 6650 Thesis: 1-6 semester hours.
Thesis. May be repeated. Graded S/U. PREREQ: Permission of instructor required prior to registration.

OLP 6660 Contemporary Issues in HRD: 3 semester hours.
Exploration of issues relating to the functions of HRD - Individual Development, Career Development, and Organizational Development. Emphasis on how these functions relate to the industrial/business environment.

OLP 6661 Performance Improvement: 3 semester hours.
Through a systems approach, critical analysis, discussion and application of performance technology in the workplace. Includes review of current research, theories, methods, and models.

OLP 6662 Distance Learning Delivery Practices: 3 semester hours.
Exploration of the distance delivery medium including on-screen practices, media development, curriculum planning, instructional strategies, technical support. Includes review of research and theory relating to distance learning.

OLP 6663 Instructional System Evaluation: 3 semester hours.
Critical analysis and discussion of the roles of evaluation in HRD. Emphasis on theories of program and curriculum evaluation.

OLP 6664 Topics in Human Resource Development: 3 semester hours.
Critical analysis of current topics in Human Resource Development. Opportunities will be provided for students to study independently with specialists in topic areas.

OLP 6680 Advanced Technical Competency: 1-4 semester hours.
Advanced occupational skills and knowledge obtained from modern practice in selected field. For experienced professionals seeking advanced techniques in specialized areas of PTE and HRD. PREREQ: Approval of advisor required.

OLP 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

Professional Technical Ed Courses

PTE 5501 Foundations of Professional-Technical Education: 3 semester hours.
Acquaints the student with the various aspects of professional-technical education: history, legislation, philosophy, and organization of professional-technical education. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor required prior to registration.

PTE 5502 Occupational Analysis and Course Construction in Professional-Technical Education: 3 semester hours.
Analysis of components of occupations to determine instructional content. Development of professional-technical technical education instructional materials based on performance objectives. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor required prior to registration.

PTE 5503 Methods of Teaching in Professional Technical Education: 3 semester hours.
Teaching methods and techniques applicable to teaching in professional-technical education. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor required prior to registration.

PTE 5504 Evaluation in Professional-Technical Education: 3 semester hours.
Designing and conducting formative and summative assessments and evaluations in professional-technical education. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor required prior to registration.

PTE 5543 Supervision and Organization of Career and Technical Student Organizations: 3 semester hours.
This course is an examination of historical perspectives of Career and Technical Student Organizations. Course will focus on recruitment and retention of student members, the development of student leadership skills, presentation skills, technical skills appropriate to the specific career program, and implications of state and federal CTSO standards. Instruction will also include preparing students for local, state and national skills events. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor required prior to registration.
PTE 5544 Career Guidance and Special Needs in Professional-Technical Education: 3 semester hours.
Examine career guidance concepts, specialist services, special needs legislation, abilities and inabilities (both mental and physical), job-seeking skills, and information sources for PTE. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor required prior to registration.

PTE 5564 Professional Technical Education Instructional Facilities Management: 3 semester hours.
Organization, safety, and management of professional-technical education teaching facilities. An in-depth study of laboratory requirements and total facility planning. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor required prior to registration.

PTE 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.
School Psychology and Educational Leadership

Chair: Neill
Professors: Watkins
Associate Professor: Neill, Wagoner
Assistant Professors: Bocanegra, Fan, Mortensen, Storie

Doctor of Education in Educational Leadership

The Doctor of Education in Educational Leadership is the College of Education’s highest degree awarded in recognition of academic preparation for professional practice in educational leadership. Because students enter the program with substantial knowledge, skills, abilities, and experience, the doctorate degree in Educational Leadership seeks to support the development of education professionals as scholars, researchers, and practitioners. This three-part whole provides the grounding from which all benchmarks of the student’s educational journey, from admissions, to advancement to candidacy, and ultimately program completion, are assessed. The doctorate in Educational Leadership does not lead to certification as a superintendent (see Educational Specialist in Educational Leadership below).

As scholars, Doctors of Educational Leadership demonstrate content mastery. As researchers, Doctors of Educational Leadership demonstrate the application of content mastery through scholarly contributions reflecting the necessary dispositions and skills to successfully conduct meaningful education research. Finally, through guided practicum experiences, Doctors of Educational Leadership demonstrate their ability to use acquired knowledge, dispositions and skills as scholars and researchers in applied educational leadership settings.

Ed.D in Educational Leadership Standards

The Ed.D. in Educational Leadership is aligned with two sets of standards: the Idaho State University Standards for Advanced Professionals (described in the previous section), and the Doctor of Education in Educational Leadership Standards. The Doctor of Education in Educational Leadership Standards address the knowledge, dispositions, skills and strategies that frame successful educational leadership. These standards include: Organizational Development, Consultation, Diversity, Supervision, Managing Change, Applied Foundations, Technology, Research, Teaching and Learning Theory, and Leadership, Ethics and Communication.

Master of Education (M.Ed.) in Educational Leadership

The Master of Education in Educational Leadership is designed to help students develop the knowledge, skills, and dispositions necessary to engage in more effective leadership practice.

Educational Specialist in Education Administration

The Education Specialist program represents advanced work in education administration leading to superintendent certification. Applicants will enter the program after completion of a master's degree in Education Administration. Completion of the Education Specialist program will require a minimum of 31 semester credit hours beyond the master's degree with an accumulated GPA of 3.5 during the specialist program. Students with a master's degree in areas other than administration may be required to take additional work equivalent to that required in the administration degree and must meet initial principal certification.

Ed.S. Educational Leadership Standards

The Education Specialist in Education Administration curriculum is aligned with two separate but related sets of standards: The Idaho State University College of Education Standards for Advanced Professionals (described previously) and the Idaho State Department of Education’s requirements for an Administrator Certificate with the Superintendent endorsement. All sets of standards are aligned.

Idaho State Department of Education Administrator Certificate with the Superintendent Endorsement

These standards address competencies determined by the State of Idaho to be necessary for effective school (district level) leadership (i.e., the superintendency). These standards include: Advanced School Finance, Grant Writing & Revenue Generation, Policy Development & School Board Relations, District-wide Support Services, Employment Practices & Negotiations, Educational Product Marketing & Community Relations, and Special Services & Federal Programs. Superintendent level certification endorsement can be a student outcome of this program.

Master of Education with Educational Leadership Emphasis

The curriculum in the Master of Education in Educational Leadership is designed to strengthen the student's understanding, knowledge, and skills in Core Professional Studies and Educational Leadership as they relate to successful leadership roles in other educational settings, such as community colleges, vocational technical schools, or other education agencies. This program will not lead to certification as a P-12 principal.

Master of Education with Educational Leadership Emphasis Standards

The curriculum for the Master of Education with Educational Leadership emphasis is aligned to the Idaho State University College of Education Standards for Advanced Professionals (previously described).

Master of Education with P-12 Educational Administration Emphasis

The curriculum in the Master of Education with P-12 Educational Administration emphasis is designed to strengthen the student's understanding, knowledge, and skills in Core Professional Studies and Educational Administration as they relate to successful P-12 education administration. The Master of Education with P-12 Education Administration emphasis can lead to certification as a P-12 principal.

Master of Education with P-12 Educational Administration Emphasis Standards

The Master of Education in Educational Leadership with P-12 Education Administration emphasis leading to P-12 principal certification curriculum is aligned to two related sets of standards: The Idaho State University - College of Education Standards for Advanced Professional (described previously) and the Idaho Standards for School Principals.
Admission Requirements

Admission to the Educational Leadership doctoral program is based on a rolling-cohort model. Cohorts cycle through approximately every three years. Screening of applications for cohort admission begins April 15th of the year in which a cohort is scheduled to begin the program. Outside the cohort, applications are invited on an ongoing basis. Non-cohort applications are reviewed fall, spring and summer. Every effort is made to support the doctoral program of study of non-cohort students.

At the time of application, the applicant must specify a single area of concentration (i.e., P-12 Education Administration, Higher Education Administration, Instructional Design and Technology). Should a student wish to change his or her area of concentration, he or she must reapply to the Graduate School for readmission to the doctoral program in Educational Leadership.

For admission to the Doctor of Education in Educational Leadership, the student must apply to and meet criteria for admission to the Graduate School. The applicant must also meet the following minimum admission requirements:

1. A master’s degree in education or a related field from a regionally accredited institution A minimum of a 3.5 grade point average at the graduate level course work
2. Letter of interest, stating why the applicant is interested in the Ed.D. (specify concentration)
3. A minimum score at the 40th percentile on the Miller Analogies Test (MAT) or on either the Verbal Reasoning or Analytical Writing section on the Graduate Record Examination (GRE)
4. A current resume that includes the names of two professional references who can address the academic or professional/leadership qualifications of the applicant
5. Successful completion of an interview with faculty in the proposed concentration area
6. Successful performance of a writing sample completed in conjunction with the interview

International students whose native language is not English must comply with Graduate School admissions requirements. Additional language-based course work may be required of international students whose native language is not English.

General Requirements

The Doctor of Education in Educational Leadership with emphasis in Higher Education Administration requires a minimum of 64 semester credits of course work:

- 18 credits in the doctoral core
- 27 credits in the area of emphasis, including 3 credits of electives
- 9 credits of cognate courses (5500 level and above)
- 10 dissertation credits

The Doctor of Education in Educational Leadership with emphasis in P-12 Education Administration requires a minimum of 61 credits:

- 18 credits in the doctoral core
- 24 credits in the area of emphasis, including a minimum of 3 practicum credits
- 9 credits of cognate courses (5500 level and above)
- 10 dissertation credits

The Doctor of Education in Educational Leadership with emphasis in Instructional Design and Technology requires a minimum of 61 credits:

- 15 credits in doctoral core
- 27 credits in the area of emphasis, including a minimum of 6 practicum credits and 9 EDLT elective credits
- 9 credits of cognate courses (5500 level and above)
- 10 dissertation credits

The Educational Leadership program defines cognate study as a planned set of courses, 5500-level and above, outside the student’s concentration area, taken within the College of Education or outside it. Cognate study is to be determined prior to cognate course enrollment, in consultation with the student’s advisor.

Of the 61/64 semester credits required for the Ed.D. in Educational Leadership, at least 30 semester credits of course work must be taken at Idaho State University. Dissertation credits may not be transferred from another institution.

Students are required to maintain continuous enrollment of at least one semester credit of work each semester (including summers) from matriculation to completion of the program including completion of the dissertation and oral defense. Failure to maintain continuous enrollment can result in dismissal from the program.

Students must maintain a 3.2 grade point average to qualify for the Doctor of Education. Two grades of C+ or below during the entire program will result in admissions status review, with the possibility of dismissal.

Final Program of Study

Tentative programs of study may be drafted upon program entry with the help of the student’s advisor. The final program of study must be submitted with the Comprehensive Examination Notice of Intent and routed through the student’s advisor, the Department, and the Dean of the College of Education.
submission of the final program of study to the Dean of the Graduate School, the Dissertation Committee, including the Graduate Faculty Representative, is established and the student is advanced to candidacy.

Comprehensive Examination

The comprehensive examination is a significant aspect of the student’s total doctoral program. The written examination is normally administered during or immediately following the last semester in which the student is engaged in formal course work.

The comprehensive examination has, as its overall objective, the assessment of the student’s knowledge, understanding, and skills as they relate to the field of educational leadership. Examination guidelines are provided in the Ed.D. Handbook.

Dissertation and Oral Defense

Upon successful completion of the comprehensive examination and approval of the dissertation proposal by the student’s Dissertation Committee, the student is authorized to complete the dissertation in preparation for the final oral defense.

Required Courses

The Doctor of Education in Educational Leadership requires a minimum of 61/64 semester credits of course work. Doctoral degrees in P-12 Education Administration and Higher Education Administration require 18 credits in the doctoral core. The Doctor degree in Instructional Design and Technology requires 15 credits in the doctoral core. A minimum of 24 credits in the area of concentration is required for the Ed.D. in P-12 Education Administration. The Ed.D. in Higher Education Administration requires 24 credits in the area of concentration and 3 elective credits. The Ed.D. in Instructional Design and Technology requires 27 concentration area credits that includes 9 credits of EDLT electives and 6 credits of practicum (EDLT 7737). Each emphasis require 9 credits of cognate study (determined in consultation with the student’s advisor and concentration area) at the graduate level (5500 or above), and at least 10 dissertation credits. The student may select from the following areas of emphasis: P-12 Education Administration, Higher Education Administration, or Instructional Design and Technology.

Education Specialist in Education Administration

Admission Requirements

For admission to the Education Specialist program, the student must apply to, and meet all criteria for, admission to the Graduate School. The student must meet the following requirements:

- A master’s degree in education administration with a minimum 3.5 GPA at the graduate level from an accredited institution
• A minimum of five years of successful teaching and/or administration experience in P-12 schools, including at least one year of successful administrative experience
• A letter of interest stating the applicant’s interest in the Ed.S. program
• A current resume, including the names of and contact information for at least 2 professional references
• A minimum score at the 40th percentile the Miller Analogies Test (MAT)
  OR on either the Verbal or Analytical Writing sections of the Graduate Record Examination (GRE)

General Requirements
The Education Specialist program requires a minimum of 31 credits, distributed as listed below to complete. Students must complete the minimum semester hours identified in each area. The courses used to meet the minimum requirements may be taken during the master’s degree or educational specialist program. In general, the program of study for the Education Specialist in Education Administration is as follows:

# Students must complete EDLA 6608 and EDLA 6612 as a prerequisite for admission to EDLA 6657 (Internship).

Master of Education with P-12 Educational Administration Emphasis

Master of Education with Educational Leadership Emphasis

Admission Requirements
For admission to the Master of Education with P-12 Education Administration emphasis, the applicant must apply to and meet all criteria for admission to the Graduate School. The applicant must also meet the following minimum admission requirements:

• A bachelor's degree from an accredited institution; usually that degree is in an education-related field
• Minimum of one year of P-12 teaching experience or documentation of equivalent experience for the P-12 school administration emphasis
• A letter of interest, stating the applicant's interest in the program
• Current resume, including the names of and contact information for at least 2 professional references
• A minimum GPA of 3.0 for all upper division credits taken at the undergraduate level
• Standardized test information that meets Graduate School admission requirements

For admission to the Master of Education with Education Leadership emphasis, the applicant must apply to and meet all criteria for admission to the Graduate
Educational context. Educational Administration emphasis have professional experience in an educational context.

It is recommended that students pursuing the Master of Education with P-12 Education Administration emphasis meet requirements of the Idaho State Board of Education. It is recommended that students pursuing the Master of Education with P-12 Educational Administration emphasis have professional experience in an educational context.

Both the Master of Education with P-12 Education Administration and the Master of Education with Educational Leadership emphasis require a minimum of 31 credits.

Students seeking Idaho principal certification (P-12 Education Administration emphasis) must meet requirements of the Idaho State Board of Education. It is recommended that students pursuing the Master of Education with P-12 Educational Administration emphasis have professional experience in an educational context.

**Educational Specialist in School Psychology or Special Education**

**Admission Requirements**

Candidates for the Educational Specialist in School Psychology or Special Education degree must meet all college and university requirements for admission and retention. The student must hold a master’s degree in the area of the chosen Ed.S. major. Master’s degree majors in a closely related field may be approved upon recommendation of the selection committee.

**General Requirements**

The student must complete 64 credits in Special Education or 66 credits in School Psychology, including the master’s degree and a specialist paper. All post-master’s degree course work must be taken from members of the Idaho State University graduate faculty or be approved in advance by the graduate faculty. A minimum grade point average of 3.0 (B) is required over all course work taken in the Ed.S. program. An oral examination covering the specialist paper, portfolio, and/or relevant topics is required.

**Time Requirement**

All requirements for the Ed.S. must be completed within a period of five years from the date of completion of the first post-master’s degree course to be applied toward the degree.

**Specific Requirements: School Psychology Major**

The Ed.S. in School Psychology is designed to be consistent with the minimal entry-level requirements in the field of school psychology as presented by the National Association of School Psychologists. A master’s degree as a school psychological examiner or its equivalent is required.

The Ed.S. is viewed as a practitioner’s degree and will focus on applied activities.

**Course Requirements**

| SCPY 6616 Psychological Assessment                    | 3 |
| SCPY 6652 Specialist Paper                             | 1-3|
| SCPY 6662 Consultation in Schools                      | 3 |
| SCPY 6663 Clinical and Diagnostic Interviewing in Schools | 3 |
SCPY 6664 Neurocognition and Learning 3
SCPY 6665 Clinical School Psychology 3
SCPY 6669 Advanced Practicum in School Psychology 6
SCPY 7759 Ed.S Internship 6

Additional Requirements
Students will also prepare a School Psychology Portfolio. The Portfolio will be presented and defended in the Oral Examination.

Total Hours 31-33

Special Education Major
The following course work is required:

1. A minimum of 21 credits in special education course work at or above the 6600 level (including administration of special education), of which 6 credits are in the supervision of clinical practicum in special education and 3 credits are in internship in special education.
2. Behavioral sciences and/or education/school psychology, 9 credits.
3. Educational Specialist Paper in Special Education, SPED 6652, 1-3 credits. The number of credits will be determined by the advisor and student.

Master of Education in Special Education

Admission Requirements
Applicants for the Master of Education in Special Education must apply to, and meet all criteria for, admission to the Graduate School and all college requirements for admission and retention.

Individuals applying for admission to the Master of Education program in Special Education must meet the following admission requirements:

• Bachelor’s degree from a regionally accredited college or university in the United States, or its equivalent from a school in another country.
• Grade point average of 3.0 or higher for all upper division credits taken at the undergraduate level.

General Requirements
Students completing a Master of Education in Special Education must complete both a written comprehensive examination and an oral examination.

Professional Studies Core
EDUC 6601 Research and Writing 3
EDUC 6602 Theories of Learning 3
EDUC 6610 Applied Educational Statistics 3

Additional Requirements for the Special Education Option
Student must either have an undergraduate special education major or a 14-credit undergraduate core of special education course work including:

SPED 3330 The Exceptional Child
SPED 3334 Classroom Behavior Management
SPED 5523 Designing Instruction
SPED 5524 Assessment Procedures in Special Education
SPED 5527 Precision Teaching

These courses will not be counted as part of the master's degree program.

Persons seeking initial certification must also complete:

SPED 5529 Strategies Severe Disabilities

SPED 5532 Direct Instruction Systems
SPED 5538 Policies and Procedures in Special Education
SPED 5546 Secondary Special Education

Persons must also complete the Idaho Technology Portfolio assessment.

SCPY 6614 Diagnostic Evaluation of Learning Difficulties 3
SPED 6630 Professional Development in Special Education 2
SPED 6638 Practicum in Special Education 6
SPED 6662 Consultation in Schools 2

Elective credits totaling a minimum of 33 semester credit hours for the Master's degree must be taken from relevant graduate-level courses, with approval of student's major advisor.

Additional Requirements for the School Psychology Option

Specialty Studies in Psychological Examiner

SCPY 6619 Individual Intelligence Testing 3
SCPY 6657 Legal and Ethical Issues in School Psychology 2
SCPY 6659 Multicultural Issues in School Psychology 2
SCPY 6660 Seminar in School Psychology 3
SCPY 6672 Problem Solving Intervention in Schools 3
SCPY 6673 Response to Intervention in Schools 3
SCPY 6682 Cognitive-Behavioral Intervention in Schools 3

Integrative Field Research Studies

SCPY 6668 Practicum Introduction to School Psychology Learning Disabilities and Special Education 3

Total Hours 44

The deadline for submission of applications is July 1. Applications will be reviewed and degree-seeking students will continue to be admitted until program capacity is reached.

**Educ Admin Courses**

**EDLA 5599 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**EDLA 6608 Organizational Leadership and Education Administration: 3 semester hours.**
Overview of leadership theories, principles of organizational development, and personal leadership development, and systems theory with applications to education leadership.

**EDLA 6609 Principalship: 3 semester hours.**
Exploration of the role of school principal as leader and manager. Topics include data and records management, personnel management, school finance, technology, special services, school safety, and other building-level topics.

**EDLA 6612 School Law, Governance, and Ethics: 3 semester hours.**
Study of legal principles guiding education organizations; overview of case law, federal and state statutes; governance policies, and ethics that provide the foundation for application of the law in education organizations.

**EDLA 6613 Using Data to Improve School Leadership: 3 semester hours.**
Emphasis on the use and understanding of data analysis to improve teaching and learning in the classroom. Statistical analysis relating to educational leadership decision-making applications.

**EDLA 6614 Curriculum Instruction and Assessment: 3 semester hours.**
Study of curriculum principles and practices of high achieving schools; overview of alignment of a standards-based curriculum with effective instructional practices and assessment.

**EDLA 6615 Supervision and Instructional Leadership: 3 semester hours.**
Examines the role of the principal as instructional leader in the supervision and evaluation of instruction, learning, and student achievement.

**EDLA 6630 Education Equity and Ethics: 3 semester hours.**
Designed to raise awareness among school leaders of equity issues and empower them to advocate equal opportunity for ALL students.

**EDLA 6642 School Culture and Community Relations: 3 semester hours.**
Overview of school culture and climate in relationship to school communications and public relations. Explores diversity and equity issues related to students, staff, and community.

**EDLA 6643 School Personnel Administration: 3 semester hours.**
Study of effective human resources management, including legal and ethical issues related to recruitment, selection, induction, staff development, employee assistance, evaluation, contract negotiations and personnel management.

**EDLA 6648 Independent Problems in Education: 1-3 semester hours.**
Individual work under staff guidance. Field and/or library research on specific educational problems of interest to graduate students in education. Experience in research composition. May be repeated.

**EDLA 6649 Issues in Education Administration: 3 semester hours.**
Critical analysis of issues, trends and current topics in education administration.

**EDLA 6650 Thesis: 1-6 semester hours.**
Thesis credits. May be repeated.

**EDLA 6651 Case Analysis in Education: 1 semester hour.**
An educational leadership scenario is presented to the student as a capstone experience for the Master's degree or principal certification program in Education Administration. A written report and oral explication is required. May be repeated one time. Graded S/U. PREREQ: Permission of instructor.

**EDLA 6657 Internship: 1-3 semester hours.**
A partnership between the University and P-12 schools providing students experience in school leadership and administration. Student completes 260 hours of internship experience in school leadership including a minimum of 60 hours of on-site work at each level (elementary, middle, and high school) with accompanying portfolio. Students must enroll for 3 credits in their first semester, and at least 1 credit/semester of continuous enrollment. PREREQ: Two of EDLA 6608, EDLA 6612, and/or EDLA 6615, and permission of instructor. Graded S/U.

**EDLA 6662 The Superintendency: 3 semester hours.**
Study of school district leadership including organizational systems, ethics, change processes, school board operations, community relations, the role of education in a democratic society, and the needs of diverse constituencies.

**EDLA 6664 Public School Monetary Policy: 3 semester hours.**
Advanced study of the financial structure of public schools, including equity issues, taxation, revenue generation (grants) and budget development. Special emphasis on Idaho public education.

**EDLA 6669 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**EDLA 7720 Legal and Ethical Issues in Educational Organizations: 3 semester hours.**
Advanced study of legal and ethical issues in educational organizations and school systems, including major court cases, use of legal counsel and monitoring of legal compliance.

**EDLA 7721 Educational Policy and Governance: 3 semester hours.**
Study of the relationship between politics, policy and governance of education organizations, including political systems, inter-governmental relations, power and conflict, and policy development regarding equity, quality and efficiency.

**EDLA 7723 Educational Planning and Evaluation: 3 semester hours.**
Study of planning and evaluation in education organizations including strategic planning, effectiveness and curriculum audits, facility planning, and program planning and evaluation.

**EDLA 7724 Data Informed Instructional Leadership: 3 semester hours.**
The study of the use of data to support district-wide planning, implementation, and monitoring of curriculum, assessment, and instruction.

**EDLA 7737 Practicum: 1-3 semester hours.**
Students observe, participate in and perform activities in a school setting. Designed to facilitate school/district leadership knowledge, skills and dispositions. Focus on certification standards. May be repeated for a maximum of 12 credits. PREREQ: Permission of instructor.
EDLA 7748 Independent Problems in Education Administration: 1-3 semester hours.
Individual field work and/or library research under staff guidance on specific education administration problems of interest to doctoral students in the Education Administration program. May be repeated. PREREQ: Permission of instructor.

EDLA 7751 Case Analysis in Educational Administration: 1 semester hour.
A final case analysis scenario is provided to the student as a capstone experience for the Education Specialist degree in Education Administration. A written report and oral explication is required. This course will also serve as the final assessment for the content specialization area of the doctoral degree. May be repeated one time. Graded S/U. PREPREQ: Permission of instructor.

Educational Leadership Courses

EDLP 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

EDLP 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

EDLP 7700 Change Strategies: 3 semester hours.
Investigation and application of individual and organizational change strategies and tactics.

EDLP 7702 Supervision and Empowerment: 3 semester hours.
Practical study of leadership values used in coaching, participative management, team building, and critical inquiry to improve supervision in complex organizations.

EDLP 7703 Leadership and Org Devel: 3 semester hours.
Students will identify and critique several leadership and organizational theories and their application to work environments, and demonstrate a professional code of ethics and values.

EDLP 7705 Adv Res Design I Qualitative: 3 semester hours.
Process-based examination of qualitative research designs and methodologies commonly used in education and related fields. PREREQ: EDUC 6601 and EDUC 6610 or permission of instructor.

EDLP 7706 Advanced Research Design II (Quantitative): 3 semester hours.
Process-based examination of quantitative research designs and methodologies commonly used in education and related fields. PREREQ: EDLP 7721 or EDLP 7722 or equivalent or permission of instructor.

EDLP 7721 Intermediate Statistics in Edu: 3 semester hours.
Applications of intermediate statistical methods used in the analysis of quantitative measurement data in education and related fields. Introduces time-series and multi-factor experiments. PREREQ: EDUC 6610 or equivalent.

EDLP 7722 Advanced Statistics in Education: 3 semester hours.
Applications of advanced statistical methods most frequently used in the analysis of quantitative measurement data in education and related fields. PREREQ: EDUC 6610 and EDLP 7705 or EDLP 7706 or equivalent or permission of instructor.

EDLP 7748 Ind Probs in Educ Leadership: 1-3 semester hours.
Individual field work and/or library research under staff guidance on specific education leadership problems of interest to doctoral students in the Educational Leadership program. May be repeated. PREREQ: Permission of instructor.

EDLP 7799 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times with the same title and content.

EDLP 8800 Doctoral Seminar: 1 semester hour.
Serves as an initiation/orientation to doctoral study. Exploration of educational leadership through readings, reflection and dialog. Taken during the first year of doctoral course work. Graded S/U.

EDLP 8801 Capstone Seminar: 1 semester hour.
Provides doctoral students with a capstone experience designed to support and facilitate the comprehensive examination preparation and dissertation process. Taken during the final year of course work. Graded S/U.

EDLP 8830 Comp Exam: 1 semester hour.
A capstone requirement of all doctoral students in the Doctor of Education program. Students enroll in EDLP 8830 when they have successfully completed all other core, concentration area, and cognate courses. Is a prerequisite for EDLP 8850. Graded S/U. PREREQ: Permission of the instructor.

EDLP 8840 Dissertation Prospectus: 1-6 semester hours.
Development of the dissertation prospectus, the step prior to the proposal meeting. COREQ: EDLP 8830. PREREQ: Permission of instructor.

EDLP 8850 Dissertation: 1-10 semester hours.
Variable credits. May be repeated. Graded S/U. PREREQ: EDLP 8830 and permission of the instructor.

Higher Ed Comm Coll Courses

EDLC 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

EDLC 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

EDLC 7730 The Modern Community College: 3 semester hours.
Course content addresses the history and philosophy of community college education, including Tribal colleges. Examines the mission, objectives, educational functions, populations served, student and faculty characteristics, and current issues facing community colleges in a global environment.

Higher Educ Admin Courses

EDLH 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

EDLH 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

EDLH 7730 History and Philosophy of Higher Education: 3 semester hours.
Comprehensive analysis of the origin of institutions of higher learning, their philosophical foundations and historical contexts from the classical periods of Greece and Rome to the 20th century.
EDLH 7731 Law in Higher Education: 3 semester hours.
In-depth study of legal issues affecting public and private higher education institutions and systems. Emphasis on statutory provisions, court decisions, common law principles, and constitutional requirements.

EDLH 7732 College and University Curriculum: 3 semester hours.
In-depth study of current higher education curriculum practices and issues in the context of historical, philosophical, and political influences. Includes focus on processes of curriculum development.

EDLH 7733 Finance in Higher Education: 3 semester hours.
Critical analysis of issues in public and private higher education finance. Includes examination of alternative financing sources and methods, resource allocation, and fiscal management.

EDLH 7734 Issues and Trends in Higher Education: 3 semester hours.
Critical analysis of current topics in higher education. Consideration of roles and responsibilities of chief academic officers, boards of regents, faculties, and student services.

EDLH 7735 Government and External Relations: 3 semester hours.
Course explores leadership strategies for effective advocacy with state and federal policy makers, governing boards, development boards, foundations, business and industry, and the general public.

EDLH 7736 Instructional Leadership and Faculty Affairs in Higher Education: 3 semester hours.
Practical study of leadership values and practices unique to higher education and necessary for successful administration in the context of shared governance: focus on faculty leadership in processes of curriculum and program design for college learners evaluation; remediation, and rewards; and the development of academic policy.

EDLH 7737 Practicum: 1-3 semester hours.
A partnership between the Higher Education Concentration and various educational entities where students can experience higher education leadership and administration and their leadership can be assessed. Students engage in practical experience in leadership and administration. Students work under the direction of a graduate faculty member/practicum supervisor and host administrator(s) to fulfill the requirements of a Practicum plan. Students must enroll for 3 credits in their first semester and at least 1 credit/semester of continuous enrollment until the Practicum is completed. May be repeated for a maximum of 12 credits. Graded S/U. PREREQ: Permission of instructor.

EDLH 7738 Assessment and Accountability in Higher Education: 3 semester hours.
Key issues, strategies, and challenges in developing assessment programs at the institutional, departmental and program levels that address national, state and accreditation mandates for accountability in higher education.

EDLH 7739 Higher Education Leadership Strategic and Enrollment Planning Governance Institutional Research: 3 semester hours.
Study of leadership strategies for strategic and enrollment planning, application of institutional research, and negotiation of complex on- and off-campus governance systems required for successful higher education leadership.

EDLH 7748 Independent Problems in Higher Education Administration: 1-3 semester hours.
Individual field work and/or library research under staff guidance on specific higher education administration problems of interest to doctoral students in the Higher Education Administration program. May be repeated. PREREQ: Permission of instructor.

School Psychology Courses

SCPY 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. Must be graded S/U.

SCPY 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

SCPY 6614 Diagnostic Evaluation of Learning Difficulties: 3 semester hours.
Investigation of theoretical and applied assessment of intervention measures suitable for remediating learning problems.

SCPY 6615 Advanced Child Psychology: 3 semester hours.
In-depth study of the principles of educational psychology and child development. Emphasis will be placed on applying research-based practices from the science of educational psychology to solve problems found in schools and other social settings. PREREQ: EDUC 6602.

SCPY 6616 Psychological Assessment: 3 semester hours.
Psychometric assessment to determine eligibility of students and provide diagnostic information to develop interventions and assess their effects. Includes writing of integrated reports that address various exceptionalities. PREREQ: SCPY 6614 and SCPY 6619.

SCPY 6619 Individual Intelligence Testing: 3 semester hours.
Supervised practice in administering, scoring, and interpreting the results of individual intelligence tests. Each section limited to 6 students.

SCPY 6652 Specialist Paper: 1-3 semester hours.
An applied research paper in school psychology, written in format appropriate for publication consideration by a peer-reviewed journal. A candidate is allowed to take 1 to 3 credits each semester but has to take at least 1 credit each semester until his or her paper is completed as approved by the instructor. May be repeated. PREREQ: EDUC 6601.

SCPY 6657 Legal and Ethical Issues in School Psychology: 2 semester hours.
This course is intended to address a variety of professional issues, including legal and ethical principles, professional standards of practice, and ethical decision making within the context of the unique professional practice of school psychology. Students will become familiar with the ethical principles of the American Psychological Association and the National Association of School Psychologists and learn to apply these principles to specific areas of school psychology practice such as assessment, intervention, and research.

SCPY 6658 Independent Problems: 1-3 semester hours.
Individual work under staff guidance. Field and/or library research on specific educational problems. Experience in research composition. May be repeated up to 6 credits.

SCPY 6659 Multicultural Issues in School Psychology: 2 semester hours.
This course is designed to examine cultural, socioeconomic, and ethnic variables unique to the practice of school psychology in the public school setting. The content of this course will include applying knowledge of cultural, socioeconomic, and ethnic differences to school psychology assessment, intervention, counseling, and English language acquisition issues.

SCPY 6660 Seminar in School Psychology: 3 semester hours.
Introduce students to the field of school psychology through guest speakers, literature, and discussion. Focus on assessment, diagnosis, professional ethics, historical development, and school law.
SCPY 6662 Consultation in Schools: 3 semester hours.
Provides theoretical and practical experience in the development, implementation, and evaluation of a variety of consulting strategies suitable for working with teachers, administrators, community agencies, and parents. PREREQ: SCPY 6665.

SCPY 6663 Clinical and Diagnostic Interviewing in Schools: 3 semester hours.
This is an advanced clinical interview skills course in which knowledge and training are obtained in how to conduct clinical interviews with children and families in educational settings. Special consideration is given to conducting Mental Health Intake Interviews, Mental Status Examinations, Suicide Assessments, Targeted Violence Assessments, and Interviewing Special Populations. PREREQ: SCPY 6615, 6616, 6665, or Permission of Instructor.

SCPY 6664 Neurocognition and Learning: 3 semester hours.
This course will increase skills of school psychologists and educators in applying neurocognitive research to psychoeducational adjustment in schools. Content will emphasize intervention, assessment, instruction, consultation, individual differences in emotionality, attention, memory, and problem solving. PREREQ: EDUC 6602.

SCPY 6665 Clinical School Psychology: 3 semester hours.
This course explores the clinical elements of school-based mental health services provided by school psychologists in public school settings. The educational manifestations of childhood and adolescent psychopathology are examined within the context of the DSM-IV-TR. Special emphasis is given to understanding the complexities of childhood mental illness and its unique educational impact on children and adolescents. COREQ: SCPY 6667.

SCPY 6668 Practicum Introduction to School Psychology Learning Disabilities and Special Education: 3 semester hours.
Supervised experience in educational, intelligence, and personality testing as well as diagnostic evaluation of learning difficulties and report writing. Special emphasis on the interpretation of test results to teachers, counselors, and administrative personnel. A combination of fifty hours of experience and supervision equals one hour of academic credit. May be repeated. PREREQ: SCPY 6619 and permission of instructor. COREQ: SCPY 6614.

SCPY 6669 Advanced Practicum in School Psychology: 1-12 semester hours.
A combination of fifty hours of experience and supervision equals one hour of academic credit. The weekly supervision seminars provide the candidate with supplementary guidance, support, and educational information regarding professional issues of school psychology such as techniques of providing in-service training and integration of technology into student learning through case discussion, supplemental readings, direct instruction, and guest speakers. May be repeated. PREREQ: SCPY 6668 and permission of instructor.

SCPY 6670 Practicum in School Psychology: 1-2 semester hours.
Second-year students will process school and community-based referrals. Fifty (50) hours contact time per credit. This involves a collaborative problem-solving approach with school-based teams to gain experience with pre-referral activities, evaluation, and intervention plans. May be repeated. COREQ: SCPY 6665.

SCPY 6672 Problem Solving Intervention in Schools: 3 semester hours.
This course will provide a foundation in skills, knowledge and practice that reflects a "Problem-Solving Intervention" (PSI) approach to assessment and intervention implementation in schools.

SCPY 6673 Response to Intervention in Schools: 3 semester hours.
This course integrates both the theory and practical application of "Response to Intervention" (RTI) used for development and implementation of effective interventions pertaining to academic and behavioral "problems" in school settings.
Sport Science and Physical Education

Chair and Associate Professor: Fitzpatrick
Professors: Appleby, Faure, Lester, and Lyons
Associate Professors: Gauthier, and Meyers
Assistant Professors: Braun and Moffit

The Department of Sport Science and Physical Education offers the Master of Physical Education/Athletic Administration degree at the Idaho State University – Pocatello campus and the Idaho State University – Meridian campus. The MSAT program is offered at the Idaho State University - Pocatello campus.

Master of Physical Education/Athletic Administration

Administration is aligned with 2 sets of standards: The Idaho State University College of Education Standards for Advanced Professionals (described previously), and the National Association for Sport and Physical Education (NASPE) and the North American Society for Sport Management (NASSM) Standards.

NASPE-NASSM Content Standards: The NASPE-NASSM standards for Master’s Degree Programs in Sport Management address eight specific areas that include the following: Management, Leadership and Organization in Sport; Research in Sport; Legal Aspects of Sport; Marketing in Sport; Sport Business in the Social Context; Financial Management in Sport; Ethics in Sport Management; and Field Experience in Sport Management.

Master of Science in Athletic Training

The Master of Science in Athletic Training (MSAT) program is a professional degree designed to develop competent athletic training students who qualify to sit for the Board of Certification exam. The program has completed the self-study and site visit for the Commission on Accreditation of Athletic Training Education (CAATE) accreditation and will know its status in June, 2015.

The overall objectives of the MSAT program are to teach the students in the following domains: Injury/Illness Prevention and Wellness Protection; Clinical Evaluation and Diagnosis; Immediate and Emergency Care; Treatment and Rehabilitation; and Organizational and Professional Health and Well-Being.

Master of Physical Education/Athletic Administration

Admission Requirements

The student must apply to, and meet all criteria for, admission to the Graduate School. In addition, applicants for the Master of Physical Education/Athletic Administration degree must meet all college requirements for admission and retention. Individuals applying for admission to the Master of Physical Education/Athletic Administration program will be reviewed using the following criteria. Preference will be given to applicants who meet or exceed these criteria.

- Bachelor’s degree from a regionally accredited college or university in the United States or its equivalent from a school in another country.
- Grade point average of 3.0 or higher for all upper division credits taken at the undergraduate level.

General Requirements

Students must complete a minimum of 33 semester credit hours for the Master of Physical Education/Athletic Administration degree. Students who choose to complete a thesis must register for no fewer than 6 credits of PE 6650 (meets elective requirement). Students who complete a Masters Project must register for no fewer than 3 credits of PE 6651 (meets elective requirement). Students completing a Thesis or Masters Project will orally defend the Thesis or Project, but will not complete comprehensive written examinations. Students not completing a Thesis or Masters Project will be required to pass both a comprehensive written examination and subsequent oral defense of that exam.

All students must document professional experience in an athletic setting either by prior athletic administrative experience (minimum of one year) or by completing an approved internship for credit while completing the MPE/AA program.

Master of Science in Athletic Training

Admission Requirements

The student must apply to, and meet all criteria for, admission to the Graduate School. In addition, applicants for the Master of Science in Athletic Training degree must meet all college requirements for admission and retention. This is a limited enrollment program. Individuals applying for admission to the Master of Science in Athletic Training program will be reviewed using the following criteria:

1. Application and acceptance by ISU Graduate School
2. Cumulative G.P.A. (minimum of 2.75)
3. GRE/MAT score guidelines posted in the SSPE Graduate handbook
4. Successful completion of the following required prerequisite courses with a grade of “C” or better in each course:
   a. Anatomy and Physiology (1 year equivalent)
   b. Care and Prevention of Athletic Injuries (or equivalent)
   c. Neuroscience (Recommended)
   d. General Nutrition or Sports Nutrition
   e. Exercise Physiology
   f. Biomechanics
   g. Sport Psychology (or other approved upper division Psychology course)
5. Evidence of current First Aid/CPR/AED for Health Care Provider certifications
6. An essay describing applicants interest in and goals related to Athletic Training
7. Two letters of Recommendation (one must be from a faculty member)
8. Personal Interview

Preference will be given to applicants who meet or exceed these criteria. Applicants must undergo a criminal background check and have current immunizations, listed in handbook. Criminal background checks must be done through the College of Education and State Board of Education at the applicant’s expense. Conviction of a felony or other serious offense will likely result in denial of placement for the clinical assignments, and consequently affect the student’s standing in the program.

Additional program information is available at http://ed.isu.edu/sspe/msat_home.shtml website.

General Requirements

Students must complete a minimum of 48 semester credit hours for the Master of Science in Athletic Training degree. Students completing the degree will be required to complete a two-year sequence of courses which will include a 5-course sequence of clinical education and culminate in a 3-credit Capstone project that will challenge the student to summarize their learning experiences through the presentation and defense of a case study before an examining committee.

Upon Graduating, ISU’s MSAT students will be eligible for national board examination (administered nationally by the Board of Certification- BOC). Only those students graduating from a CAATE accredited program are eligible to take the BOC exam.

Master of Science in Athletic Training / Doctorate of Physical Therapy Dual Degree Program

Description of the Program

The MSAT/DPT dual degree program is a unique program for select students. Normally, obtaining both degrees would take a total of 5 years, but with the dual degree, the program can be completed in 4 (47 months), graduating with an MSAT and DPT degree, as well as completion of requirements to sit for the national board examinations for both professions. Both the MSAT and DPT programs are accredited by the respective governing bodies. This program has been approved by the Idaho State Board of Education.

Admission Requirements

Applicants must be admitted to both programs (MSAT and DPT) separately. The applicant will use the normal application (PTCAS for the DPT; MSAT program application for MSAT). In addition, a letter must be submitted to both programs declaring interest in the dual degree program. Application and letter deadline is November 15th.

Once an applicant has applied and is accepted for both programs, the DPT entrance will be deferred 1 year; the first year of the program will be entirely MSAT content.

Deposits for BOTH programs would need to be made by the deadline for each program.

Awarding of Degrees

Both degrees will be awarded at the end of the entire program (47 months). The candidate will be eligible to sit for the Athletic Training Board of Certification examination during the last academic semester of the entire program and for the National Physical Therapy Examination during the final clinical semester.

Course Sequence

The MSAT sequence will consist of the first summer session and two semesters. The DPT sequence follows for six semesters plus two summer sessions.

AT 6604  3

AT 6606  3
Athletic Training Courses

**AT 6600 Foundations of Athletic Training: 3 semester hours.**
Survey of the profession of Athletic Training. Injury prevention, assessment, treatment, taping, and rehabilitation of common athletic injuries will be presented. Lab included.

**AT 6602 General Medical Assessment: 3 semester hours.**
This course addresses current medical issues that pertain to athletic training and the physically active. Content includes: sports pharmacology, physiological considerations, common illnesses and special concerns. Lab included.

**AT 6604 Physical Assessment of the Lower Extremities: 3 semester hours.**
Intense, in-depth study of the lower extremities including: physical examination, injury recognition, treatment, taping, bracing, and foundations of rehabilitation.

**AT 6606 Traumatic Brain Injury and Neurological Assessment: 3 semester hours.**
Comprehensive examination of sport-related traumatic brain injury. Includes neurological assessment and rehabilitation methods. Lab included.

**AT 6608 Physical Assessment of the Upper Extremities: 3 semester hours.**
Intense, in-depth study of the trunk, head, face, and upper extremities including: physical examinations, injury recognition, emergency treatment, taping, bracing, and foundations of rehabilitation. Lab included.

**AT 6610 Pathophysiology and Therapeutic Modalities: 3 semester hours.**
Analysis of the physiological response to injury and the effects of therapeutic modalities on athletic injuries.

**AT 6612 Conditioning and Therapeutic Exercise: 3 semester hours.**
Development of proficiency in the theory, design, and implementation of conditioning programs and instruction on the effective application of therapeutic exercise in order to achieve symptom-free movement and function. Content includes basic principles of exercise, therapeutic effects of exercise, functional evaluation of performance, goniometric measurements, and manual muscle testing. Lab included.

**AT 6614 Professional Issues in Athletic Training: 3 semester hours.**
This course is designed to expose students to various professional issues involved with athletic training in a topical format in order to develop a holistic understanding of the profession. Content includes topics such as psychosocial issues, cultural competence in healthcare delivery, performance enhancement, job seeking, exam preparation, and continuing professional development.

**AT 6640 Research Methods in Athletic Training: 3 semester hours.**
Interpretation of statistical procedures and research designs commonly used in athletic training research. Prepares students to conduct research projects related to the field of athletic training. PREREQ: Permission of instructor.

**AT 6645 Organization and Administration of Athletic Training: 3 semester hours.**
This course is designed to expose students to the organization and administration concepts of athletic training. Content includes management, leadership, legalities, historical perspectives, motivation, and technology.

**AT 6651 Capstone Assessment: 1-3 semester hours.**
There are three semesters of AT 6651 Capstone Assessment courses. Together they represent a comprehensive assessment of learning over time of the students. Capstone Assessment in Spring I requires the student to prepare and submit a research project to the Institutional Review Board. Capstone Assessment in Fall II requires abstract submissions to the Northwest Athletic Trainers' Association and the National Athletic Trainers' Association for their annual conferences. Capstone Assessment in Spring II requires a final written manuscript submission-ready to a peer-review journal, an oral project defense, and a final oral practical exam before an examining committee. Students must take this course in each of the last 3 semesters of the program (for a total of 3 credits) in order to graduate.
AT 6661 Clinical Experiences in Athletic Training I: 3 semester hours.
Clinical experiences in athletic training.

AT 6662 Clinical Experiences in Athletic Training II: 3 semester hours.
Clinical experiences in athletic training.

AT 6663 Clinical Experiences in Athletic Training III: 3 semester hours.
Clinical experiences in athletic training.

AT 6664 Clinical Experiences in Athletic Training IV: 3 semester hours.
Clinical experiences in athletic training.

AT 6665 Clinical Experiences in Athletic Training V: 3 semester hours.
Clinical experiences in athletic training.

Physical Educ Courses

PE 5513 Sport in Cinema: 3 semester hours.
Investigate sport, and the treatment of sport, through the medium of modern cinema. Sport will be analyzed from the sociological, psychological, moral and ethical perspective of the filmmakers. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

PE 5527 Personal Trainer Certification: 3 semester hours.
Theoretical knowledge and practical skills in preparation for national certification exam in personal training. Guidelines for instructing safe, effective and purposeful exercise; essentials for the client-trainer relationship, conducting health and fitness assessments, and designing and implementing appropriate exercise programming.

PE 5565 Organization and Administration of Intramural Sports: 3 semester hours.
Study of various methods of organizing and administering intramural sports programs on the junior high school, high school, and college levels.

PE 5573 Facility Planning and Designing: 3 semester hours.
An investigation of the various components, principles, and fundamental practices involved in facility planning and design for physical education, athletics, and recreation. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

PE 5580 Coaching Problems: 1-3 semester hours.
Athletic control, eligibility, new coaching techniques, finances, safety measures, public relations, duties of coaches, managers, and officials. May be repeated for up to 4 credits. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

PE 5581 Coaching Clinic: 1 semester hour.
ISU is a sponsor of the annual Idaho Coaches Association Clinic held during the first week of August. Instruction offered in football, basketball, and other sports by coaches of national reputation. May not be applied to degree programs. May be repeated.

PE 5585 Independent Problems in Physical Education: 1-3 semester hours.
Individual work under staff guidance. Field and/or library research on specific physical education problems. May be repeated up to 6 credits.

PE 5591 Physical Education Workshop: 1-3 semester hours.
A critical analysis of one or more areas of physical education. Limited enrollment. May be repeated up to six credits.

PE 5594 Adapted Physical Activity: 3 semester hours.
History, philosophy, and the teaching/learning process in providing adapted physical activity in schools and community-based settings. Includes clinical experiences. PREREQ: BIOL 3301 or PE 2243; PE 3300 and PE 3362.

PE 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. Must be graded S/U.

PE 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

PE 6605 Leadership and Administration: 3 semester hours.
Development of leadership skills and the dynamics of group process relative to effective interpersonal relationship with special emphasis on Physical Education and Athletic programs and personnel needs.

PE 6610 Advanced Sport Psychology: 3 semester hours.
Designed to define, critique, and apply critical perspectives of sport and exercise psychology, including aggression theories, violence, cohesion, and social facilitation. Aspects of coaching theory and its application are included.

PE 6612 Advanced Sociology of Sport: 3 semester hours.
Social aspects of sport and society, with emphasis on the relationship between sport, culture, and ideology.

PE 6615 Philosophy and Principles of Athletics in Education: 3 semester hours.
The role of athletics in education, the function and organization of leagues and conferences of coaches, certification of coaches, ethics, and public relations.

PE 6620 Curriculum and Supervision: 3 semester hours.
Consideration of the physical education curriculum in public schools and in colleges and universities. Recent developments and current trends that influence the curriculum and supervision policies. Observation techniques, standards in judging instruction, the supervisory conference, cooperative supervision, basic foundation of curriculum construction, and lesson planning.

PE 6622 Survey of Professional Literature: 3 semester hours.
Identification and investigation of professional literature and its application to current and future directions of the field. Extensive reading and formal writing required. May be repeated.

PE 6625 Advanced Sport Marketing: 3 semester hours.
Introduction to the basic nature of marketing in sport and athletics as it relates to consumer behavior, research in sport marketing, defining the sport product, market segmentation, pricing, promotion, and public relations, and the legal aspects of sport/athletics.

PE 6631 Athletics and the Law: 3 semester hours.
A study of the administrative role relating to the regulation of athletic competition and athletic programs. A review of significant court cases dealing with sports law, with application to the school setting.

PE 6634 Sport Finance: 3 semester hours.
This course is designed to introduce students to the economics and accounting in sport and athletics. Topics include (a) principles and theories of economics, (b) basics of accounting, (c) principles of budgeting, (d) financial reporting, (e) financing of facilities, and (f) economic impact of venues and events.

PE 6635 Management Aspects of Athletics: 3 semester hours.
Factors involved in the conduct of athletic events such as contracts, scheduling, travel, game management, crowd control, and the legal implications of athletics.

PE 6640 Research and Writing: 3 semester hours.
Analysis and interpretation of the basic principles of research and writing as they relate to physical education, athletics and allied fields of endeavor. Integration of research and writing procedures likely to have the greatest influence on programs and practices relating to the administration of P.E.D. programs.

PE 6648 Problems: 1-3 semester hours.
Individual and group study of problems in the areas of physical education and recreation. May be repeated to 6 hours credit.
**PE 6649 Issues in PED and Athletic Administration:** 3 semester hours.
A study of the current issues applicable to the administration of PED and athletics. Opportunities may be afforded for study within specialized areas. May be repeated up to 6 hours with departmental permission.

**PE 6650 Thesis:** 1-6 semester hours.
Thesis. 1-6 credits. May be repeated. Graded S/U.

**PE 6651 Masters Project in PED and Athletics:** 1-3 semester hours.
Master's Project. Maybe repeated. Graded S/U.

**PE 6655 Internship:** 1-3 semester hours.
Administration, supervision and operation of a P.E.D. or Athletic Program. Students work under the direction of a graduate faculty member and practicing administrator. May be repeated up to 6 credits. May be graded S/U.

**PE 6658 Athletics in the West:** 3 semester hours.
Field-based review of programs and topics related to physical education and athletic administration, including: tours of facilities in schools, colleges, and professional athletics; lessons and seminars with practitioners and scholars.

**PE 6699 Experimental Course:** 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

Assistant Professors: Bartle, Gallup, Ntuli, Streagle
Clinical Assistant Professors: Beasterfield, Eller
Clinical: Lin, Schroeder, Toevs

Master of Education in Elementary Education

The 30-credit (minimum) non-thesis master’s degree in Elementary Education is a combination of pedagogy and content; designed for the elementary school teacher. This degree will permit the practicing teacher to acquire greater depth in STEM (or single subject mathematics, geology, physical science, or biology), ESL/TESOL, foreign language, English/language arts, history/social science, Instructional Technology, or another Idaho SBOE-approved elementary certification or endorsement area.

1. The advanced elementary education professional, through the core curriculum and other course work, is expected to meet the core standards for advanced professionals.
2. The advanced elementary education professional is expected to meet Idaho Core Teacher Standards and National Board for Professional Teaching Standards Core Propositions.
3. The advanced elementary education professional is expected to extend their subject matter depth in STEM, (or single subject mathematics, geology, physical science, or biology), ESL/TESOL, foreign language, English/language arts, history/social science, or another Idaho SBOE-approved elementary subject matter content certification or endorsement area.
4. The advanced elementary education professional is expected to utilize the knowledge of subject area concentration in specific applications and assessments within the educational methods curriculum.

Master of Education in Secondary Education

The 30-credit (minimum) non-thesis master’s degree in Secondary Education is a combination of pedagogy and content; designed for the secondary school teacher. This degree will permit the practicing teacher to acquire greater depth in STEM (or single subject mathematics, geology, physical science, or biology), ESL/TESOL, foreign language, English/language arts, history/social science, Instructional Technology, or another Idaho SBOE-approved secondary subject matter content certification or endorsement area.

1. The advanced secondary education professional, through the core curriculum and other course work, is expected to meet the core standards for advanced professionals.
2. The advanced secondary education professional is expected to meet Idaho Core Teacher Standards and National Board for Professional Teaching Standards Core Propositions.
3. The advanced secondary education professional is expected to extend their subject matter depth in STEM (or single subject mathematics, geology, physical science, or biology), ESL/TESOL, foreign language, English/language arts, history/social science, Instructional Technology, or another Idaho SBOE-approved secondary subject matter content certification or endorsement area.
4. The advanced secondary education professional is expected to utilize the knowledge of subject area concentration in specific applications and assessments within the educational methods curriculum.

Master of Education in K-12 Education

Music Education 36 Credits

The Master of Education in Music Education is a degree program housed in the College of Education and presented in collaboration with the Department of Music. For admission into this program, apply first to the College of Education Department of Teaching and Educational Studies. The Master of Education in Music Education is designed to strengthen the student’s understanding, knowledge, and skills in three major areas — Core Professional Studies, Specialty Studies, and Integrative Field Research studies — as they relate to music education. The program is designed to meet the needs of music education specialists who work in the public school system (K-12) or who aspire to further graduate study and teaching in music education.

Master of Education in Special Education

1. The special educator will understand the field as an evolving and changing discipline.
2. The special educator will know and demonstrate respect for his/her students first as unique human beings and contributing members of the community.
3. The special educator will understand the appropriate use of various types of assessments.
4. The special educator will adapt general curriculum by using a variety of instructional strategies and positive behavior supports.
5. The special educator will collaborate with colleagues, families, and agencies to develop inclusive communities.

The Master of Education in Special Education is designed to strengthen the student’s understandings, knowledge, and skills in three major areas – Professional Studies, Specialty Studies, and Integrative Field Research Studies – as they relate to special education.

Master of Education in Early Childhood Education

Family Studies

The goal of the Early Childhood Education Program is to prepare professionals who have the necessary knowledge, dispositions, and abilities to:

1. Enhance learning and development of young children, with and without disabilities, between the ages of birth and third grade.
2. Establish collaborative relationships with families, and other professionals in ways that produce positive outcomes for young children.
3. View their own professional development as a lifelong endeavor.

Master of Education with Literacy Emphasis

1. The Literacy specialist understands the related nature of reading, writing, listening, speaking, and viewing and that literacy is a process of constructing meanings. These meanings begin with personal knowledge.
2. The literacy specialist understands the importance of building on strengths of individual learners rather than emphasizing needs.
3. The literacy specialist is able to support and expand student expression in speaking, writing, and creative art forms across subject matter areas.

4. The literacy specialist is able to conduct assessment that involves multiple indicators of student progress and develop an instructional plan based on these indicators.

The Master of Education with Literacy Emphasis is designed to strengthen the student’s understanding, knowledge, and skills in three major areas – Core Professional Studies, Specialty Studies, and Integrative Field Research Studies – as they relate to literacy education.

**Master of Science in Deaf Education**

The Master of Science in Deaf Education program has an outstanding history of identifying, educating, and placing highly qualified individuals in educational programs for Deaf and hard of hearing children and youth who are Deaf and hard of hearing. The program is in alignment with the College of Education’s other graduate programs in that it includes research components (i.e., Core Professional Studies and Integrated Field Research Studies), a teacher certification component (i.e., Specialty Studies), and a supporting area (i.e., Electives) that augment a student’s undergraduate training.

**Master of Arts in Teaching**

A 36-credit, non-thesis master degree, the Master of Arts in Teaching (MAT) is designed to strengthen the pedagogical knowledge and skills of candidates seeking to leverage an existing Bachelor degree to become a K-12 teacher. This degree program provides persons pursuing non-traditional routes to teacher certification with a process to meet the competencies required by the State of Idaho for initial licensure. The program consists of three core courses required for all master degrees in the College of Education and a series of emphasis courses designed to strengthen pedagogical knowledge and skills. A clinical and capstone experience is also required.

**Master of Education in Elementary Education**

**Admission Requirements**

The student must apply to, and meet all criteria for, admission to the Graduate School. In addition, applicants for the Master of Education in Elementary Education must meet all college requirements for admission and retention. Those include previous teaching experience and/or current certification to teach in Idaho or another state.

Master of Education in K-12 Education

Admission Requirements

The student must apply to and meet all criteria for admission to the Graduate School. In addition, applicants for the Master of Education in K-12 Education must meet all college requirements for admission and retention.

Individuals applying for admission to the Master of Education in Music Education, must meet the following admission requirements:

- Bachelor’s degree in music from a regionally accredited college or university.
- It is expected that students will meet basic requirements for public school certification.
- Completion of entrance examinations in music history and music theory. Students whose examination indicate deficiencies will be granted Classified (w/PR) Status. Any course used to remove deficiencies does not count toward the degree. When deficiencies have been removed, the student may seek Classified Status.

General Requirements

Students complete a minimum of 36 semester credit hours for the Master’s degree. Students seeking Idaho Certification in the area of their training must meet any requirements of the State Board of Education for certification. It is recommended that students have professional experience in an education context.

Master of Education with Literacy Emphasis

Admission Requirements

The student must apply to, and meet all criteria for, admission to the Graduate School. In addition, students for the Master of Education with Literacy Emphasis must meet all college requirements for admission and retention.

Individuals applying for admission to the Master of Education with Literacy Emphasis must meet the following admission requirements:

- Bachelor’s degree from a college or university accredited in the United States or its equivalent from a school in another country.
- Grade point average of 3.0 or higher for all upper division credits taken at the undergraduate level.

General Requirements

Candidates must complete a minimum of 33 semester credit hours for the Master of Education with Literacy Emphasis. They must complete EDUC 4419 Developmental Literacy or the Idaho Comprehensive Literacy Assessment. All candidates completing a thesis will orally defend the thesis, but will not complete written comprehensive examinations. All candidates not completing a thesis will be required to pass both a written comprehensive examination and an oral examination.

Candidates seeking Idaho certification in the area of their training must meet any requirements of the State Board of Education for certification. It is recommended that students pursuing the Master of Education with Literacy Emphasis have professional experience in an educational context.

Educational Specialist in School Psychology or Special Education

Admission Requirements

Candidates for the Educational Specialist in School Psychology or Special Education degree must meet all college and university requirements for admission and retention. The student must hold a master’s degree in the area of the chosen Ed.S. major. Master’s degree majors in a closely related field may be approved upon recommendation of the selection committee.

General Requirements

The student must complete 64 credits in Special Education or 66 credits in School Psychology, including the master’s degree and a specialist paper. All post-master’s degree course work must be taken from members of the Idaho State University graduate faculty or be approved in advance by the graduate faculty. A minimum grade point average of 3.0 (B) is required over all course work taken in the Ed.S. program. An oral examination covering the specialist paper, portfolio, and/or relevant topics is required.

Time Requirement

All requirements for the Ed.S. must be completed within a period of five years from the date of completion of the first post-master’s degree course to be applied toward the degree.
Specific Requirements: School Psychology Major

The Ed.S. in School Psychology is designed to be consistent with the minimal entry-level requirements in the field of school psychology as presented by the National Association of School Psychologists. A master’s degree as a school psychological examiner or its equivalent is required.

The Ed.S. is viewed as a practitioner’s degree and will focus on applied activities.

Additional Requirements

Students will also prepare a School Psychology Portfolio. The Portfolio will be presented and defended in the Oral Examination.

Total Hours: 31-33

Special Education Major

The following course work is required:

1. A minimum of 21 credits in special education course work at or above the 6600 level (including administration of special education), of which 6 credits are in the supervision of clinical practicum in special education and 3 credits are in internship in special education.

2. Behavioral sciences and/or education/school psychology, 9 credits.

3. Educational Specialist Paper in Special Education, SPED 6652, 1-3 credits. The number of credits will be determined by the advisor and student.

Master of Education in Special Education

Admission Requirements

Applicants for the Master of Education in Special Education must apply to, and meet all criteria for, admission to the Graduate School and all college requirements for admission and retention.

Individuals applying for admission to the Master of Education program in Special Education must meet the following admission requirements:

- Bachelor’s degree from a regionally accredited college or university in the United States, or its equivalent from a school in another country.
- Grade point average of 3.0 or higher for all upper division credits taken at the undergraduate level.

General Requirements

Students completing a Master of Education in Special Education must complete both a written comprehensive examination and an oral examination.

Additional Requirements for the Special Education Option

Student must either have an undergraduate special education major or a 14-credit undergraduate core of special education course work including:

- SPED 3330 The Exceptional Child
- SPED 3334 Classroom Behavior Management
- SPED 5523 Designing Instruction
- SPED 5524 Assessment Procedures in Special Education
- SPED 5527 Precision Teaching

These courses will not be counted as part of the master’s degree program.

Persons seeking initial certification must also complete:

- SPED 5529 Strategies Severe Disabilities
- SPED 5532 Direct Instruction Systems
- SPED 5538 Policies and Procedures in Special Education
- SPED 5546 Secondary Special Education

Persons must also complete the Idaho Technology Portfolio assessment.

- SCPY 6614 Diagnostic Evaluation of Learning Difficulties
- SPED 6630 Professional Development in Special Education
- SPED 6638 Practicum in Special Education
- SPED 6662 Consultation in Schools

Elective credits totaling a minimum of 33 semester credit hours for the Master's degree must be taken from relevant graduate-level courses, with approval of student's major advisor.

The deadline for submission of applications is July 1. Applications will be reviewed and degree-seeking students will continue to be admitted until program capacity is reached.
Master of Education in Early Childhood Education

Admission Requirements

The candidate must apply to, and meet all criteria for, admission to the Graduate School. In addition, applicants for the Master of Education in Early Childhood Education must meet all college requirements for admission and retention.

General Requirements

The Master of Education in Early Childhood Education is designed to strengthen the student’s understanding, knowledge, and skills in three major areas – Core Professional Studies, Integrative Field Research Studies, and Specialty Studies – as they relate to Child and Family Studies.

- Early Childhood Education

Candidates enter the program after completion of the Bachelor’s degree. All candidates completing a Master of Education in Early Childhood Education must complete a written comprehensive examination and an oral examination; a case study/project OR a case study/project/internship combination, OR a thesis.

Master of Science in Deaf Education

Admission Requirements

The student must apply to, and meet all criteria for, admission to the Graduate School. In addition, applicants for the Master of Science in Deaf Education degree must meet all college requirements for admission and retention.

Admission requirements for individuals applying to the Master of Science in Deaf Education:

- Bachelor’s degree from a regionally accredited college or university in the United States or its equivalent from a school in another country.
- Submit three letters of recommendation.

In that the mission of the Deaf Education program is to prepare individuals to become certified teachers of the Deaf, preference is given to individuals who have an undergraduate elementary, secondary, or special education major and who have American Sign Language skills. However, individuals without this background should consider applying after consulting their respective state department of education for details regarding teacher of the Deaf certification/licensure.

General Requirements

Students completing a Master of Science in Deaf Education must complete a minimum of 33 semester credit hours. Students seeking Idaho certification in the area of their training must meet the State Board of Education requirements for certification/licensure. Students seeking certification in their area of training from a state other than Idaho must meet the requirements of that state.

Required Core Professional Studies

EDUC 6601 Research and Writing 3
EDUC 6610 Applied Educational Statistics 3

Specialty Deaf Education Studies

EDHH 5556 Psychosocial Aspects of Deafness 3
EDHH 6609 Teaching Internship in Deaf Education 3
EDHH 6627 Literacy Curriculum in Deaf Education 3
EDHH 6628 Curriculum Organization in Deaf Education 3
EDHH 6637 Foundations of Deaf Education 2

Electives

Course 9
EDHH 6658 Teaching Language to the Deaf 3
EDHH 6659 Teaching Academic Subjects to the Deaf 3

Integrative Field Research Studies

Course 3
EDHH 6651 Field Project or Case Study in Deaf Education

Total Hours 32

Elective credits to total a minimum of 33 credits for the Master’s must be taken from relevant graduate-level courses. Elective credits must be approved in advance by the student’s major advisor. In certain situations a student’s program of study might exceed 33 credits. The three most common situations are:

1. Applicants will be evaluated as to their teaching experience with Deaf/hard of hearing children:
   a. those with three or more years of such teaching experience will be able to waive EDHH 6609 Teaching Internship in Deaf Education (3 credits) but will need to take added electives;
   b. those who do not meet the three years teaching experience will need to take EDHH 6609 (3 credits).

2. Applicants who do not meet American Sign Language proficiency will need to complete appropriate coursework; verification can be established through various sign language quality assurance examinations (e.g., RID, NAD, or EIPA [3.5 or above] certification), or transcript verification.

3. Applicants who do not have appropriate coursework in communication sciences/disorders and audiology will be advised to take appropriate courses in order to meet teacher of the Deaf and hard of hearing standards as identified in state certification/licensing documents. A thorough examination of each applicant’s transcript will be completed to determine what coursework the student has completed and what coursework is needed to complete the Master of Science in Deaf Education, as well as state certification/licensure requirements to become a teacher of the Deaf/hard of hearing.

Master of Arts in Teaching

Deaf Education Grad Courses Courses

**EDHH 5556 Psychosocial Aspects of Deafness: 3 semester hours.**
Psychological, educational and social influences of the hearing community on deaf persons and the structure of the deaf community as a socio-cultural entity.

**EDHH 6607 Directed Observation in Education of the Deaf: 1 semester hour.**
Directed observations at multiple levels and reporting of casual interactions and diagnostic/intervention approaches by instructor with Deaf or hard of hearing individuals (minimal 150 clock hours). May be repeated up to 3 credits.

**EDHH 6608 Communication Practicum: 2 semester hours.**
Supervised experiences applying research and theory to language intervention practices for Deaf or hard of hearing individuals. May be repeated up to 6 credits.

**EDHH 6609 Teaching Internship in Deaf Education: 1-3 semester hours.**
Directed classroom and clinical teaching experience with Deaf or hard of hearing students under supervision. Minimum 250 clock hours at the level specialization. May be repeated up to 6 credits. Graded S/U. PREREQ: Approved application.

**EDHH 6627 Literacy Curriculum in Deaf Education: 3 semester hours.**
Theory, research and practices for teaching and assessing written language for Deaf and hard of hearing students. Applications of principles of language acquisition to reading and writing.

**EDHH 6628 Curriculum Organization in Deaf Education: 3 semester hours.**
Organizing, adapting and implementing curriculum across all areas to meet the special needs of Deaf or hard of hearing students. Includes assessment, behavior management, instructional technology, and individualized planning.

**EDHH 6637 Foundations of Deaf Education: 2 semester hours.**
A comprehensive study of the philosophies and theories that influence current practice and research in the education of Deaf or hard of hearing students.

**EDHH 6651 Field Project or Case Study in Deaf Education: 1-3 semester hours.**
A field project or case study is completed in conjunction with the field internship and/or education scenario. Written report and oral explication required. May be repeated up to 6 credits. Graded S/U.

**EDHH 6658 Teaching Language to the Deaf: 3 semester hours.**
Students gain theoretical and practical knowledge in the evaluation and habilitation of language/communication problems in Deaf and hard of hearing children and adolescents.

**EDHH 6659 Teaching Academic Subjects to the Deaf: 3 semester hours.**
Students gain theoretical and practical knowledge of how to teach academic subjects to the Deaf and hard of hearing children and individuals.

Education Courses

**EDUC 5519 Developmental Literacy: 3 semester hours.**
Instructional strategies for reading, emphasizing early literacy and language development, phonemic awareness, phonics, word recognition strategies, comprehension and meta-linguistic awareness.

**EDUC 5524 Assessing Literacy Abilities: 3 semester hours.**
Methods of assessment in literacy. Introduction to case study, formal and authentic measures of comprehension, vocabulary, study strategies, and writing. PREREQ: EDUC 5519 or the Idaho Comprehensive Literacy Assessment, or permission of instructor.

**EDUC 5526 Remediation of Literacy Problems: 3 semester hours.**
Teaching strategies for remediating problems in literacy. Emphasis on planning, implementing, and evaluating approaches and materials. PREREQ: EDUC 5524.

**EDUC 5560 Foundations of ESL: 3 semester hours.**
Study of ESL learner characteristics, historical, philosophical, cultural and linguistic foundations of ESL. Theories of language acquisition and those of leaders in the field will be included.

**EDUC 5563 ESL Methods: 3 semester hours.**
Language assessment, planning, and delivery for teaching limited English proficient K-12 students. Appropriate methods for students at various developmental stages of language acquisition will be studied. PREREQ: EDUC 5560.

**EDUC 5564 ESL Practicum: 1 semester hour.**
Field experience in settings with English-as-a-Second-Language learners. COREQ: EDUC 5563 or permission of instructor.

**EDUC 5570 Manipulative Mathematics: 3 semester hours.**
Study of methods for teaching mathematics through the modern math approach stressing manipulations. Consideration is given to diagnostic and remedial procedures for exceptional children.

**EDUC 5571 Interpersonal Communications: 2 semester hours.**
Examination of basic concepts, principles, models, and theories of interpersonal communications and their application to educational settings.

**EDUC 5581 Contemporary Issues in Education: 1-3 semester hours.**
Examination and analysis of contemporary issues and trends in theories and practices in education.

**EDUC 5582 Contemporary Issues in Education: 1-3 semester hours.**
Examination and analysis of contemporary issues and trends in theories and practices in education.

**EDUC 5583 Instructional Improvement for Teachers: 1-3 semester hours.**
Study of ways by which teachers can improve instruction in their own classrooms with emphasis on the findings of research and experiences.

**EDUC 5585 Independent Problems in Education: 1-3 semester hours.**
Individual work under staff guidance. Field and/or library research on specific educational problems of interest to majors in education. Experience in research composition. May be repeated.

**EDUC 5591 Seminar: 1-3 semester hours.**
Critical analysis of the literature in one or more areas of education. Limited enrollment.

**EDUC 5597 Professional Education Development Topics: 1-3 semester hours.**
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. Must be graded S/U.

**EDUC 5598P Prof Development Workshop: 3 semester hours.**
New methods and opportunities to enhance and supplement skills. Subject to the approval of the Dean of the student's college, a maximum of eight credits earned in workshops may be applied toward a degree; students taking the courses only for personal development may choose the 0-credit option; those seeking professional development must choose a for-credit option.

**EDUC 5599 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**EDUC 6601 Research and Writing: 3 semester hours.**
Examination of methods for designing/conducting research in education and related fields and of procedures for formal report writing using APA style and format.

**EDUC 6602 Theories of Learning: 3 semester hours.**
Advanced study of the psychology of human learning and instruction. Emphasis will be given to the application of contemporary theories of learning to instructional practice and the design of effective learning environments.
EDUC 6610 Applied Educational Statistics: 3 semester hours.
Application of parametric and nonparametric statistical procedures for summarizing and analyzing qualitative and quantitative measurement data in conducting research and for report writing in education and related fields. Covers descriptive statistics to single-factor experiments.

EDUC 6612 Learners and the Content: 3 semester hours.
Examination of curriculum scope and sequence within the context of varying learner needs. The course will focus on curriculum alignment with state and national standards and the connecting of content to learner characteristics and developmentally appropriate teaching practices. COREQ: EDUC 6602.

EDUC 6614 Pedagogy and Content Knowledge: 3 semester hours.
Investigation of the structure of subject matter knowledge and how it determines pedagogical content. The course will examine philosophical perspectives, models of teaching, and develop contemporary applications. PREREQ or COREQ: EDUC 6602.

EDUC 6618 Learning Communities: 3 semester hours.
Exploration of learning communities and examination regarding models for how they are created and sustained through curriculum leadership. The course includes such topics as parental involvement, curriculum for diverse learners, and collaborative teaching practices. PREREQ: EDUC 6612 and EDUC 6614.

EDUC 6620 Motivation for Learning: 3 semester hours.
Advanced study of theories and research on student motivation including strategies for linking motivation to classroom management and curriculum. Topics include individual differences, interpersonal motivation, self-motivation, and lifelong learning. PREREQ: EDUC 6612.

EDUC 6622 Educational Assessment and Evaluation: 3 semester hours.
Construction, administration and interpretation of educational assessments for the systematic analysis of student learning and teaching practice. Emphasis is placed on the use of assessment results in planning and valuation of curriculum leadership. PREREQ: EDUC 6610.

EDUC 6627 NBPTS Certification Part I: 3 semester hours.
Provides a framework for completion of the requirements for National Board for Professional Teaching Standards Certification. Examination of the standards and portfolio guidelines; provision of support and consultation in gathering and presenting documentation.

EDUC 6628 NBPTS Certification Part II: 3 semester hours.

EDUC 6630 Advanced Elementary Methods: 3 semester hours.
Advanced study of the subject content and teaching methods in grade K-8 programs. The course includes emphasis on development of materials, lesson planning, instructional strategies, assessment, and application of technology for information acquisition, analysis, and presentation by students and teacher.

EDUC 6631 Advanced Secondary Methods: 3 semester hours.
Advanced study of the subject content and teaching methods in grade 6-12 programs. The course includes emphasis on development of materials, lesson planning, instructional strategies, assessment and application of technology for information acquisition, analysis, and presentation by students and teacher.

