B.S. Biochemistry

(This degree appears in the Biological Sciences and Chemistry sections of the catalog.)

Two departments - Biological Sciences and Chemistry - jointly offer the B.S. degree in Biochemistry. The curriculum is designed to prepare the student for graduate work in biochemistry and related fields, as well as for admission to medical, dental, or other health professional schools. The graduate is also prepared to go directly into research or industrial positions which require preparation only at the B.S. level.

The purpose of the B.S. in Biochemistry is to serve students who seek to develop a strong background in biochemistry and the supporting sciences of biology, chemistry, and physics. Majors also gain experience in the broad areas of biochemistry, molecular biology, biotechnology, and medical and/or ecological applications of each. Majors gain experience that will prepare them to participate in research development, planning and implementation, and to be competent to carry out standard biochemical and molecular biology techniques in the laboratory. The B.S. in Biochemistry prepares students to be competitive for positions in research, graduate schools, health professional schools, and in the biotechnology industry.

Core Requirements

Students pursuing a Bachelor of Science must satisfy all of the General Education Objectives (a minimum of 24 credits; Objectives 3 and 5 are satisfied in the core—see the General Education Requirements (http://coursecat.isu.edu/undergraduate/academicinformation/generaleducation) described in the Academic Information section of this catalog). Students must also satisfy the core requirements listed below and at least 20 credits of elective courses selected from Biological Sciences, Chemistry, Mathematics, and Biomedical and Pharmaceutical Sciences. In order to make timely progress toward the degree, it is imperative that the student work closely with a major advisor. All graduates of this program will earn a B.S. in Biochemistry.

¹ Students must pass core classes with a grade of C- or better.
² May elect to take BIOL 2206 and BIOL 2207 instead of BIOL 2235 and BIOL 2235L.
³ May elect to take CHEM 3351 and CHEM 3352 instead of CHEM 3341 and CHEM 3342.
⁴ May elect to take PHYS 2211, PHYS 2212, PHYS 2213, and PHYS 2214 may be taken to fulfill the Physics requirement in the core curriculum.

Electives

Students must take a minimum of 20 elective credits from the list below, with at least 8 credits in Biological Sciences (BIOL), 8 credits in Chemistry (CHEM), and 4 additional credits in either Biological Sciences (BIOL), Chemistry (CHEM), Mathematics (MATH), or Biomedical and Pharmaceutical Sciences (PSCI).
