Unmanned Aerial Systems (UAS)

Courses

UAS 0100 Introduction to Unmanned Aerial Systems: 1 semester hour.
Introduction to Unmanned Aerial Systems. Introduces the essential elements of
UAS history and operations. PREPReq: UAS program major and permission of
instructor. F

UAS 0110 Applied Mathematics and Electronics for Unmanned Systems: 3
semester hours.
Mathematical principles and practices as they relate to the construction and
operation of unmanned systems. Includes an introduction to basic electronics
fundamentals. PREREQ: UAS program major. F

UAS 0115 Flight Theory: 3 semester hours.
Introduction to the principles and practices of heavier than air flight. Overview
of aircraft components, control systems, and theory of operation. PREREQ: UAS
program major. F

UAS 0120 Flight Laboratory I: 4 semester hours.
Experiments involving the construction, repair, and operations of light duty,
remote unmanned aircraft. PREREQ: UAS program major. F

UAS 0150 Unmanned Systems Design: 2 semester hours.
Investigation of vehicle types, construction materials, tool implementation, and
other design considerations for development of unmanned systems. PREREQ:
UAS program major. S

UAS 0155 Flight Control and Subsystems: 4 semester hours.
Theory of operation of propulsion, power plant, control methods, radio frequency
fundamentals, GPS L1 and L2, and Ground and Air Data Terminal equipment
used in unmanned systems. PREREQ: UAS program major. S

UAS 0170 Flight Laboratory II: 4 semester hours.
Continuation of UAS 0151. Advanced experiments involving the construction,
repair, and operations heavy lift and multicopter aircraft. PREREQ: UAS program
major. S

UAS 0199 Experimental Course: 1-6 semester hours.
The content of this course is not described in the catalog. Title and number
of credits are announced in the Class Schedule. Experimental courses may
be offered no more than three times with the same title and content. May be
repeated.

UAS 0200 Advanced Electronics and Payload for Unmanned Systems: 4
semester hours.
Understanding and implementation of electronic and optical measurement
devices, manipulators, and the operator control systems for unmanned systems
platforms. PREREQ: UAS program major; UAS 0110 or RCET 0156B. F

UAS 0225 Flight Laboratory III: 5 semester hours.
Experiments involving the construction, repair, and operations of light duty,
remote unmanned aircraft. PREREQ: UAS program major. S

UAS 0250 Imagery Analysis: 3 semester hours.
This course will teach students imagery interpretation principles, give them
an understanding of the different roles of imagery analysts in an operational
environment. Students will receive hands-on operational experience through
mission planning, simulation and collecting images. PREREQ: UAS program
major. F

UAS 0252 Ground Control Points for Unmanned Aerial Systems: 1 semester
hour.
An introduction into emplacement of Ground Control Points for aerial surveys
and data entry requirements for mapping software. Prereq: Enrollment in UAS
program major.

UAS 0255 Autopilot Theory: 3 semester hours.
Fundamentals of unmanned platform autopilot avionics circuitry, navigational
sensors, communications, and telemetry systems. Introduction to automated flight
software and mission planning. PREREQ: UAS program major; UAS 0200 or
RCET 0154B. COREQ: UAS 0270. S

UAS 0270 Autopilot Laboratory: 5 semester hours.
Experiments involving integration, calibration, trouble shooting and repair
of avionics circuitry and related devices. Flight plan development and
implementation using automated flight software and mission planning. PREREQ:
UAS program major; UAS 0200 or RCET 0156B. COREQ: UAS 0255. S

UAS 0282 Introduction to Rapid Prototyping: 2 semester hours.
Introduction to the software, tools, and techniques used in modern rapid
prototyping processes. PREREQ: UAS program major. S

UAS 0299 Experimental Course: 1-6 semester hours.
The content of this course is not described in the catalog. Title and number
of credits are announced in the Class Schedule. Experimental courses may
be offered no more than three times with the same title and content. May be
repeated.

UAS 0200 Advanced Electronics and Payload for Unmanned Systems: 4
semester hours.
Understanding and implementation of electronic and optical measurement
devices, manipulators, and the operator control systems for unmanned systems
platforms. PREREQ: UAS program major; UAS 0110 or RCET 0156B. F

UAS 0225 Flight Laboratory III: 5 semester hours.
Experiments involving the construction, repair, and operations of light duty,
remote unmanned aircraft. PREREQ: UAS program major. S

UAS 0282 Principles of GIS: 3 semester hours.
Study of GIS fundamentals, introduction to GPS, databases, and metadata.
Practical application of ESRI and ArcView software. Build, edit, and query
a GIS; basic spatial analysis. Requires competence in computer operating
systems. Equivalent to CET 0228. PREREQ: UAS program major; UAS 0110 or
CET 0120. F

UAS 0240 Avionics and Sensors for UAS: 3 semester hours.
Introduction to unmanned aerial systems avionics and sensors. The course will
also cover basic functions and integration of the different components that
comprise an avionics and sensor suite. PREREQ: UAS 0200. S