EDUC 6632 Psychology of Literacy: 3 semester hours.
Examination of the nature of symbolic systems within the literacy field from the perspective of contemporary psychological science. Topics include decoding, lexical access, referential representation, and meta-cognition.

EDUC 6633 Language Literacy and Neurology: 3 semester hours.
Theories and principles based on research in psycholinguistics and neurophysiology as related to literacy.

EDUC 6634 Literacy Multicultural Views: 3 semester hours.
Theories and research in language acquisition and development across cultures including emphases on second language acquisition, dialects, and regionalisms affecting both oral and written codes.

EDUC 6635 Clinical Methods in Literacy: 3-6 semester hours.
Consulting, supervising, evaluating, writing case reports, and relating research and theories in literacy to clinical methods. May be repeated up to 6 credits. PREREQ: EDUC 5524, EDUC 5526 and EDUC 6633.

EDUC 6637 Leadership in Curriculum Development: 3 semester hours.
Development of the knowledge, skills, and disposition essential to effective curriculum leadership. While drawing on philosophy, the course focuses on the practical applications of leadership, including curriculum vision, development, management, and evaluation. PREREQ: EDUC 6618, EDUC 6620 and EDUC 6622.

EDUC 6638 Supervision of Interns and Student Teachers: 2 semester hours.
Role and responsibilities of supervisory personnel in the intern and student teaching programs including student orientation readiness, planning and techniques of instruction, and evaluation.

EDUC 6640 Workshop: 1-2 semester hours.
Special projects concerned with public school education. Meets for a minimum of 36 clock hours with appropriate outside assignments, lessons, or papers. May be repeated up to 6 credits.

EDUC 6641 Advanced Studies in K-12 Curriculum: 3 semester hours.
Advanced study of research and development of subject-specific curriculum in K-12 environments. Students will create a curriculum unit, demonstrating it as part of and sections will be established for each subject area. PREREQ: EDUC 6601 and EDUC 6630 or EDUC 6631.

EDUC 6648 Independent Problems in Education: 1-3 semester hours.
Individual work under staff guidance. Field and/or library research on specific educational problems of interest to graduate students in education. Experience in research composition. May be repeated up to 4 credits.

EDUC 6649 Seminar: 1-3 semester hours.
Critical analysis of the literature in one or more areas of education. Enrollment limited.

EDUC 6650 Thesis: 1-6 semester hours.
1-6 Credits. May be repeated. Graded S/U.

EDUC 6651 Field Project or Case Study in Education: 1-6 semester hours.
A field project or case study is completed in conjunction with a field practicum/ internship in an educational setting. Written report and oral explication of the project or case study required. May be repeated. Graded S/U.

EDUC 6652 Field Practicum in Education: 1-6 semester hours.
Individually designed practicum in an educational setting. The length, placement, and learning experiences will be determined in consultation with the major advisor. Graded S/U.

EDUC 6670 Seminar in Elementary Education: 3 semester hours.
Examination of research and current issues in Elementary Education. Seminar format requires readings, discussions, written assignments, and presentations.

EDUC 6671 Seminar in Secondary Education: 3 semester hours.
Examination of research and current issues in Secondary Education. Seminar format requires active participation in readings, discussion, written assignments, and presentations.

EDUC 6675 Curriculum Project: 3 semester hours.
Completion of a curriculum project within the context of a supportive learning community, or for those teachers who have achieved National Board Certification, submission of the portfolio.
EDUC 6676 Evaluation Research Practicum: 3 semester hours.
Supervised on-going assessment of curriculum projects and the systematic evaluation of their implementation in educational settings or, for those teachers who have achieved National Board Certification, content analysis of the portfolio. Each student will complete an independent curriculum evaluation project.

EDUC 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

Special Educ Courses

SPED 5523 Designing Instruction: 3 semester hours.
Introduction to instructional design principles and strategies for engaging students in higher order thinking and problem-solving. Emphasis on teaching complex concepts in reading comprehension, writing, mathematics and other academic subjects.

SPED 5524 Assessment Procedures in Special Education: 3 semester hours.
Introductory study of diagnostic assessment techniques and the writing of individual educational, behavioral prescriptions, and instructional objectives which are required to provide interventions suitable for remediating the learning programs in basic school curricula. PREREQ: SPED 3330 and SPED 4441 or permission of instructor.

SPED 5526 Assessment Severe Disabilities: 3 semester hours.
Selection, administration, and interpretation of criterion-referenced tools employed with severely disabled students. Emphasizes functional approach to assessment and evaluation of behavioral and instructional domains.

SPED 5527 Precision Teaching: 1 semester hour.
Techniques of data collection, charting, and decision making in the educational programs of children with disabilities.

SPED 5529 Strategies Severe Disabilities: 3 semester hours.
Consideration and evaluation of curriculum materials from behavioral, developmental, and ecological perspectives. Emphasizes functional approach to development and implementation of individualized intervention plans.

SPED 5532 Direct Instruction Systems: 3 semester hours.
This course provides mastery level skills training in direct instruction systems for reading, math, and written language. Includes field work, adaptation of curricula to direct instruction model and evaluation.

SPED 5533 The Emotionally Disturbed Child: 3 semester hours.
Survey of the causes of emotional disturbance in children and the effects upon the child's school performance and achievement. School programs and treatment considerations will be reviewed.

SPED 5538 Policies and Procedures in Special Education: 3 semester hours.
Consideration of legal background, current court ruling, professional responsibilities, and models for consultation and collaboration in a variety of educational settings. Includes the IEP process.

SPED 5540 Biomedical Aspects of Physical Disability: 2 semester hours.
Study of the causes, treatments, and educational implications of physical and neurological disorders of genetically and orthopedically disabled children.

SPED 5543 Autism: 2 semester hours.
An overview of autism and implications for educational planning. Teaching strategies that are successful in working with individuals who have autism will be reviewed.

SPED 5546 Secondary Special Education: 3 semester hours.
Teaching methodology focusing on needs of secondary and adult special education students. Topics include functional academics, transition, independent living, social skills, vocational training employment options, and accessing community resources.

SPED 5548 Pre-practicum Moderately Handicapped: 1-3 semester hours.
Supervised practical work with moderately handicapped children in a clinical setting. May be repeated.

SPED 5550 Creating Inclusive Classrooms: 3 semester hours.
Curricula and methods for educating students with disabilities in general education classrooms. Emphasizes inclusive lesson design, curricular adaptations, and collaborative teaching.

SPED 5562 Advanced Issues in Behavior Disorders: 2 semester hours.
Study of educational organization, collaboration and consultation skills necessary to provide integrated service for this exceptionality.

SPED 5580 Seminar in Special Education: 1-2 semester hours.
Current topics in the field of special education by departmental faculty and guest lecturers. May be repeated for a total of 2 credits.

SPED 5581 Seminar Behavior Disorders: 1 semester hour.
Covers topical issues related to the education of children with behavior disorders in a variety of educational and therapeutic settings. May be repeated.

SPED 5585 Independent Problems: 1-3 semester hours.
Individual work under staff guidance. Field and/or library research on specific educational problems of interest to majors in education. Experience in research composition. May be repeated.

SPED 5591 Seminar: 1-3 semester hours.
Critical analysis of the literature in one or more areas of education. Limited enrollment. May be graded S/U or on a letter-grade basis in separate sections.

SPED 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. Must be graded S/U.

SPED 5598 Advanced Fieldwork: 1-3 semester hours.
Orientation, observation, planning and implementation of special education instruction in a special education setting in the public schools.

SPED 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

SPED 6630 Professional Development in Special Education: 2 semester hours.
Issues related to the professional role of the master’s-degree-level special educator, including professional societies, history, philosophical and humanistic foundations.

SPED 6632 Administration of Special Education: 2 semester hours.
Supervision of special education, including the organization, financing, equipping, housing, and staffing of educational facilities for exceptional children. Also includes legal provisions relevant to special education.

SPED 6633 The Behaviorally Maladjusted Child: 3 semester hours.
Comprehensive study of the characteristics, learning problems, educational organizations, and teaching competencies for this exceptionality. PREREQ: SPED 4441.

SPED 6634 The Mentally Gifted Child: 3 semester hours.
Physical, mental, emotional, and social characteristics of the mentally gifted; teaching procedures, types of organization, analysis of educational need, and curricula material used in their education.
SPED 6636 Medical and Health Issues in Special Education: 2 semester hours.
Consideration of medical and health issues, problems, and practices as they pertain to children with disabilities in hospital-, home-, and school-based programs.

SPED 6638 Practicum in Special Education: 2-8 semester hours.
Individual observation, program development, and supervised practice in the development of teaching competencies for the education of exceptional children. A combination of fifty hours of experience and supervision equals one hour of academic credit.

SPED 6639 Internship in Special Education: 3-12 semester hours.
A combination of fifty hours of experience and supervision equals one hour of academic credit. PREREQ: SPED 6638.

SPED 6650 Thesis: 1-6 semester hours.
1-6 Credits. May be repeated. Graded S/U.

SPED 6651 Masters Paper: 1-3 semester hours.
A paper involving extensive familiarity with research findings written under the supervision of a faculty member in the department. May be repeated. Graded S/U.

SPED 6652 Specialist Paper: 1-3 semester hours.
A paper involving extensive familiarity with research finding under the supervision of a faculty member of the program, consisting of applied research activity in the field of special education written in format appropriate for publication consideration by a peer-reviewed journal.

SPED 6658 Independent Problems: 1-3 semester hours.
Individual work under staff guidance. Field and/or library research on specific educational problems. Experience in research composition. May be repeated up to 6 credits.

SPED 6659 Seminar: 1-3 semester hours.
Critical analysis of the literature in one or more areas of education. Enrollment limited. May be repeated up to 8 credits.

SPED 6662 Consultation in Schools: 2 semester hours.
Provides theoretical and practical experience in the development, implementation, and evaluation of a variety of consulting strategies suitable for working with teachers, administrators, community agencies, and parents.

SPED 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

SPED 7758 Independent Problems: 2-4 semester hours.
Individual work under staff guidance. Field and/or library research on specific educational problems. Experience in research composition. May be repeated up to 8 credits.

SPED 7759 Ed.S Internship: 1-9 semester hours.
Placement in a post-master's degree counseling, school psychology, or special education setting. A combination of fifty hours of experience and supervision equals one hour of academic credit. May be repeated.
**Health Science**

Rex W. Force, Pharm. D., Vice President for Health Sciences

Christopher Owens, Pharm.D., Interim Associate Vice President for Health Sciences

Paul S. Cady, Ph.D., Dean, College of Pharmacy

Miki Goodwin, Ph.D., Dean, School of Nursing

Marv Sparrell, MS PA-C, Coordinator, Office of Medical and Oral Health

Nancy Devine, DPT, Associate Dean and Director, School of Rehabilitation and Communication Sciences

Tracy Farnsworth, MHSA, MBA, FACHE, Interim Associate Dean and Director, Kasiska School of Health Professions

The Kasiska Division of Health Sciences is dedicated to enhancing the quality of life for our constituencies by applying the values of excellence in research, partnerships in community service, and professional education into practice.

A combination of classroom and clinical experiences ensures that graduates are prepared for licensing exams and positions in a wide range of health care fields. Programs partner with hospitals, clinics and specialized medical facilities throughout the nation to provide state-of-the-art training opportunities for students. On-campus and statewide clinics provide students with hands-on experience. Fifteen in-house clinics include medicine, dentistry, dental hygiene, audiology, speech pathology, counseling, occupational therapy, physical therapy, vestibular (balance), and wellness. Beyond the basic skill sets associated with clinical practice, we train our students to become leaders in their professions and communities. Doing this requires hiring and retaining nationally recognized faculty, using the most current teaching technologies, and giving students access to the hands-on learning opportunities they need for success.

Beyond the basic skill sets associated with clinical practice, we train students to become leaders in their professions and communities. We are dedicated to hiring and retaining nationally recognized faculty, using the most current teaching technologies, and giving students access to the hands-on learning opportunities they need for success.

**Interprofessional Geriatric Certificate**

To receive this certificate, the student would also be required to complete a bachelors or graduate degree from ISU concurrently.

**Total Hours**

8

**Courses**

**DHS 5501 Mindfulness in Health Science:** 1-2 semester hours.

Students will learn basic mindfulness practice to increase stress tolerance, compassion and immune system functioning. Students will learn meditation, mindful movement and other practices for their own benefit and will learn to teach them to others. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**DHS 5502 Survey of Aging Issues:** 3 semester hours.

Introduction to the broad spectrum of issues involved in the study of aging. Theories of aging, health promotion, demography, and multicultural aging are some topics presented in survey fashion. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**DHS 5503 Interprof Sys Geri Manage:** 3 semester hours.

Application of principles and concepts necessary to integrate theory into the practice of care coordination and management of the older adult. The scope and competencies of healthcare professionals in caring for the older adult are explored. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**DHS 5504 Geri Interprof Internship:** 2 semester hours.

Practical experience in health care arenas focusing on the older adult. This includes a project related to the application of principles and concepts of interprofessional collaborative practice. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: B- or better in DHS 5502.

**DHS 5505 Effects of Mindfulness Practice:** 2 semester hours.

This course examines physical, medical, psychological and neurophysiological effects of mindfulness meditation on the patient and clinician, from an interprofessional perspective. Students actively participate in the assessment and/or write a paper.

**DHS 5506 The Mindful Practitioner:** 2 semester hours.

This seminar for the clinical practitioner in health professions discusses the direct effects of mindful meditation practice on clients and practitioners, and provides advanced mindfulness practice training. Students actively participate in the assessment and/or write a paper.

**DHS 5507 Experience in Human Anatomy:** 1 semester hour.

Provides experience with prosected human cadaver specimens under direct supervision and guidance by DHS faculty member. Students actively participate in the assessment and/or write a paper. PREREQ: Permission of instructor.
DHS 5517 Interdisciplinary Evaluation Team: 1 semester hour.

DHS 5580 Genetics for Health Care Professionals: 2 semester hours.
An in-depth interdisciplinary review of the impact of genetics on patients and patient care and the biological, social, ethical and legal issues surrounding genetics and genomics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. Equivalent to CSD 5580 and NURS 5580.

DHS 5599 Experimental Course: 1-6 semester hours.
This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times.
Pharmacy

Paul S. Cady, Ph.D., Professor, Dean
Catherine Cashmore, Pharm.D., Associate Professor, Associate Dean

Department of Biomedical and Pharmaceutical Sciences
Interim Chair and Professor: Dodson
Professors: Dodson, Lai, Van der Schyf
Assistant Professors: Bastian, Downing, Hevener, Myers, Talley, Xu
Allied Graduate Faculty: Stevens (Boise VAMC, Professor), Bryant (Boise VAMC, Associate Professor), Cornell (BSU, Associate Professor)

Department of Pharmacy Practice and Administrative Sciences
Chair and Associate Professor: Owens
Assistant Chair and Associate Professor: Oliphant
Professors: Culbertson, Erramouspe, Force, Hachey, Lott, Madaras-Kelly, Mason, Rhodes
Associate Professors: Cashmore, Cleveland, Gould, Liday
Clinical Associate Professor: Hefflinger, Pettinger, Pugmire
Clinical Assistant Professors: Biddle, Carr, Casperson, Eroschenko, Jantz, Steed-Ivic, Wadsworth
Emeritus: Adamic, Galizia, Hurley, Sharp, Jue

Degree Programs
The College of Pharmacy offers two graduate degrees: the Master of Science (M.S.) in Pharmaceutical Sciences and the Doctor of Philosophy (Ph.D.) in Pharmaceutical Sciences. The College also offers a professional doctorate degree, Doctor of Pharmacy (Pharm.D.). The Pharm.D. is described in the College of Pharmacy (http://coursecat.isu.edu/undergraduate/divisionhealth/pharmacy/#text) section of the Idaho State University Undergraduate Catalog.

Goals
To train and prepare students to succeed in their chosen career path in the variety of areas in pharmaceutical sciences.

Objectives
- To rigorously train students in the department focus areas;
- To train students to be effective communicators of their knowledge and scientific findings;
- To expose students to multidisciplinary approaches to problem-solving so that they can use them to solve scientific problems;
- To educate students to be competent practitioners of the scientific method;
- To expose students to a variety of professional strategies so that, upon finishing their training, they become adaptable and successful in achieving their long-range goals.

Doctor of Philosophy
Programs of study leading to the Doctor of Philosophy (Ph.D.) degree are offered through the Department of Biomedical and Pharmaceutical Sciences (emphasis in areas of Pharmaceutics, Drug Discovery, or Pharmacology) and through the Department of Pharmacy Practice and Administrative Sciences (emphasis in Pharmacoeconomics and Administrative Sciences). The Ph.D. degree is a research degree and will be conferred upon the completion and report of a substantial body of original work.

General Admission Requirements
The student must apply to, and meet all criteria for, admission to the Graduate School. In addition to the general requirements of the Graduate School, the student must comply with the following:

1. Professional degree in pharmacy or a baccalaureate degree in a related field (i.e. biology, chemistry, psychology).
2. GPA of not less than 3.0 for all upper division courses (final two years).
3. Official report of Graduate Record Examination Scores with a minimum combined score of 300 is required on the verbal and quantitative sections and at least 50th percentile in one of the GRE sections (verbal, quantitative, or analytical).
4. Applicants must have a demonstrated proficiency in the English language. Students from countries where English is not the first language must demonstrate proficiency in the English language with a minimum score of 79 (internet-based test) on the Test of English as a Foreign Language (TOEFL) OR an over all band of 6.5 on the Academic Examination of the International English Language Testing System (IELTS).
5. Three letters of recommendation from individuals familiar with the applicant's academic ability and potential for graduate study.
6. Applicants must provide a personal statement of interest describing their career goals and identify which area of emphasis in the graduate program the applicant intends to follow and members of the department faculty with whom the applicant would prefer to complete his/her degree. Applications without a personal statement following these guidelines will be rejected.

Meeting minimum requirements does not guarantee admission. Other factors such as research publications, other evidence of scholarly work, strong recommendations by department graduate faculty, or compatibility of the applicant's career goals with department programs may influence the Admissions Committee to recommend conditional acceptance in the event that minimum qualifications have not been met.

General Requirements
Each beginning graduate student will have a graduate advisor assigned from the graduate faculty upon entry into the program. The student's advisor will assist the student in preparing an appropriate program of study of course work. While there is no fixed credit requirement for the Ph.D. in Pharmaceutical Sciences, the overall program of study will include at least 72 semester hours of graduate course work. The student is expected to have selected a major advisor from the graduate faculty upon entry into the program. The student's advisor will assist the student in preparing an appropriate program of study of course work. While there is no fixed credit requirement for the Ph.D. in Pharmaceutical Sciences, the overall program of study will include at least 72 semester hours of graduate course work. The student is expected to have selected a major advisor from the graduate faculty no later than the end of his/her second semester in residence.

A grade below B is unsatisfactory and will not be counted toward fulfilling the minimum requirements for the degree. Upon recommendation of the student's advisor, and with the approval of the Graduate Program Director, a student may be required to withdraw at any time for failure to maintain satisfactory progress toward the degree.

When course work is essentially complete, candidates for the Ph.D. degree complete a series of written and oral comprehensive examinations that includes the defense of a written research proposal. Upon completion of all proposed research, the student's findings will be reported in the form of a dissertation to
be prepared in accordance with Department and Graduate School guidelines. While the dissertation must be defended to the graduate faculty of the College, acceptability only requires the affirmative vote of a majority of the student’s committee members.

**Doctor of Philosophy in Pharmaceutical Sciences (Drug Discovery, Pharmaceutics, or Pharmacology Emphasis)**

**Admission Requirements**

See General Admission Requirements above. Applications for the graduate program in Pharmaceutical Sciences are reviewed twice yearly near the end of the fall and spring semesters. Deadline for the receipt of applications is April 1 for admission in the fall semester, and October 1 for admission in the spring semester. Incomplete applications and applications received after these deadlines will not be considered.

International students should also refer to the "Admission of International Students" section of the Graduate Catalog. Students with international coursework to be considered with their applications must submit an official detailed evaluation report from an institution that is a member of the National Association of Credential Services Incorporated (NACSI).

Electives in Pharmaceutical Sciences

Biomedical and Pharmaceutical Sciences related courses (as determined by committee)

1. Repeatable course.

A minimum of 72 credits including a minimum of 20 credit hours in dissertation research (PSCI 6698) and dissertation (PSCI 8850) are required. For all degree candidates, at least one half of total graduate credit hours required by the student’s Graduate Program Committee must be 6600 level. Minimum graduate credit requirements usually do not fulfill Departmental degree requirements. Specific details are provided in the Department of Pharmaceutical Sciences Graduate Guidelines.

All students in the graduate program, whether seeking the Doctor of Philosophy or the Master of Science, are expected to demonstrate proficiency in written and spoken English. Students may be required to successfully complete classes in speech and in technical writing at the request of the graduate program director and the graduate faculty of the Department of Biomedical and Pharmaceutical Sciences.

**Doctor of Philosophy in Pharmaceutical Sciences (Pharmacoeconomics and Administrative Sciences Emphasis)**

**Course Requirements**

| Statistics and Research Methods | BIOL 6605 | Biometry | 4       |
| Statistics and Research Methods | PADM 6605 | Research Methods in Pharmacy Administration | 3       |
| SOC 5508 | Statistical Analysis | 3       |
| or PSYC 6632 | Statistics and Research Design II | 2       |

**Pharmacy Administration Major Courses**

| PADM 6601 | Graduate Seminar in Pharmacy Administration (4 credits minimum) | 1       |
| PADM 6610 | Social and Behavioral Aspects of Pharmacy Practice | 3       |
| PADM 6632 | Medical Economics | 3       |
| PADM 6634 | Advanced Pharmacy Administration I | 3       |
| PADM 6635 | Advanced Pharmacy Administration II | 3       |

Major area elective courses 12

Minor Area Courses (12 courses) 1

Minor area elective courses 12

Research Activities (19 credits minimum) 2

| PADM 6650 | Thesis Research | 3       |
| PSCI 6698 | Dissertation Research (18 credits minimum) | 1-10    |
| PSCI 8850 | Dissertation | 1       |

1. A student entering the Ph.D. program with an M.S. degree in a related area may petition the Advisory Committee to waive the elective 12 credits required in a minor area of study.
2. All students must have research experience prior to beginning the dissertation. If a student has not completed an M.S. thesis, s/he must complete a minimum of 3 credits of graduate research (PADM 6650) and complete a research project resulting in a paper of publishable quality. If a student has completed an M.S. thesis, s/he may petition the Advisory Committee to accept it as fulfillment of this requirement.

**Master of Science**

The M.S. program offers the student a choice of four emphasis areas: Drug Discovery, Pharmaceutics, Pharmacology, and Pharmacoeconomics and Administrative Sciences.

**General Admission Requirements**

The student must apply to, and meet all criteria for, admission to the Graduate School. In addition to the general requirements of the Graduate School, the student must comply with the following:

1. Professional degree in pharmacy or a baccalaureate degree in a related field (i.e. biology, chemistry, psychology).
2. GPA of not less than 3.0 for all upper division courses (final two years). (Students with a grade point average between 2.75 and 3.0 will receive consideration for admission on a Classified (w/PR) basis.)
3. Official report of Graduate Record Examination Scores with a minimum combined score of 300 is required on the verbal and quantitative sections and
at least 50th percentile in one of the GRE sections (verbal, quantitative, or Analytical).

4. Applicants must have a demonstrated proficiency in the English language. Students from countries where English is not the first language must demonstrate proficiency in the English language with a minimum score of 79 (internet-based test) on the Test of English as a Foreign Language (TOEFL) or an overall band of 6.5 on the Academic Examination of the International English Language Testing System (IELTS).

5. Three letters of recommendation from individuals familiar with the applicant's academic ability and potential for graduate study.

6. Applicants must provide a personal statement of interest describing their career goals and identify which area of emphasis in the graduate program the applicant intends to follow and members of the department faculty with whom the applicant would prefer to complete his/her degree. Applications without a personal statement following these guidelines will be rejected.

Meeting minimum requirements does not guarantee admission. Other factors such as research publications, other evidence of scholarly work, strong recommendations by department graduate faculty, or compatibility of the applicant's career goals with department programs may influence the Admissions Committee to recommend conditional acceptance in the event that minimum qualifications have not been met.

General Requirements

All classified graduate students must register for the appropriate graduate seminar (PSCI 6601) each semester in which they are registered for graduate credit. A minimum of two credits in graduate seminar (PSCI 6601) is required for the degree.

Master of Science in Pharmaceutical Sciences (Drug Discovery, Pharmaceutics, or Pharmacology Emphasis)

Admission Requirements

See General Admission Requirements above. Applications for the graduate program in Pharmaceutical Sciences are reviewed twice yearly near the end of the fall and spring semesters. Deadline for the receipt of applications is April 1 for admission in the fall semester, and October 1 for admission in the spring semester. Incomplete applications and applications received after these deadlines will not be considered.

International students should also refer to the "Admission of International Students" section of the Graduate Catalog. Students with international coursework to be considered with their applications must submit an official detailed evaluation report from an institution that is a member of the National Association of Credential Services Incorporated (NACSI).

All M.S. degrees in the Pharmaceutical Sciences graduate program are thesis-based and require the completion of an original research project.

1 Repeatable course.
Dual Pharm.D./Graduate Degree Programs

Joint Pharm. D./M.S. in Pharmaceutical Sciences or Pharm.D./Ph.D. in Pharmaceutical Sciences (Drug Discovery, Pharmaceutics, or Pharmacology Emphasis)

Objective
The objective of the dual degree program at Idaho State University College of Pharmacy is to train qualified biomedical and pharmaceutical scientists for academic, industry, or government positions in the relevant scientific field. This program is intended for highly qualified applicants and is designed to reduce the total time needed for completion of the two degrees while maintaining the high standards of the individual programs. It is intended to increase the number of highly trained clinician-researchers that can operate at the interface of basic research and clinical care to facilitate a more rapid translation of medical innovation into benefit for the patient.

Admission Requirements
1. Applicants must first be admitted to the PharmD program at Idaho State University's College of Pharmacy. For admission criteria and process see http://pharmacy.isu.edu/live/pharmd/admissions.html

2. Applicants must hold a B.S. or a B.A. degree in one of the sciences, or must have completed three years of education at a college or university which will grant a B.S. or B.A. after completion of one year of education at ISU College of Pharmacy.
   a. Preference will be given to applicants who have completed one year of physical chemistry and one year of calculus.
   b. Additional courses in biochemistry, human anatomy, analytical chemistry, microbiology, advanced mathematics, and advanced organic chemistry are desirable but not required.

3. Applicants must meet all of the graduate student admission requirements as outlined above, including:
   a. Minimum GPA of 3.0 on a 4.0 scale (or equivalent).
   b. Minimum Graduate Record Examination combined score of 1,000 (old scale) or 300 (new scale) is required on the verbal and quantitative sections and at least 50th percentile in one of the GRE sections (verbal, quantitative, or Analytical).
   c. Prior research experience, although not required, is strongly encouraged.

Application Process
1. Applicants interested in the dual-degree program must arrange a meeting with the Graduate Program Coordinator. Individuals applying to the PharmD/PhD program prior to matriculating to the PharmD program should schedule the meeting at the time of their interview for the PharmD program.

2. Students may be based at either the Pocatello or Meridian campus, depending on their research interests and the requirements of the graduate program.

3. An applicant must first be admitted to the PharmD program at the ISU College of Pharmacy. After receiving confirmation of admission, the applicant should contact the Graduate Program Coordinator, who will provide an Application for Admission to the PharmD/PhD Program Form (PSCI-10)

4. The application receipt deadline is April 1st. Applications should include:
   a. A completed application form.
   b. A personal statement explaining why the applicant wants to pursue the PharmD/PhD dual degree program.
   c. A description of previous research experience, including a letter from a previous research advisor if available.
   d. GRE scores
   e. Note – Application materials already submitted for the PharmD application do not need to be resubmitted.

5. Each applicant will be interviewed individually by the Graduate Program Coordinator.

6. The Graduate Program Coordinator and GEFRAC will review the application and make a recommendation for admission to the Department Chair and Dean.

7. Applicants will be notified by May 1st on the success of their application.

8. The application provides the student an opportunity to express interest(s) in specific research areas. This information will be utilized by the Graduate Program Coordinator to tailor the student’s research experience(s) during the summer preceding the 1st year of pharmacy school (if applicable). Typically, the student will have three (3) different research experiences (rotations) lasting 3-4 weeks each. The total length for the summer research experience is ten (10) weeks. Students who need to complete PharmD pre-requisites during the summer prior to their 1st professional year are required to inform the Graduate Program Coordinator as early as possible to discuss summer rotation scheduling modifications.

9. Students enrolled in any later year of the PharmD program at ISU College of Pharmacy may also apply for admission to the PharmD/PhD program using the outlined process and timelines.

Program Requirements
For general information on the dual-degree program requirements including programs of study, research and teaching requirements, and financial support contact the College of Pharmacy Graduate Program Coordinator at gradinfo@pharmacy.isu.edu.

Joint Pharm.D.-Graduate Degree Program (Pharmacoeconomics and Administrative Sciences Emphasis)

Applicants must complete the following courses while enrolled in the P3 and P4 years of the Pharm.D. curriculum. (The courses listed below substitute for PSCI 5532 Clinical Research Design and Analysis, and 6 credits of professional electives required in the Pharm.D. curriculum). In addition, the following courses taken in the P3 year will constitute a minor area in Clinical Pharmacy as required in the graduate program: PPRA 5534 and PPRA 5535 Therapeutics I and II, PSCI 5529 Clinical Pharmacokinetics, PSCI 5568 Toxicology; PPRA 5569 will substitute for 3 credits of PADM 6650 Thesis Research.

**BioMed and Pharmacy Sci Courses**

**PSCI 5508 Respons Conduct in Research: 1 semester hour.**

This course consists of the study of the ethical principles and related federal and state laws that govern scientific research. Through a combination of lecture and case study discussion, students will learn both the substance and application to scientific research of ethical principles and related laws. Topics addressed include conflict of interest, human subject research, live vertebrate animal subjects in research, safe laboratory practices, mentor/mentee responsibilities and relationships, collaborative research, peer review, data acquisition and laboratory tools (management, sharing, and ownership), research misconduct and procedures for handling misconduct, responsible authorship and publication, and contemporary ethical issues in biomedical research.

**PSCI 5599 Experimental Course: 1-6 semester hours.**

This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**PSCI 6601 Graduate Seminar: 1 semester hour.**

Discussion of current research and theories in Pharmaceutical Sciences. May be repeated.

**PSCI 6602 Research Design and Analysis for Pharmaceutical Sciences: 3 semester hours.**

Principles of research design and statistical analysis applicable to the pharmaceutical or biomedical sciences. Emphasis on evaluation of biomedical literature and on development of research plans. PREREQ: Permission of instructor.

**PSCI 6603 Scientific Communication: 2 semester hours.**

This course will survey basic techniques in scientific communication including: scientific manuscripts/articles, theses/dissertation, and other forms of written scientific communication; laboratory notebooks, reports and other technical documentation; collecting and citing literature; basic grantsmanship and introduction to the NIH grant submission process; scientific poster and podium (oral communication) formats; preparation of professional scientific materials including CV/resume, research summary, research philosophy, teaching philosophy; and the use of relevant software.

**PSCI 6604 Research Practicum: 3 semester hours.**

The student will receive practical laboratory training in pharmaceutical sciences under the guidance of faculty. May be repeated. PREREQ: Enrollment in the non-thesis option and permission of the instructor. Graded S/U.

**PSCI 6605 Critical Literature Evaluation: 1 semester hour.**

Offered each semester, this course involves the discussion and critical analysis of the current scientific literature, focusing in the pharmaceutical sciences and its related disciplines, with written and oral presentations by the students facilitated by rotating faculty. May be repeated.

**PSCI 6606 Selected Techniques in the Laboratory: 2 semester hours.**

Practical experience in the use of instrumentation and techniques in the student's area of specialization. Each student shall select three faculty laboratories in the Pharmaceutical Sciences for specific technical training. PREREQ: Permission of instructor.

**PSCI 6607 Research Foundations: 3 semester hours.**

A discussion of the nature and critical analysis of experimentation, principles of the scientific method, and literature in the Pharmaceutical Sciences.

**PSCI 6609 Advanced Drug Delivery: 3 semester hours.**

Critical assessment of novel drug carrier systems regarding biological, drug-related, and carrier-related factors. Study of targeted drug delivery and controlled release devices with emphasis on bioerodible polymers, matrix and reservoir systems.

**PSCI 6610 Analytical Techniques in Pharmaceutics and Drug Delivery: 3 semester hours.**

Theory and practice of analytical techniques in pharmaceutics and drug delivery research. PREREQ: Permission of instructor.

**PSCI 6611 Current Topics in Pharmaceutics and Drug Delivery: 1 semester hour.**

Discussion of current research topics in pharmaceutics and drug delivery. PREREQ: Permission of Instructor.

**PSCI 6618 Principles of Pharmacology I: 4 semester hours.**

This course, the first of a two-part series, is designed to teach students the essential principles of pharmacology as a foundation for more advanced courses. Topics covered include cell biology, PK/PD, drug-receptor interactions, pharmacogenetics-epigenetics, and drug metabolism. Students will also be introduced to the molecular pharmacology of biological drug target classes, including enzymes, membrane receptors, ion channels, transport proteins, and transcription factors.

**PSCI 6619 Principles of Pharmacology II: 4 semester hours.**

This course, the second of a two-part series, is designed to teach students the essential principles of pharmacology as a foundation for more advanced courses. This course focuses on the pharmacology of the major drug classes, including drugs affecting neurotransmission, cardiovascular and pulmonary function, immunomodulation, gastrointestinal function, hormones and hormone antagonists, and drug used for chemotherapy of microbial and neoplastic diseases. PREREQ: PSCI 6618.

**PSCI 6620 Principles of Drug Design and Drug Action: 3 semester hours.**

This course will survey the principles of drug discovery, drug design, and drug action including compound screening, hit identification, lead optimization, and theories of drug-receptor binding, focusing on small-molecule drug discovery. Fundamentals of enzyme kinetics and assay development will be reviewed as well as an introduction to rational drug discovery techniques. Special topics in prodrug and peptide drug design, inorganic medicinal chemistry, design of DNA active therapeutics, drug metabolism, and natural products drug discovery will be discussed. Drug discovery case studies will highlight and reinforce the concepts and theories covered. PREREQ: Permission of instructor.
PSCI 6622 Principles of Toxicology: 3 semester hours.
Introduction to basic concepts of toxicology, including mutagenesis, carcinogenesis, teratology, risk assessment, regulatory toxicology, toxicology of solvents, pesticides, metals and radioactive materials and design of toxicological studies. PREREQ: PSCI 6621 or permission of instructor.

PSCI 6630 Psychopharmacology: 3 semester hours.
This course will cover the mechanisms of action of psychoactive drugs, including drugs used in the treatment of psychopathological disorders and drugs of abuse. Also covered will be the learned basis of drug effects. Students will critique contemporary readings in the application of psychotherapeutic agents and processes of addiction. PREREQ: Permission of instructor.

PSCI 6631 Cancer Biology: 3 semester hours.
Study of the difference between normal and cancerous cells growth control, cell cycle, carcinogenesis, growth factor and oncogenes, cellular signaling, angiogenesis, telomerasers, tumor invasion and metastasis, vitamins, diet and tobacco. PREREQ: Permission of instructor.

PSCI 6632 Anti-Cancer Drugs: 3 semester hours.
Cell cycle drug design and development, mechanisms of antimetabolites, alkylating agents, topoisomerase inhibitors, natural compounds, hormones and novel agents. Relationship between receptors and response to chemotherapy, drug resistance, drug delivery. PREREQ: Permission of instructor.

PSCI 6633 Experimental Oncology: 2 semester hours.
Cell culture, anti-cancer drug screening, protein, RNA and DNA analysis, methods in signal transduction and oncogene expression. Immunohistology, cell cycle analysis, receptor binding, receptor screening of tumors. Laboratory work included. Limit 5 students.

PSCI 6634 Current Topics in Oncology: 1 semester hour.
Study of current topics in cancer research. Emphasis on novel approaches to understand and treat cancer. PREREQ: Permission of instructor.

PSCI 6635 Special Topics in Oncology: 2 semester hours.
An introduction to cancer biology and cancer terminology. An overview of fundamentals of pharmacology as applied to cancer therapy. Mechanisms of action and resistance to chemotherapeutic drugs will be emphasized. A discussion of the importance of early detection. PREREQ: Permission of instructor.

PSCI 6636 Concepts and Tools in Pharmacogenomics: 2 semester hours.
The role of genetic factors in the development and evaluation of drugs, basic principles of microarray analysis introduction to proteomics. PREREQ: Permission of instructor.

PSCI 6640 Elements of Nanoscience and Nanotechnology: 3 semester hours.
An introduction to the properties of nanomaterials. Applications of nanomaterials in biomedical, pharmaceutical, environmental, and bioengineering systems and their impact on society. PREREQ: Permission of instructor.

PSCI 6650 Thesis Research: 1-10 semester hours.
1-10 Credits. May be repeated. Graded S/U

PSCI 6652 Advanced Biopharmaceutics and Pharmacokinetics: 3 semester hours.
Physicochemical principles involved in the kinetics of drug absorption, distribution, biotransformation, elimination, and therapeutic response. PREREQ: Permission of instructor.

PSCI 6653 Principles of Biopharmaceutical Analysis: 3 semester hours.
A treatment of the principles of modern methods for the qualitative and quantitative determination of drugs in biological materials.

PSCI 6655 Advanced Biopharmaceutical Analysis: 3 semester hours.
A continuation of PSCI 6653, this course covers the chromatographic techniques of analysis in detail including liquid chromatography, gas chromatography, thin layer capillary zone electrophoresis, and mass spectrometry, chromatography.

PSCI 6658 Biophys Chem and Struct Biol: 3 semester hours.
This course will explore the fundamentals of macromolecular structural biology, with an emphasis on the underlying principles of the related biophysical techniques, including x-ray crystallography, NMR, and mass spectrometry. Additional techniques related to the study of biological structure and function, including ultracentrifugation, absorption spectroscopy, and chromatographic methods will also be reviewed. PREREQ: Permission of instructor.

PSCI 6660 Molecular Pharmacology: 3 semester hours.
Advanced study in the transduction of biological signals, molecular basis for the action of hormones, neurotransmitters and growth factors on neurotransmission, metabolism, gene regulation and cell growth. PREREQ: PSCI 5567 and permission of instructor.

PSCI 6661 Drug Metabolism: 3 semester hours.
Advanced study in drug metabolism, cytochrome P450 oxidative system, toxic actions of drugs, mutagenicity, carcinogenicity, and in vitro systems for the study of metabolism. PREREQ: Permission of instructor.

PSCI 6662 Neuropharmacology: 3 semester hours.
The molecular basis of drug action in the central nervous system including nerve excitation, molecular properties of ion channels, neuropharmacological methods, pharmacology of ethanol and the mechanisms in tolerance and physical dependence. PREREQ: Permission of instructor.

PSCI 6670 Computer-Aided Drug Design I: 3 semester hours.
This course, the first of a two-part series, is designed to teach students the essential elements of computer-aided drug design. It will cover principles and applications of molecular modeling, an introduction to computational quantum mechanics, energy minimizations and methods of conformational analysis, computational simulations of biophysical systems (molecular dynamics and Monte Carlo methods), protein and DNA modeling, virtual screening, and structure-based hit and lead identification methods. PREREQ: Permission of instructor.

PSCI 6671 Computer-Aided Drug Design II: 3 semester hours.
This course, the second of a two-part series, is designed to teach students the essential elements of computer-aided drug design. It will cover principles and applications of cheminformatics, pharmacophore modeling in drug design, quantitative structure-activity relationship modeling, ADMET modeling, and ligand-based drug design techniques in hit identification and lead optimization. PREREQ: PSCI 6670 or permission of instructor.

PSCI 6682 Independent Problems in Pharmaceutical Sciences: 1-4 semester hours.
Advanced students are assigned special studies in areas of pharmaceutical sciences on the basis of interest and previous preparation. May be repeated. PREREQ: Permission of instructor.

PSCI 6698 Dissertation Research: 1-10 semester hours.
Research toward completion of the dissertation in the pharmaceutical, social, behavioral or administrative pharmacy sciences. May be repeated. Graded S/U.

PSCI 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

PSCI 8850 Dissertation: 1-10 semester hours.
Preparation of the written report of the dissertation research. Variable credits. May be repeated. Graded S/U.
Pharmacy Admin Courses

**PADM 5538 Independent Problems in Pharmacy Administration: 1-4 semester hours.**
Independent study of various topics in pharmacy administration. May be repeated.

**PADM 5554 Pharmacy Management I: 2 semester hours.**
Principles of organization, management and financial analysis as applied to the practice of pharmacy. PREREQ: PPRA 5519.

**PADM 5556 Pharmacy Management II: 2 semester hours.**
Problems of management, merchandising, and salesmanship, applied to community pharmacy. PREREQ: PHAR 5554.

**PADM 5599 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**PADM 6601 Graduate Seminar in Pharmacy Administration: 1 semester hour.**
Discussion of current research and theories in pharmacy administration. May be repeated.

**PADM 6603 Advanced Pharmacy Law: 3 semester hours.**
Requirements of federal laws influencing the practice of pharmacy, including selected recent cases. PREREQ: PPRA 5519 or permission of instructor.

**PADM 6605 Research Methods in Pharmacy Administration: 3 semester hours.**
Methods in research design and analysis utilized in pharmacy administration research. PREREQ: Graduate level statistics course.

**PADM 6610 Social and Behavioral Aspects of Pharmacy Practice: 3 semester hours.**
Examination of sociological and psychological concepts and theories as applied to the practice of pharmacy. PREREQ: Permission of instructor.

**PADM 6612 Ethics for Health Professionals: 3 semester hours.**
Examination of ethical issues that arise in the provision of health care. PREREQ: Permission of instructor.

**PADM 6624 Advanced Pharmacy Management I: 3 semester hours.**
Principles of operation and management encountered in the drug distribution process. PREREQ: One year of accounting or permission of instructor.

**PADM 6626 Advanced Pharmacy Management II: 3 semester hours.**
Case studies of problems encountered in pharmacy management. PREREQ: PADM 6624.

**PADM 6630 Advanced Drug Marketing: 3 semester hours.**
Approaches and methods of marketing as applied to pharmacy and the drug distribution process.

**PADM 6632 Medical Economics: 3 semester hours.**
Examination of the market forces encountered in the medical care system.

**PADM 6634 Advanced Pharmacy Administration I: 3 semester hours.**
An integration of socio-behavioral and management principles into an advanced consideration of pharmacy administration.

**PADM 6635 Advanced Pharmacy Administration II: 3 semester hours.**
A continuation of PADM 6634, this course further explores issues in the discipline of pharmacy administration.

**PADM 6649 Research in Pharmacy Administration: 1-2 semester hours.**
Research problems ancillary to the thesis project. May be repeated. Graded S/U. PREREQ: Graduate standing and permission of instructor.

**PADM 6650 Thesis Research: 1-10 semester hours.**
1-10 Credits. May be repeated. Graded S/U.

**PADM 6691 Topical Seminar in Pharmacy Administration: 2-4 semester hours.**
Examination of selected topics in pharmacy administration. May be repeated.

**PADM 6699 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

Pharmacy Practice Courses

**PPRA 5596 Clinical Pharmacy Residency: 0 semester hours.**
Advance practical experience in clinical pharmacy practice. PREREQ: Must have a Doctor of Pharmacy degree.

**PPRA 5599 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**PPRA 6699 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

Pharmacy Courses

**PHAR 5599 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**PHAR 6645 Pharmacotherapeutics for Advanced Practice Nurses: 3 semester hours.**
A problem-based course emphasizing the fundamentals of drug action and the rational use of drugs to treat various organ system disease states. PREREQ: BIOL 5563.

**PHAR 6669 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.
Counseling

Chair and Professor: Kleist
Associate Professors: Crews, Horn, Paulson
Assistant Professors: Astramovich, Coe-Smith, Moody, Stewart, Yates
Clinical Assistant Professor: Singarajah
Adjunct Associate Professor: Schmidt
Adjunct Assistant Professor: Tivis
Adjunct Instructor: Bohecker, Niece
Emeritus Faculty: Allen, Feit, Edgar, Lloyd

Department Mission Statement
The principle mission of the Department of Counseling is to prepare quality counselors for various settings in Idaho and the nation. More specifically, we seek to prepare quality School Counselors for public schools in K-12 settings, Clinical Mental Health Counselors and Marriage, Couple, and Family Counselors for community agencies and other mental health settings, and Student Affairs Counselors for working in college settings such as advising, residence halls, and career centers.

We additionally prepare doctoral level counselor educators and supervisors to work primarily in institutions of higher learning as faculty members in counselor education programs. We believe that it is also our mission to:

• instill a strong sense of professional identity in students;
• help students gain an appreciation of the rich knowledge base in counselor education;
• develop student expertise in the skills of counseling;
• aid students to become certified and/or licensed;
• aid students/graduates in their initial job placement;
• teach and perform research applicable to the practice of counseling; and
• develop student expertise in the skills of counseling;
• help students gain an appreciation of the rich knowledge base in counselor education;
• aid students to become certified and/or licensed;
• aid students/graduates in their initial job placement;
• teach and perform research applicable to the practice of counseling; and
• aid students in understanding the diversity of views and cultures within our profession and the environment in which counselors practice.

The Department of Counseling also has a mission within the Division of Health Sciences, Kasiska School of Health Professions, which is to represent the mental health perspective within the Division and to consult with Division faculty and departments in encouraging a holistic perspective toward health care services.

Counselor Education
Graduate-level preparation for

1. counselors who seek employment in schools, universities, community mental health, and various other settings, and
2. college student affairs professionals.

Pre-Counseling and Pre-Student Affairs
Preparation should consist of a broad undergraduate course of study, including some work in psychology (learning and personality theory), sociology, and the communication skills. For those seeking positions in public elementary and secondary schools, state certification requirements should be considered.

Degree Programs
Degree programs offered by the department include Doctor of Philosophy, Educational Specialist, and Master of Counseling. Majors are available in Counselor Education and Counseling (Ph.D.); Counseling (Ed.S.); Marriage, Couple, and Family Counseling (M.COUN.); Clinical Mental Health Counseling (M.COUN.); School Counseling (M.COUN.); and Student Affairs Counseling (M.COUN.).

Accreditation
The program for preparation of school counselors is credentialed by the State of Idaho.

The Counselor Education programs are approved by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) as follows: Marriage, Couple, and Family Counseling (M.COUN.), Clinical Mental Health Counseling (M.COUN.), School Counseling (M.COUN.), Student Affairs Counseling (M.COUN.), and Counselor Education and Counseling (Ph.D.).

Progression in Clinical Track Classes - Master's
Students who obtain a final grade of 2.7 (B-), or lower, in any clinical track class will be dismissed from the Department of Counseling. Students who withdraw from any clinical track class, without the prior approval of the department, will be dismissed from the program. Students can appeal their dismissal from the program through Departmental policy. The Counseling Department utilizes ISU's Appeal Policy (p. 57).

Departmental Dismissal Policies
Master's Degree Retention and Dismissal Policy
Department of Counseling faculty are confident that each student admitted has the potential to be successful in graduate study. Success in course work, clinical practice, case presentations, comprehensive exams, oral exam, and enactment of the core dispositions are examples of student's progress toward completing a degree in the Department of Counseling. However, admission into the counseling program does not guarantee success. Faculty expect students to fully engage in all aspects of the learning environment, showing openness to new experiences and risk taking necessary to develop as a person and professional counselor. The student’s major advisor plays an integral role in giving feedback to a student thus providing opportunities for continued growth and development. Engagement in all aspects of the educational experiences developed by faculty in the Department will increase the probability of successful completion of the program.

The Department of Counseling faculty members have a professional responsibility to serve as gatekeepers for the counseling profession. Counseling is a discipline that requires active and complex gatekeeping to protect the public welfare of our communities. In particular, gatekeeping refers to the responsibility of all counselors, including counselor educators and student counselors, to intervene with counselor trainees, supervisees, professional colleagues, and supervisors who engage in behavior that could threaten the welfare of those receiving counseling services. This responsibility is mandated in the ethical standards of both the American Counseling Association (ACA) and the National Board for Certified Counselors (NBCC) by specifying that counselors must act to rectify the problematic condition through appropriate organizational and professional channels (ACA, 2014, Section F.5.; NBCC, 2005, Section A; McAdams & Foster, 2009).

Faculty, site supervisors, and doctoral students systematically discuss and evaluate students’ progress in the program. When impediments are identified the
student will be informed either verbally or in writing. Impediments may include, but are not limited to, those offered by Frame and Stevens-Smith (1995):

1. inability to be open, flexible, positive, and cooperative
2. unwilling to accept and use feedback
3. unaware of impact on others
4. inability to deal with conflict and accept personal responsibility
5. inability to express feelings effectively and appropriately

The above examples are also found in the description of the Core Dispositions (see page 6 Student Handbook). If others (i.e., faculty, doctoral level supervisors, and site supervisors) have made similar observations, the Department Chairperson, major advisor, or other faculty will initiate a meeting with the student to discuss the apparent impediment to progress. Remedies and expected behavior changes will be discussed and outlined in verbal and/or written form.

The PPP represents a formal agreement between the Department and student who has been identified as having impediments to their progress as a counselor in training. Upon receipt of the PPP the student will review the plan and provide their signature indicating an understanding of the requirements expected and as agreement to meet the requirements described within. A student who chooses not to sign the PPP should understand this will cause immediate dismissal from the program and familiarize themselves with the appeals process.

Dismissal of a master’s student can be initiated in a variety of circumstances including, but not limited to, the following:

- Dismissal will occur when students violate the criteria established by the Graduate School (See Appeals and Dismissals (p. 57) in the Graduate Catalog).

Dismissal for academic or clinical deficiency will occur when a student:

1. Earns a B- or below in COUN 6696 Prepracticum Counseling Techniques,
2. OR COUN 6621 Counseling Ethics,
3. OR six credits at or below 2.7 (B- or below),
4. OR below a 3.0 GPA (B),
5. Or when students earn less than 3.0 (B) in Practicum COUN 6697 or Internship COUN 6698.

In addition, students earning a 2.7 (B-) or below in clinical coursework must petition and gain approval from the graduate faculty in the department in order to continue in the program. The Department of Counseling follows the Appeal Process detailed in the Appeals and Dismissals (p. 57) section of the ISU Graduate Catalog.

Due to the nature of the program, students can be dismissed for nonacademic concerns. The American Counseling Association Code of Ethics (2014) requires counselor educators provide remediation and/or dismissal from counseling programs when "they become aware of limitations that might impede performance" or when students are unable to demonstrate "they can provide competent counseling services to a range of diverse clients (6.f.b.)." As stated above, gatekeeping is an ethical mandate for counselor educators and designed to protect counselors in training and their current and future clients. Nonacademic concerns that could lead to dismissal include, but are not limited to, academic dishonesty, ethical violations, lack of professional comportment, personal attitudes or value systems that conflict with effective counseling relationships, and personal concerns or psychopathology.

Academic Dishonesty includes, but is not limited to, cheating and plagiarism. For the complete statement on academic dishonesty, please refer to the Academic Dishonesty (p. 60) section of the ISU Graduate Catalog. Examples of ethical violations include, but are not limited to, the improper use of technology, failure to secure informed consent, and breach of confidentiality. Lack of professional comportment includes but is not limited to, a lack of engagement in course requirements, issues within interpersonal relationships with peers, doctoral students and faculty, and inappropriate use of power with clients and other students. The faculty believe the enactment of the core dispositions embodies the values of the counseling profession and deficiencies in these areas could lead to dismissal. All students are encouraged to seek counseling and attend to their mental health. A student’s unwillingness to attend to intra- or inter-personal impediments contributing to impairment may lead to dismissal.

**Dismissal Process Flow Chart**

Process is continuous from start to graduation.

In addition to the ACA Code of Ethics, the Department of Counseling adheres to Idaho State University policies with regard to student conduct and academic dishonesty (p. 60). For more information about university expectations of student conduct, see the Idaho State University Handbook located on the Division of Student Affairs website: http://www2.isu.edu/studenta/.

**Doctor of Philosophy in Counselor Education and Counseling**

The Doctor of Philosophy (Ph.D.) is the highest university award given in recognition of completion of academic preparation for professional practice in counseling. Candidates are provided primarily with courses and practicum/internship experiences that will be instrumental in assisting them to function more effectively as professional counselor educators, as counseling practitioners, and as researchers.

**Goals**

The Doctor of Philosophy (Ph.D.) in Counselor Education and Counseling is designed to prepare counselor educators for work in counselor education programs and for work in supervisory roles in university counseling centers and other counseling sites. The major emphasis of this program is to prepare graduates for careers in university teaching in counseling programs.
Counselor education and counseling students at Idaho State University will be:

1. Prepared to teach courses in counseling skills and counseling theories.
2. Prepared to supervise counselors and counseling students who are providing individual, group, and/or marital, couple and family counseling.
3. Prepared to teach selected courses in one or more of the CACREP major areas.
4. Prepared to teach selected courses in the general CACREP common core.
5. Prepared to evaluate counselor education programs and counseling sites.
6. Knowledgeable of professional issues in the counselor education and counseling fields.
7. Knowledgeable of ethical issues and practices of counselor education and counseling.
8. Experienced in developing and conducting research.
9. Experienced in writing for professional publication.
10. Experienced in the advisement and mentoring of Master of Counseling students.
11. Knowledgeable and skilled in providing advanced clinical counseling skills.
12. Knowledgeable of the sociological manifestations of cultural diversity.

Admission Criteria
The student must apply to, and meet all criteria for, admission to the Graduate School. In addition, persons applying for admission to the doctoral program in Counselor Education and Counseling must meet the following criteria for selection. Applicants must have:

1. a master's degree from a CACREP accredited program and be licensed as a counselor in Idaho or a state with comparable requirements OR a master's degree in counseling and be a Nationally Certified Counselor and apply for an Idaho Counseling License upon admission to the doctoral program OR a master's degree in counseling, one year of full time post-master's degree counseling experience, graduate coursework curriculum requirements in all of the CACREP common core areas, and be a Nationally Certified Counselor or Idaho Licensed Counselor. (Persons who do not meet these requirements may be considered for admission as Classified (w/PR) while removing deficiencies in coursework and/or credentials);
2. taken the Graduate Record Examination (GRE) or the Miller Analogies Test (MAT). Preference will be given to scale scores of 40 percentile or more;
3. a professional resume;
4. a one-page statement of post-doctoral career objectives;
5. submitted three (3) letters of recommendation;
6. completed both Idaho State University Graduate School and Department of Counseling application forms; and
7. completed an on-campus interview by the Department of Counseling Admissions Committee.

The Admissions Committee will make the final decision regarding admission. This decision will be based on grade point and test score ranking, as well as on the committee's impression of the applicant's interpersonal style and compatibility of personality with the program's training philosophy, and his or her writing sample.

Selection Schedule for Doctoral Study
Application forms will be available for download after August 15. The application can be found at http://www.isu.edu/hpcouns//09phdapp.shtml. Applications must be postmarked by December 15. Selection of applicants for on-campus (ISU-Pocatello) interviews will be announced by early January. Notification of successful applicants for admission and alternates will be announced by approximately late January. A maximum of 5-6 students are admitted to the program each year (ISU-Pocatello, 4; ISU-Meridian, 2). Classes begin in the Fall semester of each year.

Master's Degree Curriculum Review
Doctoral students who have earned their master's degree from a 60 credit hour CACREP accredited program will be assumed to have entry level knowledge in core and major course areas. Those not graduating from a 60 credit hour CACREP accredited program will have their transcripts evaluated by a faculty committee to determine knowledge base deficiencies. A remediation plan of study will be developed and approved by the faculty as necessary. This review will take place prior to the beginning of the first semester. The transcript review will verify content of the following course comparable to the CACREP Core Areas in one of the four (4) counseling specializations.

Specialization Areas
Each doctoral student must complete at least one of the CACREP specializations. In Meridian, it could be challenging to meet the requirements of other specializations except Clinical Mental Health Counseling due to the limited availability of co-teaching opportunities. However, it is possible and has been done. If interested in doing so, please consult with your major advisor. Upon completion of the CACREP specialization requirements, the Program Requirements Verification form must be signed by the student's major advisor.

Each specialization requires competence in the following:
1. Skills and Practices
2. Supervision
3. Teaching
4. Knowledge

The major advisor, in conjunction with the program coordinator for the specialization and/or other faculty members, direct the student's study to achieve this competence. Students will develop a portfolio demonstrating competence in the specialization area. Aside from obtaining licensure, students may tailor all their teaching experiences to uniquely fit their interests and professional goals. Plans are primarily negotiated with the major advisor and in some cases may require approval from the coordinator for that specialization area with major advisor and program (i.e., specialization) coordinator approval. Application for licensure as an LPC in Idaho should be submitted by beginning of the second year.

Admission to Candidacy
Each student demonstrating an adequate foundation for doctoral study, based upon the selection criteria and the master's degree curriculum review, may apply for degree candidacy. The application for candidacy will include:

1. A course of study designed to remove entry level deficiencies as indicated by the master's degree curriculum review;
2. An approved plan for completion of specialization areas in both core and major areas; and
3. An approved final program of study.

After receiving the written approval of the major professor and a second graduate faculty committee member from the department, the application may then be submitted to the department for approval and the appointment of a third departmental committee member. The fourth committee member is non-departmental graduate faculty selected from the Division of Health Sciences or the university at large. The fifth committee member is the Graduate Faculty Representative (GFR).
Comprehensive Examination

The comprehensive examination is five days in length and is scheduled the first week of February.

Rationale for our Comprehensive Exam structure: The majority of positions advertised in counselor education require applicants to have a record of scholarship and publication. It is in the best interest of our students to provide them with not only a meaningful and rigorous capstone experience of the comprehensive exam, but also an opportunity to submit their work for publication.

1. 5 days, 2 Position Papers on the following topic areas:
   a. Day 1: CACREP Core areas
   b. Students will receive 4-6 prompts (i.e., topics, questions, or issue statements) from which to select one for development into a manuscript for submission. Students will have Monday and Tuesday to complete a draft manuscript.
   c. Day 3: Specialty Area and Professional Issues
   d. Students will receive 4-6 prompts (i.e., topics, questions, or issue statements) from which to select one for development into a manuscript for submission. Students will have Wednesday and Thursday to complete a draft manuscript.
   e. Friday can be used to polish your manuscripts for submission to the faculty editorial board. Manuscripts must be submitted by 5:00 p.m. on Friday.

2. Format and protocol:
   a. All are open book and open note. Access to library resources, or similar, via the internet are allowed.
   b. This requires a great deal of familiarity with and understanding of the literature in the areas covered in order for the students to know what to research and where to find supportive literature for their manuscripts.
   c. The intent is for students to have two submissions for publication at the end of the comprehensive examination process.
   d. Scoring rubrics will follow an adapted CES editorial board form.
   e. At the end of Friday, students will turn in their manuscripts which will include a title, an abstract, correct APA formatting and reference citations, as well as a reference page. At the end of each day the developing manuscript will be kept on a thumb drive (or more current digital format) in a secured area in a faculty member's office.
   f. The Faculty Editorial Boards will review each submission and offer feedback and edits to be incorporated into the manuscripts.
      i. This process will take place over the course of one week.
   g. After Faculty Editorial Board review, the students must incorporate the feedback and resubmit their manuscripts to the faculty within one week of receipt of feedback in electronic form.
   h. The Faculty Editorial Board will then either approve the students’ manuscripts for journal submission or return as not ready for submission. An “approve for submission” rating must be received in order to “pass” comprehensive exams.
      i. Should further editing be required by the Faculty Editorial Board, the student will be given a pre-determined amount of time in which to make these final changes and then re-submit to faculty for determination of pass or fail for submission.
   i. Each manuscript must then be submitted to a journal from the ACA family of journals or other counseling related journals acceptable to the student's doctoral committee. The students must provide their committee with acknowledgement of their submission from the journal in order to advance to doctoral candidate status.

Dissertation

After the student is admitted to degree candidacy, the dissertation proposal and preliminary research that the candidate and first two committee members have agreed upon will be presented to the complete five-member committee for recommendations and approval. Following the approval of the proposal and the completion of the comprehensive examination, the candidate is authorized to proceed with the dissertation in preparation for a final oral examination defense. The final defense is open to any member of the graduate faculty directing a request through the Dean of the Graduate School and the chair of the committee.

Residence

Following the bachelor's degree, each applicant must complete the equivalent of ten semesters of graduate study including the master's degree and three semesters of doctoral internship. At least six of the semesters must be at the doctoral level and four of these must be consecutive semesters (not including summer sessions) of full-time graduate study on campus. Students are strongly encouraged to attend all six of these semesters on a full-time basis.

Continuous Enrollment

Following admission to doctoral study, the student must register for course work, practicum, internship, independent study, or dissertation credit each semester until the completion of the degree.

Educational Specialist Degree

Education Specialist in Counseling

The Ed.S. program is designed for persons who have completed a master's degree in counseling and wish to increase their skills for advanced certification requirements or other professional objectives.

Admission Requirements

The applicant must:

1. Hold a master’s degree in counseling from a CACREP accredited school counseling program or equivalent CACREP course work.
2. Submit Graduate School application forms and application fee.
3. Submit departmental application form and application fee by specified application date.
4. Submit three (3) letters of recommendation; two (2) letters must be from Department of Counseling faculty who agree to serve on the graduate committee.
5. Have a minimum of two (2) years of work experience as a school counselor (post-master’s), and be currently employed as a certified school counselor.
6. Be recommended for admission by the Department of Counseling Admissions Committee.

Degree Requirements

The student must complete a minimum of 70 credit hours of course work (including the master's degree) and a case study. All post-master's degree course work must be approved in advance by Department of Counseling faculty. A minimum grade point average of 3.0 is required over all course work taken in the Ed.S. program. An oral examination is required that involves the presentation of a case study and demonstration of advanced counseling skills.

Major Requirements

At the post-master's degree Ed.S. level, all course work must be in Counseling-related areas and must include:

Educational Specialist Case Study

The case study presented during the oral examination reflects (both in written and video form) advanced counseling skills and theoretical orientation. It reflects therapeutic goals, client themes and counseling techniques necessary to facilitate client growth.

Time Requirement

All requirements for the Ed.S. must be completed within a period of seven (7) years from the date of completion of the first post-master's degree course to be applied toward the degree.

Master of Counseling (M.COUN)

Majors:

- Marriage, Couple, and Family Counseling
- Clinical Mental Health Counseling
- School Counseling
- Student Affairs Counseling

Goals

The general objective of the Master of Counseling (M.COUN.) degree is to prepare students to be professional counselors. The Department of Counseling faculty believe that the development of a strong professional identity, a rich knowledge base, and expertise in the skills of counseling are essential to functioning as a professional in each counseling setting.

The Master of Counseling degree is designed to be the strong foundation upon which graduates enter a lifetime career in the helping professions. This program prepares counselors to respond to the multitude of societal changes, and to the ever-expanding counseling profession. In addition to knowledge and experience in the following eight common-core areas, graduates also have specialized knowledge and skills as identified in the objectives of the Marriage, Couple, and Family Counseling, Clinical Mental Health Counseling, School Counseling, and Student Affairs Counseling majors.

Curricular Objectives

1. Students will have knowledge of Human Growth and Development in order to understand the nature and needs of persons at all developmental levels and in multicultural contexts.
2. Students will have knowledge of Social and Cultural Foundations to be effective in a multicultural and diverse society.
3. Students will be knowledgeable about various research methods and statistical analysis needs assessment and program evaluation.
4. Students will be knowledgeable and skillful in Counseling and Consultation processes.
5. Students will be knowledgeable about group development, dynamics, counseling theory, group counseling methods, and group work approaches.
6. Students will understand and be knowledgeable about individual and group approaches to assessment and evaluation.
7. Students will be knowledgeable about research methods and statistical analysis needs assessment and program evaluation.
8. Students will be knowledgeable about the profession of counseling including history, organizational structures, ethics, standards, and credentialing.

Student Professional Objectives:

In addition to the above curricular objectives, the Department of Counseling has program-wide objectives. These include:

1. School counseling students will obtain certification as school counselors.
2. Students in all majors (Clinical Mental Health Counseling, Marriage Couple and Family Counseling, School Counseling, and Student Affairs Counseling) will obtain the appropriate state licensure as professional counselors.

Admission Requirements

Admission into the counseling program is competitive. A preset number of students will be admitted, according to faculty resources. The Admissions Committee will make the final recommendation regarding admission based on grade point and test score rankings, as well as on the committee's impression.
of the applicant’s interpersonal style and compatibility of personality with the program’s training philosophy, and on the student’s written statement.

The applicant must:

1. Have a bachelor’s degree from a college or university accredited in the United States, or its equivalent from a school in another country. (Must complete degree before onset of classes in the Fall semester in year of acceptance.)

2. Meet the guidelines for admission set forth by the Graduate School and the Department of Counseling. Those individuals meeting both criteria will be invited for an interview. The minimum master’s level standards are:

   a. GPA
       Standardized Test
       (last 60 credits)
       
       3.0 to 4.0         40\textsuperscript{th} Percentile on at least one area of the GRE or 40\textsuperscript{th} Percentile on the MAT
       2.5 to 2.999       Combined Verbal and Quantitative (V + Q) score of 300 on GRE or 45\textsuperscript{th} Percentile on the MAT
       Below 2.499        No Admission

   The method for calculating an admission GPA is based on the last 60± semester undergraduate credits
   (90 ± quarter credits).

3. Prospective students are expected to come to campus (Pocatello or Meridian) for an interview. Selected applicants will be interviewed by the Department of Counseling Admissions Committee as part of the admissions procedure. Ultimately, one’s GPA and test scores qualify one to take part in the interview process.

4. Submit three (3) letters of recommendation from individuals who have knowledge of the applicant’s academic capabilities, work performance, professional potential, and character.

5. Submit Graduate School forms and application fee.

6. Submit departmental application forms and application fee.

7. Read and sign the Department of Counseling Conditions for Admission/Retention/Dismissal form.

Only applicants who have submitted all application materials on or before the application deadline will have their material reviewed by the Admissions Committee to determine status as a competitive, qualified applicant (incomplete, late, or inaccurate files/forms will not be reviewed). Due to the competition for limited seats in the Master of Counseling program, satisfactory completion of the entry level requirements does not guarantee acceptance.

Selected applicants will be interviewed by the Department of Counseling Admissions Committee as part of the admissions procedure. The Admissions Committee will make the final decision regarding admission. This decision will be based on grade point and test score rankings as well as the Committee’s impression of the applicant’s interpersonal style and compatibility of personality with the program’s training philosophy.

Selection Schedule

After August 15, application forms are available for download at http://www.isu.edu/hpcounsel.

ISU-Pocatello

Application review begins January 15, and continues until all seats are filled. Interviews are tentatively scheduled for early February. Notification of admission decisions will be announced approximately mid-February. A maximum of 20-25 students are admitted to the Master of Counseling program each year at ISU-Pocatello. Classes begin the fall semester of each year.

ISU-Meridian

Application review begins January 15 and continues until all seats are filled. Interviews are tentatively scheduled for mid-February. Notification of admission decisions will be announced approximately April 1. A maximum of 10-12 students are admitted to the Master of Counseling program each year at ISU-Meridian. Classes begin the fall semester of each year.

If the January 15 deadline has passed, please contact the Department of Counseling. A secondary admission process may be conducted.

Classified w/Performance Requirements Status

Students who meet the undergraduate grade point average of 3.0 or higher for all upper division undergraduate classes but have not received their scores for the GRE or MAT or are registered to take one of these examinations at the next possible testing may be admitted Classified (w/PR) status, and may be considered for openings not filled by Classified applicants in the Department of Counseling program.

Students must request a change of status from Classified (w/PR) status to Classified status upon completion of their first semester of graduate study. The change from Classified (w/PR) to Classified status must be approved by the Department of Counseling and the Dean of the Graduate School.

Unclassified Status

Our Department’s Professional Development Workshops do, periodically, offer workshops lengthy enough to count as 1 or 2 class credits.

Approval of Master’s Degree

Final Program of Study

A student who has been admitted to the Master of Counseling (M.COUN.) Program may submit a final program of study following the completion of COUN 6621 Professional Orientation and Ethics, COUN 6627 Conceptualizing Counseling Theory, COUN 6696 Practicum Counseling Techniques and during the semester in which COUN 6697 Practicum in Counseling is being completed. The final program of study must include all course work required to complete the selected M.COUN. major and must be approved by two counseling faculty members who have graduate faculty status (one of whom will serve as committee chair). Prior to the semester of the proposed graduation, the final program of study must receive the approval of a majority of the Counseling graduate faculty.

General Requirements

For the Master of Counseling (M.COUN.) degree the student is required to complete the equivalent of at least four full semesters of resident graduate study beyond the bachelor’s degree. For the Clinical Mental Health Counseling, Marriage, Couple, & Family Counseling, School Counseling, and Student Affairs Counseling majors, a minimum of 60 semester hours must be completed in the Core and Major Course Requirements.

### Courses

**COUN 5550 Peer Counseling Seminar: 1-2 semester hours.**
Supervised experience in assisting another student. Students meet out of class on a weekly contact basis. Course provides ongoing training for the peer counselors. May be repeated up to 6 credits. PREREQ: Permission of instructor.

**COUN 5584 Guidance Principles and Practices: 3 semester hours.**
Survey of the various guidance practices in secondary education. Each service is discussed from the point of view of its role in the total educational program.

**COUN 5585 Independent Problems: 1-2 semester hours.**
Individual work under staff guidance. Field and/or library research on specific educational problems of interest to majors in education. Experience in research composition. May be repeated. PREREQ: Permission of instructor.

**COUN 5590 Introduction to Counseling Services: 1 semester hour.**
Introduction to the counseling profession, including an overview of the curriculum, experience and skills needed to be a successful licensed counselor. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**COUN 5591 Seminar: 1-3 semester hours.**
Critical analysis of the literature in one or more areas. Limited enrollment. May be graded S/U or on a letter-grade basis in separate sections. May be repeated up to 8 credits. PREREQ: Permission of instructor.

**COUN 5594 Elementary School Guidance: 2 semester hours.**
Study of (1) the function of guidance in relation to children's needs; (2) principles and techniques of elementary school guidance; (3) analysis of representative programs of guidance in the elementary schools; and (4) research related to elementary school guidance and resulting trends.

**COUN 5597 Prof Ed Development Topics: 1-3 semester hours.**
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. Must be graded S/U.

**COUN 5598P Prof Development Workshop: 3 semester hours.**
New methods and opportunities to enhance and supplement skills. Subject to the approval of the Dean of the student's college, a maximum of eight credits earned in workshops may be applied toward a degree; students taking the courses only for personal development may choose the 0-credit option; those seeking professional development must choose a for-credit option.

**COUN 5599 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**COUN 6606 Family Violence: 2 semester hours.**
Delineates the implications for assessment and treatment of the family with violence. Topics of physical abuse, sexual abuse and psychological/emotional abuse of adults and children within a family structure will be addressed. PREREQ: Admission to the Master of Counseling Program or permission of instructor.
COUN 6607 The Family and Mental Illness: 2 semester hours.
Addresses therapeutic and community support that enhances the family unit as the primary care system. Mental illness as it relates to the family system is presented. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6608 The Family and Chemical Dependency: 2 semester hours.
Addresses family systems under the influence of addictions with primary emphasis on alcohol dependency. Models and patterns of addictions will be examined. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6609 The Family and the Aged: 2 semester hours.
Emphasizes the impact of aging on family systems from an economic, emotional, social, spiritual, and physiological perspective. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6611 Applied Statistics and Research: 3 semester hours.
Basic understanding of applied statistics. Procedures for designing, interpreting, critiquing, and presenting professional research. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6612 Psychological Testing for Counselors: 2 semester hours.
An overview of the standardized tests most commonly used by counselors. In addition to learning the underlying concepts of standardized testing, students will also be taught how to select and use tests appropriate to their proposed work settings. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6613 Basic Projective Techniques: 2 semester hours.
Projective theory and its relationship to psychoanalysis, dynamic theory, and learning theory. Techniques including problems of clinical practicality, prediction of behavior, and personality assessment. Practical experiences available in laboratory courses. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6619 Individual Intelligence Testing: 3 semester hours.
Supervised practice in administering, scoring, and interpreting the results of individual intelligence tests. Each section limited to 6 students. PREREQ: Admission to Master of Counseling Program, COUN 6612 or permission of instructor.

COUN 6621 Professional Orientation and Ethics: 2 semester hours.
Introduction to profession of counseling: history, accreditation, licensure, organizational structure, advocacy, and use of technology. Ethical problems in counseling with specific attention given to the American Counseling Association Code of Ethics. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6623 Lifestyle and Career Development: 2 semester hours.
Career development theories and decision-making models for counselors including career resources and materials. PREREQ: Admission to the Master of Counseling Program.

COUN 6624 Cultural Counseling: 2 semester hours.
Students will explore issues of diversity, social justice, and multiculturalism including race/ethnicity, gender, sexual orientation and other cultural factors relevant to multiculturally competent counseling. PREREQ: Admission to the Master of Counseling Program. COREQ: COUN 6621 and COUN 6696 or permission of instructor.

COUN 6625 Crisis Interventions and Trauma Counseling: 2 semester hours.
Current information, skills, and strategies for counseling interventions specific to crises, disasters, and other trauma-causing events. Topics include: triage, assessment and diagnosis, individual and community resiliency, emergency preparedness, multicultural considerations, interagency cooperation, and "psychological first aid." PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6627 Conceptualizing Counseling Theory: 2 semester hours.
The conceptual study of selected counseling theories related to historical development, personality development, client maturation, and learning theory. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6628 Applications of Counseling Theory: 2 semester hours.
The applied study of selected counseling theories with emphasis on the evolution of maladjustment, process of change, and appropriate interventions for generating change. PREREQ: Admission to the Master of Counseling Program.

