Auto Collision Repair (ACRR)

Courses

ACRR 0101 Introduction to Collision Repair Safety: 2 semester hours.
The orientation and application of tool safety, shop practices, and shop equipment
theories. Industry needs and standards will be addressed. Students will gain
knowledge of proper use of equipment, tools, and safety that meet or exceed
industry standards. F, S

ACRR 0102 Introduction to Welding for Collision Repair: 1 semester hour.
Orientation to mild steel, automotive sheet metals, basic oxy-acetylene, MIG
welding, plasma air arc cutting, equipment, tools, and safety. F, S

ACRR 0103 Introduction to Welding for Collision Repair Lab: 2 semester hours.
Prepare students to perform basic welding processes and techniques including
the application of mild steel, wire feed welding, automotive sheet metals, basic
oxy-acetylene, MIG welding, and plasma air arc cutting. Students will gain
knowledge of proper use of equipment, tools, and safety that meet or exceed
industry standards. F, S

ACRR 0104 Fundamentals of Auto Collision Repair and Refinishing: 3 semester hours.
Fundamentals of basic metal finishing including the use of plastic filler. Safety
rules and procedures will be emphasized. "Right to Know" laws, OSHA
guidelines, DEQ rules, and safe handling of hazardous materials are stressed. F, S

ACRR 0105 Detailing and Polishing: 2 semester hours.
This course covers the practical application of detailing and polishing
fundamentals including that of pre-wash, paint defect identification, exterior
polishing, interior renovation, environmental hazards, proper use of detailing
equipment, and PPE. Gain knowledge of general safety and health practices,
including the use of chemicals and detailing products. F, S

ACRR 0106 Minor Collision Repair Theory: 1 semester hour.
Basic theory in metal finishing and minor body repair. This includes straightening
and prepping sheet metals, the proper use of plastic body fillers, abrasives,
sanding techniques, and air tools. Remove and install necessary trim and
hardware to facilitate repair procedures. F, S

ACRR 0107 Minor Collision Repair Lab: 2 semester hours.
Practical application of metal finishing and minor body repair. This includes
straightening and prepping sheet metals, the proper use of plastic body fillers,
abrasives, sanding techniques, and air tools. Remove and install necessary trim
and hardware to facilitate repair procedures. F, S

ACRR 0108 Fundamentals of Auto Collision Repair and Refinishing Lab: 3 semester hours.
Focus will be given to completing practical exercises in refinishing single or
multiple vehicle components and customer vehicles in a lab setting. F, S

ACRR 0160 Advanced Refinishing I: 8 semester hours.
Advanced technical refinishing terms will be introduced and explained along
with Environmental Protection Agency laws. High Volume Low Pressure
application will be used. Emphasis on detailing a vehicle. System application will
be emphasized. PREREQ: ACRR 0104, ACRR 0105, ACRR 0106, ACRR 0107, ACRR 0108. F, S

ACRR 0161 Advanced Refinishing II: 8 semester hours.
Live-work projects using single and two stage painting processes and tri-coating
with a high volume, low pressure application system. PREREQ: ACRR 0160. F, S

ACRR 0162 Advanced Refinishing III: 8 semester hours.
Tri-coating, striping, and variation of painting applications. Troubleshooting
and corrective actions for problems encountered when painting. PREREQ:
ACRR 0161. F, S

ACRR 0163 Advanced Refinishing IV: 8 semester hours.
Practical application of advanced refinishing techniques, including tri-coating,
plating, striping, and variations of painting applications. Emphasis on
environmental protection and safety. PREREQ: ACRR 0162. F, S

ACRR 0164 Advanced Refinishing V: 8 semester hours.
Advanced technical refinishing terms will be introduced and explained along
with Environmental Protection Agency laws. High Volume Low Pressure
application will be used. Emphasis on detailing a vehicle. System application will
be emphasized. PREREQ: ACRR 0163. F, S

ACRR 0165 Advanced Refinishing VI: 8 semester hours.
Live-work projects using single and two stage painting processes and tri-coating
with a high volume, low pressure application system. PREREQ: ACRR 0164. F, S

ACRR 0210 Advanced Collision Repair I: 8 semester hours.
Estimating, glass removal and replacement, frame repair and frame rack
setup, body panel and part replacement and alignment, welding techniques,
and corrosion protection. PREREQ: ACRR 0101, ACRR 0102, ACRR 0103,
ACRR 0104, ACRR 0105, ACRR 0106, ACRR 0107, ACRR 0108. F, S

ACCR 0211 Advanced Collision Repair II: 8 semester hours.
Frame and unibody repair and alignment. Steering and alignment systems
diagnosis and repair. Sectioning, sheet molded compounds, fiberglass, and plastic
repair. PREREQ: ACRR 0210. F, S

ACCR 0212 Advanced Collision Repair III: 8 semester hours.
Automotive electrical circuitry, window and water leak diagnosis, air bags, and
seatbelts. PREREQ: ACRR 0210. F, S

ACCR 0252 Internship: 8 semester hours.
An opportunity for the student to receive on-the-job work experience with an
automotive body business in either collision repair or refinishing. PREREQ:
Permission of the instructor. F, S

ACCR 0296 Independent Study: 1-8 semester hours.
Addresses specific learning needs of individuals for the enhancement of
knowledge and skills within the program area under the guidance of an instructor.
May be repeated. Graded S/U, or may be letter-graded. PREREQ: Permission of
the instructor. D

ACCR 0298 Special Topics: 1-8 semester hours.
Addresses the specific needs of industry, enabling students to upgrade technical
skills that are not included in the current program curriculum. May be repeated.
Graded S/U, or may be letter-graded. PREREQ: Permission of the instructor. D
