Homeland Security and Emergency Management

Program Description

Program Description

AS and BS Degrees: Homeland Security and Emergency Management degree programs integrate security studies and emergency management principles necessary to effectively prevent, plan for, respond to, mitigate, and recover from all hazards. Deterrence of intentional acts of terror and mitigation of the impacts of other hazards that threaten the United States by building strong capabilities and enhancing the capacity needed to cope with these hazards is key to the enterprise. The multidisciplinary nature of careers in the homeland security and emergency management enterprise.

Career Development and Professional Growth Objective

Within two to three years of graduation, the majority of our graduates in homeland security and emergency management will be working in governmental agencies, non-profit agencies, or private industry and in many cases will be engaged in advanced degrees. After five to ten years, many of our graduates will have established themselves as leaders within their field and communities. Examples of some careers under the HSEM umbrella include: Pandemic Preparedness Specialist, Intelligence Analyst, 911 Operator/Manager, Cyber Security Specialist, Emergency Manager, Debris Management Planner, Critical Infrastructure Security Manager, Public Information Officer, Security Program/Project Manager, Damage Assessment Specialist, and Volunteer and Donation Manager.

Advising Information

This program requires students to achieve certain grades in order to advance each semester. Specific information is available in the major academic plans (MAPs). All homeland security and emergency management courses are delivered in an online format.

Course sequencing should be arranged to meet individual needs. In addition to other degree requirements, 36 credits of general education are required for this program. As such, students are strongly encouraged to make an advising appointment with Rachel Azzarito at 208-373-1760 or azzarach@isu.edu for more information.

Student Learning Outcomes

Our goal is to educate and develop homeland security and emergency management professionals positioned to build resilient communities to current and future threats in an all-hazards environment. The following program educational objectives have been established for students in this program:

1. To gain an essential understanding of the basic fields and the interdisciplinary nature of careers in the homeland security and emergency management enterprise.
2. To acquire specific knowledge, skills and abilities that enable graduates to develop critical thinking skills to process and analyze all-hazard threats.
3. To gain a fundamental knowledge of emergency management principles and practice throughout the homeland security and emergency management enterprise.
4. To develop an understanding of how homeland security and emergency management professionals gather and process data, reach conclusions, and design and implement plans, policies, and procedures using technology.
5. To properly collect and analyze critical information for additional meaning and relevance, and disseminate timely intelligence required by decision-makers to protect the public against all hazards.
6. To develop skills to identify and engage with community stakeholders to capitalize on the synergy created by partnerships and collaboration.
7. To prepare graduates to be service-oriented, ethical professional leaders through education in a rich variety of content and perspectives from across the homeland security and emergency management enterprise.

Minor: Earning a minor in Homeland Security and Emergency Management is an excellent way to prepare for the unexpected events and crises that can result in community chaos and disrupt school operations, businesses, hospitals, and countless other impacts involving life safety risks and economic losses. The multidisciplinary nature of various professionals who come together to respond and recover from crises creates a need for baseline knowledge about the risks we face and how to prepare for, respond to, and recover from threats and build a more resilient community.

Donation Manager.