COUN 6630 Addictions Counseling: 2 semester hours.
Acquaint students with current theories of addiction, recovery, and relapse prevention as well as effective strategies and techniques in working with clients with addictions. The course will explore public policies on local, state, and national levels with regard to addiction services. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6638 Foundations of School Counseling: 3 semester hours.
An introduction to the school counseling profession, developmental program models and the roles of the professional school counselor. Special focus will be placed on current literature, cultural considerations, philosophical assumptions, key concepts, techniques, practical applications, recent legislation, and consultation. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6639 Application of School Counseling Foundations: 3 semester hours.
This school counseling class prepares students to identify and work with specific populations of youth-at-risk and their communities. Special focus will be placed on current literature, cultural considerations, philosophical assumptions, key concepts, techniques, and practical applications for the K-12 school counselor. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6650 Thesis: 1-9 semester hours.
Thesis Credit. 1-9 credits. May be repeated. Graded S/U. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6651 Masters Paper: 3 semester hours.
A paper involving extensive familiarity with research findings written under the supervision of a faculty member in the department. May be repeated. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6652 Specialist Paper: 3 semester hours.
A paper involving extensive familiarity with research findings under the supervision of a faculty member of the department. May be repeated. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6655 Independent Problems: 1-3 semester hours.
Individual work under staff guidance. Field and/or library research on specific educational problems. Experience in research composition. May be repeated up to 6 credits. PREREQ: Admission to the Master of Counseling Program or the Ph.D. in Counselor Education and Counseling Program or the Ed.D. in Counseling Program or permission of instructor.

COUN 6659 Seminar: 1-3 semester hours.
Critical analysis of the literature in one or more areas of education. Enrollment limited. May be repeated up to 8 credits. PREREQ: Permission of instructor.

COUN 6660 Theories of Family and Couple Counseling: 3 semester hours.
The study of the development of the family counseling field and the issues and theories related to its practice. PREREQ: Admission to the Master of Counseling Program or permission of instructor.
COUN 6661 Issues in Family Counseling: 3 semester hours.
Examination of contemporary family issues and challenges, parenting issues, and the effects these challenges place on family dynamics and family counseling. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6664 Family Assessment: 2 semester hours.
Introduction to family assessment models and instruments as well as evaluation of programs/ agencies providing family counseling. PREREQ: Admission to the Master of Counseling Program.

COUN 6685 Advanced Family Systems Theory: 2 semester hours.
Advanced theoretical study with emphasis on researched applications of family counseling. PREREQ: Admission to the Master of Counseling Program.

COUN 6689 Family and Couple Counseling Practicum: 3 semester hours.
Practicum experience counseling families and couples. Graded S/U. PREREQ: Admission to the Master of Counseling Program, COUN 6660, COUN 6697, or permission of instructor.

COUN 6676 Small Group Activity: 1 semester hour.
Designed to give direct experiences as a group participant and provide preparation for COUN 6677. Graded S/U. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6677 Group Counseling Techniques: 3 semester hours.
Essential research, selected group development and therapy theories, leadership orientations and strategies, structural group dynamics, and applications. Skills development in a laboratory setting. PREREQ: Admission to the Master of Counseling Program.

COUN 6680 Foundations of Student Affairs: 3 semester hours.
History, philosophy, purpose, and function of student affairs practice including review of “The Student Personnel Point of View,” theories of student development, and current trends. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6683 Administration of Student Affairs Practice: 3 semester hours.
Leadership and management theories and practice in higher education and student services. Essential research, consultation, good practices, and assessment techniques for all student populations and services. PREREQ: Admission to the Master of Counseling Program.

COUN 6687 Field Work in Personnel Services: 1-2 semester hours.
Observation and learning the duties performed by the persons in the field work setting. A combination of fifty hours of experience and supervision equals one hour of academic credit. May be repeated. Graded S/U. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6689 Internship in Student Personnel: 3-12 semester hours.
A combination of fifty hours of experience and supervision equals one hour of academic credit. May be repeated. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6690 Foundations of Clinical Mental Health Counseling: 2 semester hours.
Orientation to the professional foundation of clinical mental health counseling for individuals, couples, and families across the lifespan. Topics include history and philosophy, ethics, professional roles and functions, professionalism, community systems and mental health, identity, and diversity within clinical mental health counseling. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6691 Professional Issues in Clinical Mental Health Counseling: 2 semester hours.
This course will provide current information and strategies for counseling issues specific to clinical mental health counseling. Topics include advocacy, public policy, administration and finance, and practice privileges. PREREQ: Admission to the Master of Counseling Program.

COUN 6692 Continuum of Care in Clinical Mental Health Counseling: 2 semester hours.
The course will address philosophical and contextual elements of clinical mental health counseling. Topics include the wellness model, prevention, diagnosis in context, treatment modalities, delivery systems, and best practices for clinical mental health counselors. PREREQ: Admission to the Master of Counseling Program or permission of instructor.

COUN 6693 Supervision of Counselors: 1 semester hour.
The study of current practices used in the clinical supervision of counselors. Current literature will be reviewed as well as standards for supervision which have been established by accrediting bodies and professional associations. PREREQ: Admission to the Master of Counseling Program or the ED.S. in Counseling Program or permission of the instructor.

COUN 6694 Psychodiagnosis and Psychotropic Drugs: 3 semester hours.
Psychological classification systems, mental status evaluations, and the use of psychotropic drugs in treatment programs. PREREQ: Admission to the Master of Counseling Program.

COUN 6696 Practicum Counseling Techniques: 3 semester hours.
The study and practice of counseling techniques including micro-counseling and role-playing. PREREQ: Admission to the Master of Counseling Program.

COUN 6697 Practicum in Counseling: 2 semester hours.
Supervised counseling experience. A combination of fifty hours of experience and supervision equals one hour of academic credit. Each section limited to 5 students. May be repeated to four credits. PREREQ: Admission to the Master of Counseling Program. COREQ: COUN 6687L.

COUN 6697L Practicum in Counseling Lab: 0 semester hours.
Group supervision of students working in the field during their internship experience. Supervision is provided on a weekly basis and thus the units of instruction are devised as tutorial experience based on the student's developmental needs. Graded S/U. PREREQ: Admission to the Master of Counseling Program. COREQ: COUN 6697.

COUN 6698 Internship in Counseling: 1-18 semester hours.
A combination of fifty hours of experience and supervision equals one hour of academic credit. May be repeated for a maximum of 18 credits. PREREQ: Admission to the Master of Counseling Program.

COUN 6698L Internship in Counseling Lab: 0 semester hours.
Group supervision of students working in the field during their internship experience. Supervision is provided on a weekly basis and thus the units of instruction are devised as a tutorial experience based on the student's developmental needs. Graded S/U. PREREQ and COREQ: Admission to the Master of Counseling Program, COUN 6698.

COUN 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated. PREREQ: Admission to the Master of Counseling Program, the ED.S. in Counseling Program, or the Ph.D. in Counselor Education and Counseling Program or permission of instructor.

COUN 7701 Advanced Statistics: 2 semester hours.
Statistical application appropriate for doctoral research and writing. PREREQ: Admission to Ph.D. in Counselor Education and Counseling Program.
COUN 7702 Advanced Research and Experimental Design: 2 semester hours.
Quantitative methods of conducting research in doctoral study. PREREQ: Admission to Ph.D. in Counselor Education and Counseling Program.

COUN 7703 Qualitative Research: 2 semester hours.
Explores and contrasts philosophical assumptions of qualitative and quantitative research. Various methodologies and approaches to qualitative research are reviewed and applications discussed. PREREQ: Admission to Ph.D. in Counselor Education and Counseling Program.

COUN 7704 Qualitative Methodology and Analysis: 2 semester hours.
Design, data collection, analysis and writing qualitative research. Practice using data collection procedures, traditional analytic methods and qualitative data processing programs for coding and matrix construction. Emphasizes grounded theory approach. PREREQ: Admission to Ph.D. in Counselor Education and Counseling Program.

COUN 7705 Instructional Theory for Counselor Educators: 4 semester hours.
Instructional theory and methods relevant to counselor education including models and methods of appraisal. PREREQ: Admission to Ph.D. in Counselor Education and Counseling Program.

COUN 7710 Practicum in College Teaching: 2 semester hours.
Observation of and assisting in the teaching and evaluation of a college course under the supervision of the course instructor. The student will prepare and deliver at least five lectures which will be observed by the instructor and will, in addition to observing the balance of the course, meet individually with the instructor for periodic discussions of procedure and methodology. PREREQ: Admission to Ph.D. in Counselor Education and Counseling Program.

COUN 7712 Advanced Psychological Testing and Assessment: 2 semester hours.
Advanced psychological testing concepts, test administration, test construction and interpretation. Advanced information of standardized tests commonly used in the counselor education field.

COUN 7723 Advanced Vocational Theory: 3 semester hours.
Theory of vocational development, sociological aspects of vocational choice and entry, development of interests and aspiration levels, and research relating to entry into work, satisfaction in work, dissatisfaction in topics. Course is structured around the major theories of vocational development as they relate to individual development. Various approaches to vocational testing are included.

COUN 7724 Advanced Diversity Issues: 3 semester hours.
Pedagogy relevant to current social and cultural issues. Role of diversity issues in counselor education, supervision, and counseling.

COUN 7727 Advanced Theories of Counseling: 3 semester hours.
Analysis of various counseling theories and their relationships to specific philosophies concerning humanity.

COUN 7758 Independent Problems: 1-4 semester hours.
Individual work under staff guidance. Field and/or library research on specific educational problems. Experience in research composition. May be repeated up to 8 credits. PREREQ: Admission to Ph.D. in Counselor Education and Counseling Program.

COUN 7759 Ed.S Internship: 1-9 semester hours.
Placement in a post-master's degree counseling setting. A combination of fifty hours of experience and supervision equals one hour of academic credit. May be repeated. 1-9 credits. PREREQ: Admission as an Ed.S. student and permission of instructor.

COUN 7774 Advanced Group Procedures: 3 semester hours.
Pedagogy relevant to current social and cultural issues. Role of diversity issues in counselor education, supervision, and counseling. PREREQ: Admission to Ph.D. in Counselor Education and Counseling Program.

COUN 7775 Advanced Practicum in Group Counseling: 2 semester hours.
Fifty hours of group counseling as the group facilitator, plus a coordinating seminar. Includes the theoretical basis for group leaders and development of group leadership skills.

COUN 7790 Supervision in Counselor Education: 3 semester hours.
Analysis of systems for conducting supervision of counseling students including various models of supervision and their implementation in Practicum and Internship. PREREQ: Admission to Ph.D. in Counselor Education and Counseling Program.

COUN 8800 Research and Professional Issues: 2 semester hours.
Critical analysis of the literature in counselor education including topics such as program models, current research, and professional associations. May be repeated up to 3 credits. PREREQ: Admission to Ph.D. in Counselor Education and Counseling Program.

COUN 8801 Doctoral Career Development: 1 semester hour.
Implementation of Career Theory into Professional Development plans for advancement in Counselor Education. PREREQ: Admission to the Ph.D. Program in Counselor Education and Counseling Program.

COUN 8802 Scholarship in Counselor Education: 1 semester hour.
Developing a scholarly identity and research agenda within counselor education and supervision. Course will focus on creating and submitting publishable manuscripts; developing grant writing skills; navigating the academic public process; and, enhancing writing quality and productivity. PREREQ: Admission to Ph.D. in Counselor Education and Counseling Program.

COUN 8848 Doctoral Counseling Practicum: 2 semester hours.
Counseling under supervision and an intensive examination of the students' own counseling philosophy and its relationship to client behavioral and attitudinal change. A combination of fifty hours of experience and supervision equals one hour of academic credit. Each section limited to six students.

COUN 8848L Doctoral Counseling Practicum Lab: 0 semester hours.
Group supervision of student working in the field during their doctoral practicum experience. Supervision is provided on a weekly basis and thus the units of instruction are devised as a tutorial experience based on the student's developmental needs. Graded S/U. PREREQ: Admission to Ph.D. in Counselor Education and Counseling Program.

COUN 8849 Doctoral Internship: 1-18 semester hours.
Placement in a doctoral level counseling or counselor education setting. A combination of fifty hours of experience and supervision equals one hour of academic credit. 1-18 credits. May be repeated. PREREQ: Admission to Ph.D. in Counselor Education and Counseling Program.

COUN 8849L Doctoral Internship Lab: 0 semester hours.
Group supervision of student working in the field during their doctoral internship experience. Supervision is provided on a weekly basis and thus the units of instruction are devised as tutorial experience based on the student's developmental needs. Graded S/U. PREREQ: Admission to Ph.D. in Counselor Education and Counseling Program.

COUN 8850 Dissertation: 1-12 semester hours.
Dietetics

Dietetic Programs

Director: McKnight

Assistant Professors: Blanton, Weeden

Clinical Faculty: McKnight, Schneider

Adjunct Faculty: Hilvers, Vance

Professor Emeritus: Dundas

The two Dietetic Programs at Idaho State University are undergraduate and post-baccalaureate. Though no graduate degree is offered in Nutrition nor Dietetics, there are several courses available to take for graduate credit once the prerequisites have been met. Dietetics has two graduate faculty who are available to work on theses with a nutrition focus.

Courses

**NTD 5509 Professional Readings: 1-3 semester hours.**
Identification and investigation of conceptual ideas about the relationship of programs, trends, legislation, and developments in food and nutrition. 1-3 credits. May be repeated. PREREQ: Permission of instructor.

**NTD 5539 Sports Nutrition: 3 semester hours.**
Nutrition recommendations for competitive and recreational athletic performance. Rationale for nutrition practices through an examination of individual nutrient metabolism. Controversies and misinformation addressed. Equivalent to CFS 5539. SUGGESTED PREREQ: NTD 2239 or equivalent or permission of instructor.

**NTD 5557 Experimental Foods: 3 semester hours.**
Development of experimental methods and their application to cookery and food technology; preparation of student for independent investigation in foods; acquaintance with literature in the field. Two hours lecture/four hours laboratory. SUGGESTED PREREQ: NTD 1104 or equivalent or permission of instructor.

**NTD 5561 Nutritional Biochemistry I: 3 semester hours.**
Advanced study of nutrition science, including protein, carbohydrate, lipid, vitamin, and mineral metabolism. Introduction to research methodology and professional literature. Equivalent to CFS 5561. SUGGESTED PREREQS: NTD 2239, CHEM 1101, CHEM 1102 and CHEM 1103 or higher levels of chemistry including inorganic, organic, and biochemistry or permission of instructor.

**NTD 5581 Special Problems in Nutrition and Dietetics: 1-2 semester hours.**
Students select problems on the basis of special needs, interests or abilities, and work on them independently in the laboratory, library, or community with regular conferences with the advisor. PREREQ: Permission of instructor.

**NTD 5592 Special Problems in Nutrition and Dietetics II: 1-2 semester hours.**
Students select problems on the basis of special needs, interests or abilities, and work on them independently in the laboratory, library, or community with regular conferences with the advisor. May be repeated. PREREQ: Permission of instructor.

**NTD 5595 Dental Nutrition: 1 semester hour.**
This course reviews the role of nutrition in attaining and maintaining optimal oral health. The course explores how the essential nutrients influence oral health, nutrition in special populations, and nutrition and disease processes that can influence oral health. This course is only available to students in the Idaho Dental Education Program in the Department of Dental Science.

**NTD 5599 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**NTD 6620 Nutritional Epidemiology: 2 semester hours.**
Specialized study of epidemiology including nutritional assessment methods, interrelationships between disease, diet, and health status, and implications for public health policy.

**NTD 6622 Maternal Infant and Child Nutrition: 2 semester hours.**
Advanced study of nutrition in human growth and development during pregnancy, lactation, infancy, childhood, adolescence. Therapeutic nutritional management of diseases specific to pregnancy, infancy, and childhood are addressed.

**NTD 6624 Nutrition and Aging: 2 semester hours.**
Exploration of the physiological, psychosocial, and chronic degenerative conditions associated with aging and the nutritional implications of each. Epidemiological basis for setting dietary goals and program development to support the nutritional needs of the elderly is addressed.

**NTD 6699 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.
Health Education and Promotion

Health Education Program

Department Chair and Assistant Professor: Fore

Assistant Professors: Olsen

Clinical Assistant Professor: Salazar

Instructor: Caudle

Emeriti: Kearns, McAleese, Morris, Rankin

Master of Health Education (MHE)

The master's degree program in Health Education is designed to prepare students to teach strategies in health promotion/disease prevention. Coursework emphasizes the acquisition of skills to assess, plan, implement, and evaluate health education programs in the school, community, or worksite setting.

Admission Requirements

To be accepted as a applicant for the Master of Health Education degree, the student must apply to, and meet all criteria for, admission to the Graduate School. In addition, the Health Education Program may require:

1. the applicant to have necessary background in the related natural sciences, and
2. that the applicant have the necessary background in tests and measurements and basic statistical procedures. Both thesis and non-thesis options are available.

Entrance Procedure

The Program Director will review MHE applications. Admission standards and application procedures are presented in the Graduate Catalog. The Program Director will admit prospective students who satisfy the MHE Program and Graduate School admission requirements. Applicants who do not completely satisfy requirements are referred to the Admissions Committee to determine recommended admission or denial.

For classified admission into the program, applicants must satisfy the following criteria:

1. The student must apply to, and meet all criteria for, admission to the Graduate School.
2. Submit all previous college transcripts and have a cumulative undergraduate grade point average of at least 3.0 in upper division courses. An applicant who currently holds a graduate degree must submit transcripts, but the undergraduate GPA requirement will not be part of departmental consideration.
3. Submit two letters of recommendation from individuals (non-relatives) who are familiar with their abilities. The letters should be sent to the Health Education Program via email (please make sure emails come directly from letter writers), United States Postal Service, or walked in.
4. Applicants must submit a typed essay (one to two pages, single spaced) describing their interest in pursuing the MHE degree and their vision of how it will facilitate their career goals. Essays may be submitted via email, United States Postal Service, or walked in.
5. Applicants currently holding degrees at the doctoral level from an accredited institution will not be required to submit GRE general test scores, except for applicants who have a professional doctoral degree (e.g., PharmD and Juris Doctorate). Those holding degrees at the baccalaureate and master's level MUST submit GRE general test results to the Graduate School. For classified admission, students must score an average of at least the 40th percentile when considering both quantitative and verbal sections of the GRE general test, but no lower than the 20th percentile in either section. No other instruments, such as MCAT, LSAT, or GMAT, may be substituted.

OR

- HE 6651 Masters Project in Health Education | 6 |

Approved Electives | 6 |

Total Hours | 30 |

Courses

**HE 5501 Issues in Health and Wellness: 1-3 semester hours.**
Contemporary health and wellness issues emphasizing education interventions and application. Topics may include: death and dying, computer technology in health, healthy aging, motivation, emergency preparedness, alternative and complementary medicine, international health. May be repeated to 6 credits with different content.

**HE 5525 Patient Education Skills: 2 semester hours.**
Explores the foundations and application of organizational and communication skills which promote a positive atmosphere for patient education in clinical and worksite settings.

**HE 5542 Environmental Health and Health Education: 3 semester hours.**
Study of a variety of issues related to protecting and preserving the environment with an emphasis on school and community educational programs. PREREQ: Admission to Health and Nutrition Sciences Program or permission of instructor.

**HE 5543 Substance Abuse and Health Education: 3 semester hours.**
Study of the physical, psychological, sociological, and environmental factors related to drug use with emphasis on school and community prevention programs. PREREQ: Admission to Health and Nutrition Program or permission of instructor.

**HE 5545 Human Sexuality and Health Education: 3 semester hours.**
Study of the multifaceted nature of human sexuality with an emphasis on school and community-level educational programs. PREREQ: Admission to Health and Nutrition Sciences Program or permission of instructor.

**HE 5585 Independent Problems in Health Education: 1-3 semester hours.**
Individual work under staff guidance. Field and/or library research on specific health education problems of interest to majors and minors. 1-3 credits. May be repeated up to 6 credits. PREREQ: Permission of instructor.
HE 5591 Health Education Workshop: 1-3 semester hours.
A critical analysis of one or more areas of health education. Limited enrollment. 1-3 credits. May be repeated up to 6 credits.

HE 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. Must be graded S/U.

HE 5598P Prof Development Workshop: 3 semester hours.
New methods and opportunities to enhance and supplement skills. Subject to the approval of the Dean of the student's college, a maximum of eight credits earned in workshops may be applied toward a degree; students taking the courses only for personal development may choose the 0-credit option; those seeking professional development must choose a for-credit option.

HE 5599 Experimental Course: 1-6 semester hours.
This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

HE 6605 Leadership Policy and Administration: 3 semester hours.
Development of leadership and administrative skills which contribute to the implementation of effective public health policies and programs. Students will learn strategic planning, facilitation techniques, communication strategies, budget development, and management. Equivalent to MPH 6605.

HE 6620 Health Program Planning and Evaluation: 3 semester hours.
Theory and processes of assessment, planning, implementing, and evaluating health education, promotion, and disease prevention programs. Principles taught in this course will be applied to community situations. Equivalent to MPH 6620.

HE 6623 Curriculum and Supervision: 3 semester hours.
Consideration of the health education curriculum in public schools and in colleges and universities. Recent developments and current trends that influence the curriculum and supervision policies. Observation techniques, standards in judging instruction, the supervisory conference, cooperative supervision, basic foundation of curriculum construction, and lesson planning.

HE 6639 Teaching Strategies in Health: 3 semester hours.
An advanced study of strategies and innovative methods of teaching health education. Emphasis on application to a variety of educational levels.

HE 6640 Research and Writing in Health: 3 semester hours.
Application of principles of research design in the health sciences. Requires preparation of a thesis/project proposal. Equivalent to MPH 6640.

HE 6648 Problems in Health Education: 1-3 semester hours.
Individual and group study of problems in the area of health. 1-3 credits. May be repeated to 6 credit hours. Graded S/U. PREREQ: Approval of advisor and/or chairperson.

HE 6650 Thesis: 1-6 semester hours.
Thesis. May be repeated. Graded S/U.

HE 6651 Masters Project in Health Education: 1-6 semester hours.
Master's Project in Health Education. May be repeated. Graded S/U.

HE 6655 Internship: 1-3 semester hours.
Administration, supervision and operation of a community health program. Students work under the direction of a graduate faculty member and practicing administrator. May be repeated up to 3 credits. PREREQ: Approval of advisor and/or chairperson.

HE 6660 Behavior Change Theory and Applications: 3 semester hours.
Provides a basic understanding of the social, emotional, and lifestyle factors related to health behavior. Strategies designed to identify barriers to behavior and to enhance the health of selected populations are examined. Equivalent to MPH 6660.

HE 6699 Experimental Course: 1-6 semester hours.
This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.
Public Health

Program Director and Assistant Professor: Fore
Assistant Professors: Lindsay, Niu

Master of Public Health (MPH)

Public health has as a basic goal to improve the health of populations through planning, implementing, and evaluating health promotion and disease prevention programs. Public health professionals design these intervention programs by using a combination of health education and related organizational, economic, legislative, and environmental supports to enhance the probability of creating a healthier populace.

The Master of Public Health Program curriculum prepares individuals to carry out the following core public health functions as defined by the American Public Health Association: assess both the health needs and the resources available in a community, assist in health policy development that supports programs in prevention, and assure that necessary, high quality, effective services including education are available to every citizen.

To meet this challenge, the MPH degree at Idaho State University is designed to meet the needs of two types of students:

1. Those practicing health professionals who desire to augment their previous preparation so they may better implement health promotion strategies in their current work setting or community, and
2. Those professionals who wish to train for careers in public health.

Core courses focus on the acquisition of requisite public health knowledge and skills in the disciplines of epidemiology, bio statistics, health policy management, social and behavioral sciences and environmental health. Elective courses allow the student to focus additional coursework in her/his chosen area of interest.

Admission Requirements

For classified admission into the program, applicants must satisfy the following criteria:

1. The student must apply to, and meet all criteria for, admission to the Graduate School.
2. Have a cumulative undergraduate grade point of at least 3.0 in upper division (3000-4000 level) courses. Applicants who currently hold a graduate degree must submit their transcripts. All official college transcripts must be submitted to the ISU Graduate School.
3. Score an average of at least 40th percentile when considering both quantitative and verbal sections of the GRE general test but no lower than the 20th percentile in either section. No other instruments such as MCAT, LSAT, or GMAT may be substituted.
4. Applicants currently holding degrees at the doctoral level from an accredited institution will not be required to submit GRE general test scores (this includes professional doctoral degrees such as PharmD, Juris Doctorate, Medical Doctor, Doctor of Osteopathy, Doctor of Veterinary Medicine). Students who are admitted as Classified w/PR status without GRE scores must take the general test within their first semester of enrollment. Continuation in the program is contingent on the student meeting GRE score requirements. GRE scores must be submitted to the Idaho State University Graduate School.
5. Have two letters of recommendation from non-relative individuals familiar with applicant’s academic or professional abilities (no personal references) sent to the Public Health program at the same time application is sent to the Graduate School. The letters must be sealed with the signature of the recommender across the envelope flap.
6. Submit a typed essay (one to two pages, single spaced) describing applicant’s interest in pursuing the MPH degree and vision of how it will facilitate the applicant’s career goals.
7. International students who have not graduated from an accredited college or university in the United States, and whose native language is not English, must achieve satisfactory scores on the Test of English as a Foreign Language (TOEFL). Satisfactory TOEFL requirements for classified admission are described in the Idaho State University Graduate Catalog under “Admission of International Students.” In addition, international student applicants who have not graduated from an accredited college or university in the United States must take the GRE and are required to score in the 40th percentile on at least one area of the GRE, but no lower than the 20th percentile on the other section.

General Requirements

Applicants’ transcripts will be evaluated by the Departmental Graduate Admissions Committee at the time of application to determine if deficiencies exist in the undergraduate coursework. Any deficiency that is identified must be made up prior to beginning the MPH program. Committee members will specify to the student courses that must be taken to rectify any deficiency.

Students pursuing the MPH degree must complete a minimum of 48 credits of coursework, including a 6-credit thesis or project and 6 credits of elective course work.

All students must maintain a satisfactory record of scholarship. A 3.0 grade point average (GPA) is required for any graduate degree or certification at Idaho State University. A grade below B is essentially failing at the graduate level. Students who earn a grade below a B in a core course will be required to retake that course. Students who earn grades below a B in two courses will be dismissed from the program.

Course Courses

MPH 5585 Independent Study in Public Health: 1-3 semester hours.
Individual work under staff guidance. Field and/or library research on specific health education problems of interest to majors and minors. May be repeated up to 6 credits. PREREQ: Permission of instructor.

MPH 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

MPH 6601 Applications in Epidemiology: 3 semester hours.
Facilitates an epidemiological approach to problem solving in the health sciences through practical application of field epidemiology concepts and methods. PREREQ: Permission of instructor if student is not in the MPH program.

MPH 6602 Biostatistics: 3 semester hours.
This course will equip students with a conceptual understanding of the calculation and interpretation of inferential statistics in public health research. PREREQ: Permission of instructor if student is not in the MPH program.

MPH 6604 Social and Cultural Perspectives in Public Health: 3 semester hours.
Exploration of multicultural health beliefs, health disparities and needs of our society focusing on local cultures to develop culturally competent interventions. Learn about ethical issues, social justice, community systems, coalition building, and development of community partnerships.

MPH 6605 Leadership Policy and Administration: 3 semester hours.
Development of leadership and administrative skills which contribute to implementation of effective public health policies and programs. Students will learn strategic planning, facilitation techniques, communication strategies, budget development, and management. Equivalent to HE 6605.

MPH 6606 Environmental and Occupational Health: 3 semester hours.
Understanding the interaction of humans with their environment and the implications of human actions. Learn about assessment and control of health risks posed by chemical and biological contaminants and physical exposures (noise, heat, and radiation) in occupational and non-occupational environments.

MPH 6607 US and Global Health Systems: 3 semester hours.
Explore the historical and contemporary multi-layered social, cultural, political, and economic determinants in the US and internationally that shape health status, health behavior, and health inequalities. Practical application of creating appropriate interventions specific to the target population.

MPH 6608 Technological Applications in Public Health: 3 semester hours.
Introduction and application of software programs utilized in public health practice. Examples include SPSS, MS Excel, GIS, EpiInfo, MS Publisher. PREREQ: MPH 6602.

MPH 6609 Seminar in Public and Community Health: 3 semester hours.
Study of topics, trends and challenges within public health.

MPH 6620 Health Program Planning and Evaluation: 3 semester hours.
Theory and processes of assessment, planning, implementing, and evaluating health education, promotion, and disease prevention programs. Principles taught in this course will be applied to community situations. Equivalent to HE 6620 and DENT 6630.

MPH 6632 Community Health: 3 semester hours.
A study of the role of health education/health promotion in the community setting. Emphasis on methods to build coalitions to address community health concerns and on the role of needs assessment.

MPH 6640 Research and Writing in Health: 3 semester hours.
Application of principles of research design in the health sciences. Requires preparation of a thesis/project proposal. Equivalent to HE 6640.

MPH 6650 Thesis: 1-6 semester hours.
Completion of a thesis/manuscript. Practical application of knowledge/skills in a public health setting. May be repeated. Graded S/U. PREREQ: MPH 6601, MPH 6602, MPH 6603, MPH 6620, and MPH 6640.

MPH 6651 Public Health Project: 1-6 semester hours.
Completion of a public health project. Practical application of knowledge/skills in a public health setting. May be repeated. Graded S/U. PREREQ: MPH 6601, MPH 6602, MPH 6603, MPH 6620, and MPH 6640.

MPH 6655 Public Health Internship: 3 semester hours.
Application of skills in a public health agency, organization or other entity to provide the student with practical experience in the field. May be repeated.

MPH 6660 Behavior Change Theory and Applications: 3 semester hours.
Provides a basic understanding of the social, emotional, and lifestyle factors related to health behavior. Strategies designed to identify barriers to behavior and to enhance the health of selected populations are examined. Equivalent to HE 6660. PREREQ: Permission of instructor.

MPH 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.
Medical Laboratory Science

Program Director: Rachel Hulse
Clinical Associate Professors: Susan Galindo
Clinical Professor: Kathleen Spiegel (Emeritus)

Master of Science in Medical Laboratory Science

Medical laboratory scientists are vital healthcare detectives, uncovering and providing key medical information from laboratory analyses that assist physicians in patient diagnosis and treatment, as well as in disease monitoring or prevention.

Laboratory testing encompasses such disciplines as clinical chemistry, hematology, immunology, transfusion medicine, microbiology, and molecular biology.

The Medical Laboratory Science program is located in the Division of Health Sciences, Kasiska School of Health Professions, with campuses in Pocatello, Meridian and Idaho Falls.

The Master of Science in Medical Laboratory Science degree is designed for either the practicing medical laboratory scientist (certified lab professional) or those students who wish to become certified and then go into leadership positions in administration, education or specialize in a certain area of pathology/labatory medicine. Graduates are ideally suited for positions involving teaching, laboratory management, and research. Full-time and part-time options are available, and many courses are available online. A curriculum of course work and research project is designed and personalized for each student, depending on his/her area of interest and experience.

The Master of Science program in Clinical Laboratory Science requires an original research project that culminates in a thesis, a minimum of 32 credits earned in graduate courses (including research and thesis), and expertise in core conceptual areas of Medical Laboratory Science (scientific, administrative, or educational).

Admission Requirements

Applicants must have a minimum 3.0 GPA for upper division credits taken at the undergraduate level. Graduate School Admission GPA is calculated based on the last 60± semester undergraduate credits (90± quarter credits). The student must apply to, and meet all criteria for admission to the Graduate School.

In addition, admission into the M.S. program will require the student to meet one of the two following conditions:

1. Professionals already certified as Medical Laboratory Scientist (BOC) and completion of a B.S. or B.A. degree in a related science from an accredited university or college. Note: Certification as Medical Laboratory Scientist categorical does not wholly satisfy this requirement, OR
2. Professional entry-level M.S. completing certification requirements while pursuing the M.S. degree. Completion of a B.S. or B.A. degree from an accredited institution and completion of the following requirements during the M.S. program of study:
   a. At least 16 semester hours of chemistry to include inorganic chemistry and some combination or organic, biochemistry and analytical chemistry;
   b. At least 16 semester hours of biology, to include at least one semester in microbiology, cell biology, genetics, immunology, anatomy and physiology and human pathophysiology.
   c. Successful completion of the ISU Medical Laboratory Science professional program, accredited by NAACLS (National Accrediting Agency for Clinical Laboratory Science). Successful completion qualifies the applicant to take the national credentialing examinations offered by Board of Certification (BOC) and this should be attempted within one year of finishing the MLS professional block and prior to completion of the MLS research thesis.

Core Curriculum Areas

The three core areas for Medical Laboratory Science that all students could include in their programs of study are:

1. Scientific subject core area including pathology, hematology, transfusion medicine (immunohematology), clinical chemistry, genetics, microbiology or molecular biology.
2. Management core area including information management, statistics, Quality Assurance Programs (i.e. Westgard, 6 Sigma Lean) predictive value theory, personnel, financial, organizational or regulatory concepts.
3. Educational core area including educational design and adult learning for professionals within and outside the medical laboratory setting.

Students are expected to have significant exposure to these core areas by the time they complete their degree requirements. Students coming in with MLS credentials have already demonstrated mastery of the core scientific subject area and those who do not have these credentials will be expected to demonstrate mastery by an examination administered by the program before they finish their M.S. studies.

Students may opt to gain expertise through a variety of mechanisms including independent readings, formal course work, seminars or special projects. For those students who are not already credentialed, the 6 credits of the MLS Practicum are at the undergraduate level. This does not count toward the 32 graduate credit requirements.

Required Core Courses

These courses will satisfy the M.S. in MLS core areas:

Total Hours 27
The remaining credits are to be taken from graduate-level courses (a minimum of 16 at the 6600 level) in one or more of the core areas with the approval of the applicant’s committee and MLS Program Director.

Three graduate-level courses (6 to 9 credits) approved by the graduate student’s committee may be taken from outside the department (to be taken at Boise State University, Idaho State University, or another approved university) and may include adult education, management, and/or medical informatics.

The thesis project may be in a core scientific subject, management or education or a combination thereof.

Courses

**MLS 5512 Urinalysis and Body Fluids: 1 semester hour.**
Fundamental principles of urine and body fluid analysis with correlation of laboratory methods and practice. Graduate students will prepare, conduct, and evaluate case study sessions. PREREQ: Acceptance into the Medical Laboratory Science program. Professional fee.

**MLS 5514 Hematology and Hemostasis: 3 semester hours.**
Theoretical and applied aspects of medical hematology and hemostasis with emphasis on recognition and correlation of abnormal laboratory observations with pathological conditions. Graduate students will prepare, conduct, and evaluate case study sessions. PREREQ: Acceptance into the Medical Laboratory Science program. Professional fee.

**MLS 5516 Medical Microbiology I: 3 semester hours.**
Study and identification of medically important bacteria, viruses, fungi, chlamydiae, rickettsiae, and parasites as applicable to laboratory and infection control settings. Graduate students will prepare, conduct, and evaluate case study sessions. PREREQ: BIOL 2235 or BIOL 2221 or equivalent and acceptance into the Medical Laboratory Science program. Professional fee.

**MLS 5518 Medical Chemistry and Instrumentation: 3 semester hours.**
Theoretical and applied aspects of medical chemistry with emphasis on test development, validation, and use in diagnosis and management of pathological conditions. Graduate students will prepare, conduct, and evaluate case study sessions. PREREQ: Acceptance into the Medical Laboratory Science program. Professional fee.

**MLS 5520 Medical Immunology: 2 semester hours.**
Practical aspects of immunology with emphasis on pathological conditions and laboratory practice. Graduate students will prepare, conduct, and evaluate case study sessions. PREREQ: Acceptance into the Medical Laboratory Science program. Professional fee.

**MLS 5522 Basic Concepts in Transfusion Medicine: 2 semester hours.**
Practical aspects and theoretical considerations of major blood groups with respect to transfusion therapy. Oral and written project presentation required for graduate credit. PREREQ: Acceptance into the Medical Laboratory Science program. Professional fee.

**MLS 5524 Medical Laboratory Fundamentals: 1 semester hour.**
Theory and application of basic techniques and instruments used in all areas of medical laboratories. Graduate students will evaluate laboratory methods and write standard operating procedures. PREREQ: Acceptance into the Medical Laboratory Science program. Professional fee. Lab fee.

**MLS 5531 Medical Microbiology II: 3 semester hours.**
Advanced topics in medical microbiology, including application of laboratory techniques to the identification and evaluation of medically important pathogens, and correlations with disease states. Graduate students will prepare, conduct, and evaluate case study sessions. PREREQ: MLS 5516 and acceptance into the Medical Laboratory Science program. Professional fee.

**MLS 5533 MLS Management and Education: 2 semester hours.**
Advanced principles of current personnel, financial, regulatory issues, laboratory information systems, management, and education. Student presentations will be required. Students taking the course for graduate credit will prepare, conduct, and evaluate a project. PREREQ: Acceptance into the Medical Laboratory Science program. Professional fee.

**MLS 5535 Molecular Diagnostics: 3 semester hours.**
A comprehensive overview of the fundamental principles of medical molecular diagnostics and use of molecular techniques in the diagnosis of disease. Topics include: Nucleic acid structure and function, genetics, DNA chemistry, introduction to nucleic acid isolation, identification and amplification techniques. Graduate students will prepare, conduct, and evaluate case study sessions. PREREQ: Acceptance into the Medical Laboratory Science program. Professional fee.

**MLS 5537 Critical Analysis of Lab Information: 3 semester hours.**
Evaluation of clinical laboratory values with emphasis on advanced methods, specialized statistics, algorithm building, and clinical correlations. Graduate students will prepare, conduct, and evaluate case study sessions. PREREQ: Acceptance into the Medical Laboratory Science program. Professional fee.

**MLS 5539 Advanced Concepts in Transfusion Medicine: 2 semester hours.**
Advanced topics in Immunohematology. Application of laboratory techniques to the identification and evaluation of antibodies and antigens. Emphasis on transfusion therapy. Graduate students will prepare, conduct, and evaluate case study sessions. PREREQ: MLS 5522 and acceptance into the Medical Laboratory Science program. Professional fee.

**MLS 5540 Advanced Topics in Hematology: 1-4 semester hours.**
Advanced principles of current personnel, financial, regulatory issues, laboratory information systems, management, and education. Student presentations will be required. Students taking the course for graduate credit will prepare, conduct, and evaluate a project. PREREQ: Acceptance into the Medical Laboratory Science program. Professional fee.

**MLS 5541 MLS Graduate Research: 1-3 semester hours.**
Individual theory and application of related topics associated with the medical laboratory. PREREQ: Acceptance into the Medical Laboratory Science program. Professional fee.

**MLS 5555 MLS Student Laboratory Practices: 2 semester hours.**
Directed practice in the advanced tests and techniques in common use in the medical laboratory (including molecular biology, microbiology, hematology, chemistry, blood bank). Graduate students will be responsible for higher complexity testing and advanced problem solving exercises. PREREQ: Acceptance into the Medical Laboratory Science program. Professional fee. Lab fee.

**MLS 6640 Advanced Topics in Hematology: 1-4 semester hours.**
Current research and practice in hematology and hemostasis including molecular approaches to medical diagnosis and treatment. May be repeated for a maximum of 4 credits.

**MLS 6641 Advanced Topics in Immunology and Transfusion Medicine: 1-4 semester hours.**
Current research and practice in immunology and transfusion medicine including molecular approach to diagnosis and treatment. May be repeated for a maximum of 4 credits.

**MLS 6642 Advanced Topics in Medical Chemistry: 1-4 semester hours.**
Current research and practice in medical chemistry including innovative instrumentation and molecular diagnostics. May be repeated for a maximum of 4 credits.

**MLS 6643 Advanced Topics in Medical Laboratory Education: 1-4 semester hours.**
Curriculum design and evaluation in the Medical Laboratory setting. May be repeated for a maximum of 4 credits.

**MLS 6644 Advanced Topics in Medical Microbiology: 1-4 semester hours.**
Current research in microbiology and molecular diagnostics including the molecular basis of important infectious diseases, microbial pathogenesis, and host-pathogen interactions. May be repeated for a maximum of 4 credits.
MLS 6648 MLS Graduate Problems: 1-9 semester hours.
Thesis-related research. May be repeated. Graded S/U. PREREQ: Graduate standing and permission of instructor.

MLS 6650 Thesis: 1-9 semester hours.
Thesis-related research. May be repeated. Graded S/U. PREREQ: Graduate standing and permission of instructor.

MLS 6651 Graduate Journal: 2 semester hours.
An online elective graduate course for students admitted into the Medical Laboratory Science program. The student, with assistance from the library, may also learn how to use library resources in this class.

MLS 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

Dental Science

Chair, IAGD Director, and Associate Professor: Crawford

IDEP Director and Assistant Professor: Ybarguen

IDEP Faculty: Polarski

Certificate in Idaho Dental Education Program (IDEP)

The Department of Dental Science administers the Idaho Dental Education Program (IDEP) for predoctoral dental students, and the Idaho Advanced General Dentistry Residency (IAGD) as a postdoctoral program.

The Idaho Dental Education Program is designed to provide residents of Idaho with access to a high quality dental education as if Idaho had its own dental school. The IDEP program is fully accredited as a Satellite Program of Creighton University School of Dentistry by the American Dental Association. The program involves a first year curriculum at Idaho State University in Pocatello, followed by completion of the second through fourth years at Creighton University in Omaha, Nebraska. Students completing the four year program receive the Doctor of Dental Surgery (D.D.S.) degree and are eligible to take the licensure examinations necessary to become a practicing dentist. Students may also elect to pursue advanced training through residencies or specialty programs, eventually becoming board certified in one of the recognized dental specialties.

There are eight positions available for Idaho residents. Applicants to the program must have completed the necessary prerequisites in English, Biology, Inorganic Chemistry, Organic Chemistry, Physics and other requirements as outlined in the Department of Dental Science Bulletin. In addition to fulfilling the minimal prerequisites, most students accepted into the program will have a bachelor’s degree at the time of entry into IDEP. Occasionally, some exceptional students who have completed the junior level (upper division) of college course work are admitted into the program.

Students are encouraged to work closely with their pre-dental academic advisor in making course selections which fulfill dental school and degree completion requirements.

Formal application for admission to the IDEP program follows the guidelines printed in the Department of Dental Science Bulletin and the Creighton University School of Dentistry Bulletin. The application process involves taking the Dental Aptitude Test (DAT), completion of the American Dental Education Association Application Service centralized application, the Creighton Supplemental Application and the IDEP Residency Certification Form. Although the application process can be completed as late as January 1 of the year the student plans to enter the program, earlier application is strongly encouraged to allow adequate time for completion of admission requirements and consideration by the admission committee.

Further information concerning the program, admission requirements, Bulletins and Residency Certification forms can be obtained by contacting the program at the following address:

Idaho Advanced General Dentistry Residency Program (IAGD)

The Department of Dental Sciences sponsors the Idaho Advanced General Dentistry Residency. The goal of the program includes increasing the knowledge and clinical skills of the general dentist beyond that achieved in the predoctoral education. Through an integrated multidisciplinary learning environment, residents are able to increase their competence in the application of modern standards of care and practice management.

This one-year residency focuses on providing comprehensive care in a variety of clinical settings, emphasizing rural, under-served, and at-risk populations. Residents also receive training with patients who have emergency or episodic needs. A certificate is awarded upon the successful completion of the program.

The IAGD is fully accredited by the American Dental Association Commission on Dental Accreditation until 2022.

Further information concerning this program, e.g., admission requirements, forms, etc., can be obtained by contacting the Program Director.

#### IAGD 5599 Experimental Course: 1-6 semester hours.
- This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

#### IAGD 6610 General Dentistry Practicum I: 12 semester hours.
- Supervised provision of general dental services with emphasis on increasing skills in routine general dental procedures and introduction to selected specialty procedures. Course may include periodic lectures on selected topics. PREREQ: Acceptance into IAGD program.

#### IAGD 6620 General Dentistry Practicum II: 12 semester hours.
- Continued provision of general dental services with emphasis on increasing skills in advanced general dental procedures and completion of selected specialty procedures. Course may include periodic lectures on selected topics. PREREQ: Acceptance into IAGD program.

#### IAGD 6624 Dental Practice Management I: 1 semester hour.
- Continuing experiential course in dental practice management. Enrollees will participate in aspects of the management of the AEGD program’s dental clinic. PREREQ: Acceptance into IAGD program.

#### IAGD 6625 Dental Practice Management II: 1 semester hour.
- Continuing experiential course in dental practice management. Enrollees will participate in aspects of the management of the AEGD program’s dental clinic. PREREQ: IAGD 6624.

#### IAGD 6626 Dental Practice Management III: 1 semester hour.
- Advanced course in dental practice management. Enrollees will participate in all aspects of the management of the AEGD program’s dental clinic. PREREQ: IAGD 6625.

#### IAGD 6630 Dental Implantology I: 1 semester hour.
- A coordinated lecture, laboratory and clinical experience in treatment planning, placement and restoration of dental implants. This course emphasizes the theory and basic biology of dental implants. PREREQ: Acceptance into IAGD program.

#### IAGD 6631 Dental Implantology II: 1 semester hour.
- Continuing lecture, laboratory and clinical experience in treatment planning, placement, restoration and maintenance of dental implants. This course emphasizes problem solving and incorporation of implants in general dental practice. PREREQ: IAGD 6630.

#### IAGD 6632 Dental Implantology III: 1 semester hour.
- Continuing lecture, laboratory and clinical experience in treatment planning, placement, restoration and maintenance of dental implants. This course emphasizes problem solving and incorporation of implants in general dental practice. PREREQ: IAGD 6631.

#### IAGD 6635 Dental Medicine Seminar I: 1 semester hour.
- Participation in the ISU Family Medicine residents’ seminar series covering topics of internal and specialty medicine. PREREQ: Acceptance into IAGD program.

#### IAGD 6636 Dental Medicine Seminar II: 1 semester hour.
- Continuing participation in the ISU Family Medicine residents’ seminar series covering topics of internal and specialty medicine. PREREQ: IAGD 6635.

#### IAGD 6637 Dental Medicine Seminar III: 1 semester hour.
- Continuing participation in the ISU Family Medicine residents’ seminar series covering topics of internal and specialty medicine. PREREQ: IAGD 6636.

#### IAGD 6640 Dental Conscious Sedation I: 2 semester hours.
- Integrated lecture and clinical experience in safe and efficacious delivery of conscious sedation. The two-semester experience is designed to fulfill the ADA guidelines. PREREQ: Acceptance into the IAGD program.

#### IAGD 6641 Dental Conscious Sedation II: 2 semester hours.
- Continuing lecture and clinical experience in safe and efficacious delivery of conscious sedation. PREREQ: IAGD 6640.

#### IAGD 6645 General Dentistry Videoteleconference I: 4 semester hours.
- Participation in the weekly two-way videoteleconference general dentistry series originating from Lutheran Medical Center in Brooklyn, NY, designed for AEGD programs. PREREQ: Acceptance into the IAGD program.

#### IAGD 6646 General Dentistry Videoteleconference II: 4 semester hours.
- Continuing participation in the weekly two-way video teleconference general dentistry series originating from Lutheran Medical Center in Brooklyn, NY, designed for AEGD programs. PREREQ: IAGD 6645.

#### IAGD 6647 General Dentistry Videoteleconference III: 3 semester hours.
- Continuing participation in and presentation for the weekly two-way video teleconference general dentistry series originating from Lutheran Medical Center in Brooklyn, NY, designed for AEGD programs. PREREQ: IAGD 6646.

#### IAGD 6650 Dental Literature Review I: 1 semester hour.
- Critical review of current and historical dental literature in general dentistry and selected recognized specialty areas of dentistry. PREREQ: Acceptance into the IAGD program.

#### IAGD 6651 Dental Literature Review II: 1 semester hour.
- Continuing review of current and historical dental literature in general dentistry and selected recognized specialty areas of dentistry emphasizing outcomes and parameters of care. PREREQ: IAGD 6650.

#### IAGD 6699 Experimental Course: 1-6 semester hours.
- This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

### Idaho Dental Educ Prog Courses

#### IDEP 5513 Dental Anatomy Lecture I: 1 semester hour.
- Nomenclature, chronology and methods of designation of human teeth. Form, size and contour of the teeth, including external and internal anatomy of the permanent and deciduous dentitions, intertooth relations and occlusion. COREQ: IDEP 5514.

#### IDEP 5514 Dental Anatomy Laboratory: 3 semester hours.

#### IDEP 5515 Dental Materials Science I: 2 semester hours.
- Composition, properties and application of the materials used in dentistry. Basic information on the design of preparatory work necessary for the mouth incident to the reception of these materials.

#### IDEP 5517 Interpersonal Relationships and Communication: 1 semester hour.
- To assist their orientation and adjustment to professional education, freshmen will participate in group introductions followed by a discussion on interpersonal relationships with classmates, administrators, faculty, and staff; dealing with stress; and establishing study habits.
IDEP 5523 Preventative Dentistry: 2 semester hours.
Introducing the philosophy and need for preventive dentistry by developing the student's knowledge of and skills for effective oral hygiene. Concepts of self motivation, knowledge of dental diseases and abnormalities; application of the principles of fluoridation, nutrition, patient motivation, and home care.

IDEP 5525 History of Dentistry: 1 semester hour.
To acquaint the student with the history of dentistry from ancient times to present, emphasis is placed upon contributions by individuals and groups of individuals leading to the current status of dentistry in the United States.

IDEP 5526 Community Dentistry Field Experience: 1 semester hour.
Designed to acquaint students with area health problems and with area health services and agencies. Field experience is gained during dental health and/or career presentations in public schools. To provide a variety of experiences, visits are made, for example, to the chronically ill, aged, or handicapped; to water purification facilities; to Indian groups.

IDEP 5533 Oral Hygiene Technique: 1 semester hour.
Introduction to the instruments and their usage in performing a complete scaling prophylaxis of the teeth. Perodontal charting and instrument sharpening techniques are also performed. Didactic, laboratory, and clinical introduction.

IDEP 5534 Dental Materials Science II: 3 semester hours.
Continuation of DENT 5515. PREREQ: IDEP 5515.

IDEP 5535 Occlusion Laboratory: 1 semester hour.
Various exercises simulating clinical diagnostic and treatment procedures are employed to exemplify principles of maxillomandibular relationships. COREQ: IDEP 5534.

IDEP 5544 Values and Ethics: 1 semester hour.
Designed to identify and understand one's own ethical decision-making processes and the relationship of religion with values and ethics. Students will discuss the areas of value of care for people as individuals, challenges of personal and professional opportunities, code of ethics of the ADA and dental care delivery systems.

IDEP 5554 Occlusion Lecture: 1 semester hour.
Basic principles of maxillomandibular relationships, static and functional, as related to the occlusal surfaces of the teeth. COREQ: IDEP 5535.

IDEP 5563 Dental Radiology I: 1 semester hour.
History, theory and application of ionizing radiation resulting in radiography of the oral structures including exposure and developing parameters along with basic interpretation. COREQ: IDEP 5564.

IDEP 5564 Dental Radiology Technique: 1 semester hour.
Practical experience in exposing and developing dental radiographs. The course will include techniques required to complete a diagnostic full mouth series, bitewing films and panoramic radiographs. COREQ: IDEP 5563.

IDEP 5565 Dental Radiology II: 1 semester hour.
History, theory, and application of radiographic methods in dentistry including cephalometric, panoramic, and digital modalities. COREQ: IDEP 5563 and IDEP 5564.

IDEP 5599 Experimental Course: 1-6 semester hours.
This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

IDEP 6617 Extramural Dental Education Program: 2 semester hours.
Community clinical experience at the ISU dental clinic. Under direct supervision, dental students observe and participate in total patient care and office management while serving Idaho residents who would not normally receive dental care.
Dental Hygiene

Director and Professor: Gurenlian

Emerti Professors: Bowen, Herzog, Paarmann, Hodges

Professor: Rogo

Associate Professors: Calley, Freudenthal, Johnson, Garland

Master of Science in Dental Hygiene

The Master of Science degree in Dental Hygiene is an advanced degree; therefore, the program is designed for students who are licensed dental hygienists with baccalaureate degrees. Graduates will be prepared for various career opportunities within the health care arena.

Goals

Program goals of this graduate level dental hygiene program are to prepare professional dental hygienists to:

1. Assume leadership roles in academics, rural and community health settings, research, professional associations or commercial industry;
2. Develop advanced clinical abilities that improve oral health and access to dental hygiene care;
3. Acquire research abilities that contribute to the scientific dental hygiene body of knowledge;
4. Assume responsibility for professional development through life-long learning capability; and
5. Provide a foundation for future doctoral education.

Admission Requirements

The student must fulfill the following requirements:

- Graduation from an accredited entry level dental hygiene program
- Bachelor's degree in dental hygiene or a related field
- Minimum grade point average of 3.0 in upper division and dental hygiene coursework
- Current dental hygiene licensure in good standing

1. The student must apply to, and meet all criteria for, admission to the Graduate School, and submit a completed application, residency form, fee payment, and transcripts. International students should refer to the "Admission of International Students" section of this Catalog for TOEFL and other requirements. Information is online at www.isu.edu/departments/graduate. Send results of the Graduate Record Examination (GRE) or the Miller Analogy Test (MAT) to the Graduate School.

2. Complete the Dental Hygiene Department application form for the Master of Science degree program (available at www.isu.edu/departments/).

3. Submit two recommendation forms provided by the department. One recommendation must be completed by an individual who has personal knowledge of the applicant's clinical skills such as a faculty member from a dental hygiene program, employer, or colleague. The second recommendation must be completed by an individual who has personal knowledge of the applicant's academic and professional qualifications for graduate study such as a faculty member, officer of a professional association, or colleague.

4. Submit to the Graduate School official transcripts to provide evidence of:
   - Graduation from an accredited entry level dental hygiene program
   - Bachelor's degree in dental hygiene or a related field

5. Previous education in local anesthesia and nitrous oxide administration is not a requirement for admissions; however, it is preferred. If previous education in these pain control methods was completed, provide evidence of successful completion of classroom and clinical experiences in local anesthesia and nitrous oxide administration. Evidence could include transcripts, course descriptions, expanded functions or continuing education certificates.

6. Send a photocopy of a license to provide evidence of current dental hygiene licensure in good standing.

7. Complete a telephone or personal interview.

Applicants can contact the Department at the following address:

Graduate Program Director
Department of Dental Hygiene
Division of Graduate Studies
921 South 8th Avenue, STOP 8048
Pocatello, Idaho 83209-8048
E-mail address: msdh@isu.edu
Telephone: (208) 282-2482

General Requirements

A total of 37 credits, including a thesis (minimum of 6 credits), will be required for degree completion. Requirements include 7 courses (23 credits) in the core curriculum, 4 courses (a minimum of 11 credits) in an area of emphasis, and 3 credits of electives.

The core courses advance the theory and practice of dental hygiene and prepare students in research methodology to apply during the thesis process. A thesis is required because the Master of Science degree in Dental Hygiene is the terminal degree in the discipline and a research foundation is imperative to advance the theoretical knowledge base of the profession. In addition to the core curriculum, graduates complete an area of emphasis in dental hygiene education or rural and community health. Two required dental hygiene courses in the emphasis area, coupled with a practicum experience and a related elective course, provide a strong basis for advanced study and thesis work. To enhance the breadth of knowledge, students are required to complete a minimum of 3 credits of electives selected from related graduate coursework offered outside the Department of Dental Hygiene.

The program is an online graduate curriculum with on-campus visitations required for orientation, DENT 6619 Graduate Seminar II and oral examination for thesis defense. A maximum of 9 credits may be transferred officially to Idaho State University.

Dental Hygiene Education Emphasis

DENT 6620 Advanced Educational Theory and Methods 3
DENT 6621 Dental Hygiene Clinical Instruction and Administration 3
DENT 6625 Dental Hygiene Education Practicum 2-4
Elective course in emphasis area (Program Director approval required)

Rural and Community Health Emphasis

DENT 6610 Special Care Populations 3
DENT 6632 Community and Global Health 3
DENT 6635 Rural and Community Health Practicum 2-4
Elective course requirements (Program Director approval required) 3

Total Hours 37

1 Undergraduate statistics or biostatistics must be taken as a prerequisite. A minimum of "C" or better is required.

Academic Requirements

1. Once admitted, students must complete a plan of graduate study with their dental hygiene graduate advisor no later than the end of the first semester after enrollment. This plan must be approved by the Program Director.

2. Any student who, after admission to the Master of Science program, falls below a 3.0 GPA, or who receives a grade of C+ or below in two graduate courses during his or her program of study will be deemed to be performing at an unsatisfactory level and will be dismissed.

3. Any student who, after admission to the Master of Science program, receives a C, C-, D, F, or grade in any graduate course in his or her program of study will be dismissed. Courses with grades of C or lower may not be used to satisfy graduation requirements.

4. Current CPR, related screenings and/or immunizations are required prior to attending the on-campus orientation.

Graduation Requirements

1. Successfully conduct and defend a thesis as outlined in the Department of Dental Hygiene, Division of Graduate Studies, Graduate Student Handbook.

2. Complete the coursework on the study plan approved by the Program Director, Department of Dental Hygiene, Division of Graduate Studies, and by the ISU Graduate School.

Courses

DENT 5596 Graduate Seminar I: 1 semester hour.
This seminar uses web-based activities and on-site campus activities to assist students in developing skills and abilities essential for successful participation in the MSDH program. Graded S/U.

DENT 5598P Professional Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May be applied to graduate degrees under special circumstances. May be repeated. Graded S/U.

DENT 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

DENT 6605 Program Development and Evaluation: 3 semester hours.
An overview of general principles of teaching, learning and evaluation in academic and community oral health programs. Emphasis on assessment, planning, implementation and evaluation of programs.

DENT 6610 Special Care Populations: 3 semester hours.
Concepts related to providing oral health care for special care populations. Emphasis on assessment, planning, implementation and evaluation of care for individuals with transient or lifelong physical, mental, medical or social health needs.

DENT 6612 Administration and Management of Healthcare Organizations: 3 semester hours.
This course combines theoretical knowledge with practical application of principles and techniques for managing a health care environment and employees associated with providing care. Emphasis on organizational structure, human resource management, financial management, quality assurance, policy development, information management, grant writing and business planning.

DENT 6615 Progressive Dental Hygiene Theory: 3 semester hours.
Critical analysis of the dental hygiene process of care related to advanced preventive and therapeutic interventions to various population groups, technology and outcomes.

DENT 6616 Progress Dent Hygiene Pract: 1 semester hour.
This clinical course provides students with experiential learning opportunities to enhance self-assessment and peer/student evaluation in clinical dental hygiene. Formative assessment techniques are applied to the process of dental hygiene care: assessment, diagnosis, care planning, implementation and evaluation. The course will culminate in an individualized professional development plan constructed by each student based upon faculty, self and peer assessments as well as career goals. May be repeated for up to 2 credits. Graded S/U. PREREQ: DENT 6615 or permission of instructor.

DENT 6618 Leadership Strategies to Improve Health Care: 3 semester hours.
Application of leadership theory and models to professional issues, policy development, advocacy, coalition building, strategic planning, communication, conflict resolution and professional advancement.

DENT 6619 Graduate Seminar II: 1 semester hour.
This course provides students with experiential learning in dental hygiene practice, research, education, and innovations in technology. The course will culminate in an updated portfolio that addresses career goals within and beyond graduate education. PREREQ: DENT 6615 or permission of instructor. Graded S/U.

DENT 6620 Advanced Educational Theory and Methods: 3 semester hours.
Study of theory, principles, and research related to the faculty role in active teaching and learning, development of ethical reasoning, critical thinking and reflective judgment, development of curricular frameworks, outcomes and competencies, and course delivery methods. PREREQ: DENT 6605 or departmental approval.

DENT 6621 Dental Hygiene Clinical Instruction and Administration: 3 semester hours.
Theory and practices of clinical instruction and supervision, related to psychomotor skill development, competency-based evaluation, student mentoring and remediation. Examination of organizational and administrative philosophy and practice in curriculum planning, implementation, and evaluation based on accreditation standards. PREREQ: DENT 6620 or departmental approval.
DENT 6625 Dental Hygiene Education Practicum: 2-4 semester hours.  
Individualized experience to apply principles and theories in dental hygiene education. Approval required for practicum sites. May be repeated for a maximum of 6 credits. Graded S/U. PREREQ: DENT 6616 and DENT 6620 or departmental approval.

DENT 6632 Community and Global Health: 3 semester hours.  
A study of population groups that are at increased risk of poor health and a familiarity with policies and programs designed to reduce health inequalities. Emphasis on the ability to plan, implement, and evaluate an oral health program to increase access to care in an underserved target population.

DENT 6635 Rural and Community Health Practicum: 2-4 semester hours.  
Individualized service-learning experience designed to apply theories in rural and community health to improve access to care. Approval required for practicum sites. May be repeated for a maximum of 6 credits. Graded S/U. PREREQ: DENT 6610 and DENT 6632 or departmental approval.

DENT 6640 Independent Study in Dental Hygiene: 2-3 semester hours.  
Specific problems selected on the basis of interest and preparation. Individualized student effort under the guidance of the instructor. May be repeated up to 6 credits.

DENT 6646 Health Research: 3 semester hours.  
Development of foundations in health research and design. The focus will be on effective literature searching with critical analysis and synthesis of evidence-based literature leading to identification of problems for research. PREREQ: Undergraduate Statistics or Biostatistics.

DENT 6650 Thesis: 1-9 semester hours.  
Research project under supervision of academic faculty member. Minimum of 6 credits required. May be repeated. Graded S/U. PREREQ: DENT 6646 or permission of program director.

DENT 6699 Experimental Course: 1-6 semester hours.  
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.
Nursing

Nancy Renn, Ph.D., RN, Interim Assistant Dean, School of Nursing

Karen S. Neill, Ph.D., R.N., SANE-A, DF-IAFN, Professor/Associate Dean for Academic Affairs/Associate Director for Graduate Studies

Vernon Kubiak, DNP, PMHNP-BC, CNS, CNP, RN, Assistant Clinical Professor and Associate Director for Undergraduate Studies

Professors: Neill

Mary A. Nies, Ph.D., RN, FAAN, FAAHB Director for the Department of Nursing Research

Associate Professor: Arvidson

Assistant Professor: Clarkson, Mispireta, Tavernier

Clinical Assistant Professors: Baron, Belliston, Christoffersen, Danstrom, Dougal, Esplin, Hackwith, Jardine-Dickerson, Kubiak, Morris, Omatowa, Renn, Sabel, Solomon

Clinical Instructor: Smout

Mission

The SON Mission is to prepare caring, exemplary nurse leaders who integrate education, practice, and research to enhance quality of life for rural and diverse populations.

Vision

The SON Vision is to be a distinguished College of Nursing committed to being as humanistic and compassionate as we are scientific and innovative.

Graduate Degree Programs

Graduate degree programs offered by the School of Nursing include:

- Doctor of Philosophy (Ph.D.) in Nursing
- Doctor of Nursing Practice (DNP)
  DNP specific options include: Family Nurse Practitioner (FNP) and Psychiatric Mental Health Nurse Practitioner (PMHNP). The School of Nursing also offers a Post Masters DNP degree for students holding certification as an FNP or PMHNP.
- Master’s in Nursing (M.S).
- M.S. in Nursing Education

DNP Degree Program

The primary objective of the DNP degree program will be to prepare clinical leaders who can effectively evaluate clinical outcomes, identify and manage health care needs of individuals, families, and populations, use technology and information to transform health care systems, and participate in interprofessional collaboration to develop efficient and effective models of health care delivery. The graduate of the DNP program will be prepared for specific national certification examination.

Accreditation

The Baccalaureate, Master’s, and Doctor of Nursing Practice degree programs in the School of Nursing are accredited by the Commission on Collegiate Nursing Education (CCNE), One DuPont Circle, NW, Suite 530, Washington, DC 20036, 202-887-6791.

School of Nursing Fees

The School of Nursing (SON) charges a student professional fee each semester of enrollment including summer session in any nursing program. Other fees may apply. Please see ISU School of Nursing website at http://www.isu.edu/nursing/ for further information.

Students may be required to enroll in Nursing Education Exchange (NEXus) courses as part of any graduate program/option in Nursing which will require additional enrollment fee(s) per course in any semester.

Doctor of Philosophy (Ph.D.) in Nursing

The Ph.D. in Nursing degree program will prepare the candidate to conduct independent research, collaborate as a scholar and leader, and educate for improving health and health care globally. The Ph.D. program will admit students on full-time or part-time status. The Ph.D. in Nursing program is delivered fully online.

Goals

The Ph.D. in Nursing is designed with a research emphasis dedicated to extending nursing science and for improving the delivery of health care for rural and diverse populations within existing cultural, geographical, and health care contexts. An interprofessional research focus will provide an opportunity for students to learn through collaboration with professionals across varied disciplines, and prepare graduates for leading change and advancing health and health care systems.

Ph.D. Degree Program Outcomes

Each student will complete a core curriculum and work closely with interprofessional faculty advisors to complete an individualized course of study which includes individual student goals and develops the foundation for a program of research. Students will complete the coursework and dissertation through online technologies integrating an interprofessional/multidisciplinary approach to:

1. Communicate scientific knowledge through mentorship, collaboration, and dissemination.
2. Create original research that contributes to scientific nursing knowledge.
3. Contribute to the development of methodologies congruent with the broad concerns of the nursing discipline.
4. Contribute to the discovery, application, and integration of nursing and interprofessional knowledge and leadership.

Application and Admission Requirements

The student must apply to and meet all requirements for admission and application to the ISU Graduate School. In addition to the general requirements of the Graduate School, the following are required:

1. Application through the ISU Graduate School website with payment of appropriate fees.
2. Earned Bachelor of Science (BS in Nursing or BSN) from program accredited by the Commission on Collegiate Nursing Education (CCNE) or other nationally recognized accrediting body for nursing education. Master's degree in Nursing from an accredited program will be considered.
3. Cumulative GPA of 3.5 or higher from a Bachelor of Science in Nursing (B.S. or B.S.N.) program of study or #3.5 GPA based on previous 60 credits of undergraduate coursework.
4. English Proficiency Exams: Students whose native language is not English must provide evidence of satisfactory scores on the English Foreign Language (TOEFL) or on the International English Language Testing System (IELTS).
   a. Satisfactory TOEFL requirements for admission include:
      i. Internet-based total test score of 80 with a score of at least 20 on each Section and 23 or above on the Speaking Section; or
      ii. Computer-based total test score of 213 with a score of at least 21 on Section 1 (Listening Comprehension); or
      iii. Paper-based total test score of 550 with a score of at least 55 on section 1 (Listening Comprehension).
   b. Satisfactory IELTS requirement for admission include scoring 6.5 or higher on the total band and 6.5 on the speaking test component.
5. Graduate Record Examination (GRE): The GRE is required. Students must submit scores of the GRE taken within 5 years prior to start of academic year of admission to the program.
   a. Required minimum test score in the Quantitative Reasoning section is the 50th percentile.
   i. Students not meeting the minimum GRE scores in the Quantitative Reasoning section can provide evidence of completion of a descriptive or inferential statistics course (400+) level with a B grade or higher, within 5 years prior to start of academic year of admission to the program. This course must be completed and grade recorded prior to the start of the academic fall semester of admission.
   b. Although we do not provide average or require minimum test scores for the Verbal Reasoning and Analytical Writing sections of the GRE, these are taken into consideration when reviewing a candidate's application for admission.
6. Submission of a personal statement (1 page) through the ISU Graduate School application system.
7. Three professional references attesting to the applicant's capacity and potential for doctoral study using the form provided on the application site. At least one reference should be from an academic source and one from a professional clinical site. All forms are sent through the ISU Graduate School application system.
8. Submission of professional vitae or resume through the ISU Graduate School application system.
9. Completion of a preadmission interview by the School of Nursing (SON) Ph.D. Admissions committee. If the applicant resides at a distance over 300 miles, an interview by videoconference may be arranged.
10. Mandatory attendance at the orientation for the Ph.D. program to be held on the ISU campus in August of the year of admission. The SON Ph.D. Admissions committee will make the final recommendation regarding admission. This decision will be based on evaluation of established application and admission requirements.

**Meeting minimum requirements does not guarantee admission to the program. The SON Ph.D. Admissions committee will make the final recommendation regarding admission. This decision will be based on evaluation of established application and admission requirements.**

**Selection Schedule for Ph.D. Program**

Application for the Ph.D. program will open in September of any academic year. Preference will be given to applications submitted by February 1 of any year. Applications are accepted on a rolling basis until class filled. All application and admission requirements as posted on the website for the Ph.D. degree program apply. Notification of successful applicants for admission and alternates will be announced in late April of any year.

**Dissertation Preparation and Advancement to Candidacy Comprehensive Examination**

The student must complete designated required and elective courses in order to complete the comprehensive qualifying examination requirements. If the student fails any component of the comprehensive examination, the student may retake the examination one time within established ISU SON guidelines, policies and procedures.

**Admission to Candidacy**

Each student that has successfully completed the comprehensive examination components may apply for degree candidacy.

**Dissertation**

Once the student has been admitted to degree candidacy, the student enrolls in NURS 8890 Dissertation for completion of the dissertation until completed.

**Continuous Enrollment**

Students must maintain continuous enrollment in NURS 8890 while in the process of research and writing the dissertation. The student must maintain continuous enrollment until graduation.

*Upon admission to the Ph.D. program, the student will be provided access to the SON Ph.D. Handbook which will provide further information on program specific policies and procedures.

### Doctor of Nursing Practice (DNP)

The primary objective of the DNP degree program is to prepare clinical leaders who can effectively evaluate clinical outcomes, identify and manage health care needs of individuals, families, and populations, use technology and information to transform health care systems, and participate in interprofessional collaboration to develop efficient and effective models of health care delivery.

The graduate of the DNP degree program options of FNP or PMHNP is eligible to sit for the certification examination for the specific option.

The DNP degree program options are delivered online. The DNP degree program will enroll students on full time, part time, or Post Master's status. Admission to any option on full time, part time, or Post Masters status is contingent on sufficient enrollment as defined by the SON. Two specific options are open for enrollment in the DNP degree program. These options include: Family Nurse Practitioner (FNP) and Psychiatric Mental Health Nurse Practitioner (PMHNP).

In order to be eligible for the Post Master’s DNP degree program, the applicant must hold national certification as a Family Nurse Practitioner (FNP) or Psychiatric Mental Health Nurse Practitioner (PMHNP) with entry specific to the certification held at time of application.

**Option Descriptions for the DNP degree program:**

**Family Nurse Practitioner (FNP):**

The Family Nurse Practitioner (FNP) is prepared to be a leader in primary care combining the roles of provider, mentor, educator, and administrator. The FNP is prepared to practice autonomously and in collaboration with other healthcare professionals.
professionals to provide evidence-based care to individuals, families, and populations across the lifespan in a variety of settings.

**Psychiatric Mental Health Nurse Practitioner (PMHNP):**
The Psychiatric Mental Health Nurse Practitioner is prepared to provide psychiatric mental health care along the wellness-illness continuum, effectively evaluate clinical outcomes, identify and manage primary and acute mental health needs of individuals with extension of expertise to families and communities.

**DNP Degree Program Outcomes**
1. Assume interprofessional leadership to advance clinical practice and health care delivery to rural and diverse populations.
2. Integrate nursing science into evidence-based care for individuals, families, and communities to improve outcomes.
3. Incorporate practice initiatives to improve systems of health care delivery.
4. Advocate policy for health care.

**Admission Requirements**
The student must apply to and meet all requirements for admission and application to the ISU Graduate School. In addition to the general requirements of the Graduate School, the following are required:

1. Earned Bachelor of Science (BS in Nursing or BSN) from program accredited by the Commission on Collegiate Nursing Education (CCNE) or other nationally recognized accrediting body for nursing education. Master's degree in Nursing from an accredited program will be considered.
2. Cumulative GPA of 3.0 or higher (calculated based on previous 60 credits of undergraduate coursework) from a Bachelor of Science degree (BS in Nursing or BSN).
3. English Proficiency Exams: Students whose native language is not English must provide evidence of satisfactory scores on the English Foreign Language (TOEFL) or on the International English Language Testing System (IELTS). (See Graduate Catalog for details).
   a. Satisfactory TOEFL requirements for admission include:
      i. Internet-based total test score of 80 with a score of at least 20 on each section and 23 or above on the Speaking section; or
      ii. Computer-based total test score of 213 with a score of at least 21 on Section 1 (Listening Comprehension); or
      iii. Paper-based total test score of 550 with a score of at least 55 on section 1 (Listening Comprehension).
   b. Satisfactory IELTS requirement for admission include scoring 6.5 or higher on the total band and 6.5 on the speaking test component.
4. Verification of valid and current unencumbered Registered Nursing license.
5. Completion of a preadmission interview by the SON DNP Admissions committee. If the applicant resides at a distance over 300 miles, an interview by videoconference may be arranged.

Two years of documented previous healthcare or nursing experience before admission is preferred, but not required.

The SON DNP Admissions committee will make the final recommendation regarding admission. This decision will be based on evaluation of established application and admission requirements.

Admission to the FNP or PMHNP DNP degree option is contingent on sufficient enrollment as defined by the SON.

