

# Bachelor of Arts in Biology with Biology Education Concentration

The B.A. in Biology with a Concentration in Biology Education is designed for students who want to pursue teacher certification in biology. The B.A. has fewer courses in Chemistry, Physics, and Mathematics than the B.S. in Biology, and more upper division electives, providing students with greater latitude to design their own program of study. Students who pursue the B.A. in Biology *will not meet the minimum requirements* for admission to most graduate research programs in biological sciences or professional programs in the health sciences.

The B.A. degree requires that students complete all of the General Education Objectives (<http://coursecat.isu.edu/undergraduate/academicinformation/generaleducation>) described in the Academic Information section of this catalog. Students must also satisfy the core requirements listed below and the requirements of the Biology Education Concentration. All graduates of this degree program will earn a B.A. in Biology regardless of the concentration selected.

## Required Core Courses:

Code	Title	Credits
BIOL 1101 & 1101L	Biology I and Biology I Lab	4
BIOL 1102 & 1102L	Biology II and Biology II Lab	4

## Concentration in Biology Education

*(Idaho teacher preparation requires 45 credits of Biology in the Single Subject Major)*

Students in the B.A. in Biology program with the Concentration in Biology Education may complete the requirements for teacher certification by completing the Professional Education Core and other required courses in the College of Education. Such students must apply for admission to the Teacher Education program (see the College of Education section of the catalog for details).

In addition to completing the Required Core courses and the General Education Requirements (<http://coursecat.isu.edu/undergraduate/academicinformation/>
