The Exercise Science BS / MSAT accelerated program provides students the opportunity to complete their BS and MSAT in 5, rather than 6 years.

**Admissions Requirements**

Students will declare their interest in the accelerated program during the spring semester of the sophomore year. Application to the accelerated program will take place in fall of the junior year. Students will submit the same information as those who are applying for the stand-alone MSAT program. Formal application to the Graduate School will be required during the semester the student will complete their bachelor’s degree.

**Awarding of Degrees**

The BS degree will be awarded when the student has completed all requirements necessary to earn the bachelor’s degree, which equates with the end of the Fall I semester in the below plan of study. The MSAT will be awarded at the end of the Spring II semester.

A full description of this program is available in the undergraduate section of the catalog.