**Application Requirements**
The student must apply to, and meet all requirements for admission to the Graduate School. In addition to the general requirements of the Graduate School, the following is required:

1. Application through the ISU Graduate School website with payment of appropriate fees.
2. Submission directly to the Graduate School of official transcripts of all degrees including the completion of the Bachelor of Science in Nursing (BSN BS in nursing) from an accredited nursing program. Official transcripts must be sent directly to the Graduate School from the Registrar’s office of the applicant’s previous institution(s) of study.
3. Evidence of completing prerequisite descriptive or inferential statistics course with a C grade or higher within five (5) years prior to admission to the program.
4. Submission of professional essay (3-4 pages) describing education, research, clinical, and life experiences that prepare the applicant for the DNP degree program, and how this preparation will facilitate career goals through the ISU Graduate School application system.
5. Three professional references attesting the applicant’s capacity for doctoral study. All forms are sent through the ISU Graduate School application system.
6. Submission of professional vitae or resume through the ISU Graduate School application system.
7. **[POST MASTER’S APPLICANTS ONLY]** The Post Master’s applicants must provide proof of certification in the option (FNP or PMHNP) for which the application is submitted.
8. **[POST MASTER’S APPLICANTS ONLY]** The Post Master’s applicant must submit at the time of application an official letter that documents the total number of clinical hours completed in the previous Master’s degree advanced practice program in Nursing from which the student graduated. An official transcript which documents the total number of clinical hours completed in the previous advanced practice program will be accepted.

*Students may be required to enroll in NEXus (The Nursing Education Exchange) courses as part of the DNP degree program which will require an additional enrollment fee(s) per course in any semester.

**Selection Schedule for DNP Degree Program**
Application for the DNP degree program will open in November of any academic year. Preference will be given to full-time applicants (3 year program) in any option. Application to the Post Masters options (FNP and PMHNP) are welcome and reviewed independently. Preference will also be given to applications submitted by February 1 of any year. Admission to the DNP degree, FNP or PMHNP options is contingent on sufficient enrollment as defined by the School of Nursing. Applications are accepted on a rolling bases until class is filled. All application and admission requirements as posted on the website for the DNP degree program apply. Notification of applicants selected for admission and alternates will be announced in late April of any year.

**Graduation Criteria**
1. Successful completion of a Scholarly Project based on established guidelines.
2. Successfully pass an oral defense of the Scholarly Project as a component of the comprehensive examination.
3. Meet all requirements established by ISU, the Graduate School, and the School of Nursing for graduation with the DNP degree.

**Scholarly Project**
The Scholarly Project includes synthesis of scientific evidence and theoretical principles within a practice environment(s) to improve healthcare outcomes.
The Scholarly Project involves the incorporation of knowledge of current and emerging healthcare technologies to improve care delivery and organizational systems for groups and populations. Requires a minimum of six credit hours.

**Continuous Enrollment**

Students must maintain continuous enrollment in NURS 7790 while in the process of completing the Scholarly Project. The student must maintain continuous enrollment until graduation.

*Upon admission to the DNP degree program, the student will be provided access to a SON DNP Handbook which will provide further information on program specific policies and procedures.

Total Hours: 26

Master of Science in Nursing

The Master of Science in Nursing (M.S.) program is offered online and requires 43 credits. A full time program is available in the Nursing Education option. Delivery of a Master’s degree program option in any academic year is based on number of total applicants and ability to establish a full cohort at the time of the admission process as determined by SON.

Pathway to the M.S. degree

Bachelor of Science (BS) to Master of Science (MS). Students enrolled in the Nursing Education option will be prepared to teach in an academic nursing program as well as in other settings. Leadership is emphasized in the preparation of the student in the Master's in Nursing program, Education option.

Application for the Master of Science degree options open in October of any academic year. Preference will be given to applications submitted by February 1 of any year. Notification of successful applicants for admission and alternates will be announced late April of any year.

Admission Requirements

The student must apply to and meet all requirements for admission to the Graduate School. In addition to the general requirements of the Graduate School, the following is required:

1. Earned Bachelor of Science (BS in Nursing or BSN) from program accredited by the Commission on Collegiate Nursing Education (CCNE) or other nationally recognized accrediting body for nursing education.
2. Cumulative GPA of 3.0 or higher (calculated based on previous 60 credits of undergraduate coursework).
3. English Proficiency Exams: Students whose native language is not English must provide evidence of satisfactory scores on the English Foreign Language (TOEFL) or on the International English Language Testing System (IELTS). (See Graduate Catalog for details).
   a. Satisfactory TOEFL requirements for admission include:
      i. Internet-based total test score of 80 with a score of at least 20 on each Section and 23 or above on the Speaking Section; or
      ii. Computer-based total test score of 213 with a score of at least 21 on Section 1 (Listening Comprehension); or
      iii. Paper-based total test score of 550 with a score of at least 55 on section 1 (Listening Comprehension).
   b. Satisfactory IELTS requirement for admission include scoring 6.5 or higher on the total band and 6.5 on the speaking test component.

4. Verification of valid and current unencumbered Registered Nursing license.

Application Requirements

The student must apply and meet all requirements for admission to the Graduate School. In addition to the general requirements of the Graduate School, the following is required:

1. Application through the ISU Graduate School website with payment of appropriate fees.
2. Submission of official transcripts of all degrees including completion of the Bachelor of Science in Nursing (BSN or BS in Nursing) degree from an accredited nursing program. Official transcripts must be sent directly to the Graduate School from the Registrar’s Office of the applicant’s previous institution(s).
3. Evidence of completing prerequisite descriptive or inferential statistics course with a C grade or higher prior to admission to the program.
4. Submission of a professional essay (2-3 pages) through the ISU Graduate School application system.
5. Three professional reference forms attesting to the applicant’s capacity and potential for Master’s study. (It is recommended two references be from academic sources and one from a recent employer.) All forms are sent through the ISU Graduate School application system.
6. Submission of professional vitae or resume through the ISU Graduate School application system.

The SON Admission Committee will make the final recommendation regarding admissions. This decision will be based on evaluation of established admission and application requirements for any program.

Individuals who do not meet these admissions requirements may be considered from admissions as a classified student with program restrictions until all requirements are met, or candidate is evaluated for progress based on established SON guidelines, policies, and/or procedures.

Progression of Graduate Students

1. Progression criteria established by the SON and Graduate School. Each degree program or option has specific progression requirements established within the SON. These policies are made available in specific program option Student Handbooks provided upon admission. Students are admitted and enter into an established curricular plan of study and must maintain that plan of study in order to progress.

Graduation Criteria

To qualify for graduation with a graduate degree (M.S., D.N.P., or Ph.D.) from the School of Nursing, the student must:

1. Successfully pass a comprehensive examination process or equivalent as established by the School of Nursing.
2. Meet all requirements established by ISU, the Graduate School, and the School of Nursing specific to the degree program in which the student is enrolled.

Courses

NURS 5517 Interdisciplinary Evaluation Team: 1 semester hour.

NURS 5580 Genetics for Health Care Professionals: 2 semester hours.
An in-depth interdisciplinary review of the impact of genetics on patients and patient care and the biological, social, ethical and legal issues surrounding genetics and genomics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. Equivalent to CSD 5580 and NURS 5580.

NURS 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

NURS 6600 Theoretical Foundations for Nursing Practice: 3 semester hours.
Critical examination of the development of nursing knowledge critique, evaluate and apply a variety of theories from nursing, family and related disciplines as a base for advanced nursing practice.

NURS 6602 Health Policy: 3 semester hours.
Analysis of policy research relevant to health care. Evaluate effects of local, regional, national, and international health policy and trends on delivery systems and care of rural and diverse populations. PREREQ: NURS 6600.
NURS 6610 Advanced Evidence Application: 3 semester hours.
Analysis of current evidence for application to nursing practice. Includes question formulation, comprehensive review of evidence related to clinical issues, evidence appraisal, and application for research-informed practice. PREREQ: NURS 6600.

NURS 6611 Advanced Health Assessment: 3 semester hours.

NURS 6611L Advanced Health Assessment Lab: 2-3 semester hours.

NURS 6612 Health Care of Rural Communities: 2 semester hours.
Explores rural culture using theories, frameworks and methodologies from various disciplines. Focus on culturally responsive care systems at the community level. Rural life analyzed to identify factors related to health systems and health care practice needs. PREREQ: NURS 6610.

NURS 6613 Health Assessment: 2 semester hours.
Concepts of health assessment for practice in various settings and with diverse populations. COREQ: NURS 6613L.

NURS 6613L Health Assessment Lab: 1 semester hour.
Acquisition and application of advanced health assessment skills in diverse populations. Skills include health history, physical assessment, health promotion, and pharmacological evaluation in practice. COREQ: NURS 6613.

NURS 6621 Advanced Nursing Roles: 2 semester hours.
Integration of theory and research related to role development, transition and ambiguity in advanced practice nursing. Emphasis on evaluation of health care delivery, ethical decision-making, partnership development, collaborative practice and accountability for quality. PREREQ: NURS 6600.

NURS 6633 Rethinking Nursing Education: 3 semester hours.
Theoretical perspective on teaching and learning in nursing education, creating a theoretical base for the education curriculum. The learners will examine theories of learning and adult learning and explore their application to nursing education.

NURS 6635 Curriculum Issues and Development: 3 semester hours.
Examination of various external and internal issues influencing nursing curriculum. Curriculum components and designs will be explored and a model curriculum developed. PREREQ: NURS 6633.

NURS 6636 Special Problems: 1-3 semester hours.
Independent study under faculty guidance. 1-3 credits. May be repeated up to 6 credits. PREREQ: Permission of instructor.

NURS 6639 Teaching and Learning Strategies in Nursing Education: 3 semester hours.
Exploration of a variety of strategies to facilitate achievement of curriculum outcomes. The use of current technology and learner-centered strategies are emphasized. PREREQ: NURS 6633.

NURS 6640 Evaluation Issues and Strategies in Nursing Education: 3 semester hours.
Examination of issues surrounding program and student evaluation. Plans for formative and summative evaluation will be developed. PREREQ: NURS 6633.

NURS 6642 Primary Care of the Young Adult: 3 semester hours.
Management and evaluation of primary care problems in the young adult. Provides the student with knowledge to assist individuals with common health problems, while integrating the concepts of health promotion. COREQ: NURS 6642L. PREREQ: NURS 6611, NURS 6611L, and PHAR 6645.

NURS 6642L Primary Care of the Young Adult Lab: 2-3 semester hours.
Delivery of advanced nursing care to young adults and their families. Clinical application of theoretical knowledge with ongoing refinement of essential skills used by nurse practitioners in primary health care. Identification and management of a broad range of common health problems including health promotion in various clinical settings. Graded S/U. COREQ: NURS 6642.
PREREQ: NURS 6611, NURS 6611L, and PHAR 6645.

NURS 6643 Primary Care of the Child and Adolescent: 3 semester hours.
Management and evaluation of primary care problems of children, adolescents and their families in a variety of ambulatory settings. The initiation of health promotion and health maintenance activities is stressed. COREQ: NURS 6643L.
PREREQ: NURS 6642 and NURS 6642L.

NURS 6643L Primary Care of the Child and Adolescent Lab: 2 semester hours.
Delivery of advanced nursing care to children and adolescents and their families. Clinical application of theoretical knowledge with ongoing refinement of essential skills used by nurse practitioners in primary health care. Identification and management of a broad range of common health problems including health promotion in various clinical settings. Graded S/U. COREQ: NURS 6643.
PREREQ: NURS 6642 and NURS 6642L.

NURS 6644 Primary Care of the Middle and Older Adult: 3 semester hours.
Management and evaluation of primary care problems of middle and older adults, including acute episodic and chronic illnesses. The initiation of health promotion and maintenance activities is stressed. COREQ: NURS 6644L. PREREQ: NURS 6642 and NURS 6642L.

NURS 6644L Primary Care of the Middle and Older Adult Lab: 2 semester hours.
Delivery of advanced nursing care to middle and older adults and their families. Clinical application of theoretical knowledge with ongoing refinement of essential skills used by nurse practitioners in primary health care. Identification and management of a broad range of common health problems including health promotion in various clinical settings. Graded S/U. COREQ: NURS 6644.
PREREQ: NURS 6642 and NURS 6642L.

NURS 6647 Advanced Practicum in Nursing Education: 6 semester hours.
Application of learning theories, strategies and evaluation in a nursing program. The learners will explore and practice various facets of the faculty role. Graded S/ U. PREREQ: NURS 6633, NURS 6635, and NURS 6639. COREQ: NURS 6640.

NURS 6655 Advanced Leadership: 3 semester hours.
Examination of nursing leadership in the advanced nursing role in the complex health care system. Application of leadership principles and practices for improving health care systems at the local, regional, and global level.

NURS 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

NURS 7720 Professional Issues of the DNP: 3 semester hours.
Introduction to DNP-related professional issues including DNP background, APRN role development, and interprofessional practice. Exploration of current and emerging healthcare issues.

NURS 7723 Health Promotion for Advanced Practice Nurses: 3 semester hours.
Critical examination and implementation of therapeutic interventions employed in disease prevention and health maintenance, protection, promotion, and restoration across age and culture in various populations, with focus on the role of the advanced practice nurse in primary care. PREREQ: NURS 6600, NURS 6611 and NURS 6611L, PHAR 6645.
NURS 7725 Informational Technology in Health Care: 2 semester hours. Application of technologies and information systems to evaluate and improve health care outcomes. Exploration of information technologies in clinical practice, education, research, and administration will be emphasized with a focus on transformation of data into information.

NURS 7735 Statistical Analysis in Evidence Based Practice: 3 semester hours. Exploration of bio-statistical methods used in implementing and evaluating health care-related research. Legal and ethical issues in research are addressed. PREREQ: NURS 6610.

NURS 7740 Primary Care Throughout the Life Span FNP: 1 semester hour. Integration of advanced nursing care for patients and families across the lifespan. Application and evaluation of primary care management of complex diagnoses and system foci. PREREQ: NURS 6642 and NURS 6642L, NURS 6643 and NURS 6643L, NURS 6644 and NURS 6644L, and NURS 7723. COREQ: NURS 7740L.

NURS 7740L Primary Care Throughout the Life Span Lab FNP: 4-5 semester hours. Delivery of advanced nursing care to patients and families across the lifespan. Clinical application and evaluation of theoretical knowledge and skills used by the nurse practitioner in primary health care at a more complex level. Includes focus on systems individualized by each student. PREREQ: NURS 6642 and NURS 6642L, NURS 6643 AND NURS 6643L, NURS 6644 and NURS 6644L, and NURS 7723. COREQ: NURS 7740.

NURS 7745 Adult Psychiatric Mental Health: 3 semester hours. Assessment, diagnosis, treatment, planning, evaluation and documentation of common mental health problems and major psychiatric disorders of adulthood. COREQ: NURS 7745L. PREREQ: NURS 6611/6611L and PHAR 6645.

NURS 7745L Adult Psychiatric Mental Health Lab: 2-4 semester hours. Clinical application and evaluation of theoretical knowledge, evidence, and skills used by the PMHNP in caring for the adult in varied care settings. COREQ: NURS 7745. PREREQ: NURS 6611/6611L and PHAR 6645.

NURS 7755 Child/Adolescent Psychiatric Mental Health: 3 semester hours. Assessment, diagnosis, treatment, planning, evaluation and documentation of common mental health problems and major psychiatric disorders of the child and adolescent. COREQ: NURS 7755L. PREREQ: NURS 6611/6611L, PHAR 6645, NURS 7723, NURS 7745, and NURS 7745L.

NURS 7755L Child/Adolescent Psychiatric Mental Health Practicum: 4 semester hours. Clinical application and evaluation of theoretical knowledge, evidence and skills used by the PMHNP in caring for the child/adolescent in varied care settings. COREQ: NURS 7755. PREREQ: NURS 6611/6611L, PHAR 6645, NURS 7723, NURS 7745, and NURS 7745L.

NURS 7760 Professional Issues of the DNP II: 3 semester hours. Integration of DNP-related professional issues including the APRN's role in the initiation and evaluation of change in patient care, interprofessional practice and current and emerging health care issues. Transition into the APRN role is emphasized. PREREQ: NURS 7720.

NURS 7780L FNP Practicum: 4-6 semester hours. Application of theoretical content, research findings and intervention strategies to advanced nursing practice in both rural and non-rural settings. PREREQ: NURS 7723, NURS 6642 and NURS 6642L, NURS 6643 and NURS 6643L, NURS 6644 and NURS 6644L, and NURS 8809.

NURS 7790 DNP Scholarly Project: 2-3 semester hours. Synthesis of scientific evidence and theoretical principles to improve health care outcomes. Incorporation of knowledge of current and emerging health care technologies to improve care delivery and organizational systems for groups and populations. Requires a minimum of six credit hours over four semesters. May be repeated.

NURS 7795 Individual, Group, and Brief Therapies: 4 semester hours. Survey of current, brief, psychodynamic, cognitive behavioral, and interpersonal therapy models applied to individuals and groups. Developing a therapeutic alliance, and viewing the client from a developmental and sociocultural context will be examined. PREREQ: NURS 6611/6611L, PHAR 6645, NURS 7723, NURS 7745, NURS 7745L, NURS 7755, NURS 7755L. COREQ: NURS 7795L.

NURS 7795L Individual, Group, and Brief Therapies Lab: 4 semester hours. Synthesis and application of current brief psychodynamic, cognitive behavioral, and interpersonal therapy models applied to individuals and groups. Development of skills for building a therapeutic alliance and viewing the patient from a developmental and sociocultural context will be examined. COREQ: NURS 7795.

NURS 7798 PMHNP Advanced Practicum: 4-6 semester hours. Synthesis and application of PMHNP role, knowledge, and skills in select areas of family psychiatric mental health practice. PREREQ: NURS 6611/6611L, PHAR 6645, NURS 7723, NURS 7745, NURS 7745L, NURS 7755, NURS 7755L.

NURS 8805 Philosophy of Nursing Science and the Role of the Nurse Researcher: 3 semester hours. This course is designed to give the doctoral student an overview of scientific philosophy, philosophy of nursing, and the role of the nurse researcher. The student will learn about the most influential philosophers and the patterns of knowing, and responsibilities of a nurse researcher within the scientific community, academia, and the world.

NURS 8808 Theoretical and Conceptual Analysis in Nursing Science: 3 semester hours. This course focuses on the relationship of theory to research with an emphasis on applying theory in the design, implementation, and interpretation of research. Students will develop an understanding of the evaluation of theory, utility in research and ability to compare research strategies from different theoretical perspectives.

NURS 8809 Research and Practice in Rural and Global Communities: 2 semester hours. This course explores rural culture using theories, frameworks and methodologies in nursing and from various disciplines. It focuses on diversity and culturally responsive methodologies. Rural life is analyzed to explore factors related to health systems and health care delivery across communities.

NURS 8813 Qualitative Inquiry and Analysis: 3 semester hours. The course examines qualitative design, methods and analyses. Emphasis is placed on the appropriateness of each approach for description and explanation of phenomena encountered in clinical, organizational and educational settings, and in the conduct of the analysis of qualitative data. Qualitative methods such as phenomenology, grounded theory, and ethnography, among others will be discussed.

NURS 8814 Statistical Methods in Health Research I: 3 semester hours. The focus of this course is on the student's ability to conduct, report, and interpret commonly used descriptive and inferential statistics for continuous and categorical outcomes such as t-tests, chi-square tests, analysis of variance and covariance, and generalized linear models. Statistical software will be used to conduct quantitative data analysis.

NURS 8815 Statistical Methods in Health Research II: 3 semester hours. The focus of this course is to expand the student's ability to conduct, report and interpret the results of generalized linear models and commonly used statistical procedures of data reduction and discrimination such as principal component analysis and factor analysis, among others. Statistical software will be utilized to conduct quantitative data analysis. PREREQ: NURS 8814
NURS 8816 Quantitative Inquiry and Analysis: 3 semester hours.
The focus of this course is on the design, methods, and analysis of quantitative health research. Emphasis in strengths and limitations of the most commonly used primary study devices including observational, experimental, and quasi-experimental, and secondary methods such as systematic reviews will be discussed, as well as the associated statistical analysis. Statistical software will be utilized to conduct quantitative data analysis. PREREQ: NURS 8814, CO-REQ or PREREQ NURS 8815.

NURS 8820 Ethics in Nursing Research: 3 semester hours.
This course provides in-depth learning of the ethics involved in conducting human subjects' research in the health care field. Federal regulations, IRB review, conflict of interest and other considerations involved in conducting research in an ethical manner will be covered.

NURS 8825 Research and Grant Writing: 3 semester hours.
Research process applied to grant funding exploration, and the development of grant writing skills for accomplishing funding for the dissertation through grant proposal preparation and submission.

NURS 8826 Approaches to Scholarly Writing: 2 semester hours.
Explore process of scholarly writing, and strategies for dissemination including publication in peer-reviewed journals among other avenues for building the nursing knowledge base.

NURS 8830 Current Trends in Research Design and Methods: 3 semester hours.
The focus of this course is to introduce the student to additional research designs and methods used in nursing research such as mixed methods, trajectory research, translational, meta-analysis, clinimetrics, and community-based participatory research will be discussed, among others. The class will explore each design/method, reasons for using and limitations. Examplars of published studies will be examined. PREREQ: NURS 8813, NURS 8816

NURS 8840 Leadership and Health Policy: 3 semester hours.
Analysis of policy research relevant to health care access, affordability, delivery, finance and integrated care systems. Students will evaluate effects of local, regional, national and international systems of health care delivery. This course focuses on the role of the nurse leader in policy development and professional practice. The leadership role in nursing to promote health policy initiatives in facilitating change will be emphasized.

NURS 8881 Research Seminar I: 3 semester hours.
The student will develop the statement of the problem, research questions, and beginning literature review for the dissertation.

NURS 8882 Research Seminar II: 1-2 semester hours.
The student will conduct a comprehensive literature review and develop the conceptual or theoretical framework for the dissertation. PREREQ NURS 8881.

NURS 8883 Research Seminar III: 1-2 semester hours.
The student will develop research methodology for the dissertation in the quantitative and qualitative, or mixed method paradigm. PREREQ NURS 8882.

NURS 8890 Dissertation: 1-12 semester hours.
Completion of original research.

NURS 8899 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times with the same title and content.
Physician Assistant Studies

Chair and Program Director: Phelps
Associate Director: Sparrell
Medical Director: Anstett, D’Souza, McClusky
Associate Professors: Phelps
Assistant Professors: Forbes, Hall, Johnson, Martin, Mirly, Nelson, Papa, Sierra, Smith, Talford
Clinical Instructor: Allen

www.isu.edu/paprog

Master of Physician Assistant Studies (MPAS)

Physician Assistants (PAs) are highly skilled health practitioners who work under physician supervision to provide patient care services. PAs take complete medical histories, perform physical examinations, order and interpret diagnostic studies, such as laboratory tests and x-rays, diagnose and treat patients. Physician Assistants improve the accessibility of health care of under-served individuals in both urban and rural settings. The Physician Assistant Program at Idaho State University is the only PA Program in the state of Idaho.

The Program

The Physician Assistant (PA) Program at Idaho State University awards the Master's of Physician Assistant Studies (MPAS) degree and a PA certificate upon successful completion of its 24 month graduate curriculum. A class of 72 students is enrolled each fall semester with 30 seats located at the Pocatello campus, 30 seats located at the Meridian campus, and 12 seats located at the College of Idaho campus in Caldwell.

The program maintains continued accreditation by the Accreditation Review Commission on Education for the Physician Assistant, Inc., (ARC-PA). Graduates of the program are eligible to take the Physician Assistant National Certification Examination (PANCE) which is administered by the National Commission for Certification of Physician Assistants (NCCPA).

Vision & Mission

Idaho State University Department of Physician Assistant Studies is the preferred educational destination for individuals who desire to be trained in a student-centered, service-oriented environment.

The mission of the Idaho State Physician Assistant program is to train PAs through service-oriented, multimodal, innovative learning. Graduates from ISU’s PA Program will be highly competent, compassionate health care providers dedicated to serving individuals and their communities.

Admission Requirements

1. Baccalaureate Degree: A Baccalaureate degree needs to be completed by June 30th of the year you plan to enter the PA Studies program. It must be from a regionally accredited U.S. institute of higher learning.
2. Prerequisite Courses: Required courses must also be completed at a regionally accredited U.S. institute of higher learning. The required prerequisite courses are:
   - Microbiology
   - Biochemistry
   - Human Anatomy (as a single course or as part of a two semester combined anatomy and physiology course)
   - Human Physiology (as a single course or as part of a two semester combined anatomy and physiology course)
   - Statistics
   - Abnormal Psychology (or Developmental Psychology throughout the Lifespan)

Applicants must have a minimum cumulative prerequisite grade point average of 3.0 as well as a minimum grade of C in all prerequisite courses (listed above). Course work ten years or older is not accepted as prerequisite coursework. Applicants may have up to two prerequisite courses in progress during spring of the year they plan to enter the program. This course work and any degree work must be completed by June 30 of the year of admission.

Highly Recommended Upper Level Biology Courses
(Note: This is not meant to be all inclusive and includes suggestions only.)

- Other health-related courses from departments such as Psychology, Sociology, Anthropology, Health Education, and Gender Studies.
- Proficiency in a foreign language, especially Spanish

Additional considerations for admission include:

- Maturity
- Work and health care experience
- Evidence of the ability to achieve academic success in a rigorous academic program
- Interpersonal skills and the ability to relate effectively with patients, peers and at a professional level
- Evidence of a desire to practice primary care in Idaho, particularly among the medically underserved
Required Applications

Central Application Services for Physician Assistants (https://caspa.liaisoncas.com/)

The CASPA application must be completed by the PA program application deadline of November 1. As part of the CASPA application process you will be required to submit three letters of recommendations and official transcripts.

Graduate Record Exam (GRE) (http://www.ets.org)

The GRE is an important admission requirement as the scores are used for ranking applicants. Please go to ETS website for information about testing locations and scheduling the exam.

The GRE must be taken by November 1. The ISU GRE School Code is 4355 and the Department Code is 0634.

ISU Graduate School Application (www.isu.edu/graduate)

The ISU Graduate School application (also called the “Supplemental Application”) is required for admission to the PA program. When applying to the Graduate School, select the Fall semester. Please refer to the ISU Graduate School for information regarding the application, requirements, and fees.

CASPA DOES NOT forward transcripts to the Graduate School or the PA program. A separate set of official transcripts must be requested for ISU’s Graduate School.

Official transcripts are to be sent directly to the Graduate School at the following address:

ISU Graduate School
921 S 8th Ave, Stop 8075
Pocatello, ID 83209-8075

The Graduate School application deadline is November 1.

Technical Standards

All entering students must meet the required list of Technical Standards. A complete list of technical standards covering essential capacities for observation, communication, sensory and motor function, intellectual, conceptual, integrative and quantitative abilities, behavioral and social attributes, and other student performance requirements is available from the program or on the program’s website at http://www.isu.edu/paprog/technical-standards.shtml.

Curriculum

The ISU PA Program Graduate Curriculum is twenty-four (24) months in length, divided into twelve (12) months of didactic (3 semesters) and twelve (12) months of clinical education (3 semesters).

The Didactic Curriculum is comprised of foundation courses in the fall semester, followed in the spring and summer semesters by modules that provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine.

Elective course work in Medical Spanish is available to Physician Assistant students. The Department of Languages & Literatures offers a graduate certificate in Spanish for Health Professions along with other elective courses. This is an excellent opportunity for students as well as graduates to enhance their credentials.

Clinical Year Rotation goals are designed to meet the needs of the student and to address the Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA) accreditation standards. The Clinical Year staff places students in eight rotations which best address PA student educational objectives and at sites which promote continued, quality, preceptor relations with the ISU PA Program. There are seven required content areas which include Internal Medicine, Outpatient Medicine, Obstetrics and Gynecology, Pediatrics, Emergency Medicine, Surgery and Psychiatry. One rotation will be an elective. Students are expected to travel during the clinical year and to pay for the expenses incurred for this travel.

There are three Capstone Assessment Courses in the second year of the PA Program. Together they represent a comprehensive assessment of the students. The Capstone Assessment III course is the third one in the series and students are required to study for and pass multiple objective examinations.

Medical Spanish elective offerings available to MPAS students

The Department of Languages and Literatures, in cooperation with the Division of Health Sciences, has created a new cooperative, interdisciplinary major in Spanish for the Health Professions (SHP), as well as a SHP graduate certificate. The hybrid undergraduate degree and graduate certificate are designed to increase graduate marketability and to better serve the health care needs of our state, region, and country.

Matriculated PA students may take individual SHP courses or pursue a Graduate Certificate in SHP. Dr. Helen Tarp, Director of the SHP Program has a joint appointment with the Department of Languages and Literature and the Department of PAS. She teaches regularly scheduled Spanish courses for PAS students during the Didactic Year as well as other Spanish coursework in the Literature and Languages Department.

Access to individual Spanish for Health Professions courses

Theses SHP courses are designed to be flexible enough to fit a PA student’s schedule and also enhance what the PA student is learning in the MPAS curriculum. Here are examples of the course offerings: SPAN 5594 Topics in Language and Culture for the Professions I (1-3 cr), and SPAN 5595 Topics in Language and Culture for the Professions II (1-3 cr) are variable-credit courses covering special topics such as Spanish Medical Terminology, Spanish for Pharmacy, for OB/GYN, Diabetes Management, Oral Health, Mental Health, Emergency Room/Trauma, the Physical Exam, and Nutrition. These courses are hybrid courses combining online coursework and a workshop experience with mock patients. SPAN 5501, Spanish for the Physician Assistant, is an eight week-course designed specifically for PAS to enable students to conduct a medical history and physical exam for a Spanish-speaking patient. PA students wishing to take these courses S/U may take them as undergraduate courses (SPAN 4494, SPAN 4495, SPAN 4499). A more complete listing of the individual courses can be found at: http://www.isu.edu/foreign/hcp_currentofferings.shtml.

Graduate Certificate in SHP (minimum of 9 credits)

Coursework credits counting toward the Graduate Certificate can be earned by PAS coursework/clinical rotations, as well as coursework and experience obtained after graduation from the PA program while continuing pursuit of the Certificate. There are three core areas of instruction: the Language Core, Health Professions Core, and Culture Core. The assessments in the three cores of instruction are designed to provide students with a thorough grounding in all three areas, and to have their proficiency be a significant, tangible contribution to their MPAS degree. The Department of Languages and Literature provides the Language Core and elements of the Culture Core which are delivered by faculty with qualifications in medical interpretation and translation. The Culture Core and diversity courses are provided by several departments in the College of Arts and Letters. For more details see: http://www.isu.edu/foreign/curriculum.shtml.

International Rotation and Medical Mission experiences

In addition to course offerings and the Graduate Certificate in SHP, MPAS students are eligible to participate in two medical missions to Spanish-speaking countries (Dominican Republic and Peru) and an international clinical rotation in Belize. These international experiences are strictly voluntary. SHP credit (SPAN 5593 Spanish Internship, SPAN 5505 Spanish Exchange, or SPAN 5580 Special Topics) is available for these experiences.

Courses

PAS 5589 Individual Problems in PAS: 1-3 semester hours.
Assigned on the basis of interest, preparation, and faculty availability. Participation in this course in no way influences opportunity to be accepted into the PA Program. May be repeated for up to 3 credits. PREREQ: Approval of PA Director.

PAS 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

PAS 6601 Introduction to Physician Assistant: 7 semester hours.
Provides an introduction to the physician assistant profession, health promotion/disease prevention, medical ethics, medical imaging, laboratory medicine, and medical decision-making.

PAS 6602 Evidence-Based Medicine and Biostatistics: 3 semester hours.
Emphasizes use of current research evidence in medical decision-making, a practice known as evidence-based medicine. Topics include critical analysis of the medical literature, biostatistics, and application of EBM to patient care.

PAS 6603 Clinical Assessment: 6 semester hours.
Provides an introduction to medical interviewing and techniques for performing and recording a complete medical history and physical examination.

PAS 6604 Pharmacology: 2 semester hours.
An introduction to foundational concepts of therapeutic pharmacology, with emphasis on pharmacokinetics and pharmacodynamics.

PAS 6630 Allergy and Immunology Module: 1 semester hour.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6631 Infectious Disease Module: 2 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6632 Hematology and Oncology Module: 2 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6633 Endocrinology Module: 2 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6634 Renal Module: 2 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6635 Pulmonary Module: 3 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.
PAS 6636 Cardiology Module: 4 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6637 Gastroenterology Module: 4 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6638 ENT Module: 2 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6639 Dermatology Module: 2 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6640 Rheumatology Module: 2 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6641 Orthopedics Module: 2 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6642 Psychiatry Module: 3 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6643 Genitourinary Module: 4 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6644 Ophthalmology Module: 1 semester hour.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6645 Neurology Module: 2 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6647 Human Sexuality Module: 1 semester hour.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6648 Women's Health Module: 1 semester hour.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6649 Mens Health and Urology Module: 1 semester hour.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6650 Obstetrics and Perinatology Module: 1 semester hour.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6651 Pediatrics Module: 2 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6652 Geriatrics Module: 1 semester hour.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6653 Surgery Module: 2 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6654 Emergency Medicine Module: 8 semester hours.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6655 Alternative and Occupational Medicine Module: 1 semester hour.
Lectures, laboratory practicum, problem-based learning, small group discussions, research methods, evidence-based medicine, and service learning are integrated to provide an immersion experience in the diagnosis and treatment of diseases commonly encountered in primary care medicine. May be graded S/U.

PAS 6656 Complementary Evaluation: 1 semester hour.
An end-of-didactic-year comprehensive evaluation of the physician assistant student’s knowledge, skills, abilities, and professional behavior. The student must receive a grade of satisfactory in order to progress to the clinical year of the program.

PAS 6660 Clinical Rotation I: 4 semester hours.
Supervised clinical practicum in medical practice settings. PREREQ: Successful completion of all PAS didactic year requirements.

PAS 6661 Clinical Rotation I: 4 semester hours.
Supervised clinical practicum in primary care or specialty care in medical practice settings. Graded S/U. PREREQ: Successful completion of all PAS didactic year requirements.

PAS 6662 Clinical Rotation II: 4 semester hours.
PAS 6663 Clinical Rotation III: 4 semester hours.

PAS 6664 Clinical Rotation IV: 4 semester hours.

PAS 6665 Clinical Rotation V: 4 semester hours.

PAS 6666 Clinical Rotation VI: 4 semester hours.

PAS 6667 Clinical Rotation VII: 4 semester hours.

PAS 6668 Clinical Rotation VIII: 4 semester hours.

PAS 6671 Capstone Assessment I: 1 semester hour.
There are three Capstone Assessment courses in the second year of the PA program. Together they represent a comprehensive assessment of the students. Capstone Assessment I course is the first one in the series and students are required to study for and pass multiple objective examinations.

PAS 6672 Capstone Assessment II: 2 semester hours.
There are three Capstone Assessment courses in the second year of the PA program. Together they represent a comprehensive assessment of the students. Capstone Assessment II course is the second one in the series and students are required to study for and pass multiple objective examinations. Additionally they are required to complete and present a medical case study under the direction of the PA program faculty.

PAS 6673 Capstone Assessment III: 1 semester hour.
There are three Capstone Assessment courses in the second year of the PA program. Together they represent a comprehensive assessment of the students. The Capstone Assessment III course is the third one in the series and students are required to study for and pass multiple objective examinations.

PAS 6689 Graduate Special Topics: 1-4 semester hours.
Special topics in specific areas of physician assistant studies which may include didactic and/or clinical studies. May be repeated up to 14 credits.

PAS 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.
Family Medicine Residency Program

The Idaho State University Family Practice Residency is a postgraduate training program for physicians who have an M.D. or D.O. degree. The program is affiliated with the medical schools of the University of Washington and the University of Utah and is accredited by the Accreditation Council for Graduate Medical Education. The Healthwest Pocatello Family Medicine Clinic, located on the Idaho State University campus, is the outpatient training site; hospital rotations are scheduled at Portneuf Medical Center.

Accepting seven residents per year, the program trains Family Physicians to practice in rural Idaho. The curriculum includes family medicine, obstetrics/gynecology, surgery, internal medicine, pediatrics, geriatrics, emergency medicine, community medicine, behavioral science, rural medicine, orthopedics, and other subspecialities.

Communication Sciences and Disorders

Devine, Associate Dean and Director, School of Rehabilitation and Communication Sciences
Chair and Professor: Kangas
Associate Chair and Professor: Johnson
Professor Emeritus: Seikel
Associate Professors: Brockett, Sanford
Assistant Professors: Altieri, Bargen, Blaiser, Hudock, Ogiela, Ramsdell-Hudock
Clinical Professor: Guryan, Holst, Loftin, Whitaker
Clinical Associate Professor: O’Donnell, S. Smith
Clinical Assistant Professors: Cheadle, Hansen, Hardy, Miller, E. Morgan, W. Morgan, Pierce Ament, C. Smith, Stubbs, Tucker, Ulrich, Van Donsel, Wilding

Accreditation
The Doctor of Audiology (Au.D.) and the Master of Science in Speech-Language Pathology (M.S.) are accredited by the Council on Academic Accreditation (CAA) in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700 (http://www.asha.org/academic/).

Degree Programs
Degree programs offered by the Department of Communication Sciences and Disorders include:

Doctor of Audiology (Au.D.)
Master of Science in Speech-Language Pathology (M.S.)

Doctor of Audiology (Au.D.)

Admission Requirements
For admission to the Doctor of Audiology program, the applicant must:

1. Have an earned Baccalaureate degree with a major in Communication Sciences and Disorders, or a Baccalaureate degree in any major with equivalent Post-Baccalaureate coursework in Communication Sciences and Disorders.
2. Possess a 3.0 or higher GPA. The method of calculating an Admission GPA is based on the last 60± semester undergraduate credits (90± quarter credits) for coursework taken during the last two years of undergraduate training. Post-Baccalaureate coursework in Communication Sciences and Disorders will be considered in computing GPA.
3. Obtain score of 40th percentile or better on at least one area of the GRE.
4. Submit three letters of recommendation.
5. Apply through Communication Sciences and Disorders Centralized Application Service at: https://csdcas.liaisoncas.com/applicant-ux/#/login.
6. Apply to, and meet all criteria for, admission to Graduate School.

International Students
International students whose native language is not English must achieve at least the 50th percentile on the Verbal section of the GRE. Applicants whose first language is not English need to meet the following TOEFL requirements for Classified admission:

1. Internet-based test (iBT): a total score of 80 with a score of at least 20 on each Section (graduate assistants who teach courses must score 23 or above on the Speaking Section) on the iBT; or
2. Computer-based test: a total score of 213 with a score of at least 21 on Section 1 (Listening Comprehension) on the computer test; or
3. Paper-based test: a total score of 550 with a score of at least 55 on Section 1 (Listening Comprehension) on the paper test or a score of 84 on the MTELP, or a score of 6 on the IELTS. Once admitted, non-native English-speaking students must also receive a passing score on a test of spoken English to participate in clinic.

We do not accept IIEI nor ELS in lieu of TOEFL/IELTS.

Program Capacity
An average of 24 students are in the program at any time. The number of seats available for each new cohort will vary. On average six (6) students are admitted per year. Classes begin in the Fall Semester of each year. Meeting entry-level requirements for admission does not guarantee a seat in the program.

Curriculum
The curriculum is four years in duration, and includes one year (fourth year) of full-time clinical practicum. There are eight regular (fall and spring) semesters and three summer semesters. For the third year, students will be required to relocate to the ISU Meridian campus to continue their academic and clinical instruction in a robust audiology community. Students will assume the financial, housing, and logistical responsibilities of the relocation.

Doctor of Audiology (Au.D.) (Regular 4 year)

1 or CSD 6691 if IET was taken as an undergraduate
2 If a student has not taken IET, she/he may take it as a graduate student

General Requirements

Students receiving the degree of Doctor of Audiology must have satisfactorily completed all courses in the curriculum and passed all clinical practicum assignments. In addition, in the fall semester of the third year, the student must pass the written comprehensive examination, and then in the spring, an oral comprehensive examination that includes defense of the doctoral project. Students must take and pass the national Praxis prior to beginning the fourth year. According to university regulations, no student may be granted a graduate degree who does not have a 3.0 grade point average for courses listed on the Program of Study upon completion of all academic work. The Department of Communication Sciences and Disorders will terminate the graduate program of any student who has received grades of C+ or lower in two or more departmental courses, or if the cumulative GPA falls below 2.7 in the first year of study, or 3.0 by the completion of graduate studies. If a student's graduate education is terminated for reasons of poor academic performance, the student may reapply for admission no sooner than one full semester following the semester of dismissal.

Additionally, graduate students deemed by the faculty not to have made satisfactory progress in the acquisition of clinical skills may be required to enroll for further credits in clinical practicum in addition to the minimum required of all students. Students may be dismissed for failure to make satisfactory progress in clinical practicum.

Master of Science in Speech-Language Pathology

Admission Requirements

For admission to the M.S. degree program in Speech-Language Pathology the applicant must:

1. Have an earned Baccalaureate degree with a major in communication sciences and disorders, or a Baccalaureate degree in any major with equivalent Post-Baccalaureate coursework in communication sciences and disorders.
2. Possess a 3.0 or higher GPA. The method of calculating an Admission GPA is based on the last 60+ semester undergraduate credits (90+ quarter credits) for coursework taken during the last two years of undergraduate training. Post-Baccalaureate coursework in communication sciences and disorders will be considered in computing GPA.
3. Obtain score of 40th Percentile or better on at least one area of the GRE.
4. Submit three letters of recommendation.
6. Apply to, and meet all criteria for, admission to Graduate School.

International Students

International students whose native language is not English must achieve at least the 50th percentile on the Verbal section of the GRE. Applicants whose first language is not English need to meet the following TOEFL requirements for Classified admission:

1. Internet based test (iBT): a total score of 80 with a score of at least 20 on each Section (graduate assistants who teach courses must score 23 or above on the Speaking Section) on the iBT; or
2. Computer-based test: a total score of 213 with a score of at least 21 on Section 1 (Listening Comprehension) on the computer test; or
3. Paper-based test: a total score of 550 with a score of at least 55 on Section 1 (Listening Comprehension) on the paper test or a score of 84 on the MTELP, or a score of 6 on the IELTS. Once admitted, non-native English-speaking students must also receive a passing score on a test of spoken English to participate in clinic.

*We do not accept IEI nor ELS in lieu of TOEFL/IELTS.

Note that an adequate undergraduate background is assumed for entry to the graduate curriculum in speech-language pathology. When meeting with an advisor, if deficiencies are found, such as lack of a basic course, the student may be required to make up the course. An advisor must be consulted during registration week. Note also that an undergraduate or graduate course in statistics or experimental design is required if not previously taken in an undergraduate program, as is CSD 5517 Interdisciplinary Evaluation Team.

Students in the Graduate Program in Speech-Language Pathology must have the following ISU courses or their equivalents from another institution, or provide evidence from course syllabi that the basic information was covered in their undergraduate program. Certain of these courses may be taken during the graduate program.

CSD 3315  Clinical Processes Pediatric  3  
CSD 3321  Clinical Phonetics and Phonology  3  
CSD 3321L  Clinical Phonetics and Phonology Lab  1  
CSD 3325  Speech Sound Development and Disorders  3  
CSD 3330  Language Science and Development  3  
CSD 3335  Language Disorders  3  
CSD 3341  Audiology and Hearing Science  3  
CSD 4405  Neuroscience for Communication Disorders  3  
CSD 4417  Interdisciplinary Evaluation Team  1  
CSD 4420  Clinical Processes Adult  3  
CSD 4435  Speech and Hearing Science  3  
CSD 4435L  Speech and Hearing Science Laboratory  1  
CSD 4445  Aural Rehabilitation  3  
CSD 4460  Educational Audiology  3  

General Requirements

Students must pass written and oral comprehensive examinations. For the Master of Science in Speech-Language Pathology the written exam may be fulfilled by either a portfolio or a thesis.

According to the university regulations, no student may be granted a graduate degree who does not have a 3.0 grade point average for courses listed on the program of study upon completion of all academic work. In addition, the Department of Communication Sciences & Disorders will terminate the graduate program of any student who has received grades of C+ or lower, in two or more departmental courses, or if the cumulative GPA falls below 2.7 in the first year of study and 3.0 by the completion of graduate studies. If a student’s graduate education is terminated for reasons of poor academic performance, he/she may reapply for admission no sooner than one full semester following the semester of dismissal.

Students with inadequate backgrounds in speech pathology and audiology may be required to take up to one year of undergraduate course work in addition to the above courses. In addition to the required graduate courses, students may have to take other courses in the department and related areas such as psychology and statistics. In addition to taking clinical practice (CSD 6602, CSD 6603, or CSD 6604) in the department, all graduate students must complete a minimum of an eight-week, full-time externship in some professional program or agency. Exceptions may be made depending on the student’s background. Graduate students deemed by the faculty not to have made satisfactory progress in the acquisition of clinical skills may be required to enroll for further credits in clinical practice in addition to the minimum required of all students. Students may be dismissed for failure to make satisfactory progress in clinical practice.

Courses

CSD 5517 Interdisciplinary Evaluation Team: 1 semester hour.

CSD 5520 Clinical Processes Adult: 3 semester hours.

Diagnostic principles, procedures, tests and clinical examination in the evaluation of speech, language and hearing disorders. Covers norms, reliability and validity. PREREQ: PSYC 4445, CSD 3315, and Statistics and/or approval of instructor.

CSD 5540 Special Topics Workshop: 1-3 semester hours.

Presentation of professionally related topics in workshop format. Meets for a minimum of 16 contact hours per credit with appropriate outside assignments, readings, or papers. May be repeated for up to 6 credits. Graded S/U.

CSD 5560 Educational Audiology: 3 semester hours.

Overview of school-based audiology services and the educational audiology model of service provision including working within the public school system, legal issues, and options for providing comprehensive services to children with hearing loss and their families.

CSD 5570 Advanced Topics in Educational Audiology: 3 semester hours.

An in-depth study and application of audiological services for school age students, evaluation of laws pertaining to public school services, exploration of working with families and educational personnel, verification and validation of hearing assistive technology, and creation of evaluation protocols.

CSD 5580 Genetics for the Health Care Professionals: 2 semester hours.

An in-depth interdisciplinary review of the impact of genetics on patients and patient care and the biological, social, ethical, and legal issues surrounding genetics and genomics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. Equivalent to DHS 5580 and NURS 5580.

CSD 5582 Independent Study: 1-4 semester hours.

Study of problems selected by students and faculty. May be repeated for up to 8 credits.

CSD 5591 Seminar: 1-4 semester hours.

Reading, preparation, and discussion of reports and projects in all areas of speech and hearing science, speech pathology and audiology. May be repeated for up to 12 credits.

CSD 5597 Professional Education Development Topics: 1-3 semester hours.

A course for practicing professionals aimed at the development and improvement of skills. May be repeated. May not be applied to graduate degrees. May be graded S/U.

CSD 5599 Experimental Course: 1-6 semester hours.

This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.
CSD 6600 Principles of Research in Communication Disorders: 3 semester hours.
Methodology including quantitative and qualitative approaches to research and use of evidence-based practice. Use of informational resources to develop a research proposal. PREREQ: Statistics or permission of instructor.

CSD 6602 Clinical Practicum Speech-Language: 1-4 semester hours.
Students, under supervision, gain experience in the diagnosing, staffing, programming, and counseling of cases with speech and language disorders. May be repeated up to 16 credits. PREREQ: Approval of Clinic Director.

CSD 6602L Clinical Practicum Laboratory: 0 semester hours.
Weekly staffing, grand rounds discussion, and professional presentations of new trends in speech pathology.

CSD 6603 Clinical Practicum Audiology: 1-4 semester hours.
Students gain experience in diagnosing, programming, and counseling cases with hearing disorders, and implementing rehabilitation programs for persons with hearing losses. May be repeated for up to 13 credits. PREREQ: Approval of advisor and Audiology Clinic Coordinator. COREQ: CSD 6603L.

CSD 6603L Clinical Practicum Laboratory: 0 semester hours.
Weekly staffing, grand rounds discussion, and professional presentations of new trends in audiology. COREQ: CSD 6603.

CSD 6604 Off Campus Practicum: 1-4 semester hours.
Designed to provide clinical experience under supervision of speech-language pathologist within placement setting. Placements include private clinics, hospitals, residential care facilities, developmental centers, and schools. May be repeated for up to 16 credits. Graded S/U. PREREQ: Approval of Clinic Director.

CSD 6605 Externship in Audiology: 1-8 semester hours.
Eight week off-campus placement that can be split between two summers. Final approval is the responsibility of the clinic director. Each student should obtain a minimum of 100 clock hours of clinical experience per eight week externship. May be repeated. Graded S/U. COREQ: CSD 7705L. PREREQ: Clinic Director Approval.

CSD 6606 Externship in Speech Language Pathology: 1-9 semester hours.
Designed to give Speech-Language Pathology students full-time practical experience in a professional setting, i.e., schools, hospitals, clinics, and private practices. May be repeated for up to 18 credits. Graded S/U. PREREQ: Completion of academic program.

CSD 6611 Advanced Auditory Assessment and Speech Audiology: 4 semester hours.
Thorough study in the historical and clinical aspects of fundamental audiological procedures such as pure-tone air- and bone-conduction testing, speech audiometry, and masking.

CSD 6614 School Age Language Development and Disorders: 3 semester hours.
Advanced study of language development and disorders in school-age children and youth. Methods of assessing later language disorders in educational settings. PREREQ: CSD 6620.

CSD 6616 Augmentative and Alternative Communication: 3 semester hours.
Functional approaches to enhancing communication for people with severe disabilities. Includes introduction to electronic communication devices, low technology strategies, empowering clients, and inclusive practices. PREREQ: CSD 6620.

CSD 6620 Early Language Development and Disorders: 3 semester hours.
Study of language development and disorders in children (0-5 years of age). Includes theories of development and disorders, assessment and intervention of child and environment. PREREQ: CSD 3330 and CSD 3335 and/or equivalent.

CSD 6621 Aud Rehab and Amplification I: 3 semester hours.
Introduction to practice of audiologic rehabilitative patient care with an emphasis on acoustic hearing aids. Basic instrument design, component, and coupling features of various wearable amplification devices will be included. Assessment of patient candidacy, fitting protocols, and outcome measures.

CSD 6622 Speech Sound Disorders: 3 semester hours.
Characteristics of children with speech sound disorders. Current approaches to assessment and theoretically-based treatment of speech sound errors, including multicultural applications. PREREQ: CSD 3325 or permission of instructor.

CSD 6623 Pediatric Audiology: 3 semester hours.
Advanced study of hearing disorders and hearing test procedures in children. Topics include development of the auditory mechanism, auditory pathologies, developmental milestones, auditory testing, differential diagnosis, and management.

CSD 6624 Disorders of Swallowing: 3 semester hours.
Assessment and treatment of disorders associated with all stages of swallowing in adults and children. Includes oromotor functional, oral preparatory, oral, pharyngeal, and esophageal swallowing disorders.

CSD 6625 Advanced Issues in Language Disorders: 3 semester hours.
Critical issues in childhood language disorders including linguistic and cultural diversity, classroom-based strategies, and children with mental retardation, autism, learning disability and deafness. PREREQ: CSD 6614 or equivalent.

CSD 6626 Introduction to Balance Function Assessment: 1 semester hour.
Introduction to the assessment of the patient with dizziness and/or balance concerns. Emphasis will be on videonystagmography procedures, interpretation of findings, and communication to the referral source.

CSD 6629 Neuropathologies of Speech: 3 semester hours.
Examines etiologies, characteristics, assessment and treatment of dysarthria, apraxia, and right-hemisphere dysfunction. PREREQ: CSD 4405 or permission of instructor.

CSD 6630 Fluency Disorders in Children and Adults: 3 semester hours.
Advanced study of assessment and treatment for fluency disorders in adults and children. Includes theory, developmental issues, cluttering, and specific treatment for adults and children.

CSD 6631 Immittance/Special Assessment: 3 semester hours.
Study of immittance and other special audiological tests used in site of lesion (differential) diagnostic work ups. Background, rationale, administration, and interpretations of immittance and other special tests will be considered along with the concept of Clinical Decision Analysis (CDA).

CSD 6632 Craniofacial Anomalies: 2 semester hours.
Consideration of the speech-language pathologist's role in the habilitation of patients with craniofacial anomalies. Clefts of the lip and palate are discussed. Team approaches to assessment and management are presented.

CSD 6633 Introduction to Evoked Potential Audiology: 3 semester hours.
Introduction to the study of evoked potential audiology and otoacoustic emissions. Emphasis will be on the physiologic processes and instrumentation.

CSD 6634 Voice Disorders: 2 semester hours.

CSD 6636 Medical/School Practice in Speech Language Pathology: 3 semester hours.
Examines methods and practices specific to medical and school settings. Includes billing procedures, record keeping, referral procedures, ethics, treatment models related to settings, caseload management, Interdisciplinary Education program requirements, legal mandates, collaborative strategies, and inclusive practices. PREREQ: CSD 6614 or CSD 6639 or equivalent.
CSD 6639 Neurogenic Disorders of Language and Cognition: 3 semester hours.
Etiologies, characteristics, assessments, and treatment of aphasia, traumatic brain injury, and dementia.

CSD 6641 Aud Rehab and Amplification II: 3 semester hours.
Continued review of amplification technology focused on advanced signal processing, prescriptive fitting rationales, verification/validation methodologies, and programming software. Patient orientation, programming adjustments, and hearing aid repair will also be covered with experiential learning activities.

CSD 6643 Aural Rehab and Cochlear Implants: 3 semester hours.
Directed classroom instruction and clinical experience with implantable hearing technologies and with cochlear implants. Current hardware and software and approaches to assessment, fitting, and rehabilitation of implanted adults and children. Lab instruction on current manufacturer devices and software will also be covered in this course.

CSD 6644 Implantable Technologies: 1 semester hour.
Directed classroom instruction and clinical experience with Middle Ear Implants, Acoustic Implants, Bone Anchored Hearing Appliances, Auditory Brainstem Implants, and Vestibular Implants. Current candidacy requirements, assessment procedures, technology, surgery implications, fittings, and rehabilitation for children and adults. There will also be lab opportunities for Bone Anchored Hearing Aid Application software, candidacy, and fittings.

CSD 6645 Auditory Anatomy and Physiology: 2 semester hours.
Comprehensive treatment of the anatomy, physiology, and neuroanatomy of the auditory system from the outer ear to the auditory cortex.

CSD 6646 Central Auditory Processing: 2 semester hours.
This course will review the anatomical and neurophysical aspects of auditory processing. The nature and causes of auditory processing disorders in children and adults will be discussed including disorder symptoms, assessment, treatment, clinical management and referrals. The impact of auditory processing disorders on language and learning will be discussed as well as differential diagnosis, the collaborative model, counseling, and advocacy.

CSD 6647 Auditory Physiology of Speech and Non-Speech Signals: 2 semester hours.
Continuation of advanced study of the auditory system, including central pathways, auditory perception of speech and non-speech signals, and psychoacoustics, with focus on pitch and loudness phenomenon, masking, and binaural effect. PREREQ: CSD 6645.

CSD 6648 Professional Issues in Speech Language Pathology: 3 semester hours.
Advanced preparation for professional practice in speech-language pathology. Includes study of policies and practices in employment settings, service delivery models, ethics, counseling, and supervision. PREREQ: Two semesters of CSD 6602.

CSD 6650 Thesis: 1-4 semester hours.
Research project under supervision of academic faculty member. May be repeated. Graded S/U. PREREQ: Ability to deal with technical literature, proven writing ability; approval of advisor and instructor.

CSD 6651 Master's Paper: 1-3 semester hours.
Major paper or project synthesizing aspects of a specialized area of speech-language pathology, or audiology. A large component of the paper must reflect the student's own original thinking. May be repeated. Graded S/U.

CSD 6652 Auditory Language Learning: 3 semester hours.
This course examines the development of speech and hearing in children who are hard of hearing or deaf. Focus is placed on how children with hearing impairments differ in their learning of language compared to children with normal hearing. Language strategies for use by professionals serving deaf and hard of hearing children to promote language learning will also be discussed.

CSD 6670 Auditory Pathologies: 3 semester hours.
Study and discussion of a wide range of auditory and vestibular pathologies. Emphasis will be placed on the relationship between the pathology and the corresponding audiometric findings.

CSD 6673 Introduction to Audiology Clinical Processes: 1 semester hour.
The basic study of electronics, sounds, acoustics, instrumentation, calibration and hands-on activities using a wide variety of audiology equipment.

CSD 6675 Hearing Conservation in Noise: 2 semester hours.
Hearing conservation programs from historical and current model perspectives. Additionally, measurement of sound, OSHA and other applicable regulations, and the effects of noise on human hearing will be discussed.

CSD 6680 Counseling in Audiology: 2 semester hours.
Examination of the role of personal adjustment counseling in audiology. Students review counseling theory and the application of counseling techniques to patient interactions.

CSD 6691 Topical Seminar: 1-4 semester hours.
Reading and discussions involving subjects of concern. May be repeated up to 12 credits.

CSD 6692 Comprehensive Seminar: 1 semester hour.
A guided and systematic review of academic content, knowledge of audiologic systems, testing, materials, diagnosis, and theories. This course concludes with the program's summative examination.

CSD 6693 Hearing Assistive Technology Systems: 1 semester hour.
An examination of Hearing Assistive Technology Systems (HATS) focused on the different types, applications, fitting considerations, and verification/validation measures. Students will gain hands-on experience with a variety of current systems.

CSD 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

CSD 7705 Off Campus Clinical Practicum: 1-4 semester hours.
These externships, referred to as 3rd-year rotations, are for the two semesters of the third year. Students will rotate through one experience every eight weeks or two per semester. Affiliation agreements and placement decisions are arranged by the externship coordinator. May be repeated. Graded S/U. COREQ: CSD 7705L.

CSD 7705L Off Campus Clinical Practicum Laboratory: 1 semester hour.
Staffing seminar conducted online with students in clinical experience settings. May be repeated. Graded S/U. PREREQ: CSD 6603.

CSD 7710 Advanced Topics in Aud Rehab: 3 semester hours.
Advanced topics include rehabilitation issues targeting outcome measures and efficacy. Topics of tinnitus and pharmacology along with professional issues will be included. PREREQ: CSD 6621, CSD 6641, and CSD 6643.

CSD 7720 Audiology Practice Management and Dispensing: 3 semester hours.
Ethics and professional issues in various practice settings, including multicultural considerations, licensure, certification, best practice, outcome measures, hearing aid dispensing, liability, malpractice, marketing, and practice/business management. PREREQ: CSD 6641 and CSD 6643.

CSD 7730 Advanced Auditory Evoked Potential Audiometry and Early Identification: 3 semester hours.
Comprehensive discussion of advanced evoked potentials including test protocols, measurement, and interpretation. Topics in early identification of individuals with hearing loss will also be covered. PREREQ: CSD 6633.
CSD 7740 Advanced Vestibular and Balance Function Assessment: 3 semester hours.
Advanced vestibular and balance function assessment including underlying causes of balance disorders, rotary chair, computerized posturography, VEMP, advances in VNG/ENG technology, and collaborative approaches to vestibular rehabilitation. PREREQ: CSD 6633.

CSD 8805 Fourth Year Externship: 1-8 semester hours.
Full time placement designed to provide the student with a breadth and depth of clinical experience equivalent to one year of full-time work (approximately 2,000 hours). Students must enroll for three semesters minimum. Students are responsible for identifying potential sites and working with externship coordinator to arrange affiliation agreements. Final approval is the responsibility of the externship coordinator. May be repeated. Graded S/U. COREQ: CSD 7705L.

CSD 8810 Clinical Project: 1-6 semester hours.
Clinically-based scholarly project completed under the supervision of the audiology faculty. May be repeated for a total of 6 credits. Graded S/U.
Physical and Occupational Therapy

Chair and Occupational Therapy Program Director and Associate Professor: Gee

Physical Therapy Program Director and Associate Professor: Dye

Associate Professors: Devine, Gee, Jackman, Seiger, Thompson

Assistant Professors: Alexander, Gerber, Kendall, Lloyd, Peterson, Ralphs

Program Mission
The primary mission of the Department of Physical and Occupational Therapy is to provide entry-level education in a supportive learning environment fostering diverse and interdisciplinary didactic and clinical experiences, clinical skills acquisition, and a desire for lifelong learning to enhance the delivery of physical therapy services and the profession. Further, the program emphasizes faculty and student enrichment through scholarly endeavors, teaching, service, and clinical practice contributions within their areas of expertise.

Degree Programs
Degree programs offered by the Department of Physical and Occupational Therapy include:

- Doctor of Physical Therapy (DPT)
- Master Occupational Therapy (MOT)

Doctor of Physical Therapy
The graduate entry-level program in Physical Therapy is a professional entry level program designed to prepare students for licensure to practice as physical therapists. The program is accredited by the Commission on Accreditation in Physical Therapy Education of the American Physical Therapy Association.

The Doctor of Physical Therapy program (DPT) was granted re-accreditation status by the Commission on Accreditation in Physical Therapy Education (CAPTE) in October 2006. Prospective students having questions about the program's accreditation status should contact:

Commission on Accreditation of Physical Therapy Education
111 North Fairfax Street
Alexandria, VA 22314
accreditation@apta.org
(703)684-2782 or (703)706-3245

Admission Requirements
The student must apply to, and meet all criteria for admission to the Graduate School. In addition, the following conditions must be met:

1. Completion of bachelor’s degree from a college or university accredited in the United States or its equivalent from a school in another country. (Must complete degree before onset of classes in PT Program of the Fall Semester in year of acceptance.)
2. Grade point average of 3.0 or above on the equivalent of the most recent four full-time semesters of academic work. GPA is calculated on upper division courses only.
3. Grade point average of 3.0 or above in each prerequisite set of science courses. Please contact the Department of Physical Therapy for clarification.
4. Applicants must take the Graduate Record Examination (GRE) or Miller Analogies Test (MAT).

- GRE must meet the following requirements to be competitive: A total combined score of at least 295 in the verbal and quantitative portions. Verbal must be at least a 148. Minimum of 4.0 on the analytical portion.
- For GREs taken before August 2011 the following is required: A total combined score of at least 950 in the verbal and quantitative portions. Verbal must be at least 450. Minimum of 4.0 on the analytical portion.
- MAT must meet the following requirements to be competitive: A total score of 390.
- Applicants whose first language is not English need to meet the following TOEFL requirements for Classified admission (We do not accept the IELTS in lieu of the TOEFL):
  
  - Internet- based test (iBT): a total score of 80 with a score of at least 20 on each Section (graduate assistants who teach courses must score 23 or above on the Speaking Section) on the iBT; or
  - Computer-based test: a total score of 213 with a score of at least 21 on Section 1 (Listening Comprehension) on the computer test; or
  - Paper-based test: a total score of 550 with a score of at least 55 on Section 1 (Listening Comprehension) on the paper test or a score of 84 on the MTELP, or a score of 6 on the IELTS.

5. At least 80 hours of salaried or voluntary experience in two or more physical therapy practice settings. Experience must be supervised and documented by licensed physical therapists. This experience must have occurred within the last five years.
6. Three letters of recommendation. Two letters must be from licensed physical therapists under whom the student has obtained hours of experience. One letter must be from a professor.

The admissions committee reviews all applicants on a competitive case-by-case basis during any admissions cycle. Qualified applicants may be invited for a personal interview with physical therapy admissions committee. Prospective applicants should contact the department for specific descriptions of the above general requirements.

A maximum of 26 students are admitted to the program each year. Classes begin in the Fall Semester of each year. Meeting entry level requirements for admission does not guarantee a seat in the program. Admission is on a competitive basis, and a majority of the seats are offered to Idaho residents. Please contact the Department of Physical and Occupational Therapy for details.

General Requirements
The curriculum is 3 years in duration and includes 5 clinical affiliations. There are 6 semesters and 2 full-time summer sessions encompassing a total of 101 credits. The clinical affiliations mandate student travel and housing with the usual expenses borne by the student. Out-of-state travel for affiliations is required.

Total Hours: 106-107

Degree and Licensure Requirements

Students receiving the degree of Doctor of Physical Therapy must satisfactorily complete all courses in the curriculum, prepare and present study papers on a regular basis, prepare and present a professional project, attend and successfully complete all clinical affiliations, and satisfactorily pass comprehensive oral and written departmental examinations. For state licensure, students must have met the degree requirements and pass the National Board Examinations for Physical Therapy.

NOTE: Admitted students should be aware that some required external clinical rotation sites will require criminal background and drug checks. In addition, students who have a record of criminal activity may have difficulty procuring a license to practice in some states after completing the program.

Grade Requirements

The Graduate School and the Department of Physical and Occupational Therapy requires that an overall GPA of 3.0 be maintained in all graduate course work and all clinical affiliations must be completed with an S (satisfactory) grade. In addition, the Department of Physical and Occupational Therapy will terminate the graduate program of any student who has received grades of “B- or lower” in more than 6 credits or a maximum of two program courses. Students should consult specific departmental grading policies for specific information.

Master of Science in Athletic Training / Doctorate of Physical Therapy Dual Degree Program

Description of the Program

The MSAT/DPT dual degree program is a unique program for select students. Normally, obtaining both degrees would take a total of 5 years, but with the dual degree, the program can be completed in 4 (47 months), graduating with an MSAT and DPT degree, as well as completion of requirements to sit for the national board examinations for both professions. Both the MSAT and DPT programs are accredited by the respective governing bodies. This program has been approved by the Idaho State Board of Education.

Admission Requirements

Applicants must be admitted to both programs (MSAT and DPT) separately. The applicant will use the normal application (PTCAS for the DPT; MSAT program application for MSAT). In addition, a letter must be submitted to both programs declaring interest in the dual degree program. Application and letter deadline is November 1.

Once an applicant has applied and is accepted for both programs, the DPT entrance will be deferred 1 year; the first year of the program will be entirely MSAT content.

Deposits for BOTH programs would need to be made by the deadline for each program.

Awarding of Degrees

Both degrees will be awarded at the end of the entire program (47 months). The candidate will be eligible to sit for the Athletic Training Board of Certification examination during the last academic semester of the entire program and for the National Physical Therapy Examination during the final clinical semester.

Course Sequence

The MSAT sequence will consist of the first summer session and two semesters. The DPT sequence follows for six semesters plus two summer sessions.

### Master of Occupational Therapy

The graduate entry level program in Occupational Therapy is a professional entry level program preparing students for licensure to practice as occupational therapists. The following information provides the specific requirements for applying to the Idaho State University Occupational Therapy (OT) Program.

Occupational therapy is a profession that uses occupation to promote well-being and health among people of all ages and abilities. Occupations are goal-directed, meaningful pursuits that occupy a person's time each day. Occupations include work and productive activities, self care or care of others, and leisure/recreational activities. Occupational therapists adapt the environment, tasks, or techniques to meet individual needs while helping each client develop new skills necessary to function productively. Occupational therapists view every aspect of a client's life as important to his/her health.

Occupational therapy seeks to improve the quality of life for individuals who are at risk for physical, cognitive, mental or psychosocial impairments. Demand for occupational therapy will increase to address the needs of a growing population of aging adults, children with developmental disabilities and those who struggle with traumatic injuries and illness. When one experiences physical or mental illness or injury, it is the job of the occupational therapist to help the individual return to work, family roles and satisfying life.

The curative nature of occupational therapy is extremely broad and requires individuals with an interest in the complexity of humanity and occupations. One also needs an ability to think critically and creatively and be able to address occupational performance problems resulting from disease, trauma and mental illness. To be well prepared, a student must enter the profession with a foundation in the liberal arts, biological, physical, and social sciences.

### Admission Requirements

Students can be admitted into the Master of Occupational Therapy (MOT) program by applying to, and meeting all criteria for, admission to the Graduate School. They must also meet the prescribed prerequisite course requirements. Students may also have the option of early pre-professional entry into the program through the established guidelines of the Bachelors of University Studies (BUS) program. The BUS is an inter-disciplinary degree designed for students whose career and educational goals are not met by traditional degrees offered at Idaho State University.

During the first three years, the student develops a course of study that will meet the student's interests, university degree requirements and Occupational Therapy Program prerequisites admission requirements. The student can apply to the BUS program during his/her junior year. With successful completion of the first professional year in the OT program, the student will receive a Bachelor of University Studies and will continue directly into the MOT program over the next two years. The combination of the BUS degree with the MOT degree program creates a seamless entry into the occupational therapy profession, ensuring that all prerequisites in social, physical and biological sciences are completed in a timely manner.
manner. For further information on the BUS and Occupational Therapy program, contact the Department of Physical and Occupational Therapy at (208) 282-4095.

1. Applicants must complete a bachelor’s degree from a college or university accredited in the U.S. or its equivalent from a school in another country. This degree may be in progress during the application process but must be completed prior to beginning OT courses in the Fall semester.

2. All applicants applying to the OT Program must also apply for admission to ISU through the Graduate School. General admissions requirements are explained in the Admissions section of the Graduate Catalog. Note: Some of the requirements for admission into the OT Program are higher than the general requirements for admission to Graduate School.

3. Applicants must have a minimum of an earned grade point average (GPA) of at least 3.0 over all upper division course work to apply to the OT Program. A minimum of 25 upper division credits must be completed, or in progress, by January of the year of admission for applications to be considered. Applicants with advanced degrees may use the most recent upper division or graduate credits completed.

4. Applicants must take the Graduate Record Examination (GRE) or Miller Analogies Test (MAT).
   a. GRE must meet the following requirements to be competitive: A total combined score of at least 950 in the verbal and quantitative portions. Verbal must be at least 400. Minimum of 4.5 on the analytical portion.
   b. MAT must meet the following requirements to be competitive: A total score of 390.
   c. Applicants whose first language is not English need to meet the following TOEFL requirements for Classified admission (We do not accept the IELI or ELS in lieu of the TOEFL):
      i. Internet-based test (iBT): a total score of 80 with a score of at least 20 on each Section (graduate assistants who teach courses must score 23 or above on the Speaking Section) on the iBT; or
      ii. Computer-based test: a total score of 213 with a score of at least 21 on Section 1 (Listening Comprehension) on the computer test; or
      iii. Paper-based test: a total score of 550 with a score of at least 55 on Section 1 (Listening Comprehension) on the paper test, or a score of 84 on the MTELp, or a score of 6 on the IELTS.
   d. Applicants with scores lower than the requirements will not be considered.
   e. The scores of the GRE/MAT/TOEFL must be received by the Graduate School by the application deadline (December 1) for an application to be considered. The Idaho State University code for these three tests is: 4355.

5. Applicants must complete specific prerequisites courses with a GPA of 3.0 in each of the specified categories. Prerequisite course work in anatomy and physiology must be completed within the last five (5) years. Prerequisite course work that is ten (10) years or older may not be acceptable for admission unless approved by the Department Admissions Committee prior to application. An applicant with more than four (4) prerequisite courses in progress or planned for the spring/summer semesters may not be considered for admission. Please contact the Department of Physical and Occupational Therapy for specific information on the prerequisite course work.

6. Applicants must document knowledge and exposure to the occupational therapy profession. All of the required experience must be completed prior to admission to the Idaho State University OT Program. All of the experience must be completed under the direct supervision of a practicing occupational therapist and must have occurred within the last five years. A total of 40 hours of experience is required and must be completed in a minimum of two different occupational therapy practices.

7. Each applicant must submit three letters of reference with the application. One of the letters must be from the Occupational Therapist who directly supervised the volunteer or aide experience(s). Please contact the Idaho State University OT Program for additional information.

8. Applicants meeting all of the above requirements will be given preference for admission into the program, and have been more successful in gaining entry. The admissions committee reviews all applicants on a competitive case-by-case basis during any admissions cycle.

Program Accreditation

The Idaho State University Master of Occupational Therapy Program was accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA) in 2009. ACOTE can be contacted at:

4720 Montgomery Lane
Suite 200
Bethesda, MD 20814-3449
(301) 652-6611 x2932
http://www.acoteonline.org

Grades of the program will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT).

After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, most states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. In addition, the OT program requires that all occupational therapy students complete Level II Fieldwork within 12 months following the completion of academic component of the program.

General Requirements

The curriculum is 33 months in duration and includes 4 clinical affiliations. There are 6 semesters and 2 full-time summer sessions encompassing a total of at least 90 credits. Please contact the Department of Physical and Occupational Therapy for additional information regarding clinical affiliations.

Graduation Requirements

Students receiving the Master of Occupational Therapy (MOT) degree must satisfactorily complete all courses in the curriculum with a minimum of 3.0 GPA, prepare and present academic study papers on a regular basis, prepare and present a professional project or case study, successfully complete all Fieldwork I and II clinical affiliations, and satisfactorily pass both oral and written comprehensive examinations.

Once the student has completed the degree requirements, he/she is eligible to sit for the NBCOT Certification Examination. Students are required to complete Level II Fieldwork within 12 months of completing the academic component of the program. Students convicted of a felony may not be able to sit for the NBCOT certification examination or attain state licensure.

NOTE: Admitted students should be aware that some required external clinical rotation sites will require criminal background and drug checks. In addition, students who have a record of criminal activity may have difficulty procuring a license to practice in some states after completing the program.

Courses

**PTOT 5501 Clinical Kinesiology and Biomechanics: 4 semester hours.** Analysis of normal and pathological human movement in joints, posture, gait, and the vertebral column. Application of movements to therapeutic interventions is emphasized. PREREQ: BIOL 5574.

**PTOT 5502 Clinical Neuroscience: 5 semester hours.** Study of structure and function of the human nervous system at the cellular and systemic levels. Specific application to clinical management of neurological problems and pathology. PREREQ: BIOL 5574 and BIOL 5586.

**PTOT 5503 Fieldwork Seminar: 0 semester hours.** Individual or group in the process and procedures of acquiring placement in fieldwork rotations in the MOT program. Will be repeated. Graded S/U. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**PTOT 5512 Professional Communication: 2 semester hours.** Introduction to standard forms of professional communication in physical and occupational therapy and among other health care professions. Medical recordkeeping and interdisciplinary communication are emphasized.

