

# Master of Public Health

---

The MPH Program at ISU is accredited by the Council for Education in Public Health (CEPH). The 42-credit curriculum has been developed to meet the Public Health Foundational Competencies required for all CEPH-accredited programs. In addition to the traditional public health core knowledge areas of biostatistics, epidemiology, social and behavioral sciences, health services administration, and environmental health sciences, the curriculum also addresses cross-cutting and emerging public health areas.

## General Requirements

Students pursuing the MPH degree must complete a minimum of 42 credits of coursework, including an integrated learning experience.

All students must maintain a satisfactory record of scholarship. A 3.0 grade point average (GPA) or better is required for any graduate degree or certification at Idaho State University. Students who earn a grade below a B- in a core course will be required to retake that course. Students who earn grades below a B- in two courses may be dismissed from the program.
