

# Forensic Sciences Certificate

This Forensic Sciences certificate program provides graduate students with both an overview of the forensic sciences through required coursework as well as targeted needs and interests of each individual gained through the electives that students choose to support their own personal trajectory in forensic sciences. New and currently enrolled students in the ISU Graduate School, no matter degree program or department, may apply for this certificate. The application can be found on the ISU Graduate School or Anthropology Department websites or through this link <https://www.isu.edu/apply/>.

Students who earn this certificate will be prepared to:

- Describe all the forensic sciences focusing on the new methods and techniques of forensic analysis and how to apply those to crime scene analysis.
- Apply new techniques to real world cases and interpreting results for outside agencies.
- Demonstrate an understanding of key parent disciplines, areas, and methodologies within the forensic sciences.
- Learn and begin to apply multiple theories to explain behavior and potential motivations across different classifications of crime.
- Recognize and demonstrate how all the forensic sciences work together to solve crimes, analyze crime scenes, and inform the public.

Two courses, ANTH 5535 Forensic Sciences: Beyond the Crime Lab (<https://coursecat.isu.edu/graduate/allcourses/anth/>) and SOC/SOWK 5557 Fundamentals of Forensic Behavioral Science (<https://coursecat.isu.edu/graduate/allcourses/soc/>), are required. Each student must take three electives that come from three of the four themes (Mind, Body, Methods, and Communication). The total number of credits required is between 13-15 dependent on the electives chosen. All courses are offered at the graduate level. It is possible that other courses not listed may count toward the certificate if approved through the petition process. Any courses that may count toward the certificate as well as a second credential must follow the policy of double counting of credits as found in the Graduate Catalog. It is expected that students would complete this certificate in at least two, but no more than four, semesters.

Code	Title	Credits
<b>Required Courses</b>		<b>6</b>
ANTH 5535	Advanced Forensic Science - Beyond the Crime Lab	
One of the following:		
SOC 5557	Fundamentals of Forensic Behavioral Science	
SOWK 5557	Fundamentals of Forensic Behavioral Sciences	
<b>Electives -- Choose 1 course in 3 of the below sections:</b>		<b>9</b>
<b>The Body</b>		
ANTH 5509	Clinical Medical Anthropology	
ANTH 5532	Human Osteology	
ANTH 5507	Anthropology of Global Health	
ANTH 5539	Principles of Taphonomy	
<b>Methods</b>		
ANTH 5534	Forensic Archaeology	
GEOL 5503	Principles of Geographical Information System	
GEOL 5503L	Principles of GIS Laboratory	

<b>The Mind</b>	
SOC 5512	Sexuality and the Body
SOWK 5538	Sexual Crimes
SOC 5551	Victimology
SOC 5552	Gang Violence
SOC 5553	Serial Murder
SOC 5554	Guns and Mass Shootings
SOC 5531	Criminology
ANTH 5536	Human Variation
<b>Communication</b>	
CMP 5503	Mass Communication and Society
CMP 5520	Advanced Leader Communication
<b>Total Credits:</b>	<b>15</b>