**PTOT 5513 Occupational Therapy Profession: 3 semester hours.** Historical overview of occupational therapy in health care, education and psychosocial settings. Occupational therapy process, rural human service delivery system, professionalism, ethics, and legal issues will be examined.

**PTOT 5514 Research Methodology: 3 semester hours.** Application of principles of research design in the biological, psychological and social sciences. Clinical and laboratory research in occupational and physical therapy are emphasized. Preparation for professional project. PREREQ: PTOT 5513, PTOT 5522, PTOT 6613.

**PTOT 5515 Service Delivery of Occupational Therapy: 3 semester hours.** Application of theoretical concepts of management to the delivery of occupational therapy services. Development, implementation and outcome evaluation of community-based service delivery systems will be emphasized. PREREQ: PTOT 5522 and PTOT 5532.

**PTOT 5518 Practicum: 1-3 semester hours.** Clinical experience in the on-campus clinic or in the community under the direction and supervision of faculty. Current issues in management and administration of practice within interdisciplinary teams are discussed. Graded S/U. PREREQ: PTOT 5532.

**PTOT 5519 Practicum: 1-3 semester hours.** Advanced experience in the on-campus clinic or community practice under the direction and supervision of faculty. Current issues in management and administration of clinical practice within interdisciplinary teams are discussed. Graded S/U. PREREQ: PTOT 5533.

**PTOT 5521 Self-Exploration in Occupation: 3 semester hours.** Focus on self-exploration in occupation and purposeful activity. Self-evaluation in occupational performance areas, components, and context. The student will complete a self-development plan in occupation.

**PTOT 5522 Occupational Performance: 3 semester hours.** Person/occupation/environment interactions are examined from the perspective of multiple theories and models that analyze typical occupations and address performance dysfunctions. COREQ: PTOT 5542. PREREQ: PTOT 5513 and PTOT 5521.

**PTOT 5523 Therapeutic Use of Self in Occupation: 2 semester hours.** Survey of historical and philosophical perspective of the therapeutic relationship and its development and implementation with individuals and groups with psychosocial dysfunction. PREREQ: PTOT 5521.

**PTOT 5524 Physical Function in Occupation Performance: 4 semester hours.** The study of theory and application of occupational performance addressing function. Overview of evaluation and treatment of physical and psychosocial function in rehabilitation and orthopedic management. COREQ: PTOT 5544. PREREQ: PTOT 5501 and PTOT 5502.

**PTOT 5525 Psychosocial Function in Occupation: 4 semester hours.** Theory, evaluation and intervention techniques in occupational therapy across the lifespan for persons with psychosocial dysfunction in different treatment settings. COREQ: PTOT 5545. PREREQ: PTOT 5522.

**PTOT 5526 Neurological Function in Occupation: 5 semester hours.** Occupational therapy management of clients with neurological trauma, degenerative disorders, central and peripheral neural and neuromuscular dysfunction. Overview of rehabilitation approach to evaluation and treatment. COREQ: PTOT 5546. PREREQ: PTOT 5502 and PTOT 5524.
PTOT 5527 Occupation and Environmental Management: 3 semester hours. The study and application of occupational therapy in managing environmental factors that restore function and decrease disability. COREQ: PTOT 5547. PREREQ: PTOT 5522 and PTOT 5526.

PTOT 5528 Occupation with Children and Adolescents: 4 semester hours. Study of occupational therapy evaluations and interventions for children and adolescents who have disabling conditions that cause occupational performance problems. COREQ: PTOT 5548. PREREQ: PTOT 5526.

PTOT 5531 Clinical Affiliation I-Fieldwork I: 1 semester hour. Fieldwork opportunities to observe occupational performance of persons served by local institutional or community-based health, educational, and human service organizations. Graded S/U. PREREQ: PTOT 5532 and PTOT 5542.

PTOT 5533 Clinical Affiliation III-Fieldwork II: 7 semester hours. An in-depth clinical fieldwork with clients having physical, psychosocial, neurological, and/or multisystem impairments/disabilities in a facility-based setting such as a hospital or rehabilitation center. Graded S/U. PREREQ: PTOT 5532.

PTOT 5542 Occupational Performance Laboratory: 1 semester hour. Introduction to and practice using occupation focused evaluation tools and methodologies used in analyzing, evaluating, and categorizing occupational performance. COREQ: PTOT 5522.

PTOT 5544 Physical Function in Occupation Laboratory: 1 semester hour. Laboratory exercise designed to apply evaluation and treatment techniques used in physical and psychosocial occupational performance approach. COREQ: PTOT 5524.

PTOT 5545 Psychosocial Function in Occupation Laboratory: 1 semester hour. Laboratory exercise designed to apply evaluation and treatment techniques in the management of psychosocial dysfunction to optimal function. The laboratory develops preclinical competency in psychosocial function across the lifespan. COREQ: PTOT 5525.

PTOT 5546 Neurological Function in Occupation Laboratory: 1 semester hour. Designed to apply evaluation and treatment techniques to promote adaptation and optimal function. The laboratory serves to develop preclinical competency in the management of neurological disorders. COREQ: PTOT 5526.

PTOT 5548 Occupation with Children and Adolescents Laboratory: 1 semester hour. Laboratory exercise designed to apply evaluation and treatment techniques for children and adolescents specific to occupational performance dysfunction, adaptation and optimal function. COREQ: PTOT 5528.

PTOT 5599 Experimental Course: 1-6 semester hours. This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

PTOT 6606 Clinical Therapeutic Exercise: 3 semester hours. Theoretical and evidence-based application of exercise for various pathological conditions. Aerobic conditioning, muscular strengthening, flexibility, balance, coordination, power and agility are discussed, demonstrated and evaluated. Specific exercise prescription, modes of exercise, and application for desired outcomes are emphasized. PREREQ: BIOL 5574 and BIOL 5586.

PTOT 6608 Applied Pharmacology for Physical and Occupational Therapists: 3 semester hours. Study of the major drug groups, therapeutic implications and side effects. Musculoskeletal, cardiovascular, connective tissue and nervous system disorders are emphasized. PREREQ: BIOL 5574, BIOL 5586, and PTOT 5502.

PTOT 6613 Physical Therapy Profession: 2 semester hours. Survey of current status of the physical therapy profession in health care systems. Professionalism, ethics, legal issues, validation of practice, future projections and historical perspective.

PTOT 6615 DPT Capstone Project: 1-4 semester hours. This is a three phase, progressive series of courses. Capstone Phase 1 (1 credit) requires the study and write up of a clinical pathology. Capstone Phase 2 (1 credit) requires the in-depth study, development, reporting and presentation of a patient case with an emphasis on the clinical reasoning and decision-making related to PT management of the patient. Capstone Phase 3 (2 credits) requires the in-depth study, development, reporting and presentation of a comprehensive patient case with an emphasis on the clinical reasoning and decision-making related to the entire patient care process.

PTOT 6617 Research Practicum: 1-2 semester hours. Faculty supervised clinical, basic or applied research project which may include review of literature preparation, proposal development, data collection, and manuscript preparation. May be repeated up to 4 credits. Graded S/U. PREREQ: PTOT 5514.

PTOT 6618 Practicum I: 1-2 semester hours. Supervised clinical experience in physical therapy. May be repeated up to 4 credits. Graded S/U. PREREQ: PTOT 6621 and PTOT 6641.

PTOT 6619 Practicum II: 1-2 semester hours. Supervised clinical experience in physical therapy. May be repeated for up to 4 credits. Graded S/U. PREREQ: PTOT 6618.

PTOT 6620 Clinical Procedures: 2 semester hours. Study and practice of theory and application of basic techniques of patient evaluation, handling, and treatment in physical therapy. COREQ: PTOT 5501 or PTOT 6640.

**PTOT 6622 Musculo-Skeletal System Management I:** 4 semester hours.
Physical therapy evaluation, treatment, and management of patients with muscle, skeletal, and connective tissue problems. Overview of orthopedic pathology. COREQ: PTOT 6642. PREREQ: BIOL 5574, BIOL 5586, PTOT 6601 and PTOT 6621.

**PTOT 6623 Physical Agents:** 3 semester hours.
Study and practice of theory and application of the therapeutic uses of physical agents and electromagnetic energy in physical therapy. COREQ: PTOT 6643. PREREQ: PTOT 6620 and PTOT 6640.

**PTOT 6624 Cardiac and Pulmonary Systems Management:** 5 semester hours.
Physical therapy management of persons with dysfunction of the cardiac and/or pulmonary systems and related pathologies. Management by other health professional team members. PREREQ: BIOL 5586.

**PTOT 6626 Neurological Systems Management:** 5 semester hours.
Physical therapy management of patients with central and peripheral neural and neuromuscular dysfunction. Survey of management by other health professionals. COREQ: PTOT 6646. PREREQ: PTOT 5502.

**PTOT 6631 Clinical Affiliation I:** 3 semester hours.

**PTOT 6632 Clinical Affiliation II:** 3 semester hours.
Clinical management practicum related to orthopedics, sports medicine, and/or cardiopulmonary problems. Graded S/U. PREREQ: PTOT 6622, PTOT 6623, PTOT 6624 and PTOT 6631.

**PTOT 6640 Clinical Procedures Lab:** 1 semester hour.
Laboratory exercises designed to practice and enhance overall skills in the initial evaluation and treatment of patients. COREQ: PTOT 6620.

**PTOT 6641 Manual Evaluation and Treatment Lab:** 1 semester hour.
Laboratory exercises designed to introduce basic theoretic and applied concepts and skills of patient handling, evaluation and modalities. COREQ: PTOT 6621.

**PTOT 6642 Musculo-Skeletal System Management Lab:** 1 semester hour.
Designed to develop preclinical competency in the evaluation, treatment, and management of disorders of the musculoskeletal system. Emphasis on the trunk and lower extremities. COREQ: PTOT 6622.

**PTOT 6643 Physical Agents Lab:** 1 semester hour.
Designed to develop clinical competence in the use of physical agents in the treatment of patients with specific pathologies. COREQ: PTOT 6623. PREREQ: PTOT 6620 and PTOT 6640.

**PTOT 6646 Neurological Systems Management Lab:** 1 semester hour.
Designed to develop preclinical competency in the evaluation, treatment, and management of the patient with neurological disorders including stroke, spinal cord injury, degenerative disease. COREQ: PTOT 6626.

**PTOT 6648 Graduate Special Topics:** 1-3 semester hours.
Individual or group critical analysis and study of a specific area of physical therapy patient management, administration, or research. May be repeated. PREREQ: 2nd year students and/or permission of instructor.

**PTOT 6681 Theories and Resources to Guide Clinical Decision Making in Physical Therapy:** 3 semester hours.
Study and application of applying evidence in physical therapy practice. The Guide to PT Practice, Physical Therapy differential diagnosis, and legal and ethical considerations will be addressed.

**PTOT 6682 Promoting Behavioral Change in Physical Therapist Practice:** 2 semester hours.
Study of the theories of learning, compliance, and behavior modification as related to the application of prevention and wellness in physical therapy practice. PREREQ: PTOT 6681.

**PTOT 6693 Contemporary Musculo-Skeletal System Management for Physical Therapists:** 2 semester hours.
Applying evidence and elements of accepted practice to PT management of patients across the lifespan with musculoskeletal diagnoses. PREREQ: PTOT 6682.

**PTOT 6694 Contemporary Cardiopulmonary System Management for Physical Therapists:** 2 semester hours.
Applying evidence and elements of accepted practice to PT management of patients across the lifespan with cardiac and/or pulmonary diagnoses. PREREQ: PTOT 6693.

**PTOT 6695 Contemporary Neurological System Management for Physical Therapists:** 2 semester hours.
Applying evidence and elements of accepted practice to PT management of patients across the lifespan with neurological diagnoses. PREREQ: PTOT 6694.

**PTOT 6696 Patient Case Seminar:** 2 semester hours.

**PTOT 6699 Experimental Case:** 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**PTOT 7701 Contemporary Multiple System Management for Physical Therapists:** 2 semester hours.
Applying evidence and accepted clinical practice to PT management of patients across the lifespan with diagnoses affecting multiple systems. PREREQ: PTOT 6696.

**PTOT 7705 Clinical Case Management:** 3 semester hours.
Advisor guided development and completion of a patient case study demonstrating the application of evidence for PT examination, diagnoses, medical management, treatment and discharge. Oral presentation required. Graded S/U. PREREQ: PTOT 7701.

**PTOT 7715 Physical Therapy Resource Management:** 3 semester hours.
Application of business and health care administration principles to the practice of physical therapy resource management strategies with an emphasis on community service delivery. PREREQ: PTOT 6612, PTOT 6613, PTOT 6621 and PTOT 6632.

**PTOT 7725 Multi-Systems Management:** 4 semester hours.
Physical therapy management of persons with problems affecting multiple systems; burns, wounds, amputations, neoplasms, metabolic disorders. PREREQ: PTOT 6621, PTOT 6622, PTOT 6623 and PTOT 6624.

**PTOT 7727 Geriatric Management:** 3 semester hours.
Examination, evaluation and treatment of the elderly population with emphasis on the management of normal and pathological conditions. COREQ: PTOT 7728. PREREQ: PTOT 6626 and PTOT 6646.

**PTOT 7728 Lifespan Development:** 4 semester hours.
Normal and abnormal development of neuromuscular, musculoskeletal, cardiopulmonary systems cognitive/perceptual and psychosocial behavior associated with life through adolescence. Evaluation, program planning and treatment strategies are introduced. COREQ: PTOT 7727. PREREQ: BIOL 5574 and BIOL 5586.
PTOT 7733 Clinical Affiliation III: 5 semester hours.

PTOT 7734 Clinical Affiliation IV: 5 semester hours.

PTOT 7735 Clinical Externship: 5 semester hours.
Clinical management experiences related to patient care, administration, or research in a variety of practice environments. Graded S/U. PREREQ: PTOT 7734.
Science and Engineering

Lyle W. Castle, Ph.D., Interim Dean and Professor
David Rodgers, Ph.D., Associate Dean and Professor
Mary Lou Dunzik-Goug, Ph.D., Associate Dean and Associate Professor

Courses

ENGR 5501 Methods of Engineering: 3 semester hours.
Introduction to fundamental concepts of engineering related to hazardous waste management. Not counted toward graduation. PREREQ: PHYS 1111.

ENGR 5510 Introduction to Environmental Engineering: 3 semester hours.
Introduction to physical, chemical, and biological principles of solid and hazardous waste management, water and wastewater treatment, air pollutant control, and national environmental regulation. PREREQ: CHEM 1112 or permission of instructor.

ENGR 5516 Applied Engineering Methods: 3 semester hours.
Applied discrete and continuous probability, random variables, probability distributions, sampling, data description, parameter estimation, hypothesis testing, inference, correlation, and linear and multiple regression. PREREQ: MATH 1170.

ENGR 5560 Engineering Cost Estimating: 3 semester hours.
Introduction to design/construction processes, planning, contracts, procurement, plans/specifications, productivity analyses, safety, cost estimating, scheduling and environmental considerations. Use of data from actual construction projects. PREREQ: MATH 3360 or permission of instructor.

ENGR 5570 Survey of Hazardous Waste Management Problems: 3 semester hours.
Environmental, technical, political and economic aspects of hazardous waste management. Credit not given if UI ChE 570 or ISU ENVE 6607 taken. PREREQ: ENGR 5501 or equivalent.

ENGR 5572 Waste Treatment Technologies: 3 semester hours.
Procedures for characterization of hazardous waste sites, identification and application of physical, chemical, biological and thermal treatment. PREREQ: Permission of instructor.

ENGR 5578 Probabilistic Risk Assessment: 3 semester hours.
Probabilistic methods applied to analysis and design. Setting probabilistic design objectives and calculating probabilistic performance emphasized. Equivalent to NE 5578. PREREQ: MATH 3364 and MATH 3360.

ENGR 5589 Principles of Hazardous Waste Site Remediation: 3 semester hours.
Restoration technologies for waste sites. Site characterization and clean-up methods for chemical, radioactive, mixed wastes in soils and water. Practical methodologies. Credit not granted if ENVE 6614 taken. PREREQ: ENGR 5570 or ENVE 6607.

ENGR 5591 Seminar in Engineering: 1 semester hour.
A series of lectures on current topics in the literature by participants or guest lecturers chosen from industry. May be repeated. PREREQ: Permission of instructor.

ENGR 5593 Human Factors in Engineering: 3 semester hours.
Overview of the discipline of human factors engineering, including design of information displays, controls, workspace, and human performance. Relationship of engineering to corporate issues such as R&D, maintenance, training, operations, safety.

ENGR 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

ENGR 6606 Environmental Law and Regulations: 3 semester hours.
Federal, state, local environmental regulations addressing environmental impact assessment; water and air pollution control, hazardous waste, resource recovery, reuses, toxic substances, occupational safety and health, radiation, siting, auditing, liability. Equivalent to POLS 6606. PREREQ: Permission of instructor.

ENGR 6607 Hazardous Waste Management: 3 semester hours.
Management of hazardous and solid wastes, emphasis on CERCLA (Superfund) process for cleaning of uncontrolled hazardous waste sites and RECRA process for industrial treatment, storages, disposal facilities. PREREQ: MATH 5508.

ENGR 6650 Thesis: 1-9 semester hours.
Thesis research must be approved by the student's advisory committee. Six credits may be used to satisfy the research requirements for the degree. 1-9 credits. May be repeated. Graded S/U.

ENGR 6651 Seminar: 1 semester hour.
Current topics in engineering. Invited speakers will be used when possible. Students presentations required. May be taken a maximum of four times. 1 credit. Graded S/U.

ENGR 6652 Special Problems: 1-3 semester hours.
Special experimental, computational, or theoretical investigation leading to development of proficiency in some area of engineering. Formal report required. 1-3 credits. May be repeated. May be graded S/U.

ENGR 6655 Environmental Topics Seminar: 1 semester hour.
Environmental engineering and science topics related to hazardous waste characterization, cleanup, regulations. Includes case histories and presentations by graduate students and visiting speakers. May be repeated.

ENGR 6660 Special Project: 1-9 semester hours.
A significant project, involving engineering applications, toward the completion of M.S. program with non-thesis option. Includes a report and oral examination. 1-9 credits. May be repeated. Graded S/U.

ENGR 6670 Industrial Practice: 1 semester hour.
Work in an approved, supervised, engineering and/or computer science position. Students will submit a report, inclusive of hours logged, to the instructor with a written narrative focusing on the accomplishments and learning gained through the work performed. May be repeated. Not counted towards graduation requirements. PREREQ: Instructor approval.

ENGR 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

ENGR 8850 Doctoral Dissertation: 1-24 semester hours.
Biological Sciences

Chair and Professor: Thomas

Professors: Anderson, Austin, Bowyer, Delehanty, Finney, Keeley, Magnuson, Meldrum, C. Peterson, Rodnick, Rose, Scalarone, Sheridan, R. Smith, Winston

Associate Professors: Baxter, Bearden, Evilia, Groome, Hill, Lohse, Loxterman, Williams

Assistant Professors: Aho, Pilarski, Reinhardt

Research Assistant Professors: Castro, Hale

Lecturers: Abbruzzese, Black, Frank, Rhett, Shurley

Department Mission

The mission of the Department of Biological Sciences is to promote learning and discovery in the life sciences through high-quality public education and research.

Goals of Biology Graduate Programs

Students successfully completing graduate programs in Biology will:

1. Be able to think critically and comprehend written and verbal communications regarding topics in the life sciences
2. Attain specific skills appropriate for careers in the biological sciences and related industries
3. Attain employment in the biological sciences or related fields

Degree Programs

Degree programs offered by the Department of Biological Sciences include:

- Doctor of Philosophy (Ph.D.) in Biology
- Doctor of Philosophy (Ph.D.) in Microbiology
- Doctor of Arts (D.A.) in Biology
- Master of Science (M.S.) in Biology
- Master of Science (M.S.) in Microbiology
- Bachelor of Science/Master of Science

Admission Requirements for Biology Graduate Programs

In addition to ISU Graduate School admission requirements, general admission requirements for Biology graduate programs are:

- Availability of a suitable faculty advisor
- Competitive scores on the GRE General Test (verbal and quantitative scores above the 50th percentile and analytical writing score of at least 3.5) and on the GRE Subject Test for Biology or Biochemistry, Cell and Molecular Biology (for doctoral program applicants)
- GPA above 3.0 in science and mathematics courses during the last degree-earning program
- Letters of recommendation from three individuals who can comment on the applicant’s ability to succeed in a biology graduate program
- Prior training commensurate with completion of a B.S. degree in Biology or a related field
- TOEFL score above 577 (paper-based), 233 (computer-based), or 90 (internet-based), if the applicant’s English is a second language
- Availability of financial assistance (see below)

Program-specific additions and modifications of these requirements are described below.

Core Courses for Biology Graduate Programs

All students in the graduate programs in Biology and Microbiology will take the following courses:

- BIOL 6690 Careers in Life Sciences (fall semester of first year) 1
- BIOL 6605 Biometry (spring semester) 4
- BIOL 6691 Seminar (second semester for M.S. students; third semester for doctoral students) 1

Program-specific additions and modifications of these core course requirements are described below.

Financial Assistance

The Department of Biological Sciences provides support for graduate students through Fellowships, Research Assistantships, and Teaching Assistantships. All forms of support include a stipend, full tuition, and other benefits. To be fully considered for the next fall semester GTA appointment, an application should be received by the end of December. Visit the department website or contact the biology graduate programs director for details about financial assistance options.

Doctor of Philosophy (Ph.D.) in Biology

Goals and Program Description

The Ph.D. program in Biology is designed to prepare graduates for careers in the biological sciences, working in academia, industry, and government research labs.

Admission Requirements

In addition to the departmental graduate program admission requirements, students applying to the Ph.D. program in Biology must submit scores for the GRE subject test in Biology or Biochemistry/Cell/Molecular Biology. For applicants who hold only a Bachelor’s degree in biology or a related discipline, entrance requirements will be closely followed. Students will normally be required to satisfy deficiencies of any courses typically required for the Bachelor’s degree in biology or a related field. For applicants who hold a M.S. degree in Biology or a related discipline, entrance requirements may be more flexible (contact program director for details).

General and Course Requirements

The Doctor of Philosophy is a research degree granted for proven ability, independent investigation, and scholarly contribution in a specialized field. It is not granted solely on the completion of a certain number of credits. Dissertation research must involve original and creative work. Credits for the dissertation and research on which it is based should comprise a substantial portion of the program of study. In addition to the departmental graduate program core course requirements, students in the Ph.D. program in Biology are expected to have knowledge of cell & molecular biology, organismal biology, and ecology & evolution, through coursework or directed readings.
Incoming Ph.D. students are required to take a diagnostic examination to assess the breadth of his or her background in biological science, and to help plan the Program of Study. The diagnostic exam must be completed in the student’s first semester (as part of BIOL 6690), is conducted by an exam committee appointed by the Chair of the Graduate Committee, and results in a diagnostic exam report. See the Biology Graduate Program website for guidelines and other information.

A substantial, original research project is required, culminating in a written dissertation research. The dissertation must demonstrate the student’s ability in independent investigation and must be a contribution to scientific knowledge. It must display mastery of the literature of the subject field and must demonstrate an organized, coherent development of ideas, with a clear exposition of results and a creative discussion of the conclusions. The dissertation examination requires a public presentation at a Biological Sciences department seminar, followed by a satisfactory oral defense to the advisory committee.

Additional details regarding the graduate timeline are available on the ISU Department of Biological Sciences website (http://www.isu.edu/bios).

### Doctor of Arts (D.A.) in Biology

#### Goals and Program Description

The Doctor of Arts degree in Biological Sciences is granted for proven ability and scholarly attainment in biological science instruction. The program stresses preparation for undergraduate teaching at colleges and universities and the development of research abilities that complement instruction at the college level. The program is concerned with the development of the candidate as a biologist, a scholar, and a professional educator. The program is designed to provide the student with a broad background in the biological sciences, the ability to conduct and interpret research, and excellent pedagogical skills. All D.A. students are eligible for D.A. Fellowship support, which includes full tuition, benefits, and a stipend (contact the biology graduate programs director for details). All D.A. students must demonstrate:

1. A broad background in the biological sciences and an understanding of scientific inquiry;
2. The ability to synthesize concepts of biology and to effectively communicate these concepts;
3. The ability to conduct, analyze, and critique research in biological sciences and biological sciences instruction;
4. The ability to integrate current biological and educational research into their teaching;
5. Expertise with teaching strategies appropriate for a variety of teaching and learning environments, including undergraduate research;
6. A well-developed philosophy of education.

#### Admission Requirements

In addition to the departmental graduate program admission requirements, students applying to the D.A. in Biology program will normally have completed a Master’s degree in biology or a related discipline prior to entrance into the program, and must submit scores for the GRE subject test in Biology or Biochemistry/Cell/Molecular Biology. If a student enters the program without having completed a Master’s degree, he or she must complete this requirement in addition to the degree requirements or design and incorporate a biological research project as a major component of the dissertation project.

#### General and Course Requirements

Incoming D.A. students are required to take a diagnostic examination to assess the student’s potential to become an effective instructor by examining the depth of his or her background in biological science and communication skills, and to help plan the Program of Study. The diagnostic exam must be completed in the student’s first semester (as part of BIOL 6690), is conducted by an exam committee appointed by the Chair of the Graduate Committee, and results in a diagnostic exam report and a preliminary program of study. See the Biology Graduate Program website for guidelines and other information.

An advisory committee will guide each student in establishing his or her program of study based upon the student’s diagnostic exam report, background and research & teaching interests. Formation of the advisory committee will occur in the student’s first semester. Typically, a full-time D.A. student on a departmental
assistantship or fellowship will take 9 credit hours in fall and spring semesters and 1 credit hour in summer semesters, for a minimum of 48 credit hours beyond the Master’s degree, including:

Courses required of all biology graduate students

</tbody>
</table>

Remaining credit hours will come from coursework at the graduate level (55xx or 66xx), the majority of which must be earned from the ISU Department of Biological Sciences. Courses, seminars, special projects, or readings, assigned by the student’s advisory committee, will provide mastery in core conceptual areas in the biological sciences, including genetics and evolution; anatomy and physiology of animals or plants; cell biology, biochemistry, or molecular biology; and ecology. All D.A. students are required to conduct supervised teaching internships (BIOL 7700), composed of rigorous, thoroughly planned pedagogical activities that provide an opportunity for development of skills in traditional and innovative teaching methods and for utilizing techniques, developed during the program (see Guidelines for Supervised Teaching Internships on the Biology Graduate Programs website (http://www.isu.edu/bios/grad/guidelines)).

Research Requirements

A dissertation proposal must be completed in the student’s third semester (typically fall); a written proposal will be given to the advisory committee 1 week prior to a proposal seminar (presented to the department as part of BIOL 6691), to be followed by an oral proposal defense. (See the Biology Graduate Program website for guidelines and other information.) Once the student has successfully defended the research proposal, the student is advanced to candidacy and may sign up for BIOL 8850 (Doctor’s Dissertation).

By the end of the sixth semester (or whenever coursework described in the program of study is complete), a D.A. candidate must sit for a Comprehensive Exam administered by the student’s advisory committee, and consist of a written and an oral portion. The exam will reflect core areas of biology, the topics covered in the education seminars, and other specific knowledge the committee determines is necessary to successfully address the student’s dissertation research.

A substantial, original research project is required, culminating in a written dissertation describing the research. The dissertation must demonstrate the student’s ability in independent investigation and must be a contribution to scientific knowledge. It must display mastery of the literature of the subject field and must demonstrate an organized, coherent development of ideas, with a clear exposition of results and a creative discussion of the conclusions. The dissertation examination requires and a public presentation at a Biological Sciences department seminar, followed by a satisfactory oral defense to the advisory committee.

Additional details regarding the graduate timeline are available on the ISU Department of Biological Sciences website (http://www.isu.edu/bios).

Doctor of Philosophy (Ph.D.) in Microbiology

The degree of Doctor of Philosophy is granted for proven ability, independent investigation, and scholarly attainment in a special field. Although it is primarily a research degree and is not granted solely on the completion of a certain number of credits, there are specific course requirements that must be met. The training of a Ph.D.-level Microbiologist is based on a strong foundation in Mathematics, Chemistry, Genetics, Molecular Biology, and Biochemistry in addition to extensive coursework in the various disciplines within the field of Microbiology. This base is built upon advanced course work in the major sub-disciplines of Microbiology (Molecular Biology, Biochemistry and Physiology, Genetics, Biotechnology, Virology, Industrial and Environmental Microbiology, and Medical Microbiology) as the student focuses his/her area of interest.

Admission Requirements

Application to the Ph.D. program in Microbiology requires:

1. At least a 3.0 grade point average (GPA) for all upper division credits taken in the previous degree program,
2. Scores in the 35th percentile or higher on the verbal and quantitative sections of the Graduate Record Exam (GRE),
3. Submission of scores for the GRE Biology or Biochemistry subject area exam, and
4. Completed application forms for the Graduate School and Department of Biological Sciences, including three letters of recommendation.

Scores in the verbal, quantitative, and analytical sections of the GRE must be submitted before entrance can be considered. International students may be accepted without GRE scores, with the requirement that they take the GRE during their first semester in residence. Individuals for whom English is a second language must meet the Graduate School minimal TOEFL score.

Applicants who do not meet the minimum GPA and/or GRE requirements may be admitted under “Classified (w/PR)” status. The conditions of acceptance will be specified on the applicant’s Approval for Admission to Graduate School form. In some cases, students may be required to retake the GRE during their first semester in residence. Students admitted under “Classified (w/PR)” status because of low/missing GRE scores will be transferred to “Classified” status if new GRE scores that meet the minimal requirement are submitted. Failure to meet the minimum GRE standards during the first year of residence may result in expulsion from the program. Students under “Classified (w/PR)” status must petition the Graduate Programs Committee for transfer to “Classified” status after a year of graduate work and successful remediation of any deficiencies in coursework or GRE scores. This petition will include a recommendation from the student’s Advisory Committee signed by the research advisor. Continuation in the Microbiology Ph.D. program is contingent upon approval of transfer to “Classified” status. In rare cases, the Graduate Programs Committee may grant approval for a student to remain on “Classified (w/PR)” status for a second year. Any student with “Classified (w/PR)” status who has not been approved for transfer to “Classified” status by the end of his/her second year will be dismissed from the program. Acceptance into the Microbiology Ph.D. program must be approved by the Microbiology Graduate Program committee.

For applicants who hold only a Bachelor’s degree, acceptance into the Microbiology Ph.D. program requires a minimum of a 3.0 GPA for all undergraduate work, scores in the 50th percentile or higher on the verbal and quantitative sections of the GRE, and submission of scores for the GRE Biology or Biochemistry subject area exam. No waiver of GRE scores is allowed except in the case of students for whom English is a second language who receive a lower verbal GRE score; these individuals must meet the Graduate School minimal TOEFL score. The application must include three letters of recommendation. The application must be approved by the Departmental Microbiology Program Committee.
Students in the Microbiology or Biology M.S. program may be permitted to change to the Microbiology Ph.D. program with approval of the Microbiology Graduate Program Committee. Application for change must include:

1. A letter from the student that provides a rationale for the status change and
2. A letter of support from the research advisor.

**Prerequisites**

The following courses are recommended for the Microbiology Ph.D. program. It is expected that applicants to the program will have a broad background in Biology, and will have completed coursework at the undergraduate level in the following areas:

- 1 semester of Calculus (Calculus through Multivariable Calculus recommended)
- 1 year of General Chemistry
- 1 year of Organic Chemistry
- 1 year of Physics
- 1 semester of Quantitative Analysis, Analytical Chemistry, or Inorganic Chemistry
- 1 semester of Statistics or equivalent
- Genetics
- General Microbiology

The Microbiology Ph.D. program will be tailored to the requirements of the student’s program of study (as determined by the student’s Advisory Committee), and will include coursework to rectify any deficiencies as determined by the Microbiology Graduate Program Committee. Deficiencies will be made up in the first year of study.

**Graduate Coursework in the Microbiology Ph.D. program**

The intent of the Microbiology Ph.D. program is to produce scientists with a broad background in the major sub-disciplines of Microbiology, while ensuring focused study in their major field of interest. The student’s Graduate Advisory Committee will direct the student to specific course offerings within the Department and University to satisfy coursework guidelines. The three core areas in the Microbiology Ph.D. program are:

- Biochemistry, Genetics, Molecular Biology, and Physiology of Microorganisms
- Immunology, Virology, and Medical Microbiology
- Microbial Ecology and Applied, Industrial, and Environmental Microbiology

**Core Courses for Biology Graduate Programs**

All students in the graduate programs in Biology and Microbiology will take the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 6690 Careers in Life Sciences (fall semester of first year)</td>
<td>1</td>
</tr>
<tr>
<td>BIOL 6605 Biometry (spring semester)</td>
<td>4</td>
</tr>
<tr>
<td>BIOL 6691 Seminar (second semester for M.S. students; third semester for doctoral students)</td>
<td>1</td>
</tr>
</tbody>
</table>

Students in the Microbiology Ph.D. program will take at least 30 credits of formal graduate coursework (at least 15 credits will be at the 6600-level). The following courses are not to be considered part of this 30 credits of formal graduate coursework: BIOL 5581 Independent Problems, BIOL 5582 Independent Problems; BIOL 6648 Graduate Problems; BIOL 6650 Thesis; BIOL 8850 Doctors Dissertation. Six credits will consist of BIOL 6695 Seminar in Microbiology. Six credits of courses will be taken in each of the three Microbiology core areas (18 credits total). The remaining 6 credits will be taken in any one of the three core areas or in subject areas recommended by the student’s Advisory Committee. It is expected that students in the Microbiology Ph.D. program will complete the majority of their coursework by the end of their 4th semester (or equivalent) in the program. Students in the Microbiology Ph.D. program may be required to take other courses (as determined by recommendation of the student’s Graduate Advisory Committee). The 6 credits of Graduate Seminar in Microbiology may be taken at any time during the student’s residence in the Microbiology Ph.D. program, but it is recommended that the student start taking Graduate Seminar no later than their 5th semester (or equivalent) in the program. The specific course list for each student will be determined by the student’s Graduate Advisory Committee based on the criteria outlined in this document. Students who have already received an M.S. degree may transfer 9 credits of graduate level work, providing a grade of “B” or higher was earned. Transfer of credits is subject to approval by the Graduate Programs Committee.

**Residency Requirements**

The equivalent of at least four years of full-time study (minimum of 75 graduate credits) is required and the research upon which it is based should compose a substantial portion of the program and involve original work. Part of the work may be completed elsewhere with the approval of a student’s Advisory Committee, but two consecutive regular semesters of full-time study must be taken in residence at this university.

**Advisory Committee**

The student’s Advisory Committee will consist of the graduate research advisor and (at least) three additional members of the graduate faculty who are chosen by the student in consultation with the research advisor. It is the student’s responsibility to contact members of the faculty to ascertain their willingness to serve. The Advisory Committee may include individuals from other departments or persons from outside the University who hold affiliate rank in the Department, with the approval of the Dean of the Graduate School, but the majority of any committee must consist of regular departmental faculty.

The final member of the student’s Advisory Committee is a Graduate Faculty Representative (GFR) from outside the Department who is appointed by the Dean of the Graduate School. The Dean will automatically appoint a GFR to participate in the defense of the dissertation if one has not been appointed before that time. However, it has been traditional for the GFR to be an active member of the Advisory Committee who participated in committee meetings and the Comprehensive Examination. In such cases, the student must submit a request in writing to the Dean of the Graduate School that a particular individual be appointed. The GFR must be a member of the Graduate Faculty of Idaho State University.

**Comprehensive Examination and Research Proposal Seminar**

Before submission of the final program of study, the student must pass a Comprehensive Examination intended to test his/her knowledge of the relevant sub-disciplines within the field of Microbiology that pertain to the dissertation research project(s). The student will be admitted to this examination when the student is considered by his/her Advisory Committee to be adequately prepared. This is to be interpreted as allowing the student to take the Comprehensive Exam,
The Comprehensive Examination should be taken following the 2nd semester (or equivalent) of residence in the Microbiology Ph.D. program, and prior to the end of the student’s 5th semester (or equivalent) in the program. Several months (3 to 6) prior to the intended date for examination, the student should meet with his/her Advisory Committee to seek approval to schedule the exam. If approval is given, the student may at that time ascertain from the committee which topical areas will be covered and which committee member will be responsible for each. Students should meet individually with committee members to determine more specifically what materials will be pertinent and how to prepare for the exam. The examination will consist of a written and an oral portion, which will be administered during a closed session following the student’s public Research Proposal Seminar. Both portions must be passed satisfactorily in order to complete the comprehensive requirements.

The written portion of the Comprehensive Exam should not be less than 25 hours nor more than 40 hours of actual writing time. Normally the written exams will be completed within the span of one week. The written portion of the Comprehensive Examination generally will involve the student applying the knowledge gained through graduate coursework and readings suggested by the Advisory Committee. The examination will consist of five sections, each meant to be answered by a five-hour essay. The specific topic areas covered will be determined by the student’s Advisory Committee. Grading on the written portion will be on a Pass/Fail basis with four of the five sections graded satisfactorily required for a Pass. If the student fails two or more sections of the written portion of the exam, the student’s Advisory Committee will convene to determine if the student will be allowed to remain in the program. The student’s Advisory Committee may recommend one of three options:

• dismissal from the program;
• transfer from the Microbiology Ph.D. program to the Microbiology M.S. program; or
• re-examination of the failed sections of the written exam.

Failed sections may be repeated once, at a time designated by the student’s Advisory Committee, but within a year of the original examination. If a student has not passed all the written sections after repeating the failed sections once, that student will be dismissed from the program. The completed and graded written portion of the Comprehensive Exam is to be deposited in the student’s department file.

Students pursuing the Microbiology Ph.D. are required to present a Seminar based on their Research Proposal to the Department of Biological Sciences prior to the end of their 5th semester (or equivalent) in the program. The seminar will be given during a scheduled meeting time of the Graduate Seminar in Microbiology (BIOL 6695) and will be considered part of the course requirements for that student. The purposes of Research Proposal Seminar is to assess the student’s potential for graduate study at the doctoral level, to determine areas in which the student shows strength or weakness, and to assess the student’s ability to assimilate, evaluate, and synthesize subject matter. Immediately after the seminar, the student will meet in closed session with his/her Advisory Committee to review and critique the Research Proposal Seminar and the written portion of the Comprehensive Exam. This will qualify as the oral portion of the Comprehensive Exam.

The purpose of the oral portion of the examination following the Research Proposal Seminar is to provide an opportunity to clarify and explore further implications of the written examination as well as to present the student with new questions in the same general subject areas as those covered by the written exams, but it can also cover other areas that are relevant to the student’s graduate program. The oral portions should not be given until after the written examination has been evaluated by all of the committee members, but no later than four weeks after completion of the written portion. The student must pass the written portion of the Comprehensive Exam prior to taking the oral portion of the Comprehensive Exam. The oral exam must be passed by simple majority vote of the Advisory Committee. Once a student has passed both the written and oral portions of the Comprehensive Exam, the student will be admitted to Candidacy in the Microbiology Ph.D. program. When the student has passed both written and oral portions of the Comprehensive Exam, the Advisory Committee should finalize and approve the student’s Final Program of Study. The Advisory Committee may recommend additional coursework to strengthen the student’s background in areas in which the student was considered weak. In case of failure, the student may be allowed to retake all or part of the oral examination at the discretion of his/her Advisory Committee. If a student fails the oral exam a second time, that student will be dismissed from the program.

Doctoral Dissertation

Every student working toward the Microbiology Ph.D. degree must submit a dissertation embodying the results of original and creative research.

The dissertation must demonstrate the student’s ability in independent investigation and must be a contribution to scientific knowledge. It must display mastery of the literature of the subject field and must demonstrate an organized, coherent development of ideas, with a clear exposition of results and a creative discussion of the conclusions. Students may register for dissertation credit only after completion of all formal course work. After the dissertation, in substantially final form, has been approved for format and content by the research advisor, and not later than two weeks before the date of the final examination, the student must personally deliver a copy of the dissertation to each member of the Advisory Committee.

Final Examination

The final examination of the dissertation will be conducted by the student’s Advisory Committee including the GFR. Students are required to give a departmental seminar on the dissertation immediately preceding the final examination. The examination is concerned primarily with the student’s research as embodied in the dissertation, but it may be broader and extend over fields of study related to the dissertation. Questions may be asked by committee members and those visitors specifically invited to do so by mutual agreement of the student’s Advisory Committee and the Dean of the Graduate School. A majority of the examining committee must approve the dissertation and the final examination.

Master of Science (M.S.) in Biology

Goals and Program Description

The Master of Science (M.S.) in Biology degree is designed to enable students to develop an advanced understanding of the biological sciences and the capability to teach or conduct biological research. Programs are flexible and can be tailored to satisfy the professional and goals of each student, preparing students for careers in industry or for advanced study in the life and health sciences.

Admission Requirements

Students must meet departmental graduate program admission requirements. Students will normally be required to satisfy deficiencies of any courses typically required for a Bachelor’s degree in biology or a related field.

General and Course Requirements

Incoming M.S. students are required to take a diagnostic examination to assess the depth of his or her background in biological science, and to help plan the Program of Study. The diagnostic exam must be completed in the student’s first semester (as part of BIOL 6690), is conducted by an exam committee appointed
by the Chair of the Graduate Committee, and results in a diagnostic exam report. See the Biology Graduate Program website for guidelines and other information.

An advisory committee will guide each student in establishing his or her program of study based upon the student’s diagnostic exam report, background and research interests. Formation of the advisory committee will occur in the student’s first semester. A minimum of 30 credit hours is required for graduation, including at least 16 credits earned at the 6600 level in biology. In addition to the courses required for all biology graduate students, M.S. students are required to take the following courses:

- BIOL 6648 Graduate Problems (4 credit hours)
- BIOL 6650 Thesis (6 credit hours)
- BIOL 6692 Graduate Seminar (1 credit hours)

The remaining 14 credits may be earned at the 5500 or 6600 level, of which eight credits may come from a related discipline. Courses, seminars, special projects, or readings, assigned by the student’s advisory committee, will provide mastery in core conceptual areas in the biological sciences, including genetics and evolution; anatomy and physiology of animals or plants; cell biology, biochemistry, or molecular biology; and ecology. Students are encouraged to develop a research tool, which can be accomplished by taking classes in biometry, microscopy, or a related field outside the biological sciences, such as geology, engineering, economics, or computer science.

**Research Requirements**

A substantial, original research project is required, culminating in a written thesis and oral presentation of the findings at a Biological Sciences department seminar. A thesis proposal must be completed in the student’s second semester (typically spring); a written proposal will be given to the advisory committee 1 week prior to a proposal seminar (presented to the department as part of BIOL 6691), to be followed by a proposal defense. The successful proposal defense will result in the development and submission of a program of study to the program director. Graduate students may not sign up for BIOL 6650 (Thesis) until their thesis proposal has been presented to the department and approved by their advisory committee.

Following completion of an original thesis research project and written thesis, the student will present his or her research findings in a seminar presented to the department and followed by a satisfactory oral defense to the advisory committee.

Additional details regarding the graduate timeline and procedures are available on the ISU Department of Biological Sciences website (http://www.isu.edu/bios).

**Master of Science (M.S.) in Microbiology**

The intent of the Microbiology M.S. program is to produce scientists with the ability to conduct independent research and to be fluent in the scientific literature. As a terminal degree, the Master of Science in Microbiology qualifies students for technical research positions in academia, industry and government research facilities. It also prepares students to progress into doctoral programs in Microbiology and related areas.

**Admissions**

Acceptance to the Microbiology M.S. program requires that a faculty member agree to serve as the candidate’s advisor. Candidates must have at least a 3.0 GPA for all upper division credits taken in the previous degree program. Scores in the verbal, quantitative, and analytical portions of the GRE must be submitted; scores in the 35th percentile or higher are required on the verbal and quantitative portions of the GRE. If either the GPA or GRE requirement is not met, the Microbiology Graduate Programs Committee may choose to admit the candidate to “Classified (w/PR)” status.

**Prerequisites**

It is expected that applicants to the program will have a broad scientific background, and will have completed coursework at the undergraduate level in the following areas:

- 1 semester of Calculus (Calculus through Multivariable Calculus recommended)
- 1 year of General Chemistry (+lab)
- 1 year of Organic Chemistry (+lab)
- 1 year of Physics (+lab)
- 1 semester of Quantitative Analysis, Analytical Chemistry, or Inorganic Chemistry (+lab)
- 1 semester of Statistics
- Genetics (lab recommended)
- General Microbiology (+lab)

The Microbiology M.S. program will be tailored to the requirements of the student’s program of study (as determined by the student’s Advisory Committee), and will include coursework to rectify any deficiencies as determined by the student’s Advisory Committee.

Coursework taken at the undergraduate level to satisfy deficiencies does not count toward the graduate degree; however, such coursework must appear on the student’s Planned Program of Study. Coursework taken at the undergraduate level to satisfy deficiencies must be taken for letter grades and the grades earned must be “C” or better.

**Graduate Coursework in the Microbiology M.S. program**

The M.S. program requires a substantial, original research project that culminates in a thesis; a minimum of 30 credits (including research and thesis) earned in graduate courses and seminars and expertise in one or more conceptual areas of the major sub-disciplines of Microbiology. The student’s Advisory Committee will direct the student to specific course offerings to satisfy the coursework guidelines.

The three core areas in the Microbiology M.S. program are:

- Biochemistry, Genetics, Molecular Biology, and Physiology of Microorganisms
- Immunology, Virology, and Medical Microbiology
- Microbial Ecology and Applied, Industrial, and Environmental Microbiology

**Core Courses for Biology Graduate Programs**

All students in the graduate programs in Biology and Microbiology will take the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 6690</td>
<td>Careers in Life Sciences (fall semester of first year)</td>
</tr>
<tr>
<td>BIOL 6605</td>
<td>Biometry (spring semester)</td>
</tr>
<tr>
<td>BIOL 6691</td>
<td>Seminar (second semester for M.S. students; third semester for doctoral students)</td>
</tr>
</tbody>
</table>

Thirty total graduate credits approved by the Microbiology Graduate Programs Committee and the Graduate School are required to complete the Microbiology M.S. degree program. At least 15 of these credit hours must be earned at the 6600 level. Students must take a minimum of 3 credits of BIOL 6648 Graduate Problems and 3 credits of BIOL 6650 Thesis. During the second semester of their first year in the program, students in the Microbiology M.S. program will present their research proposal in a public forum as part of BIOL 6695 Seminar.
in Microbiology. Students in the Microbiology M.S. program will also take 2 additional credits of Seminar in Microbiology (BIOL 6695).

Advisory Committee

The Advisory Committee consists of a minimum of three members of the Idaho State University Graduate Faculty, including a Graduate Faculty Representative (GFR). The student, in consultation with the major advisor, selects at least one additional faculty member with expertise related to the student’s research area. At least one of the advisory committee must be a member of the Microbiology Graduate Programs Committee. The GFR is appointed by the Dean of the Graduate School, who is open to recommendations from the major advisor. The GFR need only participate in the thesis defense, but may be involved throughout the student’s program. The initial committee meeting should be held during the first semester of the student’s graduate program.

Written Proposal, Proposal Seminar, and Proposal Defense

During the second semester of the first year in the program, Microbiology M.S. students must submit a research proposal to the student’s Advisory Committee two weeks prior to a formal seminar presentation of the proposed research. This proposal will:

1. be at least 5 pages in length, with citations appended,
2. be retained in the student’s departmental file.

Students will present a seminar on their proposed thesis research as part of BIOL 6695. At least one week prior to the seminar, students must submit an abstract to the seminar organizer. Immediately following the proposal seminar, the student will defend the proposal in a closed session with their Advisory Committee. A revised proposal addressing questions raised at the defense must be approved by the advisory committee by the end of the semester in which the seminar was given.

Each Microbiology M.S. applicant must submit a thesis embodying the results of original and creative research. The thesis must demonstrate the student’s ability in scientific investigation. The thesis must include a comprehensive review of the literature on the topic, and must demonstrate an organized, coherent development of ideas, with a clear exposition of results and creative discussion on the conclusions. The form and style of the thesis should comply with the format prescribed by the national or international-level journal in which the student intends to publish the material and must meet the requirements of “Instructions for Preparing Theses, Dissertations, Doctoral, Arts Papers, and Professional Projects,” which is available from the Graduate School. Within the framework of these constraints, however, the format of the thesis can vary in the number and arrangement of chapters. After the thesis has been approved for format and content by the major professor, and not later than two weeks before the date of the final examination, the student must deliver a copy of the thesis to each member of the advisory committee.

Following completion of the written thesis, the student will present the research findings in a public seminar. The thesis presentation will be followed by an oral defense conducted by the Advisory Committee. The student is responsible for scheduling the defense with the Graduate School and advertising the thesis seminar, with notices posted in the Life Sciences Building and in the Department newsletter, at least one week in advance of the seminar date. Please refer to http://isu.edu/bios/grad/guidelines/ for the manual, Instructions for Preparing Theses, Dissertations, Doctor of Arts Papers, and Professional Projects, for thesis clearance instructions.

Residency Requirements

The equivalent of at least two years of full-time study is required. Part of the work may be completed elsewhere with the approval of a student’s Advisory Committee, but two consecutive regular semesters of full-time study must be taken in residence at this university.

Bachelor of Science/Master of Science

The goal of this option is to allow academically strong students to begin work towards an M.S. degree after completing the Junior year. This will allow students to complete an M.S. degree, as well as a B.S. degree, with only one additional year in school. This option is only available to students who have demonstrated an interest in independent research before the end of the Junior year, who can meet the Biological Sciences GPA and GRE requirements for admission to the M.S. program, and who have worked with a member of the Graduate Faculty who has agreed to serve as the student’s Graduate Advisor. After being accepted into the M.S. program, students who pursue this option will have to spend at least two summers doing research and/or coursework. Given its compressed timeline and academic intensity, this option is only available to students who have demonstrated a high level of academic ability.

The student will be required to complete all of the graduation requirements for a B.S. degree in the Department of Biological Sciences. That degree will be awarded when those requirements are met, typically at the end of the 4th year. In completing the graduation requirements for a B.S. degree, these students should have met all of the coursework requirements for admission to the M.S. program.

The student will be admitted to the MS Program after completing the Junior year. Admission requires that the student meet the existing GPA requirement (at least 3.0 for the Sophomore and Junior years).

The M.S. degree will be awarded only after the student has completed all of the requirements for the M.S. program.

Requirements

These requirements are for undergraduate students admitted to the BS/MS Option ONLY. BS/MS students are restricted to a maximum of six graduate-level credits until after completion of the B.S. degree.

The micro-anatomy and formative processes of the teeth and their surrounding structures. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5500L.
Biology Teaching Methods: 3 semester hours.
Planning, teaching and evaluating teaching activities. Practical experience in methods used in science classrooms and enhancing professional development. Required for secondary education major in biology. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: 16 credit-hours of Biology, or permission of instructor.

Student of parasitic symbiomes of animals, plants and other organisms focusing on concepts, principles, and consequences of such interactions and the coevolutionary processes by which they are created. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.
BIOL 5526 Herpetology: 3 semester hours.
The biology of amphibians and reptiles; lecture topics include evolutionary history, functional morphology, physiological ecology, biogeography, reproductive, and population ecology. Laboratories and field trips cover systematic, natural history, and collecting/sampling techniques. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5526L.

BIOL 5526L Herpetology Lab: 1 semester hour.
Assignments to apply principles from BIOL 5526. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5526.

BIOL 5527 Ichthyology: 3 semester hours.
The biology of fishes; lecture topics include evolutionary history, functional morphology, physiological ecology, and biogeography. Laboratory and weekend field trips cover identification, life history and collecting techniques. Emphasis on Idaho species. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5527L.

BIOL 5527L Ichthyology Lab: 1 semester hour.
Assignments to apply principles from BIOL 5527. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5527.

BIOL 5528 Medical Parasitology and Entomology: 3 semester hours.
Study of animal parasites, with an emphasis on protozoa, helminths and arthropods affecting human health and welfare by their presence or indirectly via pathogens they transmit. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5528L.

BIOL 5528L Medical Parasitology and Entomology Lab: 0 semester hours.
Assignments to apply principles from BIOL 5528. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5528.

BIOL 5529 Regional Anatomy and Histology: 4 semester hours.
Regional approach to gross human anatomy emphasizing the use of prosected materials and microscopic anatomy. Designed primarily for students in the Physician Assistant Program. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5529L.

BIOL 5529L Regional Anatomy and Histology Lab: 0 semester hours.
Assignments to apply principles from BIOL 5529. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5529.

BIOL 5531 General Entomology: 3 semester hours.
Study of structure, development, classification, and life histories of insects, including ecological, economic and management considerations. An insect collection may be required. Field trips. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5531L.

BIOL 5531L General Entomology Lab: 1 semester hour.
Assignments to apply principles from BIOL 5531. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5531.

BIOL 5532 Biochemistry: 3 semester hours.
Comprehensive discussion/presentation of structure, function and metabolism of biological macromolecules and their constituents, including energetics, regulation, and molecular biology, with emphasis on critical analysis of biochemical issues. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Organic Chemistry or Introduction to Biology or permission of instructor.

BIOL 5533 Microbial Physiology: 3 semester hours.
Comparative physiology of microorganisms, including structure/function, metabolic diversity, enzyme mechanisms of microbial metabolism, and physiology of extreme organisms. Lectures, Class Exercises. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5533L. PREREQ: Microbiology and Bio-chemistry or permission of instructor.

BIOL 5533L Microbial Physiology Lab: 1 semester hour.
Laboratory exercises in comparative physiology of microorganisms. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5533.

BIOL 5534 Microbial Diversity: 3 semester hours.
Enrichment, cultivation, and isolation of prokaryotes from various metabolic groups and environments. Microorganisms will be identified using classical microbial techniques and modern molecular methodologies. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5534L. PREREQ: Microbiology and BIOL 5533 or permission of instructor.

BIOL 5534L Microbial Diversity Lab: 1 semester hour.
Enrichment, cultivation and isolation of prokaryotes from various metabolic groups and environments. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. Equivalent to CHEM 5538. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: GEOL 5531 or BIOL 3314 or equivalent.

BIOL 5537 Experimental Biochemistry: 1 semester hour.
Laboratory course including both qualitative and quantitative experiments. Equivalent to CHEM 5538. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ or COREQ: BIOL 5532 or BIOL/ CHEM 5545.

BIOL 5538 Ornithology: 4 semester hours.
Study of the origin, evolution, structure, habits, adaptations, distribution, and classification of birds. Field trips. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: BIOL 5539L.

BIOL 5539 Principles of Taphonomy: 3 semester hours.
Effects of processes which modify organisms between death and the time the usually fossilized remains are studied. Emphasis on vertebrates. Equivalent to ANTH 5539 and GEOL 5539. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor.

BIOL 5540 Human Gross Anatomy: 4 semester hours.
Comprehensive regional study of gross human anatomy with emphasis on the upper limb, thorax, abdomen, pelvis and perineum. Designed for the first year dental students and complements BIOL 5550. Lecture and laboratory. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5540L.

BIOL 5540L Human Gross Anatomy Lab: 0 semester hours.
Assignments to apply principles from BIOL 5540. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5540.

BIOL 5541 Mammalogy: 3 semester hours.
General study of mammals including classification, identification, habits, ecology, economics, and techniques of study, with emphasis on North American forms. Field trips. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5541L.
BIOL 5541L Mammalogy Lab: 1 semester hour. 
Assignments to apply principles from BIOL 5541. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
COREQ: BIOL 5541.

BIOL 5542 Plant-Animal Interactions: 3 semester hours. 
Coevolution of plant and animal form and function emphasizing pollination, herbivory, parasitism, frugivory/seed dispersal, and optimal foraging. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

BIOL 5543 Endocrinology: 3 semester hours. 
Study of the anatomy and physiology of the ductless glands and the properties and uses of natural and synthetic hormones. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

BIOL 5544 Cell and Molecular Biology: 4 semester hours. 
Fundamental principles of molecular biology: DNA replication, repair, and recombination, transcriptional and post-transcriptional regulation of gene expression, RNA metabolism, protein synthesis, targeting and turnover, post-translational modifications, signal transduction, regulation of the cell division cycle, and molecular genetics of development. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
PREREQ: Introductory Biology and Organic Chemistry. 
COREQ: BIOL 5544L.

BIOL 5544L Cell and Molecular Biology Lab: 1 semester hour. 
Laboratory techniques in molecular biology, including cloning, PCR and DNA sequencing. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
COREQ: BIOL 5544.

BIOL 5545 Biochemistry I: 3 semester hours. 
Introduction to basic aspects of biochemical systems, including fundamental chemical and physical properties of biomolecules. Enzymology including allostery, metabolic regulation, bioenergetics, and carbohydrate metabolism. Equivalent to CHEM 5545. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
PREREQ: Introduction to Biology and Organic Chemistry or permission of instructor.

BIOL 5546 Selected Topics in Physiology: 1 semester hour. 
Selected topics in physiology for dental students: blood coagulation-complement-kinin systems, prostaglandin and related substances, vitamins, steroids, mucopolysaccharides, collagen and other extracellular matrix molecules and cyto- and molecular genetics. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

BIOL 5547 Biochemistry II: 3 semester hours. 
Functional continuation of BIOL 5545. Lipid, amino acid and nucleotide metabolism. Emphasis is on metabolic regulation, metabolic dysfunction, biochemical mechanism of hormone action, biochemical genetics, protein synthesis, and metabolic consequences of genetic defects. Equivalent to CHEM 5547. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
COREQ: BIOL/CHEM 5545.

BIOL 5548 Advanced Experimental Biochemistry: 2 semester hours. 
Advanced laboratory projects designed to emphasize techniques of qualitative and quantitative biochemical analysis. Equivalent to CHEM 5548. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
PREREQ: BIOL 5537/CHEM 5538. 
COREQ: BIOL/CHEM 5547.

BIOL 5549 Human Physiology I: 4 semester hours. 
First of a two-course sequence. Physiology of the nervous, muscular, circulatory, respiratory, and excretory systems. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
COREQ: BIOL 5525.

BIOL 5550 Head and Neck Anatomy: 4 semester hours. 
Comprehensive presentation of the anatomy of the head and neck as it applies to the practice of dentistry. Lecture and laboratory. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
COREQ: BIOL 5550L.

BIOL 5550L Head and Neck Anatomy Lab: 0 semester hours. 
Assignments to apply principles from BIOL 5550. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
COREQ: BIOL 5550.

BIOL 5551 Immunology: 3 semester hours. 
Fundamental concepts of antibody-mediated and cell-mediated mechanisms of immunity. In-vivo and invitro antigen-antibody interactions are discussed. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
PREREQ: Microbiology or permission of instructor.

BIOL 5551L Immunology Laboratory: 1 semester hour. 
Selected laboratory experiments to accompany BIOL 5551 Immunology. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
Open to non-majors by special permission. 
PREREQ or COREQ: BIOL 5551.

BIOL 5552 Pathogenic Microbiology: 3 semester hours. 
How the medically important bacteria, viruses and fungi interact with the host to produce disease, including microbe characteristics, pathogenesis, pathological processes, prevention, and treatment methods. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
PREREQ: BIOL 5551 and permission of instructor.

BIOL 5553 Foundations in Neuroscience: 3 semester hours. 
Organizing principles in neuroscience including biological signaling of excitable cells, neuroanatomy and regional brain functions, and sensorimotor integration of behavior. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
PREREQ: Permission of instructor.

BIOL 5554 Advanced Immunology: 3 semester hours. 
Detailed study of selected areas of immunobiology. Course content will vary with current demand. Students will lead discussions and present current literature. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
PREREQ: BIOL 5551 Immunology.

BIOL 5555 Pathogenic Microbiology Laboratory: 2 semester hours. 
Will emphasize procedures for the isolation and identification of pathogenic bacteria. Clinical specimens will be provided for use in identification of unknowns. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
PREREQ or COREQ: BIOL 5555.

BIOL 5556 Human Physiology II: 4 semester hours. 
Physiology of gastrointestinal, endocrine, and reproductive systems. Includes studies of acid-base balance, peripheral circulation, shock, and temperature regulation. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
PREREQ: BIOL 5549 or equivalent.

BIOL 5558 Fish Ecology: 3 semester hours. 
Study of the behavior, habitat use, population dynamics, and management of freshwater fishes, especially salmon and trout. Laboratory and weekend field trips emphasize sampling techniques and data analysis. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
COREQ: BIOL 5559L. 
PREREQ: BIOL 5527.

BIOL 5559L Fish Ecology Lab: 1 semester hour. 
Assignments to apply principles from BIOL 5559. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. 
COREQ: BIOL 5559. 
PREREQ: BIOL 5527.
Biology 5560: Neuroscience: 4 semester hours.
Comprehensive presentation of the anatomy of the central nervous system, the brain and spinal cord. Combined lecture and laboratory demonstration. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor.

Biology 5560L: Neuroscience Lab: 1 semester hour.
Detailed examination of the gross anatomy and pathways of the human central nervous system. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor.

Biology 5561: Advanced Genetics: 3 semester hours.
Detailed and critical consideration of selected genetic topics with emphasis of recent advances. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor.

Biology 5562: Freshwater Ecology: 3 semester hours.
Study of the interaction of physical and biotic factors in aquatic communities. Field trips. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5562L.

Biology 5562L: Freshwater Ecology Lab: 1 semester hour.
Assignments to apply principles from BIOL 5562. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5562.

Biology 5563: Human Pathophysiology: 4 semester hours.
The study of basic processes underlying diseases with an emphasis on correlating anatomical, functional, and biochemical alterations with clinical manifestations. Laboratory required. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5563L.

Biology 5563L: Human Pathophysiology Lab: 0 semester hours.
Assignments to apply principles from BIOL 5563. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5563.

Biology 5564: Lectures in Human Physiology: 4 semester hours.
Physiology of the nervous, muscular, circulatory, respiratory, and excretory systems. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

Biology 5566: Medical Mycology: 3 semester hours.
Lecture/Laboratory course addressing medically important fungi. Taxonomy, clinical disease, pathogenesis, immunological diagnosis and laboratory identification of contaminants, opportunists, superficial, cutaneous, subcutaneous and systemic mycoses. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

Biology 5568: Oral Microbiology: 1 semester hour.
Study of microbiology of plaque, caries, periodontal disease, immunobiology of oral disease and control of microorganisms with antimicrobial agents. Four periods devoted to laboratory study of medically important oral microbes. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ or PREREQ: BIOL 5555.

Biology 5569: Special Topics in Microbiology: 1-4 semester hours.
Study of selected topics in microbiology. Course contents will vary with topics selected. May be repeated with departmental approval for non-repetitive course content. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor.

Biology 5570: Cross-Sectional Anatomy: 2 semester hours.
Applied regional anatomy as viewed in sectional planes, emphasizing topographic relationships of organs and surface anatomy, with interpretation of correlated CT and MRI imaging. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

Biology 5571: Biological Imaging: 3 semester hours.
Microscopy with an emphasis on image formation, documentation, interpretation and analysis relevant to experimental applications in the biological sciences. Lecture and laboratory with independent research component. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

Biology 5573: Applied and Environmental Microbiology: 3 semester hours.
Concepts in applied microbiology and microbial ecology, including fermentation, biotechnology, and ecophysiology. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5573L.

Biology 5573L: Applied and Environmental Microbiology Lab: 1 semester hour.
Laboratory exercises in applied and environmental microbiology. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5573.

Biology 5574: Human Anatomy-Occupational Therapy and Physical Therapy: 5 semester hours.
Applied regional anatomy emphasizing the development, histology and gross anatomy of the musculoskeletal, peripheral nervous, and cardiopulmonary systems. Includes laboratory with cadaver dissection. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5574L.

Biology 5574L: Human Anatomy-Occupational Therapy and Physical Therapy Lab: 0 semester hours.
Assignments to apply principles from BIOL 5574. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5574.

Biology 5575: General Virology: 3 semester hours.
Introduction to the general principles of virology through consideration of structure, genetics, replication, and biochemistry of animal and bacterial viruses. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

Biology 5575L: General Virology Laboratory: 1 semester hour.
Designed to acquaint students with the techniques and experimental principles used in the study of bacterial viruses. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5575.

Biology 5577: Bacterial Virology Laboratory: 1 semester hour.
Introduces tissue culture methods and other techniques employed in the study of animal viruses. Must be accompanied by BIOL 5575. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

Biology 5578: Animal Virology Laboratory: 1 semester hour.
Discovery research in life sciences conducted in a cooperative learning community that includes mentoring undergraduates. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. May be repeated. PREREQ: Permission of the instructor.

Biology 5580: Mentored Research Alliance: 2 semester hours.
Individual problems will be assigned to students on the basis of interest and previous preparation. May be repeated. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: A minimum of two courses in Biological Sciences and permission of instructor.

Biology 5582: Independent Problems: 1-4 semester hours.
Individual problems will be assigned to students on the basis of interest and previous preparation. May be repeated. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: A minimum of two courses in Biological Sciences and permission of instructor.
BIOL 5586 Human Systemic Physiology: 5 semester hours.
One semester human physiology course emphasizing the function and regulation of the muscular, skeletal, circulatory, respiratory, urinary, reproductive, and immune systems. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5586L.

BIOL 5586L Human Systemic Physiology Lab: 0 semester hours.
Assignments to apply principles from BIOL 5586. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. COREQ: BIOL 5586.

BIOL 5588 Advanced Radiobiology: 3 semester hours.
An advanced-level class covering aspects of molecular radiobiology, teratogenesis, oncogenesis, and acute radiation illnesses. It also considers nonstochastic radiation effects and the epidemiology of radiation exposures. Equivalent to HPHY 5588. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Permission of instructor.

BIOL 5589 Field Ecology: 4 semester hours.
An intensive field of study of at least one biogeographical region to increase students' knowledge of and skill with field sampling techniques, field-study design, data collection and analysis, and report preparation. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

BIOL 5590 Ecosystem Ecology and Global Change: 4 semester hours.
Examination of the structure and function of ecosystems and their responses to natural and anthropogenic changes emphasizing energy, water, carbon, and nitrogen cycling. Field trips. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

BIOL 5595 Animal Behavior: 4 semester hours.
Behavior of animals and the evolutionary mechanisms that dictate behavioral patterns. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

BIOL 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. May be graded S/U. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

BIOL 5598P Prof Development Workshop: 3 semester hours.
New methods and opportunities to enhance and supplement skills. Subject to the approval of the Dean of the student's college, a maximum of eight credits earned in workshops may be applied toward a degree; students taking the courses only for personal development may choose the 0-credit option; those seeking professional development must choose a for-credit option. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

BIOL 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

BIOL 6601 Advanced Animal Behavior: 3 semester hours.
Behavior and social organization of animals with particular attention to the vertebrates. Lecture, laboratory, and field work. PREREQ: Graduate standing and permission of department.

BIOL 6602 Advanced Plant Physiology: 3 semester hours.
Study of interrelationships of soil, water, and minerals in the nutrition of plants. PREREQ: BIOL 5504.

BIOL 6603 Comparative Physiology: 3 semester hours.
Study of the ways in which organisms meet their functional requirements. Lecture and laboratory. PREREQ: Permission of department.

BIOL 6604 Advanced Ecology of Streams and Rivers: 3 semester hours.
Study of the ecology of streams; chemical, physical, and geological aspects in relation to biota. The production of organic matter in flowing water is emphasized, including the tracing of food chains and food webs and the construction of energy budgets. Field trips. PREREQ: Permission of instructor.

BIOL 6605 Biometry: 4 semester hours.
Application of descriptive and analytical statistical methods to experimental design and biological research.

BIOL 6606 Scientific Writing: 3 semester hours.
Review of basic principles of grammar, organization, style, and persuasive argument as applied to specific areas of scientific writing. Each student will write proposals, technical reports and review manuscripts, and reviews of proposals and manuscripts.

BIOL 6607 Environmental Physiology: 3 semester hours.
Study of the physiological mechanisms and interrelated behavioral patterns by which animals respond to environmental factors. PREREQ: Graduate standing and permission of instructor.

BIOL 6608 Stable Isotopes in Environmental Science: 4 semester hours.
Theory and use of stable isotopes in natural sciences, with an emphasis towards the fields of ecology, geology and archeology. Basic principles of stable isotope analysis and applications towards understanding cycles of C, N, S and water, food web analysis, and paleoclimate. Individual student laboratory projects developed and carried out.

BIOL 6610 Principles of Molecular Biology: 3 semester hours.
Introduction to subcellular biology and molecular genetics. DNA replication, cell division, the genetic code, transcription, translation, enzyme function, and control mechanisms in procaryotic and eucaryotic cells. PREREQ or COREQ: BIOL 5532.

BIOL 6613 Biogeography: 3 semester hours.
Discussion of patterns of distribution of species and their historical and ecological causes. Includes research project.

BIOL 6614 Evolutionary Ecology: 3 semester hours.
Evolutionary theory applied to ecological processes, including selection theory, ecological genetics, life-history evolution and coevolution. PREREQ: BIOL 5517.

BIOL 6616 Advanced Community Ecology: 4 semester hours.
Historical and contemporary concepts and methods in community ecology and its interface with other fields, including molecular biology, informatics, conservation, social sciences, and landscape and ecosystem ecology. Emphasizes quantitative models and data analysis.

BIOL 6621 Advanced Methods in Microbiology: 3 semester hours.
PREREQ: Graduate standing and permission of instructor.

BIOL 6623 Soil and Ground Water Bioremediation: 3 semester hours.
Theoretical and applied aspects of biological treatment for contaminated subsurface systems.

BIOL 6624 Microbial Ecology: 3 semester hours.
Ecological principles applied to microorganisms. PREREQ: Course in Microbiology.

BIOL 6628 Cytology and Cell Physiology: 4 semester hours.
Advanced study of the functions and structural components of cells. Lecture and laboratory. PREREQ: Permission of instructor.
BIOL 6629 Basic Concepts in Biology: 3 semester hours.
Considerations of fundamental concepts of biology, their origin and development.
PREREQ: Permission of the instructor.

BIOL 6631 Advanced Systematic Botany: 3 semester hours.
Classification of plants as it rests on morphological, chemical, ecological, and genetic bases. PREREQ: BIOL 5512.

BIOL 6632 Advanced Systematic Botany: 3 semester hours.
Classification of plants as it rests on morphological, chemical, ecological, and genetic bases. PREREQ: BIOL 5512.

BIOL 6633 Advanced Microbial Physiology: 3 semester hours.
Advanced topics in microbial physiology and biochemistry. PREREQ: BIOL 5532 and permission of instructor.

BIOL 6634 Intermediary Metabolism: 3 semester hours.
Theory, reactions, and methods pertinent to research in intermediary metabolism. PREREQ: BIOL 5532 and permission of instructor.

BIOL 6636 Experimental Intermediary Metabolism: 2 semester hours.
Must be accompanied by or preceded by BIOL 6634.

BIOL 6641 Adv Topics in Immunology: 1-4 semester hours.
Current research and practice in immunology and immunohematology (transfusion medicine) including molecular approach to diagnosis and treatment. May be repeated for a maximum of 4 credits.

BIOL 6648 Graduate Problems: 1-9 semester hours.
Thesis related research. May be repeated. Graded S/U. PREREQ: Graduate standing and permission of instructor.

BIOL 6650 Thesis: 1-6 semester hours.
1 to 6 credits. May be repeated. Graded S/U.

BIOL 6651 Advanced Studies in Ecology: 2-6 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with ecological relationships. May be repeated.

BIOL 6652 Advanced Studies in Physiology: 2-6 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with problems in physiology. May be repeated.

BIOL 6653 Advanced Studies in Vertebrate Zoology: 2-6 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with problems in vertebrate zoology. May be repeated.

BIOL 6654 Advanced Studies in Invertebrate Zoology: 2-6 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with problems in invertebrate zoology. May be repeated.

BIOL 6655 Advanced Studies in Vertebrate Paleontology: 2-6 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with problems in vertebrate paleontology. May be repeated.

BIOL 6656 Advanced Studies in Systematic Biology: 2-6 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with problems in systematic biology. May be repeated.

BIOL 6657 Advanced Studies in Plant Biology: 2-6 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with problems in plant biology. May be repeated.

BIOL 6658 Advanced Studies in Limnology: 2-6 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with problems in limnology. May be repeated.

BIOL 6659 Advanced Studies in Genetics: 2-6 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with problems in genetics. May be repeated.

BIOL 6660 Selected Topics in Biochemistry: 3 semester hours.
Detailed study of selected areas of biochemistry. Course content will vary with current demand. PREREQ: BIOL 5532 or permission of instructor.

BIOL 6661 Advanced Studies in Environmental Physiology: 2-6 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with problems in environmental physiology. May be repeated.

BIOL 6662 Advanced Studies in Developmental Biology: 2-6 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with problems in developmental biology. May be repeated.

BIOL 6663 Selected Topics Microbiology: 1-4 semester hours.
Detailed study of selected areas of microbiology. Course content will vary with current demand. May be repeated. PREREQ: Permission of instructor.

BIOL 6665 Advanced Bacterial Virology: 3 semester hours.
Detailed study of selected areas of bacterial virology. Course content will vary with current demand. PREREQ: BIOL 5575 and permission of instructor.

BIOL 6666 Advanced Animal Virology: 3 semester hours.
Detailed study of selected areas of animal virology. Course content will vary with current demand. PREREQ: BIOL 5575 and permission of instructor.

BIOL 6667 Environmental Science and Pollutants: 3 semester hours.
Structure and function of ecosystems, sources and characteristics of hazardous materials, mechanisms and pathways of pollutant transport and degradation, mechanisms of pollutant impact on ecosystems and human health. PREREQ: BIOL 5521, an undergraduate or graduate ecology course or equivalent.

BIOL 6668 Endangered Species: 3 semester hours.
An advanced-level course required for all first-year graduate students. A review of the principles and core areas of biology, and an overview of current hypotheses, approaches, and research in the field.

BIOL 6669 Careers in Life Sciences: 1 semester hour.
An advanced level course required for all first-year graduate students. A review of current research and literature. May be repeated until a maximum of 4 credits is earned. Graded S/U.

BIOL 6670 Selected Topics Microbiology: 1-4 semester hours.
Detailed study of selected areas of microbiology. May be repeated. PREREQ: Permission of instructor.

BIOL 6671 Advanced Animal Virology: 3 semester hours.
Detailed study of selected areas of animal virology. Course content will vary with current demand. PREREQ: BIOL 5532 or permission of instructor.

BIOL 6672 Advanced Bacterial Virology: 3 semester hours.
Detailed study of selected areas of bacterial virology. Course content will vary with current demand. PREREQ: BIOL 5532 or permission of instructor.

BIOL 6673 Advanced Animal Physiology: 3 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with problems in animal physiology. May be repeated.

BIOL 6674 Advanced Studies in Invertebrate Zoology: 2-6 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with problems in invertebrate zoology. May be repeated.

BIOL 6675 Advanced Bacterial Virology: 3 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with problems in bacterial virology. May be repeated.

BIOL 6676 Advanced Studies in Developmental Biology: 2-6 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with problems in developmental biology. May be repeated.

BIOL 6677 Environmental Science and Pollutants: 3 semester hours.
Structure and function of ecosystems, sources and characteristics of hazardous materials, mechanisms and pathways of pollutant transport and degradation, mechanisms of pollutant impact on ecosystems and human health. PREREQ: BIOL 5521, an undergraduate or graduate ecology course or equivalent.

BIOL 6678 Advanced Virology: 3 semester hours.
Flexible use of seminars, lectures, and laboratory work dealing with problems in virology. May be repeated.

BIOL 6679 Experimental Course: 1-4 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

BIOL 7700 Supervised Teaching Internship: 1-9 semester hours.
Up to 9 credits per semester. May be repeated. Graded S/U.

BIOL 8850 Doctors Dissertation: 1-12 semester hours.
Dissertation. Variable credit. May be repeated. Graded S/U.
Chemistry

Chair and Professor: R. Rodriguez
Associate Chair and Professor: J. Pak
Professors: L. Castle, K. DeJesus, R. Holman, J. Kalivas, J. Rosentreter
Associate Professors: C. Evilia, L. Goss, A. Holland
Research Assistant Professor: X. Ma
Senior Lecturers: R. Rosentreter
Associate Lecturers: H. Quarder, E. Omar
Assistant Lecturers: A. Halpenny-Weathersby, S. Jolley

Master of Science in Chemistry

Goals
1. Graduates will attain a broad knowledge in their focus area of chemistry.
2. Graduates will conduct novel research in chemistry.
3. Graduates will be prepared to continue their education in pursuit of a doctorate.

Combined BS/MS Program in Chemistry

Goals
1. Students will obtain a broad knowledge in the four major areas of chemistry.
2. Graduates will conduct research in a narrow part of one of the above.
3. Graduates will be prepared to continue their education in pursuit of a doctorate.

Application Process

All applications for Fall admission to Chemistry must be submitted by April 1, and should include the following components, uploaded within the application form:

1. Unofficial/Official transcripts describing all post-secondary work. All official transcripts will be required if admitted.
2. A letter of intent describing your reasons for choosing our program, and how your personal strengths and goals align with your expectations of the program.
3. Three letters of recommendation, submitted through the application system, from professionals in the sciences or mathematics attesting to your potential to succeed in a graduate chemistry program.

Applications for the BS/MS program should be submitted directly to the Chemistry Department, and should also include a summary of current courses and expected grades. Applications for the MS and MNS programs should be submitted to the graduate school, following their additional guidelines on pages 7-9. These include submission of GRE scores and payment of a processing fee.

Doctor of Philosophy in Engineering and Applied Science

A doctoral program in Engineering and Applied Science, administered through the College of Science and Engineering, is available to Chemistry students. The complete program description is provided elsewhere in the College of Science & Engineering section of the Graduate Catalog.

Master of Science in Chemistry

Admission Requirements

The student must meet all criteria for admission to the Graduate School.

In addition, each applicant must have a GPA of at least 3.0 for all upper-division credits taken in the previous degree program (a B.S. or B.A. in Chemistry). Graduate Record Examination (GRE) scores must be in the 35th percentile or higher in two of the exam's three sections.

Several courses are prerequisite for the M.S. degree programs; any student who has not yet met these requirements must take them as part of his/her M.S. program. These are:

1. one semester of calculus
2. one year of physics
3. one semester of inorganic chemistry
4. one year of organic chemistry
5. one semester of analytical chemistry
6. one year of physical chemistry

Many of these requirements must be completed prior to enrolling in specific MS-level courses. Credits earned in these undergraduate courses do not count toward the 30 credit requirement for the M.S. degree.

General Requirements

The M.S. program includes both thesis and non-thesis degree options, each of which requires a total of 30 graduate credits including 15 credits in 6600-level chemistry or chemistry-related courses. The latter set of credits are drawn primarily from among four core classes, CHEM 6609, CHEM 6630, CHEM 6655, and CHEM 6671, and all MS students are required to take 2 credits of seminar, CHEM 6601. Each program of study must be approved by the student's committee, the Chemistry Department, and the Graduate School.

Thesis Option

The thesis option emphasizes original research in a specific field, and requires a substantial, original research project that culminates in a thesis and defense. Timely completion of this degree typically involves summer research in addition to the formal coursework outlined below. At least one of the core advanced courses is required, but others may, with committee approval, be replaced by other electives more relevant to a specific student's field of study. A suggested minimum schedule to maintain full-time status is as follows:

First Year

<table>
<thead>
<tr>
<th>Fall/Spring</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 6630(^1)</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 6655(^1)</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 6635</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 6601</td>
<td>1</td>
</tr>
</tbody>
</table>
Electives and/or Prerequisites

Second Year

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 6671</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 6609</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 6650</td>
<td>6</td>
</tr>
<tr>
<td>CHEM 6601</td>
<td>1</td>
</tr>
<tr>
<td>Electives</td>
<td>5</td>
</tr>
</tbody>
</table>

Total Hours: 36

1. All but one of these courses may, with committee and chair approval, be replaced by other graduate electives.

Non-Thesis Option

The non-thesis option emphasizes accumulation of broad chemical knowledge through coursework encompassing all fields of the discipline. Students may count no thesis credits and limited research credits toward this degree, and complete a multi-part written exam and subsequent oral defense at the conclusion of the program. A suggested minimum schedule to maintain full-time status is as follows:

First Year

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 6630</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 6655</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 6635</td>
<td>2</td>
</tr>
<tr>
<td>CHEM 6601</td>
<td>1</td>
</tr>
<tr>
<td>Electives and/or Prerequisites</td>
<td>9</td>
</tr>
</tbody>
</table>

Total Hours: 18

Second Year

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 6671</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 6609</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 6601</td>
<td>1</td>
</tr>
</tbody>
</table>

Total Hours: 18

1. With committee approval these courses may be replaced by other 6600-level coursework electives; at least 15 6600-level credits are required in total.

2. Few credits in CHEM 6635 may be counted toward the non-thesis degree.

Combined BS/MS Program in Chemistry

Admission Requirements

Students may be admitted to the program after having completed 64 credit hours. Application for admission must be made to the Chemistry Department. In addition, the student should have completed the following courses or their equivalent:

<table>
<thead>
<tr>
<th>Course</th>
<th>Equivalent</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1111 &amp; 1111L</td>
<td>General Chemistry I and General Chemistry I Lab</td>
</tr>
<tr>
<td>CHEM 1112 &amp; 1112L</td>
<td>General Chemistry II and General Chemistry II Lab</td>
</tr>
<tr>
<td>CHEM 3301 &amp; CHEM 3303</td>
<td>Organic Chemistry I and Organic Chemistry Laboratory I</td>
</tr>
<tr>
<td>CHEM 3302 &amp; CHEM 3304</td>
<td>Organic Chemistry II and Organic Chemistry Laboratory II</td>
</tr>
<tr>
<td>MATH 1170</td>
<td>Calculus I</td>
</tr>
<tr>
<td>MATH 1175</td>
<td>Calculus II</td>
</tr>
<tr>
<td>PHYS 2211 &amp; PHYS 2213</td>
<td>Engineering Physics I and Engineering Physics I Laboratory</td>
</tr>
<tr>
<td>PHYS 2212 &amp; PHYS 2214</td>
<td>Engineering Physics II and Engineering Physics II Laboratory</td>
</tr>
</tbody>
</table>

Suggested Preparatory Courses

Students are encouraged, but not required, to complete the following courses prior to entering the program. These courses must be completed eventually to satisfy the BS degree requirements and also serve as prerequisites for advanced courses in the BS/MS degree.

<table>
<thead>
<tr>
<th>Course</th>
<th>Equivalent</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 2211 &amp; CHEM 2213</td>
<td>Inorganic Chemistry I and Inorganic Chemistry I Laboratory</td>
</tr>
<tr>
<td>CHEM 2232 &amp; CHEM 2234</td>
<td>Quantitative Analysis and Quantitative Analysis Laboratory</td>
</tr>
</tbody>
</table>

General Requirements and Timeline

Students typically enter the BS/MS program after completing two years of college coursework. During the first semester each student is expected to select, subject to the approval of the Department Chair, three faculty members to serve as their advisory committee. In the second semester, each student will work with a research advisor to devise their planned program of study, write an overview of their research project, and apply for admission to the Graduate School. The student is expected to begin research no later than their first summer in the program. Thereafter, individual sections of the research paper will be required as the student progresses through the program.

The student must satisfy admission requirements and be admitted to the Graduate School prior to their fourth year. Continuation in the program requires that the student maintain a minimum GPA of 3.0 from date of admission, and make
satisfactory progress as approved by their committee. It will be recommended that students who are not making adequate progress discontinue the program.

The student must complete a total of 150 credit hours. This corresponds to 120 credit hours for the BS degree and 30 credit hours for the MS degree. The final course selection must be approved by the student’s advisory committee. Students are required to have completed all general education requirements by the end of their second year in the combined BS/MS program, and it is the intent that all students will finish within 3 years of admission to the program. Successful completion of the program requires that the student write and defend an original research paper before his/her research committee.

**Suggested Schedule**

The following schedule shows how a typical student might progress through the BS/MS program if they enter it having already completed CHEM 2211, CHEM 2213, CHEM 2232, and CHEM 2234. Each student is required to meet all course requirements for the BS degree in chemistry (except independent problems CHEM 4481 and CHEM 4482, which are replaced by CHEM 4485). Students should select between 4400 and 5500 levels in advanced courses depending on their specific needs to meet credit requirements in both BS and MS degrees. Each student is required to complete two credits of seminar (CHEM 6601), six credits of MS research (CHEM 6635), three of the advanced chemistry courses (CHEM 6609, CHEM 6630, CHEM 6655, and CHEM 6671) and three additional credits from among these or other 6600 level lecture courses. These twenty credits of 6600 level courses are taken during the second and third years of the program.

</table>

<sup>1</sup> Must be completed by the end of the junior year.

<sup>2</sup> CHEM 4485 Replaces CHEM 4481/4482 in the regular BS curriculum.

<sup>3</sup> Three of these four classes are required; one may be replaced by another 6600-level elective.
CHEM 5538 Experimental Biochemistry: 1 semester hour.
Laboratory course including both qualitative and quantitative experiments. Equivalent to BIOL 5537. PREREQ or COREQ: BIOL 5532 or BIOL/CHEM 5545.

CHEM 5547 Biochemistry I: 3 semester hours.
Introduction to basic aspects of biochemical systems, including fundamental chemical and physical properties of biomolecules. Enzymology, including allosterism, metabolic regulation, bioenergetics, and carbohydrate metabolism. Equivalent to BIOL 5545. PREREQ: Introductory Biology and Organic Chemistry or permission of instructor.

CHEM 5548 Biochemistry II: 3 semester hours.
Functional continuation of CHEM 5547. Lipid, amino acid, and nucleotide metabolism. Emphasis is on regulation of metabolism, metabolic dysfunctions, biochemical mechanisms of hormone action, biochemical genetics, protein synthesis, and metabolic consequences of genetic defects. Equivalent to BIOL 5547. PREREQ: BIOL/CHM 5547.

CHEM 5549 Advanced Experimental Biochemistry: 2 semester hours.
Advanced laboratory projects designed to emphasize techniques of qualitative and quantitative biochemical analysis. Equivalent to BIOL 5548. PREREQ: BIOL 5537/CHEM 5538. COREQ: BIOL/CHM 5547.

CHEM 5550 Modern Experimental Physical Chemistry: 2 semester hours.
Magnetic, optical, and electrical properties of materials, calorimetry, voltammetry, optical and laser spectroscopic techniques. PREREQ: CHEM 3334 and CHEM 3352.

CHEM 5570 Biorganic Chemistry: 3 semester hours.
Overview of basic principles of organic mechanisms, and overview of biochemistry principles, fundamentals of proteins and protein synthesis, enzymes and enzyme reaction mechanisms including group transfer, hydrolysis, animations, phosphorylation, reductions and oxidation, mono- and d-oxygenation, substitutions, carboxylations, and decarboxylations, isomerizations, and eliminations and addition reactions. Specific evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: CHEM 3302 and CHEM 4445 or BIOL 4445.

CHEM 5581 Independent Problems in Chemistry: 1-4 semester hours.
Directed library and laboratory research. Courses may be repeated to a maximum of 6 credits. PREREQ: CHEM 3352.

CHEM 5582 Independent Problems in Chemistry: 1-4 semester hours.
Directed library and laboratory research. Courses may be repeated to a maximum of 6 credits. PREREQ: CHEM 3352.

CHEM 5591 Seminar: 1 semester hour.
A formal introduction to the chemical literature including electronic methods of literature searching. A detailed treatment of methods for presenting scientific seminars including a full-length student presentation on selected library or laboratory research. COREQ: CHEM 5581 or CHEM 5582 or CHEM 4485 or permission of instructor.

CHEM 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. May be graded S/U.

CHEM 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

CHEM 6601 Seminar: 1 semester hour.
Oral reports of current literature and research in chemistry. This course may be taken multiple times as determined by degree requirements. Graded S/U.

CHEM 6609 Advanced Inorganic Chemistry: 3 semester hours.
Synthesis, reactions, spectroscopic characterization methods, and application of transition metal complexes. Foci will vary and may include metal carbon bond transformations, bioinorganic chemistry, or materials chemistry. PREREQ: CHEM 4407 or CHEM 5507 or permission of instructor.

CHEM 6610 Special Topics in Chemistry: 1-3 semester hours.
Detailed consideration of a limited phase of chemistry; course content will vary with current demand and with the instructor; may be repeated with departmental approval for non-repetitive course content.

CHEM 6615 Neutron Activation Analysis: 4 semester hours.
Theory and use of neutron activation methods for quantitative chemical analysis of natural and synthetic materials. Applications in geologic systems will be emphasized. Equivalent to GEOL 6615 and PHYS 6615. PREREQ: Permission of instructor.

CHEM 6617 Environmental Geochemistry: 3 semester hours.
Geochemistry of environmental systems. Emphasis given to low-temperature water-rock interactions, including sorption processes, retardation, reaction kinetics and reaction-mass transport modeling. Equivalent to GEOL 6617. PREREQ: GEOL 5520 or CHEM 3351.

CHEM 6621 Organic Reactions: 3 semester hours.
Advanced study of organic chemical reactions with emphasis on synthetic applications. PREREQ: CHEM 3302.

CHEM 6625 Quantitative Geochemistry Lab: 3 semester hours.
Applications of instrumental methods for geochemical analysis. Equivalent to GEOL 6625.

CHEM 6630 Advanced Analytical Chemistry: 3 semester hours.
Advanced treatment of standards, sampling, special methods of analysis, and methods of separation. PREREQ: CHEM 3302, CHEM 3304, CHEM 3334 and CHEM 3352 or permission of instructor.

CHEM 6635 Masters Research: 2-6 semester hours.
A continuation of CHEM 4435 to improve ability of students to solve chemical problems independently and pursue research at an advanced level. 2-6 credits. May be repeated for up to 12 credits. PREREQ: CHEM 4485 or permission of instructor.

CHEM 6640 Research Techniques in Chemistry: 2-6 semester hours.
Designed to improve the ability of students to solve chemical problems independently in the laboratory; special emphasis on development of manipulative skills, instrumental methods and supporting library research; nature of the projects dictated by students' needs; may be repeated with departmental approval for non-repetitive course content. Limit 12 credits.

CHEM 6650 Thesis: 1-10 semester hours.
Thesis. 1-10 credits. May be repeated. Graded S/U.

CHEM 6655 Advanced Physical Chemistry: 3 semester hours.
Introductory material from quantum chemistry and statistical mechanics with applications in chemical thermodynamics. PREREQ: CHEM 3302 and CHEM 3352 or permission of instructor.

CHEM 6671 Advanced Organic Chemistry: 3 semester hours.
Kinetics and mechanisms in organic reactions. PREREQ: CHEM 3302 and CHEM 3352 or permission of instructor.

CHEM 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.
CHEM 8850 Doctoral Dissertation: 1-12 semester hours.
Research toward and completion of the dissertation. May be repeated. Graded S/U.
Civil and Environmental Engineering

Chair and Associate Professor: Savage
Professors: Ebrahimpour, Leung, Sato
Assistant Professors: Sorensen
Senior Lecturer: Mahar

Master of Science in Civil Engineering

The master's program in civil engineering is designed to provide advanced study, both theoretically and experimentally, in structures, mechanics, finite element methods, water resources, and geotechnics. This program prepares the student for advanced placement in the civil engineering field in industry, research, or development areas. Additionally, this program provides a suitable base for entrance into a doctoral program in a field related to civil engineering. The program is offered both at the Pocatello and the Idaho Falls campuses, primarily through the use of telecommunications/distance learning, which includes partial in-class instruction.

Goals

- Enhance the knowledge of graduates in the advanced concepts in civil engineering fields such as structures, mechanics, finite element methods, geotechnics, and water resources.
- Increase the ability of graduates to synthesize and apply these advanced concepts to develop realistic designs in fields related to civil engineering and to solve identified problems, and design strategies for implementing them safely, ethically, and effectively.
- Enhance the ability of graduates to effectively communicate these concepts both in oral and written formats.

Master of Science in Environmental Engineering

This program is designed to provide the student with advanced technical training in environmental engineering, with an emphasis on hazardous waste treatment and control. The program fills a need in industry and government for professionals with a broad understanding of the technical aspects of environmental issues. Students enrolled in the program are generally expected to have a sufficient background in mathematics and chemistry (a minimum of one year of general chemistry). Students with an insufficient background in engineering and math are required to make up the deficiencies according to the advice of their advisory committee (usually includes ME 3307, CE 3332, CE 3341)

Goals

- Enhance the knowledge of graduates in the advanced concepts of environmental control and remediation, involving a significant fraction of the following: chemistry, water & waste water quality, air quality, radioactive material handling and disposal, environmental laws and regulations, global environmental issues, and cost benefit analyses.
- Increase the ability of graduates to synthesize and apply these advanced concepts to develop realistic environmental engineering designs and to solve identified problems, designing strategies for implementing them safely, ethically, and effectively.
- Enhance the ability of graduates to communicate these concepts effectively both in oral and written formats.

Master of Science in Environmental Science and Management

The Environmental Science and Management (ENSM) Program is an interdisciplinary program designed to allow students to combine courses in environmental engineering with related courses in an interdisciplinary area of emphasis. Interdisciplinary course work may come from a combination of courses from the following emphasis areas: geosciences, biological sciences, chemistry, mathematics, physics, pharmaceutical sciences, political science, and business. Students may also choose environmental engineering as the academic emphasis; thus maintaining the entire program of study within the Department of Civil and Environmental Engineering. The ENSM program is jointly sponsored by the University of Idaho, and some of the courses are cross-listed. Students must complete at least ten credits in an interdisciplinary discipline (academic emphasis) and satisfy all departmental and Graduate School requirements.

Admission Requirements

The student must meet all criteria for admission and then apply to the Graduate School.

General Requirements

With the assistance of the Civil Engineering faculty, the student shall select an initial advisor during the first semester of residence to help in planning a program of studies and research. The student must also complete a Plan of Study and form a complete advisory committee by the time six credits of course work have been completed.

30 to 33 credit hours are required to complete the M.S. degree (at least 50% of the credits should be at 6000 level). Approximately half of the credits are engineering and technical electives, subject to the approval of the student’s advisory committee. The Thesis or Special Project, should consist of study and research that complements the course work selected. Each student may also be required to complete two semesters of seminar, an important component in developing research and communication skills.

Doctor of Philosophy in Engineering and Applied Science

A doctoral program in Engineering and Applied Science, administered through the College of Science and Engineering, is available to Civil and Environmental Engineering students. The complete program description is provided elsewhere in the College of Science & Engineering section of the Graduate Catalog.

Master of Science in Civil Engineering

Thesis, Non-Thesis options

- Thesis option (30 credits): 15 credits from the approved list of courses, 9 credits of electives from the approved list of electives, and 6 credits of thesis.
- Non-thesis option (33 credits): 21 credits from the approved list of courses, 9 credits of electives from the approved list of electives, and 3 credits of Special Project in the related field and a written report. After completion of the course work and special project, students are required to take an oral exam on their special project, and other courses from the student’s approved M.S. program.
Note: For lists of approved courses and elective courses, student should see an advisor. The approved and elective courses may be changed with the approval of the advisor.

Master of Science in Environmental Engineering

Thesis, Non-Thesis options

• Thesis option (30 credits): 15 credits from the approved list of courses, 9 credits from the approved list of electives, and 6 credits of thesis.

• Non-thesis option (33 credits): 21 credits from the approved list of courses, 9 credits from the approved list of electives, and 3 credits of Special Project in the related field and a written report.

After completion of the course work and special project, students are required to take an oral exam on their special project, and other courses from the student’s approved M.S. program.

Note: For lists of approved courses and elective courses, student should see an advisor. The approved and elective courses may be changed with the approval of the advisor. (Web link to the approved courses: http://engr.isu.edu/gp/docs/course_listing.pdf).

Master of Science in Environmental Science and Management

Students entering the ENSM program are required to obtain interdisciplinary admission into the Department of Civil and Environmental Engineering and one other academic discipline (emphasis). Admission requirements vary between academic units, and there may be departmental requirements beyond those of the Department of Civil and Environmental Engineering which the student must fulfill to gain departmental admission. At least 30 credits are required for the degree, of which at least 15 must be at the 6600 level. At least 10 credits must be completed within the academic emphasis, with the remainder of the course work representing ENSM course work. No more than 9 credits may be transferred from another university, with the exception of courses from the University of Idaho, which will be accepted as resident credits. Students must have successfully completed course work equivalent to Idaho State University’s MATH 1160 and Idaho State University’s MATH 1111 and MATH 1112 with grades of “C” or better. Students with prerequisite course deficiencies may be admitted as Classified with Performance Requirements with the understanding that these requirements must be satisfied prior to graduation, and such efforts may not necessarily count toward graduation. Classified with Performance Requirements (w/PR) admission into the ENSM program is the prerogative of individual departments.

Thesis and non-thesis options are available for the ENSM degree. For the thesis option, a maximum of ten thesis credits may be counted toward the degree. For the non-thesis option, a maximum of three “Special Project” credits may be counted toward the degree. These credits may apply toward the requirement of 15 credits at the 6600 level. There are program-wide and department-specific requirements for the thesis and non-thesis options, and students must create a program of study in conjunction with their advisory committee. Students will register for thesis credits or nonthesis project credits in the home department of the thesis/project advisor. Some departments’ “Special Project” courses may have a different title and/or course number.

Within the framework of the basic degree requirements, an advisory committee is chosen to work with the student to create an individualized program of study. The advisory committee consists of two faculty advisors: one from the Department of Civil and Environmental Engineering (CEE), and one from the student’s other academic discipline (emphasis). The student’s major advisor provides direction to the student regarding all relevant aspects of the program. All courses selected for fulfillment of the program of study must be approved by the advisory committee. The initial program of study must be submitted to the ENSM program director no later than the second semester of enrollment. Changes in the initial program of study may only be made with the approval of the student’s advisory committee. The final program of study is submitted to the Graduate School for graduation clearance in accordance with Graduate School policy.

Required Courses

The following courses are required for every student receiving the M.S. degree in Environmental Science and Management.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENVE 5510</td>
<td>Introduction to Environmental Engineering</td>
<td>3</td>
</tr>
<tr>

</tr>
</tbody>
</table>

1 Course must be completed two times in order to satisfy requirement. A student may select a seminar other than ENGR 6655 offered in his/her interdisciplinary discipline with approval of the advisory committee.

2 Students will register for thesis or non-thesis "Special Project" credits in the home department of the thesis/non-thesis project advisor. Some departments’ "Special Project" courses may have a different title and/or course number.

In addition, the following courses are required for students choosing chemistry, environmental engineering or mathematics as the second academic emphasis. Course work in other emphasis areas will be selected from elective course work with the approval of the advisory committee.

Civil Engineering Courses

**CE 5506 Green and Sustainable Engineering: 3 semester hours.**
Study of green engineering and sustainability, topics focused on design of processes to advance sustainability, manufacturing and disposal alternatives, energy and material life-cycle assessment, and environmental law and related issues. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: CHEM 1111.

**CE 5524 Open Channel Flow: 3 semester hours.**
Application of the principles of fluid mechanics to flow in open channels - natural and manmade. Topics include uniform flow, flow resistance, gradually varied flow, flow transitions, unsteady flow, and hydraulic structures (culverts, weirs, etc.) used in open channel control. Computer applications will be used in the analysis of open channel systems. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: CE 3341 or equivalent or permission of instructor.

**CE 5525 Water Resources: 3 semester hours.**
Overview of the general field of water resources engineering. Course topics covered in other courses such as CE 3351, Engineering Hydrology, CE 4435/5535, Hydraulic Design, and CE 4424/5524, Open Channel Flow, will be limited. The course is structured to give students a background in the diverse field of water resources and help prepare them for future careers in water supply, wastewater, floodplain, stormwater and groundwater management. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

**CE 5531 Advanced Mechanics of Solids: 3 semester hours.**
An introduction to elasticity, plasticity, and energy foundations, stability, plates. PREREQ: ENGR 3350 and MATH 3360.

**CE 5534 Geotechnical Design: 3 semester hours.**
Application of soil mechanics to design of foundations, retaining wall, stable slopes, buried conduits and pavement structures. Computer methods utilized. PREREQ: ENGR 3350 and CE 3332.

**CE 5535 Hydraulic Design: 3 semester hours.**
Hydraulic design of water control and transport structures, pipelines, and distribution systems. Computer methods utilized. PREREQ: CE 3351.

**CE 5536 Transportation Engineering: 3 semester hours.**
Fundamentals of earthwork, route location, drainage, and pavement materials with application to geometric and pavement design of highways, streets and rural roads. COREQ: CE 3332. PREREQ: ENGR 2224 and CE 3301.

**CE 5537 Geotechnical Engineering Laboratory: 1 semester hour.**
Field and laboratory work on site investigation, soil sampling classification and testing. Evaluation of soil properties. Design of experiment. PREREQ: CE 3332.

**CE 5554 Basic Engineering Geology: 3 semester hours.**
Geology applied to civil engineering projects rock engineering classification systems and geotechnical parameters such as joint set orientation ground behavior and underground construction. Preparation of baseline geotechnical reports. Equivalent to GEOL 5554. COREQ: CE 3332 or GEOL 3314.

**CE 5555 Geologic Data Methods: 3 semester hours.**
Geotechnical investigations for civil works projects. Geologic mapping for civil engineering purposes. Development of engineering geologic profiles. Core logging. Preparation of Geotechnical Data Reports for civil works projects. Equivalent to GEOL 5555. PREREQ: CE 5554 or CE 4454.

**CE 5560 Project Management: 3 semester hours.**
Knowledge, techniques and tools for management of civil, electrical, mechanical and environmental engineering projects and firms. Topics include contract organization/interpretation, project responsibility/authority, cost estimating, scheduling; quality control; construction safety; environmental requirements and project closeout. Examples from actual construction projects used as teaching aid. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: CE 3360 or CE 3361.

**CE 5561 Project Management: 3 semester hours.**
Analysis of statically indeterminate structures. Continuation of the use of classical methods. Introduction to computer methods in structural analysis including the use of commercially available software, and lateral load effects. PREREQ: CE 3362.
CE 5562 Design of Steel Structures: 3 semester hours.
Design of steel members and connections with emphasis on the AISC specifications. PREREQ: CE 3362.

CE 5564 Design of Concrete Structures: 3 semester hours.

CE 5565 Design of Prestressed Concrete Structures: 3 semester hours.
Basic concepts in prestressed concrete design, full versus partial prestressing, flexural design, ultimate load design, beams with constant and variable tendon eccentricity, design of reinforcement for shear and torsion. PREREQ: CE 5564 or CE 4464.

CE 5566 Design of Wood Structures: 3 semester hours.
Design of solid and laminated wood members and connections. Includes the design of wooden diaphragms for resisting lateral loads. PREREQ: CE 3362.

CE 5567 Structural Engineering Laboratory: 1 semester hour.

CE 5568 Behavior of Composite Materials: 3 semester hours.
Macro and micromechanical behavior of laminae and laminates bending, buckling and vibration of laminated beams and plates. Equivalent to ME 5568. PREREQ: ENGR 3350 and MATH 2240.

CE 5575 Essentials of Geomechanics: 3 semester hours.
Essentials of rock fracture relevant to geological engineering including stress and strain, properties and classification of rock masses, rock fracture mechanisms. Equivalent to GEOL 5575. PREREQ: GEOL 4421 or ENGR 3350.

CE 5576 Engineering Geology Project: 1 semester hour.
Team projects studying actual problems in engineering geology. Equivalent to GEOL 5576, PREREQ: GEOL 5554, GEOL 4454, CE 5554, or CE 4454.

CE 5580 Earthquake Engineering: 3 semester hours.
Topics include: mechanism and characterization of earthquakes; seismic risk analysis; site and structural response; applications from points of view of engineer and geologist. Equivalent to GEOL 5583. PREREQ: GEOL 3313 or CE 3332, or permission of instructor.

CE 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

CE 6626 Introduction to Computational Fluid Dynamics: 3 semester hours.
Introduction to the governing equations of fluid flow, their application to solve fluid flow problems and the traditional numerical methods used to solve the equations. Numerical methods will cover basic techniques in the solutions of parabolic, hyperbolic and elliptical type equations. In addition, students will be introduced to an industry Computational Fluid Dynamics (CFD) code. Application of the code and its limitations will be covered. PREREQ: CE/ME 3341 or equivalent.

CE 6628 Hydraulics of Pipelines: 3 semester hours.
A study and application of the principles and procedures involved in the design and operation of pipeline systems. Topics include a feasibility assessment, economic analysis, design of pipe size/pressure class, cavitation, hydraulic transients and the selection of pumps and valves. Comprehensive design problems are used to demonstrate pipeline design and operational problems. PREREQ: CE/ME 3341 or equivalent.

CE 6650 Thesis: 1-6 semester hours.
Thesis research must be approved by the student's advisory committee. Total of six credits are required to satisfy the research requirements for the degree. May be repeated. Graded S/U.

CE 6652 Advanced Topics: 3 semester hours.
Advanced topics in Civil Engineering and related fields, depending upon the interest of students and faculty. May be repeated for credit when topics vary. PREREQ: Permission of instructor.

CE 6660 Special Project: 1-3 semester hours.
A significant project, involving engineering applications, toward the completion of the M.S. program, without a thesis option. Includes a report and oral examination. Total of three credits may be used to satisfy the degree requirement. May be repeated. Graded S/U.

CE 6664 Dynamics of Structures: 3 semester hours.
Evaluation of response of structures subjected to dynamic forces including earthquake-induced forces and deformations. Applications include single- and multi-degree of freedom systems, and continuous systems. PREREQ: ME 4440 or ME 5540 or permission of instructor.

CE 6665 Finite Element Methods: 3 semester hours.
Introduction to finite element methods applied to linear one- and two-dimensional problems. Application of the concept to specific problems in various fields of engineering and applied sciences. Equivalent to ME 6665. PREREQ: ENGR/CE/ME 3350 and MATH 3360.

CE 6667 Structures and Mechanics Laboratory: 3 semester hours.
Strain gauge installation and circuitry. Strain measurements and analysis of variety of structural and mechanical systems. Dynamic measurements of various structures. PREREQ: CE 5531 or CE 4431 or permission of instructor.

CE 6699 Experimental Course: 1-6 semester hours.
An experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

CE 8850 Doctoral Dissertation: 1-24 semester hours.
Research toward completion of the dissertation for Ph.D. in Engineering and Applied Science. Variable credits. May be repeated. Graded S/U.

Env Engr Courses

ENVE 5504 Environmental Risk Assessment: 3 semester hours.
Quantitative and qualitative approaches to characterizing and controlling contaminant pathways. Risk assessment requirements and implications in superfund projects for engineers working on remediation. PREREQ: BIOL 5521 and ENGR 5501.

ENVE 5508 Water and Waste Water Quality: 3 semester hours.
Principles of chemistry in applications to water and waste water treatment systems for water quality control and reuse. COREQ: ENVE 5509. PREREQ: CHEM 1111 or equivalent.

ENVE 5509 Water and Waste Water Lab: 1 semester hour.
Fundamental analytical procedures for measurement of water and wastewater quality. Introduction to materials and protocols associated with general environmental analytical techniques. COREQ: ENVE 5508.

ENVE 5510 Introduction to Environmental Engineering: 3 semester hours.
Introduction to physical, chemical, and biological principles of solid and hazardous waste management, water and waste water treatment, air pollution control, and national environmental regulation. PREREQ: ENVE 5508, ENVE 4408, or equivalent.

ENVE 5530 Air Pollution and Solid Waste: 3 semester hours.
Sources, characteristics, regulations, and effects of air pollution and solid waste on environmental quality analysis and design of control systems, including the recovery of resources from solid waste. PREREQ: Permission of instructor.
ENVE 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

ENVE 6610 Introduction to Radioactive Waste Management: 3 semester hours.
Principles and practices of radioactive waste storage, transportation and disposal. Evolution of government regulations and current solutions developed in response to the regulations. PREREQ: ENGR 5501.

ENVE 6611 Treatment Systems for Environmental Engineering: 3 semester hours.
Fundamental principles and processes for physical, chemical, and biological treatment of wastes including mixing, flocculation, sedimentation, stripping, aeration, sorption and leaching. Some experiments required. PREREQ: ENVE 5510 or ENVE 4410.

ENVE 6615 Water Quality Modeling and Control: 3 semester hours.
Fundamental principles for mathematical modeling and analysis of environmental contaminant's fate and transport in lakes, rivers, estuaries, and groundwater. PREREQ: ENVE 5510 or ENVE 4410.

ENVE 6616 Biological Treatment of Wastewater: 3 semester hours.
Fundamental principles, design, and operation of aerobic and anaerobic biological waste treatment processes. PREREQ: ENVE 5510 or ENVE 4410.

ENVE 6617 Environmental Systems Engineering and Design: 3 semester hours.
Application of physical, chemical, and biological operations and processes to the design of water, waste water, and industrial waste treatment systems. PREREQ: ENVE 5510, ENVE 4410 or previous design experience.

ENVE 6629 Physical and Chemical Treatment of Water and Waste Water: 3 semester hours.
Fundamental principles, design and operations of physical and chemical water and waste water treatment processes. Removal of hazardous materials emphasized. PREREQ: ENVE 5510 or ENVE 4410.

ENVE 6630 Air Pollution and Control: 3 semester hours.
An introductory air pollution course. Regulations, atmospheric dispersion models, control of emissions and sources and human health effects are emphasized. PREREQ: ENVE 5510 or ENVE 4410.

ENVE 6650 Thesis: 1-6 semester hours.
Thesis research must be approved by the student's advisory committee. Total of six credits are required to satisfy the research requirements for the degree. May be repeated. Graded S/U.

ENVE 6652 Advanced Topics: 3 semester hours.
Advanced topics in Environmental Engineering and related fields, depending upon the interest of students and faculty. May be repeated for credit when topics vary. PREREQ: Permission of instructor.

ENVE 6660 Special Project: 1-3 semester hours.
A significant project, involving engineering applications, toward the completion of M.S. program with non-thesis options. Includes a report and oral examination. Total of three credits may be used to satisfy the degree requirement. May be repeated. Graded S/U.

ENVE 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

ENVE 8850 Doctoral Dissertation: 1-24 semester hours.
Research toward completion of the dissertation for Ph.D. in Engineering and Applied Science. Variable credits. May be repeated. Graded S/U.
Engineering and Applied Science

Doctor of Philosophy in Engineering and Applied Science

This interdisciplinary Ph.D. program is open to students in the Departments of Civil and Environmental Engineering, Electrical Engineering, Mechanical Engineering, Anthropology, Chemistry, Geosciences, Mathematics, and Physics. The program allows for a broad range of research topics in Engineering (Civil Engineering, Electrical Engineering, Environmental Engineering, Environmental Science and Management, Measurement and Control Engineering, and Mechanical Engineering), Anthropology, Chemistry (Biochemistry, Atmospheric, Environmental, Materials, Inorganic, Organic, Organometallic, and Physical Chemistry), Geosciences (Geology, Geochemistry, Environmental Geosciences), Mathematics (Applied Mathematics and Computational Mathematics), and Physics (Radiation Science, Accelerator Applications, and Applied Nuclear Physics).

Goals

- Prepare graduates to conduct and disseminate independent scholarly research.
- Prepare graduates for careers in academia, government, or industry.

Objectives

- Increase the knowledge of graduates in their specialized field: Anthropology, Chemistry, Engineering (all disciplines), Geosciences, Mathematics, and Physics.
- Enhance the ability of graduates to contribute to their chosen field.
- Enhance effective written and oral communication skills of graduates.

Admission Requirements

All applicants must meet Idaho State University Graduate School admission requirements for doctoral programs. Additionally, applicants must have attained a master’s degree in engineering, physics, chemistry, geosciences, mathematics, or a closely related field. Applicants must submit a one-page statement of research interests, a one-page statement of career interests, a resume, and at least 3 letters of reference along with their application. The approval of the chair of major department is required for admission. In some special cases, a student with an exceptional undergraduate academic record and aptitude for research but without an M.S. degree may be directly admitted to the Ph.D. program with the approval of the Department Chair of the student’s parent department.

General Requirements

The Ph.D. degree requires completion of at least 84 credits consisting of 30 credits for the M.S. degree, 18 credits of additional course work (at least 50% of the credits should be at 6000 level), 1-4 credits of graduate seminar and 32-35 credits of dissertation research. Additional dissertation research credits may be required by the student’s dissertation committee.

Program of Study

An advisory committee consisting of Idaho State University graduate faculty (a minimum of 2 from the student’s parent department and 1 from another relevant department) will be formed for each student upon entry into the program. The committee will guide the student in establishing his or her program of course work and laboratory study based upon the student’s background and research interest. The advisory committee has the responsibility of ensuring that the student has adequate knowledge to support research in his or her chosen area of interest.

At the end of 18 credits of course work, the student will take an 8-hour written, comprehensive qualifying examination covering relevant information within the scope of the chosen research area. A student taking the comprehensive qualifying exam must be prepared to take an oral examination conducted by the student’s dissertation committee. The oral exam will focus primarily on material in the written exam that was not adequately answered. However, the Advisory Committee, at its discretion, may excuse a student from taking the oral examination if the student excels in the written examination. The student will be allowed two attempts to pass the comprehensive qualifying examination, and the second attempt must be within one-half year after the first attempt. The student will be admitted to candidacy only upon passing the comprehensive qualifying examination.

A Dissertation Committee is formed with a minimum of 5 members consisting of a major professor, 2 members from the student’s parent department, a member from another relevant department, and a Graduate Faculty Representative (GFR). The major professor chairs the dissertation committee. Within six months of passing the comprehensive qualifying examination, the candidate, with guidance from the major professor, will satisfactorily complete an oral presentation and defense of a proposal for dissertation research to the Dissertation Committee. The research and dissertation preparation must be conducted under the close supervision of the committee and must include at least one full year of work performed under Idaho State University graduate faculty. The candidate can submit the final dissertation any time after six months from the date of acceptance of the research proposal if the candidate meets the requirement of one full year of work.

Dissertation approval requires a public presentation of the dissertation and a satisfactory oral defense to the Dissertation Committee. Doctoral oral examinations are open to all regular members of the faculty as observers. Further, oral presentations are open to the public until questionning by the Dissertation Committee begins.
Mechanical Engineering

Interim Chair and Senior Lecturer: Hofle
Professor: Bosworth, Schoen, Williams
Associate Professors: Perez, Wabrek
Assistant Professor: Sebastian

Master of Science in Measurement and Control Engineering

The master’s degree program in Measurement and Control Engineering is designed to provide advanced study (analytically, computationally, and experimentally) in measurements, modeling, simulation, robotics, and adaptive, intelligent, nonlinear, optimal, and robust control. This program prepares the student for advanced placement in the measurement and control engineering field in industry, research, or development areas. Additionally, this program provides a suitable base for entrance into a doctoral program in a field related to mechanical engineering. The program is offered both at the Pocatello and Idaho Falls campuses, primarily through the use of telecommunications/distance learning, which includes partial in-class instruction.

Goals

• Enhance the ability of graduates to effectively communicate these concepts both in oral and written formats.
• Increase the ability of graduates to synthesize and apply these advanced concepts to develop realistic measurement and control engineering designs and to solve identified problems, designing strategies for implementing them safely, ethically, and effectively.
• Enhance the knowledge of graduates in advanced concepts of measurement, control, signal processing, engineering mathematics, computation and other related areas.

Master of Science in Mechanical Engineering

The master’s degree program in Mechanical Engineering is designed to provide advanced study, (analytically, computationally, and experimentally) in thermodynamics, fluids, heat transfer, energy systems, vibrations, engineering mechanics, and their associated measurement systems. This program prepares the student for advanced placement in the mechanical engineering field in industry, research, or development areas. Additionally, this program provides a suitable base for entrance into a doctoral program in a field related to mechanical engineering. The program is offered both at the Pocatello and Idaho Falls campuses, primarily through the use of telecommunications/distance learning, which includes partial in-class instruction.

Goals

• Enhance the knowledge of graduates in advanced concepts of thermodynamics, fluids, heat transfer, energy systems, vibrations, engineering mechanics, measurements, and engineering mathematics.
• Increase the ability of graduates to synthesize and apply these advanced concepts to develop realistic mechanical engineering designs implementing them safely, ethically, and effectively.
• Enhance the ability of graduates to effectively communicate these concepts both in oral and written forms.

Master of Science in Measurement and Control Engineering

Program Director: Ken Bosworth

Admission Requirements

The student must meet all criteria for admission and then apply to the Graduate School. In addition, official Graduate School record Examination (GRE) score reports are required for all applicants, with a score equal or above the upper 65th percentile on the Quantitative Reasoning area being required for admission.

General Requirements

With the assistance of the Mechanical Engineering and/or Electrical Engineering faculty, the student shall select an initial advisor during the first semester of residence to help in planning a program of studies and research. The student must also complete a Plan of Study and form a complete advisory committee by the time six credits of course work have been completed.

30 credit hours are required to complete the M.S. degree (at least 50% of the credits should be at the 6600 level). Approximately half of the credits are engineering and technical electives, subject to the approval of the student’s advisory committee. The Thesis or Special Project should consist of study and research that complements the course work selected.

Required Courses (30 credits)

The following courses are required of every student receiving the master’s degree in Measurement and Control Engineering covered by the abbreviated list.

<table>
<thead>

1 Students desiring to do the non-thesis option must have a minimum of two years industry experience. In place of the 6-credit thesis, the non-thesis option consists of a 3-credit Special Project in addition to a 3-credit course. At the completion of the Special Project, the student will be required to present an oral presentation/defense of the Project.

Master of Science in Mechanical Engineering

Program Director: Alba Perez Gracia

Admission Requirements

All applicants for the MS in ME program must have a Bachelor of Science degree in engineering, physical sciences, mathematics or a closely related field, and must meet Idaho State University Graduate School MS admission requirements. In addition, official Graduate Record Examination (GRE) score reports are required for all applicants, except those with a BS degree in an Engineering discipline.
from ISU, with a score equal or above the 65th percentile on the Quantitative Reasoning area being required for admission.

**General Requirements**

With the assistance of the Mechanical Engineering faculty, the student shall select an initial advisor during the first semester of residence to help in planning a program of studies and research. The student must also complete a Plan of Study and form a complete advisory committee by the time six credits of course work have been completed.

30 credit hours are required to complete the M.S. degree (at least 50% of the credits should be at the 6600 level). Approximately half of the credits are engineering and technical electives, subject to the approval of the student’s advisory committee. The Thesis or Special Project should consist of study and research that complements the course work selected.

**Required Courses (30 credits)**

Select at least 3 credits (1 course) of advanced mathematics from the following list:

Total Hours 30

1 Approved by Major Advisor.

2 Students desiring to do the non-thesis option must have a minimum of two years of industry experience, or a previous graduate degree (MS or PhD) in an engineering discipline that included the completion of a thesis or dissertation. In place of the 6-credit thesis, the non-thesis option consists of a 3-credit Special Project in addition to a 3-credit course. At the completion of the Special Project, the student will be required to do an oral presentation/defense of the Project.

**Doctor of Philosophy in Engineering and Applied Science**

A doctoral program in Engineering and Applied Science, administered through the College of Science and Engineering, is available to Engineering students. The complete program description is provided elsewhere in the College of Science & Engineering section of the Graduate Catalog.

**Measurement/Control Engr Courses**

**MCE 5599 Experimental Course: 1-6 semester hours.**  
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**MCE 6640 System Modeling Identification and Simulation: 3 semester hours.**  
Model development, off-line and on-line identification methods for engineering systems, diagnostic tests and model validation and analog and digital simulation methods. PREREQ: ME/EE 5573 or equivalent.

**MCE 6642 Advanced Control Systems: 3 semester hours.**  
State space analysis and design to include stability, controllability, observability, realizations, state feedback and estimation. PREREQ: ME 5573/EE 5573 or ME 4473/EE 4473.

**MCE 6643 Advanced Measurement Methods: 3 semester hours.**  
Instrumentation systems used in detection and signal conditioning of thermal-hydraulic process variables, radiation including lasers, and electrical and mechanical properties of materials. PREREQ: ME 5505 or ME 4405.

**MCE 6644 Measurements and Controls Laboratory: 3 semester hours.**  
Work with measuring systems for a variety of process variables. Investigation of characteristics of various process control components and systems. Transient and stationary conditions will be included. PREREQ: MCE 6642 and MCE 6643.

**MCE 6645 Advanced Control Theory and Applications: 3 semester hours.**  
Topics selected from advanced control theory and applications, depending upon the interest of students and faculty. May be repeated for credit when topics vary. PREREQ: MCE 6642 or permission of instructor.

**MCE 6646 Intelligent Control Systems: 3 semester hours.**  
Analysis and design of systems using intelligent techniques such as neural networks, fuzzy logic, genetic algorithms, and artificial intelligence. PREREQ: Permission of instructor.

**MCE 6647 Nonlinear Control Systems: 3 semester hours.**  
Phase plane analysis. Lyapunov stability. Describing functions. Singular perturbation and feedback linearization. PREREQ: MCE 6642 or permission of instructor.

**MCE 6649 Robotics and Automation: 3 semester hours.**  
Robotic manipulator kinematics, dynamics, trajectory planning, sensors, programming and control. The application concepts of robotics in industry will be briefly introduced. PREREQ: MCE 6642.

**MCE 6650 Thesis: 1-9 semester hours.**  
Thesis research must be approved by the student’s advisory committee. Six credits may be used to satisfy the research requirements for the degree. Graded S/U.

**MCE 6652 Special Problems: 1-3 semester hours.**  
Special experimental, computational, or theoretical investigation leading to development of proficiency in some area of engineering. Formal report required. PREREQ: PRIO Project Approval Required by an Engineering Faculty. May be graded S/U. May be repeated.

**MCE 6653 Optimal Control Systems: 3 semester hours.**  
MCE 6654 Adaptive Control Systems: 3 semester hours.

MCE 6656 Robust Control Systems: 3 semester hours.
Analyze and design basic robust controllers using methods for robustness investigation such as mu-analysis and H infinity control algorithms. PREREQ: MCE 6642 or permission of instructor.

MCE 6660 Special Project: 1-9 semester hours.
A significant project, involving engineering applications, toward the completion of M.S. program with non-thesis option. Includes a report and oral examination. Graded S/U. May be repeated.

MCE 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered more than three times. May be repeated.

MCE 8850 Doctoral Dissertation: 1-24 semester hours.

Mechanical Engr Courses

ME 5505 Measurement Systems Design: 3 semester hours.
Introduction to instrumentation systems analysis and design, including: statistical analysis, system modeling, actuators, transducers, sensor systems, signal transmission, data acquisition, and signal conditioning. PREREQ: MATH 3360.

ME 5506 Measurement Systems Laboratory: 1 semester hour.
Principles of measurement, measurement standards and accuracy, detectors and transducers, digital data acquisition principles, signal conditioning systems and readout devices, statistical concepts in measurement, experimental investigation of engineering systems. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: MATH 3360 and EE 2240.

ME 5515 Model Theory: 3 semester hours.
Theory of design and testing of scaled system models. Dimensional analysis with application to physical models. True and distorted models, linear and non-linear models, and analogies. Laboratory work required. PREPREQ: ME 3341 and CE/ME 3350.

ME 5525 Mechatronics: 3 semester hours.
Basic kinematics, sensors, actuators, measurements, electronics, microprocessors, programmable logic controllers, feedback control, robotics and intelligent manufacturing. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. Equivalent to EE 5525. PREREQ: ME 4473 or EE 4473; and MATH 3360.

ME 5540 Vibration Analysis: 3 semester hours.

ME 5551 Compressible Fluid Flow: 3 semester hours.
Fundamentals of compressible flow and gas dynamics, development of basic principles, practical applications. Techniques developed for isentropic friction, heat addition, isothermal flow, shock wave analysis, propagation, expansion waves, reflection waves. PREREQ: ME 3307 and CE/ME 3341.

ME 5556 Engineering Numerical Techniques: 3 semester hours.
Numerical methods for solving linear and nonlinear systems of equations, data fitting and smoothing, numerical integration and differentiation, initial and boundary value problems, and optimization. Stresses engineering applications and programming projects. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: ME 1165 or CS 1181; MATH 2240, MATH 2275, and MATH 3360.

ME 5568 Behavior of Composite Materials: 3 semester hours.
Macro and micromechanical behavior of laminates and laminae. Bonding, buckling and vibration of laminated beams and plates. Equivalent to CE 5568. PREREQ: ENGR 3350.

ME 5573 Mechanical Control Systems: 3 semester hours.
Discrete and continuous time control system design, signal processing, embedded systems. PREREQ: ME 2220, EE 2240, and MATH 3360, or equivalent.

ME 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

ME 6607 Advanced Thermodynamics: 3 semester hours.
Thermodynamic property relationships, gas mixtures, thermodynamic optimization, irreversible thermodynamics, constructual theory, applications towards solar power, power generation, and refrigeration systems. PREREQ: MATH 3360 and ME 4416.

ME 6635 Transport Phenomena: 3 semester hours.
Systematic and parallel treatment of heat transfer, mass transfer, and momentum transfer (viscous flow). PREREQ: ME 4476, ME 3341, and MATH 3360. RECOMMENDED: MATH 5521.

ME 6640 Advanced Vibrations: 3 semester hours.
Vibrational theory of continuous, multiple-degree-of-freedom systems, and random vibrations. Use of advanced numeric techniques. COREQ: ENGR 5521 or MATH 5521. PREREQ: ME 5540 or ME 4440.

ME 6644 Advanced Kinematic Design: 3 semester hours.
Application of kinematic synthesis theory to the design of planar and spatial articulated systems. Finite-position precision synthesis, trajectory and workspace optimization and motion analysis for planar, spherical and spatial open and closed-loop chains. PREREQ: MATH 2240 and ME 3320.

ME 6648 Robotic Grasping/Manipulation: 3 semester hours.
Theoretical issues for multi-fingered robotic hands. Grasp analysis, grasp synthesis, mechanics of manipulation, path planning. Screw theory, twists and wrenches. Study of robotic hands and related sensing devices. PREREQ: MCE 6649 or permission of instructor.

ME 6650 Thesis: 1-9 semester hours.
Thesis research must be approved by the student's advisory committee. Six credits may be used to satisfy the research requirements for the degree. Graded S/U. May be repeated.

ME 6652 Special Problems: 1-3 semester hours.
Special experimental, computational, or theoretical investigation leading to development of proficiency in some area of engineering. Formal report required. PREREQ: ROJO Project Approval Required by an Engineering Faculty. May be graded S/U. May be repeated.

ME 6660 Special Project: 1-9 semester hours.
A significant project, involving engineering applications, toward the completion of M.S. program with non-thesis option. Includes a report and oral examination. Graded S/U. May be repeated.
ME 6665 Finite Element Methods: 3 semester hours.
Introduction to finite element methods applied to linear one- and two-dimensional problems. Application of the concept to specific problems in various fields of engineering and applied sciences. Equivalent to CE 6665. PREREQ: ENGR 3350 and MATH 3360.

ME 6676 Conduction Heat Transfer: 3 semester hours.

ME 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

ME 8850 Doctoral Dissertation: 1-24 semester hours.
Geosciences

Chair and Associate Professor: Michael McCurry
Professors: Link, McCurry, Rodgers, Thackray
Associate Professor: Crosby
Assistant Professors: Kobs Nawotniak, Godsey, Delparte, Pearson
Research Assistant Professor: Shapley
Assistant Lecturers: Lori Tapanila, Bottenberg
Joint Appointment Faculty: Finney, Lohse
IGS Research Geologist: Welhan
GIS TReC Director: Weber
Emeritus Professors: Blount, Hughes, Ore
Affiliate Faculty: Ames, Dehler, Davis, Glenn, Hailenmichael, Heath, Manic, Plummer, Rittenour, Schlegel, Sherwin, Smith, Solan

Goals - All Programs
1. Graduates will think critically and comprehend written and verbal communications about geoscience topics.
2. Graduates will have specific skills for careers in geoscience and related industries, licensure, or to continue in graduate study.
3. Graduates will attain employment in geology or related fields or gain admission to graduate programs.

Goals - Graduate Degree Programs
1. Graduates will be prepared to communicate effectively at the professional level.
2. Graduates will be prepared to define, implement, and complete geologic investigations.
3. Graduates will have professional skills for employment or further graduate study.

Objectives
1. Provide graduate students with coursework, laboratory experiences, field exercises and research opportunities in order to achieve all goals set forth above.
2. Provide graduate students with a professional interactive environment that improves their opportunities to enter successful careers in geoscience.
3. Increase graduate students’ probability of obtaining employment in academia or industry, or of being accepted for doctoral studies.

General Admission Requirements
A complete graduate application for classified status in the Idaho State University Geosciences Department consists of:
1. The student must apply to and meet all criteria for admission to the Graduate School. An Idaho State University Graduate School application and official copies of transcripts from all previous coursework are required. In addition to the requirements of the Graduate School, applicants must meet the requirements of the department.
2. Departmental GRE requirements: 50th percentile or above in two of the three categories or strengths clearly demonstrated in other components of the application;
3. A letter of intent and statement of goals in graduate school;
4. Three letters of recommendation

Doctor of Philosophy in Geosciences

Brief Description
The Ph.D. program in geosciences is offered to those students who have demonstrated strong aptitude for research and scholarly activity. Research can be conducted in any field of the geosciences in which ISU faculty have expertise. The student’s course of study will be determined in consultation with his or her advisor and doctoral committee. Continued enrollment in the program is contingent upon maintaining a 3.0 grade point average and making satisfactory progress toward the degree. In order to complete the research and prepare the dissertation, the program normally requires at least four years of full-time study beyond the master’s degree. In some cases, students without an appropriate M.S. degree but demonstrating an exceptional undergraduate academic record and aptitude for research may be directly admitted to the Ph.D. program.

Admission Requirements
All applicants must meet Idaho State University Graduate School admission requirements for doctoral programs. In addition, applicants must have attained a minimum of a bachelor’s degree in geosciences or a closely related field (environmental science, physics, engineering, chemistry, biology, etc.) and have maintained at least a 3.0 GPA in their previous degree(s) unless special circumstances are demonstrated.

A complete graduate application for classified status in the Idaho State University Geosciences Department Ph.D. program consists of:
1. GRE scores (a minimum of 50th percentile is required in both verbal and quantitative categories); Students for whom English is a second language who do not meet the minimum verbal GRE score must meet the Graduate School minimum TOEFL score.
2. An Idaho State University Graduate School application form, fee, and official copies of transcripts;
3. Three letters of recommendation; and
4. A statement outlining the student's motivation for graduate school and their longer term career goals.

General and Course Requirements
The doctoral degree requires completion of at least 84 graduate credits. Of these, at least 32 credits must be doctoral dissertation credits (GEOL 8850) and another 35 credits must come from coursework at the graduate level, two to four of which must be a graduate seminar. Of the total 84 credits, at least 40 must be taken from the ISU Department of Geosciences. Pre-Thesis credits (GEOL 6649) are not included in the credits counted toward the degree. Students entering the program with a master’s degree may receive credit for up to 30 credits toward the doctorate, split between dissertation and coursework as appropriate, subject to the department chair’s approval. Classes and seminars may be taken at, or in collaboration with, Boise State University and/or the University of Idaho. Students may be required to complete any missing course material that is required for the B.S. degree in geosciences at Idaho State University.
Program of Study

An initial Doctoral Committee of at least three, composed of the candidate's major professor (committee chair) and two graduate faculty will guide each student in establishing his or her program of study based upon the student’s background and research interests. The majority of any committee must consist of graduate faculty from the ISU Department of Geosciences. It is the responsibility of the initial Doctoral Committee chair to arrange the first meeting. The committee has the responsibility of ensuring that the student has adequate knowledge in his or her area of research. The initial Doctoral Committee should be assembled early in the candidate’s program to discuss the process, timeline and recommendations for the Program of Study and the Written Qualifying Exam.

During the third semester, the student is allowed two attempts to pass the Written Qualifying Exam. The student will be admitted to candidacy upon passing. Following passing, the full time candidate, with guidance from the major professor, will assemble their final Doctoral Committee. This committee is composed of at least five, inclusive of the candidate's major professor, at least three graduate faculty and a Graduate Faculty Representative (GFR). The majority of any committee must consist of graduate faculty from the ISU Department of Geosciences.

By the end of the fourth semester, under the supervision of the final Doctoral Committee, the doctoral candidate will also have completed a satisfactory research Prospectus and passed an Oral Prospectus Defense. Exceptions to this schedule may be made when a student has academic deficits to make up, in which case the student may be granted an additional year.

The research and dissertation preparation must be done under the close supervision of the final Doctoral Committee and must include at least one full year of work performed under the supervision of Idaho State University graduate faculty. The dissertation must demonstrate the student’s ability in independent investigation and must be a contribution to scientific knowledge. It must display mastery of the literature of the subject field and must demonstrate an organized, coherent development of ideas, with a clear exposition of results and a creative discussion of the conclusions.

Dissertation approval requires a public presentation of the dissertation and a satisfactory oral defense to the final Doctoral Committee. The oral defense is open to all regular members of the graduate faculty as observers. Further, oral presentations are open to the public until the oral defense begins. Additional details regarding the graduate timeline are available on the ISU Department of Geosciences website.

Doctor of Philosophy in Engineering and Applied Science

A doctoral program in Engineering and Applied Science, administered through the College of Science and Engineering, is available to Geoscience students. The complete program description is provided elsewhere in the College of Science & Engineering section of the Graduate Catalog.

Master of Science in Geology

The M.S. degree is offered to those students who have a degree in the sciences, and have demonstrated the potential for research and a professional career. Classified (degree-seeking, fully accepted) admission to the program is recommended by the graduate faculty of the Geosciences Department.

The student’s course of study will be determined by consultation and possibly an entrance examination. Students will normally be required to complete deficiencies, at the undergraduate level, in any courses required for the B.S. in geology at Idaho State University. Continued enrollment in the program is contingent upon maintaining a 3.0 grade point average and making satisfactory progress toward the degree.

Unclassified status is used for students with large numbers of deficiencies or with low undergraduate GPAs. Unclassified students may apply for classified status when their performance warrants.

General Requirements

A student who wants to earn a master's degree in geology must complete at least 30 credits of coursework. These credits must be earned under the following conditions:

1. The student must earn at least 17 credits (including six thesis credits) at the 6000 level in Geology. GEOL 6649 credits are not included in this count.
2. The remaining 13 credits may be earned at the 5500 or 6600 level, of which eight credits may come from a related discipline. GEOL 6649 credits are not included in this count.

In addition to the 30 required credits, each student must take two approved courses from outside the Geosciences Department (e.g., technical writing, anthropology, etc.) or may opt to take the foreign language challenge exam at the elementary level.

The department requires that the following core courses be completed. These classes are normally taken during the first and second semesters of graduate study:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOL 5591</td>
<td>Seminar</td>
<td>1</td>
</tr>
<tr>
<td>GEOL 6601</td>
<td>Advanced Physical Geology</td>
<td>2</td>
</tr>
<tr>
<td>GEOL 6603</td>
<td>Geologic Writing Seminar</td>
<td>2</td>
</tr>
</tbody>
</table>

Graduate students may not sign up for GEOL 6650 (Thesis) until their thesis prospectus has been submitted and approved by the Thesis Committee. Additionally, all graduate students are required to present at least one geology colloquium dealing with their thesis topic prior to taking their oral examination.

Master of Science in Geology with Emphasis in Environmental Geoscience

A geology master's degree may be awarded with the annotation “Emphasis in Environmental Geoscience” added if the student completes the requirements for a master's degree plus at least 9 credits in approved graduate-level courses in the general area of Environmental Geoscience. Students who wish their master's degree to contain the added designation “With Emphasis in Environmental Geoscience” need to file an amended program of study form with the Graduate School. The curriculum may be developed in, but is not limited to, the following areas: surface and groundwater hydrology; environmental geochemistry; surficial geological processes; geomorphology; volcanic, earthquake, and other geologic hazards; environmental geophysics; assessment and remediation of hazardous waste sites; or Neogene and Quaternary geology. Courses in related sciences and engineering disciplines may also be included.

The curriculum must be approved by the student’s graduate committee and may include components taken at Boise State University and/or the University of Idaho. Inter-university graduate committees are encouraged.

Master of Science in Geographic Information Science

The M.S. in GISci degree is offered to students who wish to become competent geospatial researchers and Geographic Information Systems (GIS) analysts. The program focuses on advancing knowledge to acquire, store and manage, visualize, model, and analyze information about spatial features and phenomena, with strong emphasis on real world geospatial applications. The M.S. in GISci is
designed as an interdisciplinary study of the nature, function, and development of spatial information systems and the application of these systems in research. Students will be involved in the technical study of the design and evaluation of scientific inquiry methods, tools, and techniques that will involve formulating hypotheses, collecting spatial information, and developing techniques for spatial analysis.

Applicants must hold a degree of Bachelor of Science or Bachelor of Arts in any discipline that allows a research focus on geotechnologies, including, but not limited to: Geosciences, Anthropology, Biology, Business, Information Technology, Computer Science, and Engineering. Each student in this program will have a member of the current Geotechnology Faculty as his/her major advisor.

NOTE: Due to the interdisciplinary nature of this program, applicants should initially contact a faculty member or the Geotechnologies Program Director, in the Department of Geosciences, in order to match his/her interests with those of potential faculty advisors.

**Admission Requirements**

Applicants must apply to and meet all criteria for admission to the Graduate School as well as additional criteria for admission to the Department of Geosciences.

**General Requirements**

In his/her application, a student must state a preference for the Thesis Option or Non-Thesis Option for the master's degree in GISci. The geotechnologies graduate faculty will determine for which track the student is accepted.

**Thesis Option:** Students desiring to enter careers in research or to pursue a doctorate are encouraged to request the Thesis Option master's degree in GISci. Students supported on research assistantships or teaching assistantships will typically be required to enroll in the Thesis Option. A minimum of 30 credit hours is required for completion of the Thesis Option master's degree in GISci, with a minimum of 15 credit hours (including six thesis credits) completed in 6000-level courses. The student’s graduate advisory committee (major advisor and co-advisor) will establish specific research goals, thesis topic, and the course electives in the program of study.

**Non-Thesis Option:** The Non-Thesis Option master's degree in GISci is particularly suited for working professionals who are interested in earning additional education without interrupting their careers. Typically students are not awarded research assistantships or teaching assistantships in the Non-Thesis Option. A minimum of 30 credit hours is required for completion of the Non-Thesis Option master's degree in GISci, with a minimum of 15 credit hours completed in 6000-level courses. The student must prepare and submit to the Geotechnologies program director a program of study in his or her first semester indicating the courses to be taken to meet these requirements. In his/her final semester, all Non-Thesis Option students will complete a written and oral capstone exam administered by geotechnologies graduate faculty and a graduate faculty representative.

All master's degree students are required to take a 1 credit hour graduate seminar (in any related discipline) and eleven credit hours of core courses. Generally these will be taken during the first year of study. Prerequisites for core courses are designed to permit students entering the master's degree program from all disciplines. Students entering with some or all of the core courses taken at the undergraduate level may, with permission from the student’s advisory committee, substitute other graduate-level courses in the program of study.

**Program Requirements:**

| Graduate Seminar (taken in a related discipline) | 1 |
| Core Geotechnologies Courses | 11 |

| Electives | 12 |
| Thesis 6 credits | 12 |
| Non-thesis | 12 |
| Total Hours | 30 |

*Total Hours includes 15 hours at 6000-level

Certain graduate courses not shown in the list above may be acceptable with approval of the student’s advisory committee. All courses in the program of study require approval by the student’s advisory committee and final approval by the Graduate School. Non-Thesis Option master's degree students must have their planned program of study approved by the Geotechnologies program director in their first semester and by the Graduate School in their final semester.

Thesis Option master's degree students are expected to complete a thesis that will be original and encompass all stages of scientific work, including project design, implementation, and communication. A graduate student may sign up for thesis credits only after his/her thesis prospectus has been submitted and approved by the advisory committee. Additionally, all thesis option master's degree students are required to present at least one colloquium dealing with his/her thesis topic prior to taking his/her oral examination.
Post-Baccalaureate GeoTechnology Certificate
(19 credits required)

Goals
1. Graduates will have the knowledge and skills necessary to apply geotechnology in their chosen careers or fields of interest.
2. Graduates will have the background to compete successfully for industrial and academic positions.

Objectives
1. Learn and perform techniques in Geographic Information Systems, Global Positioning Systems, Remote Sensing, and related skills.
2. Increase knowledge of how geotechnical applications are incorporated into research, education, and industry.
3. Increase knowledge of geotechnical workforce needs and the future directions of geotechnological applications.

Admission Requirements
Classified admission is necessary to complete the Certificate and is recommended by the graduate faculty of the Geosciences Department in accordance with standards set by the Graduate School. Applicants must have a bachelor’s degree from an accredited school and meet the Graduate School admission requirements. All applicants must submit an application to the Graduate School.

Students will complete 14 credits of required coursework and 5 credits of elective coursework to obtain the Certificate. The following courses are relevant:

For current information regarding GIS Center and courses, see the website: [http://giscenter.isu.edu](http://giscenter.isu.edu)

Courses

GEOL 5502 Geomorphology: 4 semester hours.
Process-response approach to landforms and landscapes. Historical perspectives, endo- and exogenetic processes, equilibrium and relict landforms. Emphasis on interrelations among various geologic sub-disciplines. Field trips, some lab exercises. COREQ: GEOL 5502L.

GEOL 5502L Geomorphology Laboratory: 0 semester hours.
Assignments to apply principles from GEOL 5502. COREQ: GEOL 5502.

GEOL 5503 Principles of Geographical Information System: 3 semester hours.
Study of GIS fundamentals, introduction to GPS, databases, and meta data. Practical application of ESRI ArcView?. Build, edit, and query a GIS; basic spatial analysis. Requires competence in computer operating systems. COREQ: GEOL 5503L.

GEOL 5503L Principles of GIS Laboratory: 0 semester hours.
Computer lab assignments to apply principles from GEOL 5503. COREQ: GEOL 5503.

GEOL 5504 Advanced Geographic Information Systems: 3 semester hours.
Study of relational databases, including spatial analysis, and remote sensing. Practical application of ArcInfo and Idrisi. Exercises include digitizing, querying, digital terrain modeling, and image processing.

GEOL 5505 Volcanology: 3 semester hours.
Aspects of physical and chemical volcanology: types of volcanoes; interpretation of volcanic deposits; properties of magma; generation, rise, and storage of magma; volcanic hazards and prediction.

GEOL 5506 Environmental Geology: 3 semester hours.
Humans and the environment. Topics include: industrial exploitation of fossil fuels, energy sources, soils, water and other materials, environmental health, pollution, waste disposal, hazards, disasters, and land use.

GEOL 5507 GPS Application in Research: 3 semester hours.
Overview of satellite positioning systems usage. Topics include GPS theory, basic mapping concepts, use of mapping grade receivers for GIS data collection, and processing of carrier phase data for high precision applications. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: GEOL 4403 or GEOL 5503.

GEOL 5508 GeoTechnology Seminar: 2 semester hours.
GIS applications in natural and social sciences, ethical and legal issues, current status and recent advances in GeoTechnology. Lectures, discussion, readings.

GEOL 5509 Remote Sensing: 3 semester hours.
Fundamentals and applications of single frequency, multispectral, and hyperspectral remote sensing for physical, natural, engineering, and social sciences. Emphasis on acquiring, processing, integrating, and interpretation of imagery. Requires competence in computer operating systems.

GEOL 5510 Science in American Society: 2 semester hours.
Observational basis of science; technology’s historical influences on scientific developments; perceptions of science in contemporary America; tools/strategies for teaching science. Equivalent to PHYS 5510.

GEOL 5511 Planetary Petrology: 3 semester hours.
Chemistry, mineralogy, tectonic association and petrogenesis of the principal igneous and metamorphic rock types on Earth and other planetary bodies.
GEOL 5512 Petrology Lab: 2 semester hours.
Microscopic identification of igneous and metamorphic minerals and rocks.
COREQ: GEOL 5511.

GEOL 5515 Quaternary Global Change: 3 semester hours.
Use and interpretation of land forms, sediments, and fossil life in the reconstruction of Quaternary events, environment, and climates.

GEOL 5516 Global Environmental Change: 3 semester hours.
Analysis of the causes and effects of both natural and human-induced environmental change. Integrates knowledge from other Earth Systems Science courses, and examines and analyzes relevant problems in global environmental change using scientific methods.

GEOL 5517 Introduction to Soils and Critical Zone Processes: 3 semester hours.
Introduction to soils with emphasis on soil formation and classification and the physical, chemical and biological properties of soils. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: CHEM 1112, CHEM 1112L, or permission of instructor. COREQ: GEOL 5517L.

GEOL 5517L Introduction to Soils Laboratory: 1 semester hour.
Assignments to apply GEOL 5517. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: CHEM 1112, CHEM 1112L, or permission of instructor. COREQ: GEOL 5517.

GEOL 5520 Principles of Geochemistry: 3 semester hours.
Chemistry of the earth; discussion of factors controlling abundance, distribution, and migration of chemical elements within the earth.

GEOL 5522 Planetary Geology: 3 semester hours.
Formation of planetary bodies (planets, moons, asteroids, and comets), internal and surficial processes, tectonics, and planetary exploration.

GEOL 5527 Information Technology for GIS: 3 semester hours.
Study of servers, networks, system administration, relational database design and management, spatial database engines, and serving maps on the internet. The course uses traditional lectures along with demonstrations and hands-on exercises.

GEOL 5528 Programming for GIS: 3 semester hours.
Course introduces students to programming for GIS. Students will learn the fundamentals of coding (I/O, logical forks, loops, language standards) and integration of GIS libraries (ex., Arcpy, GDAL). Students will complete a project where they develop a GIS tool of their choice. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: MATH 1147 and GEOL 1100 or 1101, or permission of instructor.

GEOL 5530 Principles of Hydrogeology: 3 semester hours.
Surface and groundwater occurrence, movement and recovery, water quality and pollution, well construction principles, and computer modeling.

GEOL 5531 Geobiology and the History of Life: 4 semester hours.
Principles of biology and geology applied to the study of fossil invertebrates; consideration is given to morphology, classification, evolution, paleoecology, and the stratigraphic significance of fossils. COREQ: GEOL 5531L.

GEOL 5531L Invertebrate Paleontology Laboratory: 0 semester hours.
Assignments to apply principles from GEOL 5531. COREQ: GEOL 5531.

GEOL 5535 Vertebrate Paleontology: 4 semester hours.

GEOL 5539 Principles of Taphonomy: 3 semester hours.
Effects of processes which modify organisms between death and the time the usually fossilized remains are studied. Emphasis on vertebrates. Equivalent to ANTH 5539 and BIOL 5539.

GEOL 5540 Ore Deposits: 3 semester hours.
Nature, mode of occurrence, and origin of ores with each type related to a given rock association and as the product of a particular environment.

GEOL 5545 Environmental and Engineering Geophysics: 4 semester hours.
Geophysical applications to environmental and geological engineering problems. Includes seismic, gravity, magnetic, electrical, and electromagnetic methods (includes lab).

GEOL 5550 Field Geology: 6 semester hours.
Five-week summer field camp, applying standard geologic field instruments and geologic concepts to a series of field problems.

GEOL 5551 Field Methods in Environmental Sciences: 3 semester hours.
Practical application of field methods with an Earth systems focus. Analysis of topographic and vegetational data, hydrologic methods, riverine processes and habitat, and soil characteristics, emphasizing use of GIS, GPS, remote sensing and other geotechnologies. Two week summer course. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

GEOL 5552 Sedimentation-Stratigraphy: 4 semester hours.
Principles of sedimentation from source to diagenesis. The basis of stratigraphic nomenclature, classification, and correlation of rock units. Laboratory covers unconsolidated sediment, hand specimens, subsurface, and field techniques.

GEOL 5552L Sedimentation-Stratigraphy Laboratory: 0 semester hours.
Assignments to apply principles in GEOL 5552. COREQ: GEOL 5552.

GEOL 5554 Basic Engineering Geology: 3 semester hours.
Geology applied to engineering projects; geotechnical problems in civil projects; site methods. Subsurface investigations including scope, logging, and in situ and geophysical methods. Equivalent to CE 5554.

GEOL 5555 Geologic Data Methods: 3 semester hours.
Classification of geotechnical projects. Geologic mapping for civil engineering purposes. Development of engineering geologic profiles. Pre-bid geotechnical investigations and field instrumention for civil works projects. Equivalent to CE 5555.

GEOL 5556 Geology of Idaho: 2 semester hours.
Geologic provinces and plate tectonic history of Idaho. Topics include basement, Belt Supergroup, Phanerozoic passive margin, Cordilleran orogen, accreted terranes, terranes, Idaho batholith, Challis volcanics, Idaho mineral deposits, Basin and Range, Snake River and Pleistocene floods.

GEOL 5558 Geology of North America: 3 semester hours.
Regional stratigraphy and tectonics of North America emphasizing National Parks and the Intermountain West. Graduate students will do extensive additional reading in current literature.

GEOL 5565 Petroleum Geosciences: 3 semester hours.
Occurrence of hydrocarbons, well logs, geophysical methods, generation and migration of petroleum, the reservoir, traps and seals, petroleum basins, unconventional petroleum resources. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

GEOL 5571 Historical Geography of Idaho: 3 semester hours.
Influences of geography and geology on Idaho's economic, political and cultural history. May be team taught and include field trips, discussion sections. Equivalent to HIST 5571 and POLS 5571.
GEOL 5575 Essentials of Geomechanics: 3 semester hours.
Essentials of rock fracture relevant to geological engineering including stress and strain, properties and classification of rock masses, rock fracture mechanisms. Equivalent to GEOL 5575.

GEOL 5576 Engineering Geology Project: 1 semester hour.
Team projects studying actual problems in engineering geology. Equivalent to GEOL 5576.

GEOL 5580 Special Topics in GIS: 1-3 semester hours.
Visual Basic programming for GIS. May be repeated.

GEOL 5581 GeoTechnology Internship: 1-3 semester hours.
Choose a project with either natural resource or municipal GIS emphasis and work with real-world data at the internship's off-campus location. Projects focus on using/creating geotechnical data. May be repeated.

GEOL 5583 Earthquake Engineering: 3 semester hours.
Mechanism and characterization of earthquakes; seismic risk analysis; site and structural response; applications from points of view of engineer and geologist. Equivalent to GEOL 5583.

GEOL 5590 Ecosystem Ecology and Global Change: 4 semester hours.
Examination of the structure and function of ecosystems and their responses to natural and anthropogenic changes emphasizing energy, water, carbon, and nitrogen cycling. Field trips. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus.

GEOL 5591 Seminar: 1 semester hour.
Field trip or discussion of current geologic literature and geologic problems. May be repeated until 3 credits are earned. Graded S/U.

GEOL 5597 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. 1-3 credits. May be repeated. May be graded S/U.

GEOL 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

GEOL 6601 Advanced Physical Geology: 2 semester hours.
An advanced level course in physical geology required for all first year graduate students. A review of the principles of physical geology, and an overview of current hypotheses and research in the field.

GEOL 6602 Advanced Geomorphology: 3 semester hours.
Seminar in the treatment of theoretical concepts in classical and modern geomorphology.

GEOL 6603 Geologic Writing Seminar: 2 semester hours.
Review of quality geologic writing practices; extended field trip and introduction to regional geology. Topics include databases, abstracts, stratigraphic terminology, grant proposals, thesis prospectus, and use of reference library. Required for all Geosciences graduate students.

GEOL 6604 Watershed Modeling: 3 semester hours.
Use of geographic information systems and integrated simulation models to study the hydrologic cycle, water quality, agricultural and industrial impacts, environmental and related issues at the watershed scale.

GEOL 6607 Spatial Analysis: 3 semester hours.
This course focuses on advanced techniques for spatial data analysis covering issues in sampling, characterizing, visualizing, exploring and modeling spatial data. Techniques for point patterns, continuous data, area data, and spatial interaction data will be emphasized.

GEOL 6608 Geostatistics Spatial Data Analysis and Modeling: 3 semester hours.
Description, analysis and modeling of spatial data in the geosciences, emphasizing hands-on application of geostatistical software tools for spatial analysis and probabilistic modeling in petroleum and groundwater reservoirs, environmental remediation, and mining or any application involving spatially-varying data. PREREQ: GEOL 6607 or permission of instructor.

GEOL 6609 Advanced Image Processing: 1 semester hour.
An advanced-level course in image processing techniques, such as using transforms, filters, and classifiers for data derived in the visible, infrared, and microwave. Specific topics include preprocessing, endmember analysis, classification (including spectral unmixing), and accuracy assessment. Practical application of theory for graduate student theses and dissertations.

GEOL 6613 Idaho Water Resources Seminar: 1 semester hour.
This course is an interactive discussion focused on water science, issues, and policy across the state. The seminar is a joint effort of Idaho's universities and multiple institutes, agencies and firms.

GEOL 6615 Neutron Activation Analysis: 4 semester hours.
Theory and use of neutron activation methods for quantitative chemical analysis of natural and synthetic materials. Applications in geologic systems will be emphasized. Equivalent to CHEM 6615 and PHYS 6615.

GEOL 6617 Environmental Geochemistry: 3 semester hours.
Geochemistry of environmental systems. Emphasis given to low-temperature water-rock interactions, including sorption processes, retardation, reaction kinetics and reaction-mass transport modeling. Equivalent to CHEM 6617.

GEOL 6618 Applied Geophysics: 3 semester hours.
Geologic interpretation of reflection seismic, refraction seismic, gravity, magnetic, and ground penetrating radar data.

GEOL 6621 Advanced Structural Geology: 3 semester hours.
Current aspects of structural geology or tectonics. May focus on regional structures, tectonic theories, orogenic mechanics, global tectonic model(s), or topics of special interest in structural geology.

GEOL 6622 Orogenic Belts of the World: 3 semester hours.
Interdisciplinary analysis of Alpine and Cordilleran-type mountain belts including their infrastructure, tectonic evolution, and mechanisms of formation.

GEOL 6623 Tectonics and Sedimentation: 3 semester hours.
Sedimentary basin analysis and mechanisms of subsidence. Extensional, compressional and strikeslip tectonics as related to depositional systems, facies architecture, and provenance.

GEOL 6625 Quantitative Geochemistry Lab: 3 semester hours.
Practical application of theory involving use and operation of instrumental techniques. Equivalent to CHEM 6625.

GEOL 6628 Advanced GIS Programming: 3 semester hours.
Course focuses on advanced topics in GIS programming, particularly processing efficiency for large problems. Students will learn the fundamentals of parallel processing for spatial problem solving, including use of shared and/or distributed memory systems. PREREQ: GEOL 5503, GEOL 5528, and permission of instructor.

GEOL 6630 Advanced Hydrogeology: 3 semester hours.
Advanced topics in hydrogeology, including precipitation and stream flow, soil moisture, principles and modeling of groundwater flow, migration of wastes in both saturated and unsaturated zones, design and impact of production wells, water chemistry.

GEOL 6631 Sedimentology: 3 semester hours.
Provenance, dispersal, and environments of deposition; emphasis on various aspects of surface equilibria.
GEOL 6641 Advanced Petrology: 3 semester hours.
Selected topics in igneous and/or metamorphic petrology, regional and/or global aspects of current interest, including relationship to major advances in other areas of solid earth sciences.

GEOL 6646 The Sedimentary Record: 3 semester hours.
Earth history as revealed in sedimentary facies, provenance, chemical and isotopic excursions. Methods of analysis including sequence stratigraphy, geochronology, biogeochemistry, chemostratigraphy.

GEOL 6648 Research Problems: 1-6 semester hours.
Independent research on non-thesis subject matter, subject to approval of the staff before results receive credit. Course may be repeated until 10 credits are earned.

GEOL 6649 Pre-Thesis: 1-6 semester hours.
Preparation and development of a prospectus for a thesis or dissertation project. May be repeated. Graded S/U. Credits are not counted in the program graduation credit requirement.

GEOL 6650 Thesis: 1-9 semester hours.
Ordinarily a field problem with supporting laboratory work undertaken by the student with approval of the geology graduate faculty, and after a thesis prospectus has been accepted. May be repeated. Graded S/U.

GEOL 6684 Graduate Teaching Practicum: 1-2 semester hours.
Supervised teaching in an undergraduate laboratory. Graded S/U. May be repeated. Credits are not counted in the program graduation credit requirement.

GEOL 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

GEOL 8850 Doctoral Dissertation: 1-16 semester hours.
Department of Mathematics and Statistics

Chair and Professor: Fisher
Assistant Chair and Professor: Laquer
Professors: Y. Chen, Derryberry, Hanin, Kriloff, Palmer, Payne, Wolper
Associate Professors: S. Chen, Gryazin, W. Zhu, Y. Zhu
Visiting Assistant Professors: Foster-Greenwood, Chikwanda

Goals
• Master's degree students develop a broad knowledge of mathematics and a degree of competence in one field within mathematics.
• Doctoral students develop a broad knowledge of mathematics; learn about the roles of instruction, service, and research in the mathematical profession; and study a mathematical topic in depth, reporting their findings in a thesis that meets professional standards.
• Graduate students find employment in teaching or industry.

Doctor of Arts in Mathematics
The Doctor of Arts in Mathematics is designed to prepare the student for a teaching career in institutions of higher learning. The program emphasizes broad competence in mathematics rather than specialization and makes provision for classroom teaching experience.

Master of Science in Mathematics
The Master of Science in Mathematics is designed to provide a broad and in-depth background and prepare the student for further study at the doctoral level or for an industrial or academic career.

Master of Arts in Mathematics for Secondary Teachers
The Master of Arts in Mathematics for Secondary Teachers (MAMST) is designed for people with a bachelor’s degree who hold a secondary school teaching certificate for the teaching of mathematics and have at least three years of full-time teaching experience. The objective of the program is to enhance the mathematical training of secondary teachers and to equip such teachers with a broad and modern background in mathematics.

Doctor of Arts (D.A.) in Mathematics
Admission Requirements
For admission to the D.A. program in Mathematics, the applicant must meet all admission requirements of the Idaho State University Graduate School as well as the following admission requirements of the department:

1. submission of all requirements for a master’s degree equivalent to the M.S. degree in Mathematics at Idaho State University before the start of the initial enrollment;
2. at least 3.5 grade point average (GPA) out of 4.0 in all previous graduate course work;
3. at least the 67th percentile on the quantitative reasoning section and 50th percentile for the average of the percentiles on the verbal reasoning, quantitative reasoning, and analytical writing sections of the Graduate Record Examination (GRE) General Test.

In addition to completing the application procedure specified by the Graduate School, an applicant to the D.A. program in Mathematics must:

1. submit a letter addressing the applicant's reasons for pursuing the D.A. degree in Mathematics uploaded to with the application to the Idaho State University Graduate School;
2. arrange for at least three confidential letters of recommendation, to be submitted within the application to the Idaho State University Graduate School, and addressing the applicant's background and potential for success in the study of advanced mathematics and teaching of college-level mathematics courses.

Applicants will be selected according to the following criteria:

1. measure of success in completing the master's degree;
2. satisfactory GRE scores (See Item 3 of the above departmental admission requirements.);
3. teaching experience;
4. letters of recommendation;
5. applicant's reasons for pursuing the D.A. degree.

An applicant who wishes to be considered for financial assistance must complete a Financial Assistance Application form and submit the completed Financial Assistance Application form directly to the Idaho State University Graduate School.

Applications must be received by April 1st to be given full consideration.

Residence
Up to six credits beyond the master’s degree may be transferred into the program. Two consecutive semesters of full-time study are required in residence.

Committees and Advising
The student will be advised initially by the departmental graduate committee. This group will be the student’s temporary advising committee and will assist in the selection of the student’s permanent committee which will supervise the remainder of the student’s program.

General Requirements
The program requires course work, a thesis, teaching internships, and examinations as described below. The program must include a minimum of 48 credits beyond the masters degree, and at least two 6600-level sequences taken in residence. Approval for optional courses is granted by the Mathematics Department Graduate Committee.

Total Hours 68

**Examinations**

2. Oral Examination: An oral examination on the four core areas previously described in Section 1.
3. Final Examination: The candidate will present to the public a lecture on the candidate’s dissertation, and will answer any questions that arise. Following the lecture and question period, the candidate will be examined orally by the candidate’s dissertation committee on topics related to the dissertation.

**Doctor of Philosophy in Engineering and Applied Science**

A doctoral program in Engineering and Applied Science, administered through the College of Science and Engineering, is available to mathematics students. The complete program description is provided elsewhere in the College of Science & Engineering section of the Graduate Catalog.

**Master of Science (M.S.) in Mathematics**

**Admission Requirements**

For admission to the M.S. program in Mathematics, the applicant must meet all admission requirements of the Idaho State University Graduate School as well as the following admission requirements of the department:

1. completion of a bachelor’s degree with strong mathematical component before the start of the initial enrollment;
2. at least 3.0 grade point average (GPA) out of 4.0 in upper-division undergraduate course work in mathematics;
3. at least 50th percentile on the quantitative reasoning section of the Graduate Record Examination (GRE) General Test;
4. completion of the course work in modern algebra, differential equations, and analysis courses beyond the calculus sequence.

In addition to completing the application procedure specified by the Graduate School, an applicant to the M.S. program in Mathematics must:

1. submit a letter addressing the applicant's reasons for pursuing the M.S. degree in Mathematics directly to the Idaho State University Graduate School;
2. arrange for at least three confidential letters of recommendation, to be submitted directly to the Idaho State University Graduate School, and addressing the applicant's background and potential for success in the study of advanced mathematics.

An applicant who does not fully meet the departmental requirements will be considered for admission on an individual basis and required to make up the deficiency at Idaho State University in case of admission.

An applicant who wishes to be considered for financial assistance must complete a Financial Assistance Application form and submit the completed Financial Assistance Application form directly to the Idaho State University Graduate School.

Applications must be received by April 1st to be given full consideration.

**General Requirements**

The Master of Science program in Mathematics provides thesis and non-thesis options. Students choosing either option must take 15 credits in mathematics at the 6600 level, including two full-year sequences. Of the remaining 15 graduate credits required for the degree, at least 9 must be in mathematics. The entire program of study must be approved by the departmental graduate committee.

Students must pass a written examination on one of the 6600-level sequences in their programs of study. Those who choose the thesis option must also complete and defend an expository or research thesis, for which they will receive 6 credits of MATH 6649. Those who choose the non-thesis option must pass a final oral examination over all courses in their program of study.
Master of Arts in Mathematics for Secondary Teachers

Admission Requirements
The student must apply to, and meet all criteria for, admission to the Graduate School. In addition to the general requirements of the Graduate School, the student must comply with the following departmental requirements. For full admission to the MAMST program, the applicant:

1. must hold a bachelor’s degree and a standard secondary school teaching certificate in Mathematics;
2. must have at least three years’ full-time teaching experience;
3. must have a GPA of at least 3.0 for the last two years of undergraduate work;
4. must have taken the Graduate Record Examination (GRE), achieving at least the 50th percentile on the quantitative part of the general aptitude test; and
5. must have completed undergraduate work equivalent to that required for the Idaho State University Teaching Major in Mathematics.

General Requirements
The MAMST degree requires the following:

1. Possession of a bachelor’s degree and a secondary teaching certificate in Mathematics.
2. Completion of a program of study approved by the Graduate Committee of the Department of Mathematics and Statistics and the Dean of the Graduate School.
3. Completion of a minimum of 30 credits beyond the bachelor’s degree in courses numbered 5500 or above.
4. Approval of semester papers as required by the Graduate Committee of the Department of Mathematics and Statistics.
5. Satisfactory performance on comprehensive written and oral examinations on the student’s program of study.

Courses

MATH 5503 Survey of Combinatorics and Graph Theory: 3 semester hours.
Enumeration techniques, including generating functions. Applications. Introductory graph theory. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: MATH 1175 AND MATH 2240.

MATH 5504 Topics in Combinatorics and Graph Theory: 3 semester hours.
Continuation of MATH 5503. Application of algebraic, analytic, and/or probabilistic methods to combinatorial, graph-theoretic, and algorithmic problems. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: MATH 5503 or permission of instructor.

MATH 5506 Advanced Linear Algebra: 3 semester hours.
Advanced linear algebra with a strong emphasis on proof. Real and complex vector spaces, linear transformations, polynomials associated to matrices, determinants, canonical forms, inner product spaces. PREREQ: MATH 2240.

MATH 5507 Modern Algebra I: 3 semester hours.
Rings, fields, groups, algebras, and selected topics in abstract algebra. PREREQ: MATH 2240 and MATH 2287.

MATH 5508 Modern Algebra: 3 semester hours.
Rings, fields, groups, algebras, and selected topics in abstract algebra. PREREQ: MATH 2240 and MATH 2287.

MATH 5521 Advanced Engineering Mathematics I: 3 semester hours.
Analysis of complex linear and nonlinear engineering systems using advanced techniques, including Laplace transforms, Fourier series and classical partial differential equations. SUGGESTED PREREQ: MATH 3360.

MATH 5522 Advanced Engineering Mathematics II: 3 semester hours.
Analysis of complex linear and nonlinear engineering systems using advanced techniques, including probability and statistics, advanced numerical methods and variational calculus. SUGGESTED PREREQS: ENGR 5521 or MATH 5521.

MATH 5523 Introduction to Real Analysis I: 3 semester hours.
The real number system, topology of metric spaces, sequences, limits, series of functions and convergence, continuity, theory of differentiation and Riemann integration of functions of one variable and several variables, and selected topics on measure theory and integration. SUGGESTED PREREQS: MATH 2240, MATH 2275, and MATH 3326.

MATH 5524 Introduction to Real Analysis II: 3 semester hours.
The real number system, topology of metric spaces, sequences, limits, series of functions and convergence, continuity, theory of differentiation and Riemann integration of functions of one variable and several variables, and selected topics on measure theory and integration. SUGGESTED PREREQS: MATH 4423 or MATH 5523.

MATH 5526 Elementary Analysis: 3 semester hours.
A beginning course in analysis on the real line. Proof writing and the underlying logic are emphasized throughout the course. Topics include sets and functions, sequences, convergence, limits, continuity, and infinite series. Enrollment restricted to students admitted to the MAMST program and approved by the department graduate committee.

MATH 5527 Vector Analysis: 3 semester hours.
Calculus of vector functions of several variables, derivative matrix, chain rule, inverse function theorem, multiple integration. Change of variables. Integrals over curves and surfaces. Green’s, Stokes and Divergence Theorems. Applications to Physics. Enrollment restricted to students admitted to the MAMST program and approved by the departmental graduate committee.

MATH 5535 Elementary Number Theory: 3 semester hours.
Diophantine equations, prime number theorems, residue systems, theorems of Fermat and Wilson, and continued fractions. SUGGESTED PREREQ: MATH 5507.

MATH 5541 Introduction to Numerical Analysis I: 3 semester hours.
Introduction to standard numerical techniques for solving problems dealing with nonlinear equations, systems of linear equations, differential equations, interpolation, numerical integration, and differentiation. SUGGESTED PREREQS: MATH 2240, MATH 3326 and MATH 3360 or permission of instructor.

MATH 5542 Introduction to Numerical Analysis II: 3 semester hours.
Extension of MATH 5541 for students who wish to pursue more advanced techniques with emphasis on analysis. Typical topics covered include numerical methods applied to partial differential equations, integral equations, and in-depth treatment of topics covered in MATH 5541. SUGGESTED PREREQ: MATH 5541.

MATH 5543 Modern Geometry I: 3 semester hours.
Planar Euclidean geometry. Rigid motions and symmetry in the plane. Enrollment restricted to students admitted to the MAMST program and approved by the departmental graduate committee.

MATH 5544 Modern Geometry II: 3 semester hours.
Transformation groups. Topics from hyperbolic, projective, and other geometries.
MATH 5550 Mathematical Statistics I: 3 semester hours.
Probability, random variables, discrete and continuous distributions, order
statistics, limit theorems, point and interval estimation, uniformly most
powerful tests, likelihood ratio tests, chi-square and F tests, nonparametric tests.
SUGGESTED PREREQS: MATH 3326 and MATH 3352.

MATH 5551 Mathematical Statistics II: 3 semester hours.
Probability, random variables, discrete and continuous distributions, order
statistics, limit theorems, point and interval estimation, uniformly most
powerful tests, likelihood ratio tests, chi-square and F tests, nonparametric tests.
SUGGESTED PREREQS: MATH 3326 and MATH 3352.

MATH 5552 Introduction to Probability: 3 semester hours.
Fundamentals of probability, discrete and continuous random variables,
distributions such as binomial, uniform, Poisson, hypergeometric, normal,
gamma; expectation; joint, marginal, conditional distributions; central limit
theorem; applications to statistics. Emphasizes material needed to develop
statistical inference methods. Enrollment restricted to students admitted to
MAMST program and approved by the departmental graduate committee.

MATH 5553 Topics in Statistics: 1-3 semester hours.
Content varies. May be repeated for up to 6 credits. SUGGESTED PREREQ:
Permission of instructor.

MATH 5554 Operations Research I: 3 semester hours.
Deterministic problems in operations research oriented towards business.
Includes linear programming, transportation problems, network analysis, PERT,
dynamic programming, and elementary game theory. Enrollment restricted to
students admitted to the MAMST program and approved by the departmental
graduate committee.

MATH 5555 Operations Research II: 3 semester hours.
Probabilistic models oriented towards business are treated. Selections from
stochastic processes, Markov chains, queuing theory, inventory theory, reliability,
decision analysis and simulation. Enrollment restricted to students admitted to
the MAMST program and approved by the departmental graduate committee.

MATH 5556 Operations Research III: 3 semester hours.
Content varies. May be repeated for up to 6 credits. SUGGESTED PREREQ:
Permission of instructor.

MATH 5557 Applied Regression Analysis: 3 semester hours.
Simple and multiple linear regression, polynomial regression, diagnostics,
model selection, models with categorical variables. SUGGESTED PREREQS:
MATH 3350 or MATH 3352 or permission of instructor.

MATH 5558 Experimental Design: 3 semester hours.
The linear model for experimental designs, analysis of variance and covariance,
block designs, factorial designs, nested designs, choice of sample size.
SUGGESTED PREREQS: MATH 3350 or MATH 3352 or permission of instructor.

MATH 5559 Applied Multivariate Analysis: 3 semester hours.
Matrix computation of summary statistics, graphical analysis of multivariate
procedures, multivariate normal distribution, MANOVA, multivariate linear
regression, principal components, factor analysis, canonical correlation analysis.
SUGGESTED PREREQS: MATH 2240 and one of the following: MATH 3350,
MATH 5573, MATH 5558 or permission of instructor.

MATH 5560 Differential Equations: 3 semester hours.
Theory and applications of ordinary differential equations. Enrollment restricted to
students admitted to the MAMST program and approved by the departmental
graduate committee.

MATH 5561 Introduction to Complex Variables: 3 semester hours.
Introduction to the study of functions of a complex variable including the algebra
and geometry of complex numbers, analytic functions, power series, integral
theorems, and applications. Enrollment restricted to students admitted to the
MAMST program and approved by the departmental graduate committee.

MATH 5562 Partial Differential Equations: 3 semester hours.
Equations of the first and second orders, methods of solution, Laplace's Equation,
heat equation, and the wave equation. Emphasis on applications to problems in
the physical sciences and engineering. SUGGESTED PREREQS: MATH 2275
and MATH 3360.

MATH 5565 Introduction to Topology: 3 semester hours.
Metric spaces; convergence; notions of continuity; connected, separable and
compact spaces. SUGGESTED PREREQ: Permission of instructor.

MATH 5566 Operations Research II: 3 semester hours.
Reading and conference in an area not usually covered by a regular offering.
Individual work under the supervision and guidance of a professor whose
specialty includes the chosen area. Open to seniors and graduate students in good
standing and with the consent of the instructor. May be repeated until 6 credits
are earned.

MATH 5567 Mathematics Seminar: 1-3 semester hours.
Advanced reading and discussion on selected topics in mathematics. May be
taken for credit more than once. SUGGESTED PREREQ: Senior standing or
equivalent.

MATH 5568 Professional Education Development Topics: 1-3 semester hours.
A course for practicing professionals aimed at the development and improvement
of skills. May not be applied to graduate degrees. May be repeated. May be
graded S/U.

MATH 5569 Professional Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are
noted by course section and announced in the class schedule by the scheduling
department. Experimental courses may be offered no more than three times.
May be repeated.

MATH 6600 Introduction to College Mathematics Teaching: 1 semester hour.
Practical course management issues for teaching mathematics at the college level.
Open only to graduate students in mathematics. May not be repeated. Graded S/ U.

MATH 6610 Topics in College Mathematics Teaching: 1 semester hour.
Theories and research related to mathematics teaching and learning. May be
repeated. Graded S/U.

MATH 6625 Real Analysis I: 3 semester hours.
Measures, the Lebesgue integral, Lp spaces and other normed vector spaces,
approximation theorems. SUGGESTED PREREQ: MATH 5524.

MATH 6626 Real Analysis II: 3 semester hours.
Approximation theorems. SUGGESTED PREREQ: MATH 5524.

MATH 6627 Complex Analysis I: 3 semester hours.
Theory of functions of a single complex variable, including their differentiation,
integration and representation by sums, products and integrals. The Cauchy
integral formula and its consequences, conformal mappings, harmonic functions.

MATH 6628 Complex Analysis II: 3 semester hours.
Theory of functions of a single complex variable, including their differentiation,
integration and representation by sums, products and integrals. The Cauchy
integral formula and its consequences, conformal mappings, harmonic functions.

MATH 6631 Abstract Algebra I: 3 semester hours.
Advanced theory and structural properties of groups, rings, modules, and fields,
including topics such as group actions, universal maps, and Galois theory.
SUGGESTED PREREQS: MATH 5508 or permission of instructor.

MATH 6632 Abstract Algebra II: 3 semester hours.
Advanced theory and structural properties of groups, rings, modules, and fields,
including topics such as group actions, universal maps, and Galois theory.
SUGGESTED PREREQS: MATH 5508 or permission of instructor.
MATH 6633 Matrix Analysis: 3 semester hours.
Eigenvalues, special matrices, normal forms, matrix polynomials, matrix functions, matrix norms, Kronecker products, stability, matrix equations, generalized inverses, nonnegative matrices. SUGGESTED PREREQS: MATH 5506 and MATH 5524.

MATH 6636 Lie Groups and Lie Algebras I: 3 semester hours.
Lie groups, Lie algebras, and their representations. Structure of real and complex Lie algebras. Representations of semi-simple Lie algebras and compact Lie groups. SUGGESTED PREREQS: MATH 5506 and MATH 5507 or permission of instructor.

MATH 6637 Lie Groups and Lie Algebras II: 3 semester hours.
Lie groups, Lie algebras, and their representations. Structure of real and complex Lie algebras. Representations of semi-simple Lie algebras and compact Lie groups. SUGGESTED PREREQS: MATH 5506 and MATH 5507 or permission of instructor.

MATH 6641 Numerical Analysis I: 3 semester hours.
Topics selected from approximation theory, optimization, numerical linear algebra, differential and integral equations, spline analysis, computer algorithms, and other areas of current research in numerical analysis. SUGGESTED PREREQS: MATH 5523 and MATH 5541.

MATH 6642 Numerical Analysis II: 3 semester hours.
Topics selected from approximation theory, optimization, numerical linear algebra, differential and integral equations, spline analysis, computer algorithms, and other areas of current research in numerical analysis. SUGGESTED PREREQS: MATH 5523 and MATH 5541.

MATH 6650 Thesis: 1-6 semester hours.
May be repeated. Graded S/U.

MATH 6652 Stochastic Processes: 3 semester hours.
Topics from conditional probability and expectation, martingales, Kolmogorovs Theorem, Markov processes, random walks, Brownian motion, diffusions, dynamic programming, stochastic differential equations. Applications to modeling physical and/or social dynamical systems. SUGGESTED PREREQ: MATH 5550.

MATH 6653 Advanced Topics in Probability and Statistics: 3 semester hours.
Topics such as experimental design, regression analysis, multivariate statistical analysis. SUGGESTED PREREQS: MATH 3352 and MATH 5506 or permission of instructor.

MATH 6655 Combinatorics I: 3 semester hours.
Theory and applications of: choice and enumeration techniques, generating functions, partitions, designs and configurations, graph theory including digraphs, algebraic graph theory and extremal problems. SUGGESTED PREREQ: Permission of instructor.

MATH 6656 Combinatorics II: 3 semester hours.
Theory and applications of: choice and enumeration techniques, generating functions, partitions, designs and configurations, graph theory including digraphs, algebraic graph theory and extremal problems. SUGGESTED PREREQ: Permission of instructor.

MATH 6662 Differential Equations I: 3 semester hours.
Existence, uniqueness, and dependence of solutions upon initial conditions; linear equations; autonomous equations; dynamical systems and stability; partial differential equations of first and second order, with applications. SUGGESTED PREREQS: MATH 3326, MATH 3327, and MATH 3360.

MATH 6663 Differential Equations II: 3 semester hours.
Existence, uniqueness, and dependence of solutions upon initial conditions; linear equations; autonomous equations; dynamical systems and stability; partial differential equations of first and second order, with applications. SUGGESTED PREREQS: MATH 3326, MATH 3327, and MATH 3360.

MATH 6664 Methods of Applied Mathematics I: 3 semester hours.
Transform, spectral, variational and perturbation methods applied to the analysis of equations involving differential and integral operators. Emphasis on equations arising in physical and biological sciences. SUGGESTED PREREQS: MATH 5506 and MATH 5565.

MATH 6665 Methods of Applied Mathematics II: 3 semester hours.
Transform, spectral, variational and perturbation methods applied to the analysis of equations involving differential and integral operators. Emphasis on equations arising in physical and biological sciences. SUGGESTED PREREQS: MATH 5506 and MATH 5565.

MATH 6667 Functional Analysis I: 3 semester hours.
Major results of functional analysis, such as the Hahn-Banach, open mapping, and closed graph theorems; study of Hilbert and Banach spaces; spectral analysis. SUGGESTED PREREQS: MATH 5523 or MATH 6625 or permission of instructor.

MATH 6668 Functional Analysis II: 3 semester hours.
Major results of functional analysis, such as the Hahn-Banach, open mapping, and closed graph theorems; study of Hilbert and Banach spaces; spectral analysis. SUGGESTED PREREQS: MATH 5523 or MATH 6625 or permission of instructor.

MATH 6671 Topology I: 3 semester hours.
Fundamental theorems and examples from point-set topology; emphasis is on general and metric topologies and continuous mappings; introduction to topology of manifolds, covering spaces, homotopy, homology, and cohomology. SUGGESTED PREREQS: MATH 5573 or permission of instructor.

MATH 6672 Topology II: 3 semester hours.
Fundamental theorems and examples from point-set topology; emphasis is on general and metric topologies and continuous mappings; introduction to topology of manifolds, covering spaces, homotopy, homology, and cohomology. SUGGESTED PREREQS: MATH 5573 or permission of instructor.

MATH 6681 Differential Geometry I: 3 semester hours.
Differentiable manifolds and mappings; bundles, connections, geodesics, and curvature; Lie groups; topics from Riemannian, Hermitian, or symplectic geometry. SUGGESTED PREREQ: MATH 3327.

MATH 6682 Differential Geometry II: 3 semester hours.
Differentiable manifolds and mappings; bundles, connections, geodesics, and curvature; Lie groups; topics from Riemannian, Hermitian, or symplectic geometry. SUGGESTED PREREQ: MATH 3327.

MATH 6691 Directed Reading: 1-3 semester hours.
Reading and problems arranged on an individual basis with a faculty supervisor.

MATH 6692 Doctor of Arts Seminar: 2 semester hours.
Topics include the nature and practice of mathematical research, grants, public speaking, professionally and classroom related software, information media, issues in mathematical pedagogy, standards, and curricula, university organization, history of mathematics. Graded S/U.

MATH 6693 Mathematical Exposition: 1 semester hour.
Presentation of mathematics in a seminar setting. Small group practice in and critique of mathematical exposition. Requirements include presentation of a departmental colloquium on an assigned topic. Graded S/U.

MATH 6694 Special Topics in Mathematics: 1-3 semester hours.
Each offering will deal with a topic selected from such fields of mathematics as algebra, analysis, geometry, number theory, topology, applied analysis, probability, and mathematical logic. May be taken for credit more than once.
MATH 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are
noted by course section and announced in the class schedule by the scheduling
department. Experimental courses may be offered no more than three times. May
be repeated.

MATH 7700 Supervised Teaching Internship: 1-9 semester hours.
Graded S/U.

MATH 7750 Thesis: 1-6 semester hours.
Graded S/U.

MATH 8850 Doctoral Dissertation: 1-9 semester hours.
Variable credits. May be repeated. Graded S/U.
Physics, Nuclear and Electrical Engineering

Physics
Chair and Professor: Beezhold
Program Director and Research Professor: Spielman
Professors: Cole, Dale, Khandaker, Shropshire
Associate Professors: Forest, Tatar
Research Associate Professor: Chouffani, Hunt
Assistant Professor: McNulty
Lecturer: Bernabee
Adjunct Faculty: Franckowiak, Hobdey, Hoskins, Millward
Affiliate Faculty: Starovoitova, Wells
Professors Emeritus: Harmon, Parker

General Objectives of Graduate Programs
The objectives of our graduate degrees, which are the Doctor of Philosophy in Applied Physics and Master of Science in Physics, are to develop a core competence in the fundamental physical science that is appropriate for the level of the degree, to develop more generalized skills of quantitative reasoning that are applicable to any discipline, and to understand the nature and influence of physics in particular, and science in general, upon our society. Additional objectives for these students include the development of (1) broad, fundamental technical skills and knowledge, (2) strong communication skills, and (3) the capability to think critically and work independently. The expectations for each of these objectives have a “level” that is appropriate for the degree.

The learning objectives of the master's degree in physics are mastery of the “core” subjects of electromagnatism, non-relativistic quantum mechanics, and theoretical methods of classical physics (principally mechanics).

The communication objectives for these degrees are writing and speaking skills that are sufficient for students to represent themselves, their projects, and their organizations at regional, national, or international scientific meetings. Our expectations are that these students will obtain critical thinking skills and an ability to work independently at a level that will require minimal or no supervision by a more senior scientist or management.

The educational objectives of the doctoral degree in applied physics include all of those of the master's degree program, plus mastery of additional graduate-level classes of the student’s choice, plus completion of an original doctoral research thesis project with the objective of mastery of planning, executing, and publishing original research in physics at the highest level of the discipline. The communication objectives at this level are writing and speaking skills that are sufficient to teach in higher education, attract interest and funding to their projects, and to represent themselves, their projects and their organizations at regional, national, or international scientific meetings. Our expectations are that these students will develop critical thinking skills and an ability to work independently such that they are capable of initiating and leading their own scientific projects, and can work at a level that requires no supervision.

Nuclear Engineering and Health Physics

Program Director and Associate Professor: Pope
Professors: Brey, Imel, Jacobsen, Kunze
Associate Professors: Burgett, Dunzik-Gougar

Certificate Program in Applied Nuclear Energy
This program provides bachelor’s degree graduates who do not have recent experience or education in the nuclear energy field with historical insights, information on basic concepts, regulatory requirements, and economic and environmental considerations. This program is not intended to lead to a master's or doctoral program in the areas of Nuclear Science and Engineering. The Certificate is granted upon completion of fourteen (14) credit hours of class work, consisting of nine credit hours of required courses, a three-credit elective course and participation in two semesters of a one-credit graduate seminar. Up to six credits of appropriate graduate course work taken at another university may be applied toward the certificate program subject to approval by the student’s certificate committee. With appropriate pre-planning, some of these credits could be applied to a master’s degree.

Master of Science in Nuclear Science and Engineering
The master’s degree program in Nuclear Science and Engineering prepares the student for advanced placement in the nuclear industry in commercial, research, or development areas. It provides in-depth studies and advanced design concepts in several areas of modern nuclear science and engineering. It is also an excellent program of study for entering the doctoral program in Nuclear Science and Engineering.

Goals
- Enhance the knowledge of graduates in the physics and engineering of nuclear reactors, the nuclear fuel cycle, and other aspects of the study of nuclear engineering. At Idaho State University, while our emphasis is on advanced reactors and the science and technology of nuclear fuel recycling, we allow the flexibility to build programs on other aspects, which can include systems studies and simulations including policy aspects, radiation shielding and detection, medical applications of radiation, and the economics and safety of all of these applications.
- Increase the ability of graduates to synthesize and apply these advanced concepts to develop realistic nuclear engineering designs and to solve identified problems, designing strategies for implementing them safely, ethically, and effectively.
- Enhance the ability of graduates to effectively communicate these concepts both in oral and written formats.

Master of Science in Health Physics
The Nuclear Engineering and Health Physics Program additionally offers the master's option in Health Physics. Health Physics, an applied science, is concerned with the protection of humans and their environment from the possible harmful effects of radiation while providing for its beneficial uses. It is a multi-disciplined profession that incorporates aspects of both the physical and biological sciences. The master's program in Health Physics is accredited by the Applied Sciences Accreditation Commission of ABET, http://www.abet.org. The Idaho State University Health Physics programmatic educational objectives have
been developed in close collaboration of faculty and the Idaho State University Health Physics Program Advisory Board.

The educational objectives of the ISU Health Physics program are to produce health physicists with

1. broad, fundamental technical knowledge;
2. written and verbal communication skills;
3. professional judgment and capability to think critically;
4. practical experience in solving applied health physics problems;
5. the ability to work independently;
6. a professional ethic of magnitude sufficient for them to productively and successfully work in a variety of health physics settings.

The graduate program has two additional educational objectives:

1. An ability to conduct research;
2. Professional tools and experience above that expected for the baccalaureate program.

Students may enter the master's program in health physics from several undergraduate majors including health physics, physics, chemistry, biology, and other science or engineering majors. Additional course work to correct deficiencies may be necessary.

**Doctor of Philosophy in Nuclear Science and Engineering**

This program combines the atomic nuclear aspects of engineering and science. Research areas range from the more traditional nuclear engineering disciplines (reactor physics, thermal hydraulics, and reactor design) to cross-discipline topics in the fields of radiation detection and measurement, nuclear fuels, and materials development, nuclear fuel cycle systems studies and radioactive waste management.

**Goals**

- Prepare graduates to conduct and disseminate independent scholarly research.
- Prepare graduates for careers in academia or industry.

**Objectives**

- Increase the knowledge of graduates in their specialized field: chemistry, engineering (all disciplines), geosciences, mathematics, and physics.
- Enhance the ability of graduates to contribute to their chosen field.
- Enhance effective written and oral communication skills of graduates.

**Electrical Engineering**

Chair and Professor: Bezzhold

Program Director and Professor: Stuffle

Professors: Mousavinezhad

Associate Professors: Chiu, Ellis, Kantabutra

Adjunct Faculty: Baldwin, Alsaraj

**Master of Science in Measurement and Control Engineering**

The master’s degree program in Measurement and Control Engineering is designed to provide advanced study (analytically, computationally, and experimentally) in measurements, modeling, simulation, robotics, and adaptive, intelligent, nonlinear, optimal, and robust control. This program prepares the student for advanced placement in the measurement and control engineering field in industry, research, or development areas. Additionally, this program provides a suitable base for entrance into a doctoral program in a field related to electrical or mechanical engineering. The program is offered both at the Pocatello and the Idaho Falls campuses, primarily through the use of telecommunications/distance learning, which includes partial in-class instruction.

**Goals**

- Enhance the knowledge of graduates in advanced concepts of measurement, control, signal processing, engineering mathematics, computation and other related areas.
- Increase the ability of graduates to synthesize and apply these advanced concepts to develop realistic measurement and control engineering designs and to solve identified problems, designing strategies for implementing them safely, ethically, and effectively.
- Enhance the ability of graduates to effectively communicate these concepts both in oral and written formats.

**Doctor of Philosophy in Applied Physics**

**Program Goals**

- Prepare graduates to conduct and disseminate independent scholarly research in applied physics.
- Prepare graduates for careers in academia, industry, or government.

**Program Objectives**

- Increase the knowledge of graduates in their chosen field of applied physics.
- Enhance the ability of graduates to contribute to their chosen field of applied physics.
- Enhance effective written and oral communication skills of graduates.

The Ph.D. program in Applied Physics is an interdisciplinary program offered by that allows for a broad range of research topics. Areas of emphasis in the department include: nuclear physics applications, radiation effects in materials, accelerator physics and applications, materials science, homeland security applications, and other areas of applied nuclear science.

To attain a degree in this program, a student must demonstrate scholarly achievement and ability for independent investigation. The program will normally require approximately five years of full-time study beyond the bachelor’s degree (or three years beyond the master’s degree), including class work, research, and preparation of the dissertation.

**Admission Requirements**

All applicants must meet Idaho State University Graduate School admission requirements for doctoral programs. In addition, applicants must have attained a minimum of a bachelor’s degree in physics, or a closely related field (engineering, applied physics, chemistry, etc.). The student’s course of study will be determined by consultation with the department chair or the department’s graduate advising committee. Students may be required to complete any missing course material that is required for the B.S. degree in physics at Idaho State University. Continued enrollment in the program is contingent upon maintaining
A dissertation committee of four departmental members and a Graduate Faculty candidate upon passing the qualifying examination. Within one attempt must be the next available examination. The student will be admitted to candidacy. A total of 30 credits are required for the Master of Science Degree.

**Program of Study**

A departmental advisory committee consisting of graduate faculty will guide each student in establishing his or her program of course and laboratory study based upon the student’s background and research interest. The advisory committee has the responsibility of ensuring that the student has adequate knowledge to support research in his or her area of research.

At the beginning of a full-time student’s second year, the student will sit for a written Qualifying Examination. Exceptions to this schedule may be made when a student has academic deficits to make up, in which case the student will have an additional year. These exams are offered in January and September. The student will be allowed two attempts to pass this examination, and the second attempt must be the next available examination. The student will be admitted to candidacy upon passing the qualifying examination.

A dissertation committee of four departmental members and a Graduate Faculty Representative (GFR), chaired by the candidate’s major professor, must be appointed within six months of passing the qualifying examination. Within one year of passing the qualifying exam, the full-time candidate, with guidance from the major professor, must satisfactorily complete the Preliminary Examination, which consists of an oral presentation and defense of a written proposal for dissertation research to the student’s dissertation committee.

The research and dissertation preparation must be done under the close supervision of the committee and must include at least one full year of work performed under the supervision of a Idaho State University graduate faculty.

Dissertation Examination approval requires a public presentation of the dissertation and a satisfactory oral defense to the dissertation committee. Doctoral oral examinations are open to all regular members of the graduate faculty as observers. Further, oral presentations are open to the public until questioning by the dissertation committee begins.

**Doctor of Philosophy in Engineering and Applied Science**

A doctoral program in Engineering and Applied Science, administered through the College of Science and Engineering, is available to Physics students. The complete program description is provided elsewhere in the College of Science & Engineering section of the Graduate Catalog.

**Master of Science Programs**

**Admission Requirements**

The student must apply to, and meet all criteria for, admission to the Graduate School. In addition to the general requirements of the Graduate School, the student must comply with departmental requirements.

A complete graduate application for classified status in the Idaho State University Physics Department consists of:

1. GRE aptitude scores;
2. An Idaho State University Graduate School Application form, fees, and official copies of transcripts;
3. Three letters of recommendation;
4. A resume or CV;
5. A brief statement of career goals.

Applicants must hold the degree of Bachelor of Science or Bachelor of Arts in Physics, or a closely related field. The student’s course of study will be determined by consultation with the chair and the student’s major advisor. In some circumstances, a placement examination will be given. Students will normally be required to complete as deficiencies any courses required for the B.S. in Physics at Idaho State University which they have not already taken. Continued enrollment in the program is contingent upon maintaining a 3.0 grade point average and upon making satisfactory progress toward the degree.

**Master of Science**

**Thesis Option**:

A satisfactory score on physics examination(s) may be required before admission to candidacy. A total of 30 credits are required for the Master of Science Degree.

Additional graduate level credits approved by the student's advisor, department chair and the Graduate School
A public presentation of the thesis is required, along with a satisfactory oral defense to the thesis committee consisting of two departmental members and one GFR.

**Master of Science**

**Non-Thesis Option:**
There are two mechanisms by which a student may attain a non-thesis M.S. degree. First, students in the Ph.D. program who do not pass the qualifying examination at the Ph.D. level after two attempts may complete a non-thesis M.S. degree. The required core courses for the non-thesis M.S. degree are the same as those for the Ph.D., i.e., those listed above. In addition, a non-thesis M.S. student must pass the qualifying examination at a level appropriate for the M.S., and he or she must complete an oral presentation and defense of a written proposal for research project to the student’s graduate committee.

Second, students in the Ph.D. program who have completed all required courses for the Ph.D. and have passed both their qualifying examination and their oral presentation and defense of a written proposal for research project are eligible for a non-thesis M.S. degree.

**Nuclear Engineering and Health Physics**

**Certificate Program in Applied Nuclear Energy**

**Admission Requirements**
The student must apply to, and meet, all criteria for admission to the Graduate School. GRE scores are not required if an earned grade point average of at least 3.0 or higher was achieved for all upper division credits taken at the undergraduate level, regardless of the institution at which the credits were earned.

Approved NE, NSEN, ENGR, ENVE or PHYS 55xx/66xx elective course.

**Master of Science in Nuclear Science and Engineering**

**Admission Requirements**
The student must apply to, and meet, all criteria for admission to the Graduate School and hold a BS degree in a physical science or engineering.

**General Requirements**
The basic program requirements are 32 credits: 24 credits of course work (of which 9 credits must be at the 6600-course level), 6 credits of thesis research, and 2 credits of seminar. Students who are prepared with a B.S. degree in nuclear engineering will have a different course schedule than those with B.S. degrees in other engineering fields or a physical science. Therefore, the student’s program will be determined in consultation with the student’s advisor and committee to meet his/her needs. An oral examination in defense of the thesis is required for the thesis option.

**Thesis Option in Engineering Master’s Programs**
All students entering with less than two years of industrial experience as determined by Engineering are required to complete six credits of thesis in their related field. Students who are planning to continue their education beyond the master level are strongly encouraged to choose this option. After the completion of the course work and the thesis, an oral defense of the thesis will be required. No more than six credits of Thesis (ENGR 6650 Thesis, 1-9 credits) will be allowed on the student’s final Program of Study.

**Non-Thesis Option in Engineering Master’s Programs**
All students entering with a minimum of two years industrial experience in the related area as determined by the School of Engineering are eligible to choose this option. In the non-thesis program students will be required to take an additional 3-credit course, to complete a 3-credit Special Project (ENGR 6660 Special Project, 1-9 credits) in the related field and submit a written report. After completion of the course work and the Special Project, students are required to take a two-hour oral exam on their Special Project and other courses in the MS program. No more than three credits of special Project will be allowed on the student’s final Program of Study.

**Master of Science in Health Physics**

**Admission Requirements**
For admission, the student must apply to, and meet all criteria for, admission to the Graduate School, including a baccalaureate degree in a physical or biological science or engineering.

**General Requirements**
The basic program requirements are 33 credits, of which 15 credits must be at the 6600-course level. Six of the eighteen required credits may be thesis. Students who are prepared with some education and experience in health physics will likely not need all of the elective health physics courses. Therefore, the student’s program will be determined in consultation with the student’s advisor and committee and can include electives to meet his/her needs. An oral examination in defense of the thesis is required for the thesis option. A non thesis option is also available.

**Doctor of Philosophy in Nuclear Science and Engineering**

**Admission Requirements**
All applicants must meet Idaho State University Graduate School admission requirements for doctoral programs. Additionally, applicants must have attained a master’s degree in engineering, physics, chemistry, geosciences, mathematics, or a closely related field. Applicants must submit a one-page (only) statement of research interests, a one-page (only) statement of career interests, a resume, and at least 2 letters of reference along with their applications. In some special cases, a student with exceptional undergraduate academic record and aptitude for research, but without an M.S. degree, may be directly admitted to the Ph.D. program with the approval of the Ph.D. program committee.

**General Requirements**
The doctoral degree requires completion of at least 84 credits consisting of 32 credits for the master’s degree, 18 credits of additional course work (at least 50% of the credits should be at 6600 level), 4 credits of graduate seminar and 32 credits of dissertation research. Six credits of core courses are required for each emphasis area. At least 9 of the 18 credits of course work must be in collateral
areas as designated by the student’s advisor. Additional dissertation research credits may be required by the student’s dissertation committee.

**Program of Study**

An advisor, a Graduate Faculty member from the student’s parent department, will be identified for each student upon entering the program. The advisor will guide the student in establishing his or her program of course work and laboratory study based upon the student’s background and research interest. The advisor has the responsibility of ensuring that the student has adequate knowledge to support research in his or her chosen area of interest.

At the end of the first year, the student will take an 8-hour written, comprehensive qualifying examination covering the relevant information addressed in a nuclear engineering B.S. curriculum (including nuclear physics, reactor physics, reactor engineering and nuclear fuel cycle.) A student taking the comprehensive qualifying exam needs to be prepared to take an oral examination conducted by the examination committee. The oral exam needs to focus primarily on material in the written exam that was not adequately answered. However, the examination committee, at its discretion, may excuse a student from taking the oral examination if the student excels in the written examination. The student will be allowed two attempts to pass the comprehensive examination, and the second attempt must be within one-half year after the first attempt. The student will be admitted to candidacy upon passing the comprehensive qualifiying examination.

A dissertation committee is formed with a minimum of 5 members consisting of a major professor, 2 members from the student's parent department, a member from other relevant department, and a Graduate Faculty Representative. The major advisor chairs the dissertation committee. Within six months of passing the comprehensive qualifying examination, the candidate, with guidance from the major advisor, will satisfactorily complete an oral presentation and defense of a proposal for dissertation research to the dissertation committee. The research and dissertation preparation must be conducted under the close supervision of the committee and must include at least one full year of work performed under Idaho State University graduate faculty. The candidate can submit the final dissertation anytime after six months from the date of acceptance of the research proposal.

Dissertation approval requires a public presentation of the dissertation and a satisfactory oral defense to the dissertation committee. Doctoral oral examinations are open to all regular members of the faculty as observers. Further, oral presentations are open to the public until questioning by the dissertation committee begins.

**Electrical Engineering**

**Master of Science in Measurement and Control Engineering**

Program Director: Ken Bosworth

**Admission Requirements**

The student must meet all criteria for admission and then apply to the Graduate School. In addition, official Graduate School record Examination (GRE) score reports are required for all applicants, with a score equal or above the upper 65th percentile on the Quantitative Reasoning area being required for admission.

**General Requirements**

With the assistance of the Mechanical Engineering and/or Electrical Engineering faculty, the student shall select an initial advisor during the first semester of residence to help in planning a program of studies and research. The student must also complete a Plan of Study and form a complete advisory committee by the time six credits of course work have been completed.

30 credit hours are required to complete the M.S. degree (at least 50% of the credits should be at the 6600 level). Approximately half of the credits are engineering and technical electives, subject to the approval of the student’s advisory committee. The Thesis or Special Project should consist of study and research that complements the course work selected.

**Required Courses (30 credits)**

The following courses are required of every student receiving the master’s degree in Measurement and Control Engineering covered by the abbreviated list.

Total Hours 30

1 Students desiring to do the non-thesis option must have a minimum of two years industry experience. In place of the 6-credit thesis, the non-thesis option consists of a 3-credit Special Project in addition to a 3-credit course. At the completion of the Special Project, the student will be required to present an oral presentation/defense of the Project.

**Doctor of Philosophy in Engineering and Applied Science**

A doctoral program in Engineering and Applied Science, administered through the College of Science and Engineering, is available to Engineering students. The complete program description is provided elsewhere in the College of Science & Engineering section of the Graduate Catalog.

**Electrical Engr Courses**

**EE 5513 Techniques of Computer-Aided Circuit Analysis and Design:** 3 semester hours.

Automatic formulation of equations and fundamental programming techniques pertinent to computer-aided circuit analysis, design, modeling. May include sensitivity calculations, system analogies, optimization. PREREQ: EE 3340 and EE 3342.

**EE 5516 Applied Engineering Methods:** 3 semester hours.

Applied discrete and continuous probability, random variables, probability distributions, sampling, data description, parameter estimation, hypothesis testing, inference, correlation and linear and multiple regression. P

**EE 5517 Probabilistic Signals and Systems:** 3 semester hours.

EE 5518 Communication Systems: 3 semester hours.
Basic principles of analysis and design of modern analog and digital communication systems, including transmission and reception. PREREQ: EE 3329 and EE 3345.

EE 5525 Mechatronics: 3 semester hours.
Basic kinematics, sensors, actuators, measurements, electronics, microprocessors, programmable logic controllers, feedback control, robotics and intelligent manufacturing. Equivalent to ME 5525. PREREQ: MATH 3360, EE 3342, and EE 3340.

EE 5526 Computer Architecture and Organization: 3 semester hours.
Design, implementation, and performance evaluation of modern computer systems; instruction sets; datapath and control optimizations; single-cycle, multiple-cycle, and pipelined processors; hazard detection and resolution; memory hierarchies; peripheral devices. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: EE 2274 and EE 2275 or equivalent.

EE 5527 Embedded Systems Engineering: 2 semester hours.
Integration of algorithms, software and hardware to design real-time and embedded systems for signal processing and control. PREREQ: CS 4475 or CS 5575. COREQ: EE 5527L.

EE 5527L Embedded Systems Engineering Laboratory: 1 semester hour.
Lab activities include the complete process of design and implementation of embedded signal processing and control systems through the integration of algorithms, software, and hardware. COREQ: EE 5527.

EE 5529 Advanced Electronics: 2 semester hours.
Introduction to operational amplifiers and their applications, current mirrors, active loads, differential amplifiers, feedback and stability, filters, oscillators, Schmitt triggers, power amplifiers and voltage regulators. COREQ: EE 5529L. PREREQ: EE 3329 and EE 3345.

EE 5529L Advanced Electronics Laboratory: 1 semester hour.
Laboratory course emphasizing transistor biasing, amplifiers and other basic analog circuit designs. COREQ: EE 5529.

EE 5532 Introduction to VLSI Design: 3 semester hours.
Photolithography, CMOS fabrication, MOSFET operation, CMOS passive elements, design rules and layout, CAD tools for IC design, invertors, static logic and transmission gates, dynamic logic. PREREQ: EE 3329.

EE 5533 Mixed Signal Design: 3 semester hours.
Analog IC design. Passive components, parasitic elements, component matching, IC layout techniques, amplifiers, current sources, comparators, op amps, noise, switched capacitor circuits. Includes lab work using design tools. PREREQ: EE 4432 or EE 5532.

EE 5572 Electrical Machines and Power: 3 semester hours.
Theory and application of electrical machinery and transformers. Power and energy relationships in power systems. Includes 1 credit lab component. COREQ: EE 5572L. PREREQ: EE 3340, EE 3342, and MATH 3360.

EE 5572L Electrical Machines and Power Laboratory: 1 semester hour.
Laboratory course emphasizing an experimental study of the fundamental physical phenomena and characteristics of transformers, induction motors, synchronous and direct current machines. COREQ: EE 5572.

EE 5573 Automatic Control Systems: 3 semester hours.
Study of continuous-time and control systems using both frequency-domain and state-space techniques; topics include design methodology, performance specifications, analysis and design techniques. PREREQ: EE 3345, ME 5505 or ME 4405.

EE 5574 Advanced Circuit Theory: 3 semester hours.
Methods of analog electrical circuit analysis and synthesis. Topics include signal flow graphs, multi-port networks, simulation techniques, and topological methods for formulation of network equations. PREREQ: EE 3340.

EE 5575 Digital Signal Processing: 3 semester hours.
Discrete, fast Fourier and Z-transforms, correlation, convolution, finite and infinite impulse response digital filter design, spectral analysis and adaptive digital filters. COREQ: EE 4484 or EE 5584. PREREQ: EE 3345.

EE 5576 Semiconductor Processing and Fabrication: 3 semester hours.
Silicon semiconductor processing and basic integrated circuit fabrication. Physics, chemistry, and technology in basic processing steps in production of integrated circuits. PREREQ: PHYS 2211, PHYS 2212, and MATH 1170 or equivalent.

EE 5578 Semiconductor Devices: 3 semester hours.
Operating principles of basic building blocks of modern silicon-based semiconductor devices to include p-n junctions, field effect transistors and bipolar junction transistors. PREREQ: PHYS 2212 or equivalent.

EE 5579 Advanced Semiconductor Devices: 3 semester hours.
Review of semiconductor band theory. Opto-electronics, quantum mechanics, hetero junctions, power and microwave semiconductor devices. PREREQ: EE 5578 or equivalent.

EE 5582 Principles of Power Electronics: 3 semester hours.
Introduction to steady state converter modeling and analysis. Principles of converter dynamics and control including controller design. COREQ: EE 5573. PREREQ: EE 3329.

EE 5584 Signal Processing Laboratory: 1 semester hour.
Design finite and infinite response digital filters in digital signal processing system applications. COREQ: EE 5573.

EE 5592 Digital Control Systems: 3 semester hours.
Design of advanced control algorithms topics include: observers and state estimation, linear quadratic regulator, frequency-domain techniques for robust control, and an introduction to multivariable and nonlinear control. PREREQ: EE 5573 or EE 4473.

EE 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

EE 6609 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

EE 8850 Doctoral Dissertation: 1-24 semester hours.

Health Physics Courses

HPHY 5511 Accelerator Health Physics: 3 semester hours.
Fundamentals of particle accelerator design and operation. Examination of the potential radiation environment associated with accelerators and health and safety issues of their operation. PREREQ: Senior standing in Health Physics or permission of instructor.
HPHY 5512 Environmental Health Physics: 3 semester hours.
State-of-the-art applied mathematical techniques for estimating the release, transport, and fate of contaminants in multimedia environmental pathways (air, groundwater, terrestrial). Both radiological and non-radiological contaminants will be addressed, with emphasis on radiological contaminants. PREREQ: Permission of instructor.

HPHY 5513 Fundamentals of Industrial Hygiene: 3 semester hours.
Overview on the recognition, evaluation, and control of hazards arising from physical agents in the occupational environment. The exposure consequences associated with agents of major occupational health concerns are considered. PREREQ: Permission of instructor.

HPHY 5516 Introduction to Nuclear Measurements: 3 semester hours.
Lecture/laboratory course emphasizing practical measurement techniques in nuclear physics. PREREQ: CHEM 1112 and PHYS 1111 and PHYS 1113 or PHYS 2211 and PHYS 2213 or equivalent or permission of instructor.

HPHY 5516L Radiation Detect/Measure Lab: 0 semester hours.
Laboratory course emphasizing practical measurement techniques in nuclear physics.

HPHY 5517 Industrial and Aerosol Physics: 3 semester hours.
This course focuses on two distinct subject areas: an elaboration on the details of the ACGIH method of local exhaust-system design, and a study of applied aerosol physics based upon trajectory analysis. PREREQ: Permission of instructor.

HPHY 5518 Non-ionizing Radiation Protection: 3 semester hours.
Occupational safety and health issues of human exposure to non-ionizing radiation. Topics include health concerns and safety strategies developed for extremely low frequency, microwave, radio-frequency, ultraviolet, infrared, laser radiation, and soundwaves. PREREQ: Permission of instructor.

HPHY 5519 Radiological Emergency Planning: 3 semester hours.
Radiological emergency planning for facilities ranging from reactors and other major nuclear facilities to transportation accidents and smaller-scale nuclear accidents. Topics include planning, coordination, "exercises," exposure pathways, modeling, measurement, control, decontamination, and recovery. PREREQ: Permission of instructor.

HPHY 5520 Reactor Health Physics: 3 semester hours.
Introduction to reactor physics; nuances peculiar to reactor health physics; reactor designs. Critiques of exposure pathways accidents, decommissioning, contamination control, and emergency planning examine radiation safety approaches within the nuclear fuel cycle. PREREQ: Permission of instructor.

HPHY 5531 Radiation Physics I: 3 semester hours.
Atomic and nuclear structure, series and differential-equation descriptions of radioactive decay, physical theory of the interaction of radiation with matter suitable for the discipline of Health Physics. PREREQ: Permission of instructor.

HPHY 5532 Radiation Physics II: 3 semester hours.
Continuation of HPHY 5531 considering dosimetric quantities/units, theory and technology of radiation detection and measurement, and radiobiology important to an advanced understanding of radiation protection. PREREQ: HPHY 5531 or permission of instructor.

HPHY 5533 External Dosimetry: 3 semester hours.
A lecture course emphasizing external radiation protection including study of point kernel techniques, monte carlo modeling, and NCRP-49 methods. Also discussed are external dosimetry measurement techniques. PREREQ: HPHY 5532 or permission of instructor.

HPHY 5534 Internal Dosimetry: 3 semester hours.
A lecture course emphasizing internal radiation protection including studies of ICRP-2, ICRP-26&30, ICRP-60&66, and MIRD methods of internal dosimetry. PREREQ: HPHY 5533 or permission of instructor.

HPHY 5555 Topics in Health Physics I: 2 semester hours.
A lecture/seminar course covering special topics in Health Physics such as state and federal regulations, waste disposal methodology, and emergency procedures. PREREQ: HPHY 5532 or permission of instructor.

HPHY 5556 Topics in Health Physics II: 2 semester hours.
A continuation of HPHY 5555. A lecture/seminar course covering special topics in Health Physics such as state and federal regulations, waste disposal methodology, and emergency procedures. PREREQ: HPHY 5532 or permission of instructor.

HPHY 5588 Advanced Radiobiology: 3 semester hours.
An advanced-level course covering aspects of molecular radiobiology, teratogenesis, oncogenesis, and acute radiation illnesses. It also covers nonstochastic radiation effects and the epidemiology of radiation exposures. Equivalent to BIOL 5588. PREREQ: Permission of instructor.

HPHY 5590 ABHP Review: 3 semester hours.
A course for practicing professionals aimed at the development and improvement of skills. May be graded S/U. PREREQ: Permission of the instructor.

HPHY 5599 Experimental Course: 1-6 semester hours.
This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times with the same title and content.

HPHY 6605 Radiological Environmental Monitoring and Surveillance: 3 semester hours.
Advanced considerations in the design of monitoring programs. Sampling and analytical measurement programs for specific radionuclides and sources with emphasis in quality assurance.

HPHY 6610 Radiation Regulations: 3 semester hours.
Covers regulation of ionizing and non-ionizing radiation. Historical, biological, and legal foundations; federal regulations; state regulations; nuclear fuel cycle; emergency response; academic and medical facilities; transportation; accelerators; NORM/NARM; non-ionizing radiation. PREREQ: Permission of instructor.

HPHY 6650 Thesis: 1-12 semester hours.
Thesis. 1-12 credits. May be repeated. Graded S/U.

HPHY 6659 Experimental Course: 1-6 semester hours.
This course is not described in the catalog. The course title and number of credits are announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times with the same title and content.

HPHY 8850 Doctoral Dissertation: 1-12 semester hours.
Research toward and completion of the dissertation. 1-12 credits. May be repeated. Graded S/U.

Measurement/Control Engr Courses

MCE 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

MCE 6640 System Modeling Identification and Simulation: 3 semester hours.
Model development, off-line and on-line identification methods for engineering systems, diagnostic tests and model validation and analog and digital simulation methods. PREREQ: ME/EE 5573 or equivalent.

MCE 6642 Advanced Control Systems: 3 semester hours.
State space analysis and design to include stability, controllability, observability, realizations, state feedback and estimation. PREREQ: ME 5573/EE 5573 or ME 4473/EE 4473.
MCE 6643 Advanced Measurement Methods: 3 semester hours.
Instrumentation systems used in detection and signal conditioning of thermal-hydraulic process variables, radiation including lasers, and electrical and mechanical properties of materials. PREREQ: ME 5505 or ME 4405.

MCE 6644 Measurements and Controls Laboratory: 3 semester hours.
Work with measuring systems for a variety of process variables. Investigation of characteristics of various process control components and systems. Transient and stationary conditions will be included. PREREQ: MCE 6642 and MCE 6643.

MCE 6645 Advanced Control Theory and Applications: 3 semester hours.
Topics selected from advanced control theory and applications, depending upon the interest of students and faculty. May be repeated for credit when topics vary. PREREQ: MCE 6642 or permission of instructor.

MCE 6646 Intelligent Control Systems: 3 semester hours.
Analysis and design of systems using intelligent techniques such as neural networks, fuzzy logic, genetic algorithms, and artificial intelligence. PREREQ: Permission of instructor.

MCE 6647 Nonlinear Control Systems: 3 semester hours.
Phase plane analysis. Lyapunov stability. Describing functions. Singular perturbation and feedback linearization. PREREQ: MCE 6642 or permission of instructor.

MCE 6649 Robotics and Automation: 3 semester hours.
Robotic manipulator kinematics, dynamics, trajectory planning, sensors, programming and control. The application concepts of robotics in industry will be briefly introduced. PREREQ: MCE 6642.

MCE 6650 Thesis: 1-9 semester hours.
Thesis research must be approved by the student's advisory committee. Six credits may be used to satisfy the research requirements for the degree. Graded S/U.

MCE 6652 Special Problems: 1-3 semester hours.
Special experimental, computational, or theoretical investigation leading to development of proficiency in some area of engineering. Formal report required. PREREQ: PRIO Project Approval Required by an Engineering Faculty. May be graded S/U. May be repeated.

MCE 6653 Optimal Control Systems: 3 semester hours.

MCE 6654 Adaptive Control Systems: 3 semester hours.

MCE 6656 Robust Control Systems: 3 semester hours.
Analyze and design basic robust controllers using methods for robustness investigation such as mu-analysis and H infinity control algorithms. PREREQ: MCE 6642 or permission of instructor.

MCE 6660 Special Project: 1-9 semester hours.
A significant project, involving engineering applications, toward the completion of M.S. program with non-thesis option. Includes a report and oral examination. Graded S/U. May be repeated.

MCE 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

MCE 8850 Doctoral Dissertation: 1-24 semester hours.

Nuclear Engr Courses

NE 5519 Energy Systems and Nuclear Power: 3 semester hours.
Fundamentals of conventional and renewable energy systems. Energy sources, distribution, use and environmental effects. Nuclear power plant "balance of plant" design. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: ME 3307 and MATH 3360 or instructor permission.

NE 5521 Mathematical Methods in Nuclear Engineering: 3 semester hours.
First and second order ordinary differential equations (ODEs), generalization to systems of ODEs, Laplace transforms, series solutions to second order ODEs, special functions and Sturm-Liouville systems; partial differential equations by separation of variables. Examples will emphasize practical problems of interest to nuclear engineers. PHYS 6602 may be substituted for this course. PREREQ: MATH 3360.

NE 5543 Thermal Fluids Laboratory: 1 semester hour.
Measurement of thermal and fluid properties, experiments on fluid flow and heat transfer systems. Equivalent to ME 5543. PREREQ: ME 3341 and NE 5576 or NE 4476.

NE 5545 Reactor Physics: 3 semester hours.
Neutron balance equations in reacting systems, diffusion and diffusion-perturbation theory, introductory reactor kinetics, the multi-group energy approach, neutron slowing down and thermalization, introductory concepts in reactor systems. PREREQ: NE 3302 or NSEN 6685, and NE 5521 or equivalent.

NE 5546 Nuclear Fuel Cycle Systems: 3 semester hours.
Uranium mining, milling, conversion; enrichment technology including cascade analysis; fuel fabrication, criticality safety in the nuclear fuel cycle, introduction to ORIGEN and Monte-Carlo methods and codes, reactor fuel management, waste management (LLW, HLW, TRU waste). PREREQ: NE 3302 or NSEN 6684 or equivalent.

NE 5548 Design Control and Use of Radiation Systems: 3 semester hours.
Generation detection and measurement systems design for control and use of neutrons and gamma rays in industrial and medical applications. Radiation protection, regulations, environmental and economic considerations. COREQ: ENGR 5545.

NE 5551 Nuclear Seminar: 1 semester hour.
Current topics in nuclear science and engineering. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: Graduate student status in NSEN or HPHY program.

NE 5558 Monte Carlo Methods and Applications: 3 semester hours.
Basics of the application of stochastic methods to calculate the transport of neutrons, photons, and other sub-atomic particles. Includes introduction to the MCNP code, and sample application problems in both nuclear reactor design and in applications such as radiation beams used for cancer therapy.

NE 5576 Heat Transfer: 3 semester hours.

NE 5578 Reliability and Risk Assessment: 3 semester hours.
Methods of evaluating process and equipment reliability. Probabilistic methods applied to analysis and design. Setting probabilistic design objectives and calculating probabilistic performance. Specific, evaluated graduate-level activities and/or performances are identified in the course syllabus. PREREQ: MATH 3360 and EE 4416 or permission of instructor.
NE 5587 Medical Applications in Engineering and Physics: 3 semester hours.
Applications of engineering and physics, principles, particularly nuclear science, to medicine. Covers radioisotopes, x-ray imaging, magnetic resonance and ultrasound imaging, radiation protection, codes and standards. PREREQ: MATH 3360 and PHYS 2212.

NE 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

NE 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

NE 8850 Doctoral Dissertation: 1-24 semester hours.

Nuclear Sci and Engr Courses

NSEN 5599 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

NSEN 6601 Nuclear Engineering Experiments: 3 semester hours.
Experimental verification of theoretical models will be stressed. Kinetic behavior, neutron spatial distribution, perturbation, and other characteristic equations will be investigated. PREREQ: NE 5545, NE 4445, or equivalent.

NSEN 6603 Thermal Hydraulics: 3 semester hours.
Advanced studies of both fluid flow and heat transfer in nuclear reactor cores. Conservation equations constitutive relations formulation and solution approaches for complete equation set. PREREQ: ME 3341 and ME/NE 5576 or ME 4476.

NSEN 6604 Dynamic Behavior of Nuclear Systems: 3 semester hours.
Kinetic behavior of nuclear reactors including feedback effects of power transients, fuel burn up, coolant perturbations, etc. Mathematical models developed to predict both short and long term behavior. PREREQ: NE 4445 or NE 5545.

NSEN 6605 Nuclear Reactor Design: 3 semester hours.
Detailed treatment of current, advanced nuclear power reactor designs. Emphasis on the inherent and engineered safety features and on advantages and disadvantages of each design. PREREQ: NE 5545 or NE 4445.

NSEN 6608 Radiation Transport: 3 semester hours.
Advanced treatment of radiation transport and shielding concepts; interaction and attenuation of neutral particles, including photons. Use of deterministic and Monte Carlo computer codes. PREREQ: NE 5521 or NE 4421.

NSEN 6609 Radiation Detection Measurement and Applications: 3 semester hours.
Advanced treatment of radiation detectors, measurement techniques, data acquisition, and signal processing. Emphasis on applications in science, industry, and medicine. PREREQ: NE 5545, NE 4445 or NSEN 6608.

NSEN 6615 Introduction to Practical Nuclear Engineering: 3 semester hours.

NSEN 6616 Special Applications of Nuclear Energy: 3 semester hours.
Isotopic power systems for remote applications, nuclear propulsion for space vehicles, process heat and space heat reactors, maritime nuclear power plants, medical and industrial applications of nuclear radiation. PREREQ: Acceptance in Certificate Program in Applied Nuclear Energy.

NSEN 6617 Applications of Nuclear Energy: 3 semester hours.
Continued study of nuclear power plant design, operation, and safety analysis of present plants, proposed future concepts. Examination of biological effects of radiation and nuclear medicine, food irradiation and waste heat applications. PREREQ: NSEN 6615 and acceptance in Certificate Program in Applied Nuclear Energy.

NSEN 6618 Radioactive Waste Management: 3 semester hours.
Overview of historical, legal, political and social aspects of radioactive waste management; radwaste across the nuclear fuel cycle; waste definition and classification, treatment and disposal; design and assessment of repositories and radionuclide migration. PREREQ: NSEN 6684 and NSEN 6685 or equivalent.

NSEN 6619 Materials Science of Radwaste: 3 semester hours.
Materials chemistry and fabrication of waste glasses, ceramics and cements; waste form development and characterization; waste form degradation; radionuclide release and migration. PREREQ: ENGR 3350 and NE 5546 or equivalent.

NSEN 6631 Computational Transport Theory: 3 semester hours.
Study of advanced theories used in the calculation of nuclear reactor parameters including such topics as the Boltzman transport equation with energy and space dependence multi-group, multi-region diffusion for reflected systems, perturbation theory, etc. Special emphasis will be given to the application of digital computers in nuclear reactor design problems. PREREQ: NSEN 6608.

NSEN 6651 Nuclear Engineering Seminar: 1 semester hour.
Current topics in nuclear engineering and health physics. Invited speakers will be used when possible. Student presentations required. May be taken a maximum of four times. Graded S/U. PREREQ: Permission of instructor.

NSEN 6678 Probabilistic Risk Assessment: 3 semester hours.
Probabilistic methods applied to analysis and design. Setting probabilistic design objectives and calculating probabilistic performance emphasized. PREREQ: NSEN 6605.

NSEN 6684 Nuclear Engineering Basics: 3 semester hours.
For BS physical science graduates with little or no nuclear background. Lecture, laboratory each semester. Nuclear science; reactor physics, kinetics and thermal hydraulics; nuclear fuel cycle. PREREQ: Permission of NE Department Chair.

NSEN 6685 Nuclear Engineering Basics: 3 semester hours.
For BS physical science graduates with little or no nuclear background. Lecture, laboratory each semester. Nuclear science; reactor physics, kinetics and thermal hydraulics; nuclear fuel cycle. PREREQ: Permission of NE Department Chair.

NSEN 6686 Modeling Experimentation and Validation: 3 semester hours.
Two-week summer course. Provides early career nuclear engineers with advanced studies in integrated modeling, experimentation, and validation. The course emphasis rotates yearly among thermal-hydraulics, reactor physics, fuels and materials, and simulations. PREREQ: Permission of the NE Department Chair.

NSEN 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

NSEN 8850 Doctoral Dissertation: 1-24 semester hours.
Physics Courses

**PHYS 5503 Advanced Modern Physics: 3 semester hours.**
Study of the elementary principles of quantum mechanics and an introduction to atomic, solid state and nuclear physics. Quantum mechanics will be used as much as possible. PREREQ: MATH 3360 and PHYS 3301.

**PHYS 5504 Advanced Modern Physics: 3 semester hours.**
Study of the elementary principles of quantum mechanics and an introduction to atomic, solid state and nuclear physics. Quantum mechanics will be used as much as possible. PREREQ: PHYS 5503.

**PHYS 5505 Advanced Laboratory: 2 semester hours.**
Experiments in radiation detection and measurement, nuclear spectroscopy including x-ray and gamma spectroscopies, neutron activation and ion beam methods. Available to Geology, Engineering, Health Physics, and Physics majors. PREREQ: Permission of instructor.

**PHYS 5509 Introductory Nuclear Physics: 3 semester hours.**
A course in Nuclear Physics with emphasis upon structural models, radioactivity, nuclear reactions, fission and fusion. PREREQ: Knowledge of elementary quantum mechanics and differential equations or permission of instructor.

**PHYS 5510 Science in American Society: 2 semester hours.**
Observational basis of science; technology's historical influences on scientific developments; perceptions of science in contemporary America; tools/strategies for teaching science. Equivalent to GEOL 5510. PREREQ: Permission of instructor.

**PHYS 5514 Electronic Instrumentation and Measurement: 3 semester hours.**
Lecture course with laboratory requirements. Topics include: DC and AC electrical circuits, Analog pulses, Bipolar Transistors, Field Effect Transistors, Operational amplifiers. PREREQ: PHYS 2212, PHYS 2214, and MATH 3360.

**PHYS 5515 Statistical Physics: 3 semester hours.**
Topics covered may include kinetic theory, elementary statistical mechanics, random motion and the theory of noise. Choice of topics will depend upon the interest of the students and instructor. PREREQ: PHYS 2212 and MATH 3360.

**PHYS 5516 Radiation Detection and Measurement: 3 semester hours.**
Lecture/laboratory course emphasizing practical measurement techniques in nuclear physics. PREREQ: CHEM 1111, CHEM 1111L, CHEM 1112, CHEM 1112L, and either PHYS 1111 and PHYS 1113, or PHYS 2211 and PHYS 2213.

**PHYS 5516L Radiation Detect/Measure Lab: 0 semester hours.**

**PHYS 5521 Electricity and Magnetism I: 3 semester hours.**
Intermediate course in fundamental principles of electrical and magnetic theory. Free use will be made of vector analysis and differential equations. PREREQ: PHYS 2212 and MATH 3360.

**PHYS 5522 Electricity and Magnetism: 3 semester hours.**
Intermediate course in fundamental principles of electrical and magnetic theory. Free use will be made of vector analysis and differential equations. PREREQ: PHYS 5521.

**PHYS 5542 Solid State Physics: 3 semester hours.**
Introduction to the field of solid state physics emphasizing the fundamental concepts. Topics usually covered are crystal structure, X-ray diffraction, crystal binding energies, free electron theory of solids, energy bands. PREREQ: PHYS 3301, PHYS 5583, and MATH 3360 or permission of instructor.

**PHYS 5552 Intermediate Optics: 3 semester hours.**
Wave theory, e/m waves, production of light, measurement of light, reflection, refraction, interference, diffraction, polarization, optical systems, matrix methods, Jones vectors, Fourier optics, propagation of e/m waves in materials, atmospheric optics. COREQ: MATH 3360. PREREQ: PHYS 2212.

**PHYS 5553 Topics in Astrophysics: 2 semester hours.**
Application of physics to astronomy or cosmology. May include lab exercise. PREREQ: Permission of instructor.

**PHYS 5561 Introduction to Mathematical Physics I: 3 semester hours.**
Introduction to the mathematics most commonly used in physics with applications to, and practice in, solving physical problems; includes vector analysis, ordinary and partial differential equations. PREREQ: PHYS 2212 and MATH 3360.

**PHYS 5562 Introduction to Mathematical Physics: 3 semester hours.**
Introduction to the mathematics most commonly used in physics with applications to, and practice in, solving physical problems; includes vector analysis, ordinary and partial differential equations. PREREQ: PHYS 5561.

**PHYS 5583 Theoretical Mechanics: 4 semester hours.**
Detailed study of the motion of particles, satellites, rigid bodies and oscillating systems. Develop and apply Lagrangian and Hamiltonian methods. PREREQ: PHYS 2212 and MATH 3360.

**PHYS 5592 Colloquium in Physics: 1 semester hour.**
Faculty and student lectures in current research topics in physics. Open to upper division and graduate students in physics. May be repeated to a maximum of 4 credits.

**PHYS 5597 Professional Education Development Topics: 1-3 semester hours.**
A course for practicing professionals aimed at the development and improvement of skills. May not be applied to graduate degrees. May be repeated. May be graded S/U.

**PHYS 5598P Prof Development Workshop: 1-3 semester hours.**

**PHYS 5599 Experimental Course: 1-6 semester hours.**
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

**PHYS 6602 Theoretical Methods of Physics: 3 semester hours.**
Calculus of variations, Lagrangian and Hamiltonian formalisms of classical mechanics, some classical scattering theory, methods of solving PDEs, Green's functions, functions of complex variables, vector and tensor analysis, matrix, group and operator theory, and numerical methods integrated throughout each topic.

**PHYS 6603 Particle Physics: 3 semester hours.**
Basic constituents of the standard model, experimental methods, particle interactions: weak, gravitational, strong and electromagnetic, conservation laws, hadron structure and interactions, unification of interactions, physics beyond the standard model. PREREQ: PHYS 6624 or permission of instructor.

**PHYS 6609 Advanced Nuclear Physics: 3 semester hours.**
Nucleon-nucleon interaction, bulk nuclear structure, microscopic models of nuclear structure, collective models of nuclear structure, nuclear decays and reactions, electromagnetic interactions, weak interactions, strong interactions, nucleon structure, nuclear applications, current topics in nuclear physics. PREREQ: PHYS 6624 or permission of instructor.

**PHYS 6611 Electricity and Magnetism: 3 semester hours.**
Maxwell's equations and methods of solution, plane wave propagation and dispersion, wave guides, antennas and other simple radiating systems, relativistic kinematics and dynamics, classical interaction of charged particles with matter, classical radiation production mechanisms.
PHYS 6612 Advanced Electricity and Magnetism: 3 semester hours.
Advanced topics in application of Maxwell's equations to wave guides, antennas and other simple radiating systems. Particular emphasis upon the relativistic interaction of charged particles with matter, energy loss, and classical radiation production and absorption mechanisms. PREREQ: PHYS 6611 or permission of instructor.

PHYS 6615 Activation Analysis: 3 semester hours.
Theory and use of neutron activation methods for quantitative chemical analysis of natural and synthetic materials. Applications in geologic systems will be emphasized. PREREQ: Permission of instructor.

PHYS 6621 Classical Mechanics: 3 semester hours.
Lagrange equations, small vibrations; Hamilton's canonical equations; Hamilton's principal, least action; contact transformation; Hamilton-Jacobi equation, perturbation theory; nonlinear mechanics. PREREQ: PHYS 5583, PHYS 5561, and PHYS 5562, or permission of instructor.

PHYS 6624 Quantum Mechanics: 3 semester hours.
Schrödinger wave equation, stationary state solution; operators and matrices; perturbation theory, non-degenerate and degenerate cases; WKB approximation, non-harmonic oscillator, etc.; collision problems. Born approximation, method of partial waves. PREREQ: PHYS 5561, PHYS 5562, and PHYS 6621 or permission of instructor.

PHYS 6625 Quantum Mechanics: 3 semester hours.
Schrödinger wave equation, stationary state solution; operators and matrices; perturbation theory, non-degenerate and degenerate cases; WKB approximation, non-harmonic oscillator, etc.; collision problems. Born approximation, method of partial waves. PREREQ: PHYS 6624 or permission of instructor.

PHYS 6626 Advanced Quantum Mechanics: 3 semester hours.
Elementary quantum field theory and practical applications. Emphasis upon non-relativistic and relativistic quantum electrodynamics, radiative processes, bremsstrahlung, pair-production, scattering, photo-electric effect, emission and absorption. PREREQ: PHYS 6625 or permission of instructor.

PHYS 6630 Accelerator Physics: 3 semester hours.
The physics of direct voltage accelerators, betatrons, synchrotrons, linear induction acceleration; high current accelerators; electromagnetic particle optics, free electron lasers and synchrotron light sources. PREREQ: PHYS 6612, and PHYS 6624 or equivalent.

PHYS 6631 Accelerator Technology: 3 semester hours.
Topics will include high voltage and pulsed power techniques, wave guide and R.F. structures, ion and electron beam sources and beam measurements as applied to particle beam machines. PREREQ: PHYS 6612 or equivalent.

PHYS 6632 Particle Beam Laboratory: 1-4 semester hours.
Laboratory projects in particle beam and ion optics, radiation detectors, ion source operation, etc. May be repeated up to 4 credits. PREREQ: Permission of instructor.

PHYS 6640 Statistical Mechanics: 3 semester hours.
Statistical ensembles; the Maxwell-Boltzmann law; approach to equilibrium, quantum statistical mechanics; application of statistical mechanics to thermodynamic processes. PREREQ: PHYS 5515 and PHYS 6621.

PHYS 6641 Field Theory Particles and Cosmology I: 3 semester hours.
Topics may include Dirac theory, group theory, Feynman diagrams, superstrings, supergravity, relativity and cosmology. PREREQ: Permission of instructor.

PHYS 6642 Field Theory Particles and Cosmology II: 3 semester hours.
A continuation of PHYS 6641. Topics may include Dirac theory, group theory, Feynman diagrams, superstrings, super gravity, relativity and cosmology. PREREQ: Permission of instructor.

PHYS 6643 Advanced Solid State Physics: 3 semester hours.
Electron many-body problem, crystal and reciprocal lattice, Bloch functions, pseudo potentials, semi-conductors, transition metals, crystal momentum and coordinate representations, electric and magnetic fields, impurities and defects in crystals and semi-conductors, radiation effects on solids, lattice vibrations, electron transport. PREREQ: PHYS 6624 or permission of instructor.

PHYS 6648 Special Topics in Physics: 1-3 semester hours.
Survey, seminar, or project (usually at an advanced level) in one area of physics. Content varies depending upon the desires of the students and faculty. May be repeated until 6 credits are earned. PREREQ: Permission of instructor.

PHYS 6649 Graduate Seminar: 1 semester hour.
Advanced seminar topics in currently-active areas of applied physics. Students will be required to provide presentations and may be required to submit a paper. Four credits required. May be repeated.

PHYS 6650 Thesis: 1-10 semester hours.
Thesis. May be repeated. Graded S/U.

PHYS 6699 Experimental Course: 1-6 semester hours.
This is an experimental course. The course title and number of credits are noted by course section and announced in the class schedule by the scheduling department. Experimental courses may be offered no more than three times. May be repeated.

PHYS 8850 Doctoral Dissertation: 1-12 semester hours.
Research toward and completion of the dissertation. Variable credits. May be repeated. Graded S/U.
**Graduate Faculty**

**Idaho State University Graduate Faculty Roster**

(NOTE: The date in parentheses is the date of first appointment at Idaho State University. Adjunct, Affiliate and Emeritus Faculty are listed in the Undergraduate Catalog.)

The Idaho State University Graduate Faculty list changes throughout the year. Please check the Department's website and/or the Graduate School's website for the most current list.

**College of Arts & Letters**

**Anthropology**

**Speer, Charles A.**, Assistant Professor, Anthropology. B.A., 2003, University of Texas at San Antonio; M.A., 2006, University of Texas at San Antonio; Ph.D., 2013, University of Texas at San Antonio. (2015)

**Stull, Kyra E.**, Assistant Professor, Anthropology. B.A., 2006, University of Tennessee; M.S., 2008, Mercyhurst University; Ph.D., 2014 University of Pretoria, South Africa. (2014)

**Trawick, Paul B.**, Associate Professor & Chair, Anthropology; B.S. University of Oregon; M.A., University of Texas, Austin; Ph.D., Yale University 1994. (2012)

**Art**

**Ferber, Andrea L.**, Assistant Professor. B.F.A. 2002, Milwaukee Institute of Art & Design; M.A., 2006, University of Illinois at Urbana-Champaign; Ph.D., 2014, University of Illinois at Urbana-Champaign. (2014)

**Communication, Media, & Persuasion**

**English**

**Berger, Jacob F.**, Assistant Professor of Philosophy, English and Philosophy. B.A. 2005, Swarthmore College; Ph.D. 2013, The Graduate Center, City University of New York. (2014)

Hellwig, Harold H., Associate Professor of English, English and Philosophy. B.A., 1972, State University of New York, Buffalo; M.A., 1976, California State University, Fullerton; Ph.D., 1985, University of California, Los Angeles. (1987)

Johnson, Margaret E., Professor of English, English and Philosophy; Faculty Affairs Coordinator, Academic Affairs. B.S. 1986, University of California, Berkeley; M.A. 1990, San Jose State University; Ph.D. 1998, University of Oregon. (1999)

Wahl, Russell E., Professor of Philosophy, Director of Philosophy, and Vice-Chair, English and Philosophy. B.A. 1974, Colby College; M.A. 1977, Ph.D. 1982, Indiana University. (1985)

Zink, Amanda J., Assistant Professor of English, English and Philosophy. B.A. 2000, Olivet Nazarene University; M.A. 2005, University of Massachusetts; Ph.D. 2013, University of Illinois, Urbana-Champaign. (2013)

Global Studies and Languages

Park, Pamela, Professor, Languages and Literatures. B.A., 1972, Fordham University; Licence Lettres És Modernes, 1974, Université de Nancy; Ph.D., 1979, City University of New York. (1985)

Tarp, H. Cathleen, Associate Professor, Spanish. B.A., 1992, University of Idaho; M.A., 1996, University of New Mexico; Ph.D., 1999, University of New Mexico. (2001)

History

Stover, Justin Dolan, Assistant Professor, History. B.S., 2003, Central Michigan University; M.A., 2005, National University of Ireland; Ph.D., Trinity College Dublin. (2012)

Performing Arts - Music, Theatre, Dance

Dienstfrey-Swanson, Sherri R., Professor, Theatre and Dance. B.S. 1977, University of Nebraska at Lincoln; M.A. 1980, North Dakota State University; Ph.D. 1986, Kent State University. (1987)

Political Science

Gabardi, Wayne, Professor, Political Science; Department Chair. B.A., 1977, Stockton State College; M.A., 1981; Ph.D., 1986, University of California, Santa Barbara. (1990)

Hummel, Daniel, Assistant Professor, Political Science. B.A., 2004, Pennsylvania State University (State College); M.P.A., 2009, University of Nebraska at Omaha; Ph.D., 2013, Florida Atlantic University. (2013)

Kirkpatrick, Kellee J., Assistant Professor, Political Science. B.A., 2003, Kansas State University; M.S., 2006, University of Kansas; M.A., 2009, University of Kansas; Ph.D., 2012, University of Kansas. (2014)

Stoutenborough, James W., Political Science. B.S., 2003, Kansas State University; M.A., 2005, University of Kansas; Ph.D., 2010, University of Kansas. (2016)

Psychology

Aubuchon-Endsley, Nicki L., Assistant Professor and Clinic Director, Psychology. B.S., 2006, University of Denver; M.S., 2007, Oklahoma State University; Ph.D., 2012, Oklahoma State University. (2014)

Brumley, Michele R., Associate Professor, Psychology. B.A., 1999, DePaul University; Ph.D., 2005, University of Iowa. (2007)

Hatzenbuehler, Linda C., Professor, Psychology; Interim Vice President, Health Education. B.A., 1969, John Carroll University; M.A., 1971; Ph.D., 1977, Kent State University. (1976)

Heyneman, Nicholas E., At-Large Graduate Faculty, Psychology. B.A., 1980, University of California, San Diego; M.S., 1982; Ph.D., 1985, West Virginia University.

McCarrey, Anna, Assistant Professor, Psychology. M.A., 2007, University of Aberdeen, UK; Ph.D., 2012, University of New South Wales, Australia. (2016)

Rieske, Robert D., Assistant Professor, Psychology. B.S., 2008, Utah Valley University; M.A., 2012, Louisiana State University; Ph.D., 2015, Louisiana State University. (2015)

Stamm, Beth Hudnall, At-Large Graduate Faculty, Psychology. B.S., 1986; M.A., 1989, Appalachian State University; Ph.D., 1993, University of Wyoming.

Swift, Joshua K., Assistant Professor, Psychology. B.S., 2005, Brigham Young University; M.S., 2007, Oklahoma State University; Ph.D., 2010, Oklahoma State University (2015)

Walters, Amy, Licensed Psychologist, Psychology. B.S., 1991, University of Idaho; M.S., 1994, Utah State University; Ph.D., 1996, Utah State University. (Allied)

Xu, Xiaomeng, Assistant Professor, Psychology. B.S., 2005, New York University; M.A., 2007, Stony Brook University; Ph.D., 2011, Stony Brook University. (2012)

Sociology

Burnham, Morey, Research Assistant Professor, Sociology. B.A., 2003, University of Connecticut; M.S., 2008, Antioch University; Ph.D., 2014 Utah State University. (2016)

Caputo-Levine, Deirdre, Assistant Professor, Sociology. B.S., 1999, State University of New York at Stony Brook; M.A., 2008, State University of New York at Stony Brook; Ph.D., 2015 State University of New York at Stony Brook. (2016)

Hearn, Gesine K., Assistant Professor, Sociology. R.N., 1986, School of Nursing, Chirurgische Klinik an der Universität Erlangen-Nürnberg, Germany; M.A., 1993, Universität Tübingen, Germany; Ph.D., 2006, Universität Erlangen-Nürnberg, Philosophische Fakultät, Germany. (2003)

Hoskin, Anthony, Associate Professor, Sociology, Ph.D., 1999, State University of New York at Albany; B.S., 1993, University of Utah (2015)

College of Business

Benson, C. Scott, Jr., Professor, Economics. A.B., 1972, University of California, Berkeley; M.A., 1979; Ph.D., 1988, University of California, Davis. (1986)

Byers, Steven S., Professor, Finance; Department Chair. B.A., 1982; MBA, 1989, Indiana University; Ph.D., 1996, Texas A&M University. (1996)

Krumwiede, Dennis, Professor, Management. B.S., 1977, University of Nebraska, Lincoln; M.S., 1989, University of Colorado; Ph.D., 1997, Kansas State University. (2000)

Murphy, Gregory B., Professor, Management. B.A., 1985, Weber State University; M.S., 1989, University of Central Texas; Ph.D., 1996, University of Houston. (2008)

Ottaway, Thomas A., Professor, Informatics; Dean. B.S., 1990, Wichita State University; M.S., 1993; Ph.D., 1995, Texas Tech University. (2001)

Parker, Kevin R., Professor, Informatics; Department Chair. B.A., 1982, University of Texas, Austin; M.S., 1991; Ph.D., 1995, Texas Tech University. (1999)

Peterson, Teri S., At-Large, Assistant Professor, College of Business, Division of Health Sciences, B.A., 1977, University of California at Los Angeles; M.S., 1980, San Diego State University, M.S., 1989, Utah State University; Ed.D., 2013, Idaho State University. (1992)

Schou, Corey D., Professor, Computer Information Systems. B.S., 1968, Rollins College; M.S., 1970; Ph.D., 1972, Florida State University. (1985)

Street, Jeffrey N., Associate Professor, Management. B.S., 1982, East Tennessee State University; MBA, 1990, University of Tennessee; Ph.D., 2007, University of Georgia. (2007)

Stegner, Tesa, Professor, Economics. B.S., 1983, Valparaiso University; Ph.D., 1989, Washington State University. (1992)

Tolke, Joanne, Professor, Management. B.S., 1981, University of Wisconsin; M.S., 1983; University of Minnesota; Ph.D., 1988, Iowa State University. (1988)

College of Education

Bennett, Cory A., Associate Professor, Teaching and Educational Studies. B.A., 2005, Western Washington University; M.Ed., 2008, University of Hawaii at Manoa; Ph.D., 2010, University of Hawaii at Manoa.

Braun, Timothy M., Assistant Professor, Athletic Training. B.S., 2007, Endicott College; M.S., 2008, East Stroudsburg University; Ph.D., 2015, Rocky Mountain University of Health Professions. (2014)

Crooks, Steven M., Professor, Organizational Learning and Performance. B.A., 1986, Brigham Young University; M.H.A., 1988, Brigham Young University; Ph.D., 1995, Arizona State University. (2014)

Denner, Peter R., Professor, School Psychology and Educational Leadership; Associate Dean, College of Education. B.A., 1973, University of New Hampshire; M.S., 1975; Ph.D., 1981, Purdue University. (1982)

Finch, Daryl, Sport Science. R. B.S., 2007, Point Luma Nazarene University; M.S. 2011, San Jose State University; (2011) (Allied)

Frantz, Alan C., Professor, School Psychology and Educational Leadership; B.S., 1980, Idaho State University; M.A.T., 1984, Indiana University; Ph.D., 1994, University of Denver. (1987)

Hansmann, Paul, Assistant Professor, School Psychology and Educational Leadership. B.S., 2008, University of Montana; M.S., 2010, Oklahoma State University; Ph.D., 2013, Oklahoma State University. (2014) (Allied)

Lester, Michael J., Professor, Sport Science and Physical Education. B.S., 1976, Lewis-Clark State College; M.S., 1978, University of Arizona; Ed.D., 1985, Oklahoma State University. (1990)

Lin, Shu-Yuan, Clinical Assistant Professor, Teaching and Educational Studies. B.A., 1985, Chunghsing University, Taiwan; M.Ed., 1993, University of Houston; Ed.D., 2003, Idaho State University.(2003)

Lion, Robert, W., Assistant Professor, Organizational Learning and Performance. B.A., 2000, Graceland University; M.S., 2002, Drake University; Ph.D., 2010, Capella University. (2012)

Meyers, Michael C., Associate Professor, Sport Science and Physical Education. B.S., 1980, Oklahoma State University; M.S., 1986, Texas A&M University; Ph.D., 1990, Texas A&M University. (2013)

Payne, Brandon, Sport Science. B.S., 2007, Central Michigan University; M.S., 2008, Utah State University; (2011) (Allied)

Ray, Beverly, Professor, Teaching and Educational Studies. B.S., 1984, University of Texas, Austin; M.A., 1989; Ph.D., 2000, University of Alabama. (2001)

Schou, Sue B., At-Large Graduate Faculty, School Psychology and Educational Leadership. B.S., 1971; M.S., 1974 Florida State University; Ph.D., 2007, Idaho State University.

Scott, Karen Wilson, Professor, Organizational Learning and Performance, Department Chair. B.A., 1974, Linfield College; M.Ed., 1999; Ph.D., 2002, University of Idaho. (2005)

Storie, Gary L., Assistant Professor, School Administration. B.S., 1975, Ball State University; M.S., 1983, Indiana University; Ed.D., 2011, Ball State University. (2012)

Thorpe, Justin N., Assistant Professor, Teaching and Educational Studies. B.S., 2007, Utah State University; Ph.D., 2013, Michigan State University. (2014)

College of Science & Engineering

Biological Sciences

Aho, Ken, Assistant Professor, Biological Sciences. B.S., 1995, Idaho State University; Ph.D., 2006, Montana State University; M.S., 2007, Montana State University. (2011)

Austin, Mark C., Professor, Biological Sciences. B.S., 1981, Pennsylvania State University; Ph.D., 1988, Washington State University. (2012)

Bearden, Shawn, Professor, Biological Sciences. B.S., 1994, University of Virginia; M.S., 1996, George Mason University; Ph.D., 2000, Florida State University. (2004)

Beckmann, Jon, At-Large Graduate Faculty, Biological Sciences. B.S., 1996, Kansas State University; Ph.D., 2002, University of Nevada, Reno. (2005)

Berger, Joel, At-Large Graduate Faculty, Biological Sciences. B.A., 1974; M.S., 1975, California State University, Northridge; Ph.D., 1978, University of Colorado, Boulder. (2005)

Bowyer, Terry, Professor, Biological Sciences. B.S., 1970, Humboldt State University; M.S., 1976, Humboldt State University; Ph.D., 1985, University of Michigan. (2004)

Bunde, Carolyn J. W., At-Large Graduate Faculty, Biological Sciences. B.S., 1980, California State University, Stanislaus; B.S., 1983; Ph.D., 1987, Idaho State University.

Castro, Antonio J., Assistant Research Professor, Biology. B.S., 2004, University of Granada (Spain); M.S.; 2007, Autonomous University of Madrid/University of Almeria (Spain); Ph.D., 2010, University of Almeria (Spain). (2015)

Connelly, John William, Jr., At-Large Graduate Faculty, Biological Sciences. B.S., 1974, University of Idaho; M.S., 1977; Ph.D., 1982, Washington State University.

Finney, Bruce P., Professor, Biological Sciences. B.S., 1979, University of Minnesota; Ph.D., 1987, Oregon State University. (2008)

Groome, James, Associate Professor, Biological Sciences. B.A., 1981, Wake Forest University; Ph.D., 1988, University of New Hampshire. (2003)

Hale, Rebecca L., Research Assistant Professor, Biological Sciences. B.A., 2005, Hampshire College; Ph.D., 2013, Arizona State University.

Hill, Jeffrey P., Associate Professor, Biological Sciences. B.S., 1982, State University of New York, Binghamton; M.S., 1984, University of California, Davis; Ph.D., 1989, University of California, Riverside. (1991)

Howard, Hope, At-Large Graduate Faculty, Biological Sciences. B.A., 1996, Hood College; Ph.D., 2002, Georgia Institute of Technology. (2005)

Johnson, LaMar J., At-Large Graduate Faculty, Biological Sciences. B.S., 1959, Utah State University; M.S., 1963, University of Kansas; Ph.D., 1969, Colorado State University.

Keener, William, At-Large Graduate Faculty, Biological Sciences. B.S., 1988, Texas A&M University; Ph.D., 1996, Oregon State University. (2001)

Larson, Danielle M., Post-Doctoral Research Associate, Biology. B.S., 2010, University of Idaho; Ph.D., 2014, Kansas State University. (Allied)

Lehman, R. Michael, At-Large Graduate Faculty, Biological Sciences. B.A., 1983, University of Colorado; M.S., 1991, University of Virginia; Ph.D., 2000, Idaho State University. (2001)

Lortzerman, Janet L., Associate Professor, Biological Sciences. B.S., 1992, Lehigh University; M.S., 1995, Virginia Commonwealth University; Ph.D., 2001, Idaho State University. (2008)

Magnuson, Timothy, Professor, Biological Sciences. B.S., 1987, University of Minnesota; Ph.D., 1996, University of Idaho. (2001)

Meldrum, D. Jeffrey, Professor, Biological Sciences. B.S., 1982; M.S., 1984, Brigham Young University; Ph.D. 1989, State University of New York, Stony Brook. (1993)

Peterson, Charles R., Professor, Biological Sciences. B.S., 1972; M.S., 1974, University of Illinois at Urbana-Champaign; Ph.D., 1982, Washington State University. (1988)

Pierce, Becky, At-Large Graduate Faculty, Biological Sciences. B.S., 1987, California Polytechnic State University; M.S., 1991, University of Nevada, Reno; Ph.D., 1999, University of Alaska, Fairbanks. (2005)

Pilarski, Jason Q., Assistant Professor, Biological Sciences and Dental Sciences. B.S., 1996, Indiana University, Bloomington; M.S., 2000, Indiana University, Bloomington; Ph.D., 2006, Northern Arizona University, Flagstaff. (2012)

Rodnick, Kenneth J., Professor, Biological Sciences. B.S., 1979, University of California, Davis; M.S., 1982; M.A., 1984, Oregon State University; Ph.D., 1989, Stanford University. (1993)

Rose, W. Jack, Professor, Biological Sciences. B.S., 1975; M.S., 1979, The Ohio State University; Ph.D., 1985, Oregon State University. (1987)

Sheridan, Peter, Professor, Biological Sciences. B.A., 1984; M.S., 1991, Rutgers University; Ph.D., 1996, University of Cincinnati. (2001)

Stephenson, Thomas, At-Large Graduate Faculty, Biological Sciences. B.S., 1986, Colorado State University; M.S., 1989, Virginia Polytechnic Institute and State University; Ph.D., 1995, University of Idaho. (2005)

Thomas, Michael, Professor, Biological Sciences; Department Chair. B.S., 1991, University of Nebraska, Lincoln; M.S., 1994, Kansas State University; Ph.D., 2000, Pennsylvania State University. (2003)

Williams, Charles F. (Rick), Associate Professor, Biological Sciences. B.S., 1979, University of Oklahoma; M.S., 1985, University of Miami; Ph.D., 1991, University of Wisconsin-Madison. (1999)

Winston, Vern D., Professor, Biological Sciences. B.S., 1970; Ph.D., 1976, University of Nebraska, Lincoln. (1980)
Chemistry

Castle, Lyle W., Professor, Chemistry; Dean, Academic Programs, Idaho Falls. B.S., 1985, Southern Utah State College; M.S., 1988, University of Nebraska; Ph.D., 1992, University of South Florida. (1994)

De Jesus, Karl, Professor, Chemistry. B.S., 1977, Texas Christian University; Ph.D., 1986, University of Wisconsin-Madison. (1994)

Holland, Andrew, Associate Professor, Chemistry. B.S., 1997, University of Washington, Seattle; Ph.D., 2002, University of California, Berkeley. (2005)

Holman, Robert, Professor, Chemistry. B.S., 1983, University of Wisconsin; Ph.D., 1988, University of Nebraska, Lincoln. (2004)

Kalivas, John H., Professor, Chemistry. B.S., 1978, California Polytechnic State University; Ph.D., 1982, University of Washington. (1985)

McGrath, Christopher A., Allied Graduate Faculty, Chemistry. B.S. Gannon University; Ph.D., 1996, University of Kentucky. (2015)(Allied)

Pak, Joshua, Professor, Chemistry. B.A., 1993, Whittier College; M.S., 1995, Duquesne University; Ph.D., 1999, University of Oregon. (2001)

Rodriguez, René, Professor, Chemistry. B.S., 1981, University of Colorado; M.S., 1984, University of Minnesota; Ph.D., 1987, University of Idaho. (1988)

Rosementreger, Jeffrey J., Professor, Chemistry. B.S., 1985, University of Montana; Ph.D., 1990, Colorado State University. (1991)

Computer Science

Edwards, John, Assistant Professor, Computer Science. B.S., 1998, Utah State University; M.S., 2004, Brigham Young University; Ph.D., 2013, University of Texas, Austin. (2016)

Engineering

Barlow, Fred D. III, At-Large Graduate Faculty, Professor, Electrical Engineering and Computer Science, B.S., 1990, Emory University; M.S., 1994, Virginia Polytechnic Institute; Ph.D., 1999, Virginia Polytechnic Institute.

Brey, Richard R., Professor, Nuclear Engineering and Health Physics; B.S., 1988; M.S., 1990; Ph.D., 1994, Purdue University. (1994)

Burgett, Eric A., Associate Professor, Nuclear Engineering and Health Physics. B.S., 2005, M.S., 2008; Ph.D., 2010 Georgia Institute of Technology. (2010)

Ebrahimpour, Arya, Professor, Civil and Environmental Engineering; Interim Department Chair. B.S., 1981; M.S., 1984; Ph.D., 1987, University of Idaho. (2000)

Ellis, Mikle, Associate Professor, Electrical Engineering. B. E., 1983, Brigham Young University; M.S., 1984, Rensselaer Polytechnic Institute; Ph.D., 1994, Virginia Polytechnic Institute and State University. (1999)

Elshabini, Aicha, At-Large Graduate Faculty, Professor, Electrical Engineering and Computer Science. B.S., 1973, Cairo University; M.S., 1975, University of Toledo; Ph.D., 1978, University of Colorado at Boulder.

Hill, Tony S., At-Large Affiliate Faculty, Nuclear Engineering. B.S. 1991, Abilene Christian University; M.S. 1993, Iowa State University; Ph.D. 1996, Iowa State University. (2010)

Hunter, Stevan G., Adjunct, Electrical Engineering. B.S., 1978, Brigham Young University; M.S., 1980, Idaho State University; Ph.D., Idaho State University. (2012)(Allied)

Jacobsen, Richard T., Professor, Nuclear Engineering and Health Physics, College of Science and Engineering. B.S., 1963, University of Idaho; M.S., 1965, University of Idaho; Ph.D., 1972, Washington State University. (2006)

Kirkman, Richard D., At-Large Graduate Faculty, Nuclear Engineering and Health Sciences. B.S., 2002 Idaho State University; M.S., 2006, University of Utah; Ph.D., 2010, University of Utah. (2014)

Larson, Howard A., At-Large Graduate Faculty, Nuclear Engineering. B.S., 1962, University of North Dakota; Ph.D., 1970, University of Washington.

Mahar, James W., At-Large Graduate Faculty, Civil and Environmental Engineering. B.S., 1967, Idaho State University; M.S., 1972, Colorado State University; Ph.D., 1977, University of Illinois. (2003)

Mousavinezhad, Seyed Hossein, Professor, Electrical Engineering and Computer Science; Department Chair. B.S., 1972, National Taiwan University; M.S., 1973, Michigan State University; Ph.D., 1977, Michigan State University. (2007)

Perez, Alba, Associate Professor, Mechanical Engineering. B.S., 1996, Polytechnic University of Catalonia, Spain; M.S., 1999; Ph.D., 2003, University of California, Irvine. (2004)

Pope, Chad L., Associate Professor, Nuclear Engineering. B.S., 1989, Idaho State University; M.S. 1993, Idaho State University; Ph.D., 2011, Idaho State University. (2013)

Rempe, Joy Lynn, At-Large Graduate Faculty, Nuclear Engineering and Health Physics. B.S., 1987, University of Missouri, Rolla; M.S., 1983, Massachusetts Institute of Technology; D.Eng., 1983, Massachusetts Institute of Technology. (2014)

Sato, Chikashi, Professor, Civil and Environmental Engineering. B.S., 1971, Fukushima National College of Technology; M.S., 1976, University of Kansas; Ph.D., 1981, University of Iowa. (1995)

Savage, Bruce M., Associate Professor, Civil and Environmental Engineering. B.S., 1992; M.S., 1997; Ph.D., 2002, Utah State University. (2006)

Schoen, Marco P., Professor, Mechanical Engineering; Department Chair. B.S., 1989, Swiss College of Engineering, Muttenz, Switzerland; M.E., 1993, Widener University; Ph.D., 1997, Old Dominion University. (2001)

Smith, Curtis L., At-Large, Adjunct Assoc. Faculty, Nuclear Engineering. B.S., 1988, Idaho State University; M.S., 1990, Idaho State University; Ph.D., 2003, Massachusetts Institute of Technology. (2009)

Sorensen, Andrew D., Assistant Professor, Civil and Environmental Engineering. B.S. 2002, University of Wyoming; Ph.D., University of Nebraska-Lincoln. (2011)

Stave, Sean C., Nuclear Engineering. B.S., 1999, University of Kentucky; Ph.D., 2006, Massachusetts Institute of Technology. (Allied)

Wahrek, Richard M., Associate Professor, Mechanical Engineering. B.S., 1971, Valparaiso University; M.S., 1976, University of Vermont; Ph.D., 1985, New Mexico State University. (1989)

Wen, Haiming, Research Assistant Professor, Nuclear Engineering. B.S., 2005, Sichuan University, China; M.S., 2008, Chinese Academy of Sciences; Ph.D., 2012, University of California - Davis. (2016)

Whicker, Jeffrey J., At-Large Faculty, Health Physics. B.S., 1984; M.S., 1988; Ph.D., 2005, Colorado State University. (2014)(Allied)

Williams, Brian G., Associate Professor, Mechanical Engineering. B.S., 1990, Brigham Young University; M.S., 1991; Ph.D., 1997 Utah State University. (2001)

Geosciences

Bottenberg, H. Carrie, Assistant Lecturer, Geosciences, Geography/German B.A., 1997, University of Montana; Geology. B.S., 2005, University of Montana; M.S., 2009, Missouri University of Science and Technology; Ph.D., 2012, Missouri University of Science and Technology. (2011) (Allied)

Crosby, Benjamin T., Associate Professor, Geosciences. B.A., 1999, University of California, Berkeley; Ph.D., 2006, Massachusetts Institute of Technology. (2006)

Delparte, Donna M., Assistant Professor, Geosciences, B.S., 1989, University of Regina; M.S., 1997, University of Calgary; Ph.D., 2008, University of Calgary. (2012)

Godsey, Sarah, Assistant Professor, Geosciences. B.A., 1999, University of Virginia; M.S., 2003, University of Cincinnati; Ph.D. 2009, University of California, Berkeley. (2012)

Kobs-Nawotniak, Shannon, Assistant Professor, Geosciences. B.S., 2003, Michigan Technological University; Ph.D., 2009, State University of New York at Buffalo. (2011)

Link, Paul Karl, Professor, Geosciences. B.S., 1976, Yale University; B.Sc., 1977, University of Adelaide; Ph.D., 1982, University of California, Santa Barbara. (1980)

McCurry, Michael O., Professor, Geosciences. B.A., 1974, University of Washington; Ph.D., 1985, University of California, Los Angeles. (1990)

Rittenour, Tammy, Associate Professor, Geosciences, B.A., 1996, University of Massachusetts, Morris; M.S., 1999, University of Massachusetts, Amherst; Ph.D., 2004, University of Nebraska, Lincoln (2004) (Allied)

Rodgers, David W., Professor, Geosciences; Associate Dean, Science and Engineering. B.A., 1981, Carleton College; Ph.D., 1987, Stanford University. (1985)

Shapley, Mark, At-large Graduate Faculty, Geosciences. B.S., 1979, University of Washington; M.S., 1985, University of Montana; Ph.D., 2005, University of Minnesota. (2008)

Shinneman, Douglas J., Supervisory Research Fire Ecologist, Geosciences. B.S., Michigan State University; M.A., University of Wyoming; Ph.D., 2006, University of Wyoming. (Allied)

Tapanila, Leif, Associate Professor, Geosciences. B.S., 1999, University of Waterloo, Canada; M.S., 2001, Laurentian University, Canada; Ph.D., 2005, University of Utah. (2005)

Wheaton, Joseph M., At-Large Graduate Faculty, Geosciences. B.S., 2002; M.S., 2003, University of California, Davis; Ph.D., 2008, University of Southampton. (2008)

Mathematics & Statistics

Chen, Shu-Chuan, Associate Professor, Mathematics, B.A., 1994, National Chung-Hsing University, Taiwan; M.S., 1996, National Donghwa University, Taiwan; Ph.D., 2003, Pennsylvania State University. (2012)

Fisher, Robert J., Jr., Professor, Mathematics; Department Chair. A.B., 1975, College of the Holy Cross; Ph.D., 1981, University of Massachusetts, Amherst. (1989)

Gryazin, Yuriy, Associate Professor, Mathematics. M.S., 1986; M.S., 1991; Ph.D., 1996, Novosibirsk State University, Russia. (2001)

Palmer, Bennett, Professor, Mathematics. B.S., 1979, University of Massachusetts; Ph.D., 1986, Stanford University. (2002)

Zhu, Wensheng, Assistant Professor, Mathematics. B.S., 1992, Fudan University, China; M.S., 1995, Fudan University, China; Ph.D., 2002, Iowa State University. (2006)

Physics

Hunt, Alan W., Research Associate Professor, Physics. B.S., 1994, University of Michigan; Ph.D., 2000, Harvard University. (2002)

Khandaker, Mahbub, Professor, Physics; B.A., 1979, Brandeis University; Ph.D., 1987, University of Washington. (2012)

McNulty, Dustin, Associate Professor, Physics. B.S., 1994, James Madison University; Ph.D., University of Virginia, 2002. (2010)

Tatar, Eddie, Associate Professor, Physics. M.S., 2001; Ph.D., 2000, University of Notre Dame. (2001)

Division of Health Sciences

Audiology and Speech-Language Pathology - Communication Sciences and Disorders

Altieri, Nicholas A., Assistant Professor, Communication Sciences and Disorders. B.A., 2005, The Ohio State University; M.S., 2010, Indiana University; Ph.D., 2010, Indiana University. (2012)

Bargen, Gabriel Anne, Assistant Professor, Communication Sciences and Disorders: Audiology Program. B.S., 2000, Texas Christian University; M.S.Ed., 2002, University of Nebraska at Kearney; M.A., 2006, University of Kansas Medical Center; Ph.D., 2010, University of Kansas. (2010)

Hansen, Karrie C., Professor, English Teaching. B.A., 2000, Boise State University; M.S., 2005, Idaho State University. (2010)(Allied)

Hardy, Amy, E., Clinical Assistant Professor, Communication Sciences and Disorders. M.S., 2001, Northern Arizona University; B.S., 1996, Arizona State University. (2011)(Allied)

Kangas, Kathleen A., Professor, Communication Sciences and Disorders; Department Chair. B.S., 1974, Northern Michigan University; M.S.P.A., 1977, University of Washington; Ph.D., 1990, Purdue University. (1990)

Loftin, Joni G., Clinical Professor, Speech-Language Pathology. B.S., 1984, Appalachian State University; MSP, 1996, University of South Carolina (1990)(Allied)

O’Donnell, Jody, Clinical Associate Professor, Communication Sciences and Disorders. B.S., 1977, Iowa State University; M.S., 1983, Idaho State University. (2010)(Allied)

Ogiela, Diane A., Assistant Professor, Communication Sciences and Disorders. B.A., 1991, Benedictine University; M.A., 1993, Syracuse University; M.S., 1995, Purdue University; Ph.D., 2007, Michigan State University. (2011)

Sanford, Chris A., Associate Professor, Communication Sciences and Disorders. B.S., 1997, M.S., 1999, Brigham Young University; Ph.D., 2006, University of Washington. (2009)

Smith, Shauna, L. H., Clinical Associate Professor, Speech-Language Pathology; Department of Communication Sciences and Disorders. B.S., 2003, Idaho State University; M.S., 2005, Idaho State University. (2009)(Allied)

Biomedical and Pharmaceutical Sciences

Bryant, Amy, Associate Professor, Biomedical & Pharmaceutical Sciences. B.S., 1983, Boise State University; Ph.D., 1999, University of Idaho. (Allied)

Cady, Paul S., Professor, Pharmacy Practice and Administrative Sciences; Interim Dean, College of Pharmacy, Department Chair. B.S., 1980; M.S., 1986, Ph.D., 1988, University of Arizona. (1990)

Cashmore, Catherine A., Professor, Pharmacy Practice and Administrative Sciences; Associate Dean. B.A.; 1980, University of California, San Diego; M.S. 1984, West Virginia University; Pharm.D., 1993, Idaho State University. (1994)

Cornell, Ken, Associate Professor, Biochemistry, Biomedical and Pharmaceutical Sciences. B.S., 1983, Oregon State University; M.S., 1985, Wichita State University; Ph.D., 1997, Oregon Health & Sciences University. (2015) (Allied)

Culbertson, Vaughn L., Professor, Pharmacy Practice and Administrative Sciences. B.S., 1971, University of Nebraska, Lincoln; Pharm.D., 1981, University of Nebraska, Omaha. (1989)

Diedrich, Dana L., Professor, Biomedical and Pharmaceutical Sciences. B.S., 1969; M.S., 1972, University of Kentucky; Ph.D., 1974, Pennsylvania State University. (1991)

Hevener, Kirk, E., Assistant Professor, Biomedical and Pharmaceutical Sciences. B.S., 2005, Tennessee State University; Pharm.D., 2005, University of Tennessee; Ph.D., 2008, University of Tennessee. (2013)

Pettinger, Tracy K., Clinical Associate Professor, Pharmacy. Pharm.D., 2003, Idaho State University. (2005)

Pugmire, Brooke, Clinical Associate Professor, Pharmacy Practice. Pharm.D., 2004 Idaho State University. (2006)

Talley, Todd L., Assistant Professor, Department of Biomedical and Pharmaceutical Sciences. B.S., 1995, University of Utah; Ph.D., 2001, University of Montana. (2012)

Van der Schyf, Cornelis J., Professor, Biomedical & Pharmaceutical Sciences. B.Pharm., 1978, Potchefstroom University, South African; M.Sc., 1982, Potchefstroom University South Africa; D.Sc., 1983, Potchefstroom University, South Africa. (2013)

Xu, Dong, Assistant Professor, Biomedical and Pharmaceutical Sciences. B.S., 1996, Nan Kai University; M.S., 2003, San Diego State University; Ph.D., 2008, San Diego State University. (2012)

Community and Public Health
Fore, Margaret Elizabeth, Assistant Professor, B.A., Psychology, 1992, Clemson University; M.Ed., 1994, Clemson University; Ph.D., 2006, University of South Carolina. (2011)

Lindsay, Ryan, Assistant Professor, Public Health. Ph.D., San Diego State University/University of California San Diego joint Doctoral Program in Public Health. (2012)

Olsen, Janette, Associate Professor, Health Education. B.S., 1995, Brigham Young University; M.S., 1999, Brigham Young University; Ph.D., 2010, University of Utah. (2007)

Counseling

Coe Smith, Jane C., Assistant Professor, Counseling. B.A., 1979, Western Michigan University; M.A., 1981, Western Michigan University; M.Coun., 2004, Idaho State University; Ph.D., Idaho State University. (2014) (Allied)

Moody, Steven J., Assistant Professor, Counseling. B.S., 1996, University of Wyoming; M.Coun., 2007, Idaho State University; Ph.D., 2012, Idaho State University. (2014)

Paulson, Donald L., Associate Professor, Counseling. B.A., 1966, Hamline University; M.S., 1968, Indiana University; Ph.D., 1972, University of Iowa. (1991)

Stewart, Leslie A., Assistant Professor, Counseling. B.A., 2007, Georgia State University; M.Ed., 2009, University of Georgia; Ph.D., 2014, Georgia State University. (2014)

Tivis, Rick, At-Large Graduate Faculty, Counseling. B.A., 1980, University of Central Oklahoma; M.P.H., 1994, University of Oklahoma Health Science.

Yates, Chad M., Assistant Professor, Counseling. B.S., 2005, University Toledo; M.S., 2008, University of Toledo; Ph.D., 2012, Kent State University. (2013)

Dental Hygiene
Calley, Kristin H., Associate Professor, Dental Hygiene. B.S., 1988, Idaho State University; M.S., 1993, Old Dominion University. (1992)

Freudenthal, Jacqueline, Assistant Professor, Department of Dental Hygiene. B.S., 1982, Idaho State University; M.H.Ed., 2005, Idaho State University. (2006)

Gurennlian, JoAnn R., Professor and Graduate Director, Dental Hygiene. B.S., 1978 Fairleigh Dickinson University; M.S., 1979, Columbia University, Ph.D., 1991, University of Pennsylvania. (2012)

Portillo, Karen, Assistant Professor, Dental Hygiene. B.S., 2006, College of Southern Nevada; M.S. Dental Hygiene, 2010, Idaho State University.

Rogo, Ellen, Associate Professor, Dental Hygiene. B.S., 1978, University of Missouri, Kansas City; M.Ed., 1981, University of Washington; Ph.D., 2009, University of Idaho. (1992)

Dental Science

Family Medicine

Health Education and Nutrition Sciences
Blanton, Cynthia A., Assistant Professor, Health and Nutrition Sciences. B.S., 1994, California State University; Northridge; Ph.D., 2000, University of California, Davis. (2007)

Hermanson, Patrick M., Assistant Professor & Program Director, Health Care Administration. B.S., 1973, United States Military Academy; M.S., 1976, University of Utah; DHA, 2012, Central Michigan University. (2011)

Kirkpatrick, Carol F., Clinical Assistant Professor, Health Education and Promotion. B.S., 1992, Utah State University; M.S., 1999, Utah State University;

Weeden, Allisha M., Assistant Professor, Dietetics. B.S., 2002, Kansas State University; M.S., 2004, University of Kansas; Ph.D., 2005, Kansas State University. (2009)

**Medical Laboratory Science**

**Nursing**

Arvidson, Cathy R., Associate Professor, Nursing. B.S.N., 1978, Vanderbilt University; M.S.N., 1981, University of Florida; Ph.D., 1990, Texas Woman’s University. (1992)

Baron, Kathleen A., Assistant Clinical Professor, Nursing. D.N.P., 2013, University of Utah. (2014)

Clarkson, Gina, Assistant Professor, Nursing Science. B.S.N., 1997, Hawaii Pacific University; M.S.N., 2009, Vanderbilt University; Ph.D., 2016, Vanderbilt University. (2016) (Allied)

Goodwin, Miki, Dean and Associate Professor; Master of Science Nursing Education 2006, Idaho State University; Ph.D. in Nursing Education, 2009, University of Nevada Las Vegas. (2016)

Kehinde, Julius, University of Utah Post-Doctoral Fellow, 2013; Medical University of South Carolina, PhD, 2011 (Allied)

Mladenka, Christine (Tina), Adjunct Clinical Professor, Nursing. B.S., 1983, University of Texas at Arlington; M.S., 1994, University of Texas, Medical Branch at Galveston Graduate School of Biomedical Sciences; Ph.D., 2009, University of Utah College of Nursing. (2015) (Allied)

Mispireta, Monica L., Assistant Professor, Nursing. M.D., 2003, San Martin de Porres University; M.H.S., 2007, Cayetano Heredia University; Ph.D., 2015, Johns Hopkins Bloomberg School of Public Health.

Neill, Karen S., Professor, School of Nursing; Associate Director of Graduate Studies. B.S. in Nursing, 1982; M.S. in Nursing, 1985; Ph.D. in Pharmaceutical Sciences, 1994, Idaho State University. (1985)

Nies, Mary A., Professor, School of Nursing. B.S.N., 1974, University of Wisconsin Madison; M.S.N., 1980, Loyola University Chicago; Ph.D., 1988, University of Illinois at Chicago. (2012)

Reavy, Kathleen, Professor, Nursing. B.S., 1988, University of Utah; M.S., 1993, University of Utah; Ph.D., 2003, University of Utah. (2015) (Allied)

Tavernier, Susan S., Assistant Professor, B.S.N., 1985, Whitworth University; M.S.N., 1990, Loyola University of Chicago; Ph.D., 2009, University of Utah; Pst-Doc, 2013, University of Utah. (2013)

Walters, Amy, Allied, Ph.D. Utah State University 1996. (Allied)

**Physical and Occupational Therapy**

Creelman, Jim, Associate Professor, Physical and Occupational Therapy; Assistant Department Chair, Doctor of Physical Therapy Program, Program Director. B.S., 1971, U.S. Navel Academy; B.S., 1982, University of Maryland; M.S., 1997, Idaho State University; D.P.T., 2006, University of St. Augustine. (1990)

Devine, Nancy L., Associate Professor, Physical and Occupational Therapy, School of Rehabilitation and Communication Sciences; Associate Dean. B.S., 1986, University of Vermont; M.S., 1993, Idaho State University; D.P.T., 2006, MGH Institute of Health Professions. (1990)

Gee, Bryan, M., Associate Professor, Occupational Therapy.; Director of Occupational Therapy and Assistant Chair. B.S./M.S. 2002, D’Youville College; M.Ed., 2011, Idaho State University; OTD, 2007, University of St. Augustine. (2007)

Kendall, Eydie, Assistant Professor, Physical Therapy. B.S., 1989, California State University at Long Beach; M.S., 1993, University of Idaho; Ph.D., 2009, University of Idaho. (2011)

Peterson, Theodore W., Clinical Assistant Professor, Occupational Therapy. B.S., 1980, University of North Dakota; M.B.A., 1992, Moorhead State University; Dr.O.T., 2008, Nova Southeastern University. (2008)

Ralphs, James E., Clinical Assistant Professor, Physical Therapy. B.S., 1999, Utah State University; M.P.T., 2001, Old Dominion University. (2009)(Allied)

Seiger, Cindy, Associate Professor, Physical & Occupational Therapy. B.S., 1995, University of Utah; B.S. (Hons.), 1999, University of Ulster; M.S., 2002, Rocky Mountain University of Health Professions; Ph.D., 2009, Brigham Young University. (2006)

Thompson, Kelly, Clinical Associate Professor, Physical and Occupational Therapy. B.S., 2002, Belmond University; Ed.D., 2008, Idaho State University.
Physician Assistant Studies

Forbes, Jennifer L., Clinical Assistant Professor, Physician Assistant. B.S., 1997, University of South Alabama; M.H.S., 2001, University of South Alabama. (2012) (Allied)

Johnson, Jeffery, Clinical Assistant Professor, Physician Assistant. Idaho State University; B.S., 2002, PharmD., 2000 Idaho State University. (2011) (Allied)

Martin, Dave E., Clinical Assistant Professor, Physician Assistant Studies. B.S., 1980, University of Oklahoma; M.P.A.S., 2000, University of Nebraska. (2003)

Papa, Jared, Clinical Assistant Professor, Physician Assistant Studies. B.S., Brigham Young University; M.S., Pacific University. (2012)

Talford, David, B., Clinical Assistant Professor, Physician Assistant Studies, B.S., 1999, Des Moines University; M.S., 2007, University of Nebraska. (2007)
Faculty Emeriti

Asterisks denote members of the Graduate Faculty.

Adamcik, Barbara A.,* Professor, Pharmacy Practice and Administrative Sciences. 1985-2013

Aho, James A.,* Professor, Sociology, Social Work and Criminal Justice. 1969-2010

Akersten, William A., Associate Professor, Biological Sciences and Geosciences; Curator, Vertebrate Paleontology, Idaho Museum of Natural History. 1985-2009

Allen, Virginia B.,* Professor, Counseling. 1981-2012

Anderson, Robert C., Professor, Zoology. 1969-2007

Ashton, Carol Ann,* Associate Professor, Nursing. 2001-2011

Bain, Barbara A., Director of Undergraduate Studies and Professor, Communication Sciences and Disorders, and Education of the Deaf. 1989-2004

Balsley, Ronald D., Professor, Marketing. 1978-2005

Beebe, Thomas G., Instructor, Electronics Technology. 1957-1989

Bezzold, Wendland, Research Professor, Physics. 2000-2010

Benintendi, Wilma, Associate Professor, Education. 1967-1984

Bielby, Victor C., Instructor, Civil Engineering Technology. 1966-1993

Black, James M., Instructor, Electronics Technology. 1963-1993

Bliss, Traci, Professor, Educational Foundations. 1996-2008

Blount, Charles W., Professor, Geology. 1975-1990

Bobell, John L.V. Professor, Human Resource Training and Development. 1990-2002

Boes, Richard F.,* Professor, Accounting. 1977-2011

Booher, Shirley (Deagle), Instructor, Office Technology. 1964-1996

Bowen, Denise M.,* Professor, Dental Hygiene. 1976-2010

Bowen, Richard L., University President. 1985-2005

Bowmer, Richard G., Professor, Botany. 1961-1997

Bowyer, R. Terry,* Professor, Biological Sciences. 2004-2015

Braun, Loren, Professor, Chemistry. 1957-1989

Brown, Donald D., Professor, Art. 1956-1994

Brown, Norris C., Instructor, Diesel Technology. 1972-1997

Browning, Jr., Wallace E., Professor, Physical Education. 1963-1990

Bryan, Clifford E., Professor, Sociology. 1971-2001

Burns, Mary Jane,* Co-Director, Women Studies Program; Associate Professor, Political Science. 1985-2006

Cantrill, Dante K.,* Professor, English. 1974-2005

Chambers, Darold, Registrar. 1961-1990

Christensen, Calvin D., Instructional Coordinator, Laser/Electro-Optics Technology. 1971-2000

Christie, Carole R., Professor, Dental Hygiene. 1979-2011

Coffland, Jack A., Professor, Education; Coordinator, Center for Accountability Systems (Education). 1992-1999

Cowles, Lois Anne, Associate Professor, Sociology, Social Work, and Criminal Justice. 1993-2003

Cresswell, Donald J., Associate Professor, Mathematics. 1968-2000

Christelow, Allan,* Professor, History. 1983-2013

Christelow, Stephanie,* Professor, History. 1990-2015

Creelman III, James (Jim) E.,* Department Chair and Associate Professor, Physical and Occupational Therapy. 1990-2015

Croker, Robert E.,* Professor, Human Resource Training and Development. 1994-2012

Cullen, Carol, Instructor, Office Occupations. 1963-1990

Daniels, Christopher K.,* Professor, Biomedical and Pharmaceutical Sciences. 1988-2012

Davis, Everett Eugene (Gene), Professor, Educational Leadership; Director, Intermountain Center for Education Effectiveness. 1992-2007

Denner, Peter R.,* Associate Dean, College of Education; Professor, Educational Foundations. 1982-2015

Dial, Theresa Gail, Professor, Art. 1974-2008

Dickey, John, Associate Professor, Family Medicine. 1997-2015

Dolsen, Arthur, Professor, Foreign Languages. 1983-2009

Downing, Joan K., Public Services Director (equivalent rank, Professor), Library. 1969-1986

Dundas, Mary L.,* Director, Dietetics; Professor, Health and Nutrition Sciences. 1996-2009

Durtschi, Ralph, Senior Instructor, Robotics and Communications. 1986-2013

Eastman, Philip, Vice President for Financial Services. 1956-1988

Edgar, Thomas E., Professor, Counselor Education. 1966-1987

Edwards, Marilyn, Instructional Program Coordinator, Culinary Arts Technology. 1966-1997

Eilander, Leann, Senior Instructor, General Education. 1981-2007
Ekstrom, Grant, Instructor, Diesel/Diesel Electric Technology. 1973-1996

Enloe, Linda J.,* Associate Professor, Psychology. 1974-2007

Engebretsen, Terry O.,* Associate Professor, English and Philosophy. 1988-2014

Evans, Scott E.,* Professor, Art. 1986-2015

Faler, Kenneth T., Professor, Chemistry and Physics. 1967-1991

Farrell, Larry D.,* Professor, Microbiology. 1972-2008

Feige, Gary, Coordinator and Senior Instructor, Machining Technology. 1977-2003

Feit, Stephen S.,* Professor, Counseling. 1973-2013

Fontenelle, L. Judy, Professor, Biomedical and Pharmaceutical Sciences. 1969-1998

Ford, Lawrence C.,* Associate Vice President for Special Programs and Enrollment Management; Associate Professor, Mathematics. 1984-2009

Foster, Richard H., Jr., Professor, Political Science. 1973-2008

Francis, Jr., Charles A., Associate Professor, Radiographic Science. 1987-2011

Frantz, Alan C.,* Professor, Educational Leadership. 1987-2016

Frazier, Timothy H.,* Professor, Mass Communication. 1986-2013

Galizia, Virginia, Associate Dean, College of Pharmacy; Professor, Pharmacy Practice and Administrative Sciences. 1996-2002

Ganttt, Gamewell D.,* Professor, Management. 1982-2004

Geisler, Don, Instructor, Auto Collision Repair and Refinishing. 1971-1992

George, Thom Ritter, Professor, Music. 1983-2008

Gesell, Thomas F.,* Professor, Nuclear Engineering and Health Physics. 1991-2014

Gironella, Ann Inez,* Associate Professor, Mathematics. 2003-2015

Goff, Glen F., Instructor, Electronics Technology. 1960-1989

Goldbeck, H. Janne, Professor, English. 1976-2006

Gould, Frederica (Teddie), Associate Professor, Pharmacy Practice and Administrative Sciences. 1981-2017

Gravatt, Darwin, Instructional Program Coordinator, Auto Collision, Repair and Refinishing. 1974-1997

Green, Joel N., Instructor, Diesel/Diesel Electric Technology. 1975-2001

Greenwood, Audrey, Professor, Foreign Languages. 1957-1978

Griffith, John S., Professor, Biology. 1977-1999

Hansen, Vaughn, Coordinator and Senior Instructor, Electromechanical Design Drafting Technology. 1970-2005

Harmon, J. Frank, Director and Research Professor, Idaho Accelerator Center; Professor, Physics. 1969-2008

Hatzenbuehler, Linda C.,* Executive Dean and Associate Vice President, Division of Health Sciences. 1976-2016

Hatzenbuehler, Ronald, * Professor, History. 1972-2013

Herzog, Anita, Professor, Dental Hygiene. 1978-2008

Hewett, Beverly J.,* Clinical Assistant Professor, Nursing. 1992-2014

Hill, Linda Charlotte, Associate Professor, Mathematics. 1976-2006

Hill, Richard D.,* Professor, Mathematics. 1967-2012

Hitchcock, Leonard A., Associate University Librarian, Collection Development (equivalent rank, Professor), Library. 1984-2006

Hjelm, Victor S. “Butch,” Dean, College of Arts and Sciences; Professor, Political Science. 1968-2001

Hobbs, Dan L., Associate Professor, Radiographic Science. 1999-2015

Hodges, Kathleen O.,* Professor, Dental Hygiene. 1979-2013

Holmer, Richard N.,* Professor, Anthropology. 1983-2011

Holte, Karl E., Professor, Botany; Curator, Museum. 1965-1997

House, Edwin W., Chief Research Officer; Professor, Physiology. 1966-2004

House, Janet G., Associate Professor, Mass Communication. 1985-2002

Huck, Wilbur, Associate Professor, English. 1957-1990

Hughes, Scott S.,* Interim Dean, College of Arts and Sciences; Professor, Geosciences. 1991-2010

Hurley, Stephen C., Professor, Pharmacy Practice and Administrative Sciences. 1976-2006

Inouye, Richard S.*, Professor, Ecology. 1987-2010

Isaacson, Eugene I., Professor, Biomedical and Pharmaceutical Sciences. 1969-1998

Jacobson, Grace, Associate Professor, Nursing. 1981-2002

Jenkins, Robert M., Coordinator and Senior Instructor, Automotive Technology. 1974-2005

Jenkins, Susan J.,* Professor, Educational Foundations. 1988-2013

Jensen, Jay, Dean of Students. 1956-1989

Joe, Victor C., Department Chair and Professor, Psychology. 1969-2003

Johnson, Frank J., Instructor, Civil Engineering Technology. 1966-1993

Johnson, Jeanne M.,* Professor, Communication Sciences and Disorders; Education of the Deaf. 2009-2016

Jolly, James P.,* Professor, Management. 1982-2015
Jones, Gordon F., Associate Dean, School of Applied Technology. 1968-1995
Jue, Sandra G., Clinical Professor, Pharmacy Practice and Administrative Sciences. 1973-2012
Kawamura, Carole J., Assistant Professor, Dental Hygiene. 1975-2002
Kearns, Richard L., Director of Undergraduate Programs and Professor, Health and Nutrition Sciences. 1988-2004
Kidd, Paul F., Instructor, Graphic Arts. 1965-1995
Kijinski, John L., Dean, College of Arts and Sciences; Professor, English and Philosophy. 1985-2007
Kilpatrick, John A., Professor, Management. 1977-2006
King, Kathleen, Associate Professor, English. 1984-2007
King, William L., Professor, English and Philosophy. 1960-1994
Kirkpatrick, David, Professor, Military Science, Director of Housing. 1951-1955, 1958-1981
Klug, Beverly J., Associate Professor, School Psychology, Literacy, and Special Education. 1985-2014
Kovacs, Rudolph S., Professor, Art and Pre-Architecture. 1980-2012
Kratz, Lawrence J., Professor, Mathematics. 1966-2010
Kritsky, Delane C., Associate Dean, College of Health Professions; Professor, Health and Nutrition Sciences and Biological Sciences. 1974-2008
Kunze, Jay., Professor, Nuclear Engineering and Health Physics. 1995-2013
Lang, Patrick M., Professor, Mathematics. 1985-2012
Lawson, Jonathan N., Professor, Educational Leadership and Instructional Design. 1995-2013
Laurence, Dennis, Professor, English and Philosophy. 1971-1992
LeBlanc, Ronald P., Professor, Marketing; Adjunct Faculty, Sport Science and Physical Education. 1980-2006
Lerch, Robert, Professor, Education. 1971-1995
Levenson, Carl A., Professor, Philosophy. 1981-2016
Linder, Allan, Professor, Biological Sciences. 1963-1988
Lloyd, Arthur P., Professor, Counseling. 1967-2001
Lloyd, Marcia L., Professor, Dance. 1977-2001
Loebs, Bruce, D., Professor, Communication, Media, and Persuasion. 1969-2015
Longmire, Dean R., Professor, Department of Finance. 1978-2001
Lott, Rex S., Professor, Pharmacy Practice and Administrative Sciences. 1997-2015
Lu, Joseph, Professor, Libraries. 1972-1992
Luckey, Angela S., Associate Professor, Educational Foundations. 1996-2009
Marcum, R. Laverne, Professor, Education. 1969-1984
Marley, Bert, Professor, History. 1967-1989
Martin, Anthony, Professor, Art. 1977-2015
Martindale, Charlene, Associate Professor, English/Instructor-Coordinator, Business Communication. 1970-1999
Matteson-Howell, Janice, Chair, Technical Department. 1984-2007
Matthews, Leroy J., Professor, Psychology. 1968-2000
Mauch, John E., Professor, Journalism. 1971-1999
Maughan, Ralph B., Professor, Political Science. 1971-2007
McAleese, Willis J., Professor, Health Education and Promotion. 1989-2014
McCune, Joan H., Professor, Microbiology. 1980-2001
McCune, Ronald W., Professor, Biochemistry. 1970-2004
McGee, Shanna, Professor, Psychology. 1964-1985
McLaughlin, Diana, Associate Department Chair; Assistant Professor, Nursing. 1987-2007
McRoberts, Jacqueline, Associate Professor, Nursing. 1981-2005
Merrill, Clifton L., Master Instructor, Civil Engineering Technology. 1985-2011
Merrill, Donald, Master Instructor, College of Technology. 1971-2008
Millner, William, Professor, Business. 1971-1983
Montgomery, Tracy T., Associate Professor, English and Philosophy. 1990-2013
Mullin, Anne E., Associate Professor, English and Philosophy. 1990-2000
Myers, Rosemary N., Director, Individualized Education Programs; Assistant Professor, English and Philosophy. 1960-1999
Naidu, D. Subbaram, Professor, Electrical Engineering and Computer Science. 1990-2014
Newsome, Jack D., Associate Professor, Educational Foundations. 1997-2011
Newsome, Julie Renee, Associate Professor, Educational Foundations. 1998-2013
Nickisch, Craig W., Professor, Foreign Languages. 1988-2004
Nilson, Douglas C., Associate Professor, Political Science. 1989-2009
Nite, Philip S., Professor, Marketing. 1993-2010
Noakes, Sandra D., Assistant Professor, Physical Education. 1966-2002
Nunn, Gerald D., Professor, School Psychology Literacy and Special Education. 1996-2011
Owens, John “Jack” B., Professor, History. 1975-2011
Paarmann, Carlene S., Professor, Dental Hygiene. 1976-2011
Park, Pamela, Professor, Languages and Literature. 1985-2015
Park, Barry R., Professor, Physics. 1967-1997
Park, Stephen K., Associate Professor, Mathematics. 1972-2002
Pawar, Sheelwant B., Professor, Management. 1967-1999
Pehrsson, Robert S.,* Professor, Teacher Education. 1980-2003
Pean, Deborah M., Assistant Professor, General Education. 1988-2011
Peña, Sally J.,* Professor, Educational Foundations. 1990-2010
Pierson, Donald S.,* Professor, Sociology, Social Work and Criminal Justice. 1985-2011
Piland, Neill F.,* Director and Research Professor, Institute of Rural Health. 2002-2016
Plewaw, Jr., Franklin J.,* Professor, Accounting. 1984-2013
Priddy, Kathleen S., Senior Instructor, Office Technology. 1976-2005
Pumphrey, Lela "Kitty" D.,* Professor, Accounting. 1988-2006
Rankin, Linda L.,* Associate Dean, Division of Health Sciences; Professor, Health Education and Promotion. 1991-2015
Rankin, Roger A.,* Professor, Educational Foundations. 1981-2011
Reis, Priscilla R.,* Associate Professor, Accounting. 1994-2013
Renn, Nancy, Clinical Assistant Professor, Nursing. 1993-2012
Roberts, Mark W.,* Professor, Psychology. 1977-2015
Ronald, Bruce P., Professor, Chemistry. 1968-2001
Rose, Fred L., Professor, Biological Sciences. 1969-2000
Rost, Robert, Senior Instructor, Trade and Industrial Department. 1972-2007
Rucker, Jack, Director, School of Vocational-Technical Education. 1955-1976
Sagness, Richard L., Director, Office of Clinical Experiences and Student Services; Professor, Teacher Education. 1979-1999
Sahlberg, Jeanne H., Instructor, Office Occupations. 1967-1990
Salzman, Stephanie, Professor, Teacher Education. 1986-2002
Sato, Alyce, Associate Professor, Nursing. 1976-2004
Schneider, Audrey D. (Weston), Associate Professor, Speech-Language Pathology. 1990-2005
Schow, H. Wayne, Professor, English and Philosophy. 1967-1999
Schow, Ronald L., Professor, Audiology. 1975-2007
Scott, Darrell F., Assistant Dean, College of Business; Senior Lecturer, Marketing. 1970-2007
Seeley, Rodney R.,* Professor, Physiology. 1973-2008
Seikel, John Anthony “Tony,”* Assessment Coordinator, Health Sciences; Professor, Communications Sciences and Disorders. 1998-2015
Sharp, William T., Professor, Pharmacy Practice and Administrative Sciences. 1975-2000
Smedley, Thayne, Professor, Audiology. 1983-2001
Smith, Denzell S., Professor, English and Philosophy. 1972-1991
Smith, Jill M., Assistant Professor, Accounting. 1986-2009
Smith, Kenneth A.,* Professor, Accounting. 1970-2015
Snarr, Terry L., Program Coordinator and Senior Instructor, Instrumentation and Automation Engineering Technology. 1985-2015
Spadafore, Gerald J., Professor, Teacher Education. 1969-1999
Spall, Richard D., University Ombudsman, Professor, Pathology. 1981-2003
Spiegel, Kathleen, Clinical Professor, Clinical Laboratory Science. 1991-2007
Squires, W. David Jr.,* Professor, Literacy Education. 2000-2015
Standley, Mike, Director of Registration and Records. 1971-1999
Stanek, Alan E., Chair and Professor, Music. 1976-2001
Stenson, Carol M., Professor, Special Education. 1978-2003
Stephens, Trent D., Professor, Biology. 1981-2011
Stocks, Anthony, Chair and Professor, Anthropology. 1979-2006
Stowe, Dennis C.,* Professor, Mathematics. 1988-2015
Stratton, William E.,* Professor, Management. 1974-2011
Streubel, Donald P., Professor, Biology. 1974-1999
Strickland,* Jane M., Associate Professor, Organizational Learning and Performance. 1999-2016
Sutcliffe, Roy M., Instructor, Electronics Technology. 1958-1989
Sutter, Jr., E. John, Professor, Chemistry. 1971-2004
Swanson, Merwin, Professor, History. 1972-2002
Sweat, Robert C., Coordinator and Senior Instructor, Computer/Business Equipment Technician Program. 1978-2004
Swetnam, Susan H.,* Professor, English and Philosophy. 1979-2013
Tate, Paul D., Dean, Graduate School; Professor, English and Philosophy. 1976-2006
Thomas, Gloria (Jean),* Associate Professor, School Psychology and Educational Leadership. 1997-2015
Trinklein, Michael J., Professor, Mass Communication. 1984-2004
Trout, Charles H., Professor, Biological Sciences; Curator, Museum. 1968-2000
Tullis, James, Professor, Biological Sciences. 1965-1996

Urfer, Alexander G.,* Professor, Physical and Occupational Therapy. 1977-2011

Vittetoe, Dennis, Master Instructor, Electronic Systems Technology. 1976-2003

Wallber, M. Josara, Clinical Associate Professor, Communications Sciences and Disorders. 2006-2014

Walsh, Mary Ellen,* Professor, English and Philosophy. 1971-2002

Warnke, Janet Lynn, Assistant Librarian (equivalent rank, Professor), Library. 1978-2012

Watters, Ronald, Senior Lecturer, Sport Science and Physical Education. 1974-2007

Watts, Robert T., Associate Professor, Computer Information Systems. 1978-1999

Wells, Gary R.,* Professor, Finance. 1965-2009

Weston, Audrey, D.,* Professor, Speech Language Pathology. 1990-2005

Wiegand, Gayl H., Professor, Chemistry. 1965-2004

Willer, Janene, Clinical Associate Professor, Communication Sciences and Disorders. 1990-2011

Wilson, Albert E.,* Professor, Engineering and Nuclear Science. 1966-1995

Wissa, Maher F., Professor, Geomatics Technology. 1993-2008
