Overview

About Community and Public Health

Our Mission

We advance health for all through collaborative learning and scholarly activities, enabling students and communities to thrive.

Our graduates work at the frontlines of emerging health issues and strategically guide organizations and communities through evidence-based decision-making and cultural humility. Each of our programs prepares students in areas with projected job growth as organizations and communities recognize the need for better programs, healthcare, and environments that foster healthy people and communities.

The undergraduate program in Community and Public Health is designed to prepare students to plan, implement, and evaluate health promotion programs, interventions, and strategies, serve as an advocate to support healthy behaviors and healthy environments, and lead in empowering individuals, groups, and communities to achieve optimal health, well-being, and quality of life. More specifically, they learn to facilitate the adoption of actions that are conducive to the health of individuals, groups, or communities.

Students in the Community and Public Health Program may choose from three concentrations:

1. Community health
2. Addiction studies
3. School health

Teaching and non-teaching minors are available. Accelerated programming is offered into our Master of Health Education (MHE) and a Master of Public Health (MPH) graduate degrees.

Program Goals and Objectives

Graduates with a baccalaureate degree in Community and Public Health are eligible to take the Certified Health Education Specialist (CHES) national certification offered through the National Commission on Health Education Credentialing (NCHEC). Coursework in the Idaho State University undergraduate Community and Public Health program prepares students on the following Eight Areas of Responsibilities for Health Education Specialists that have been identified by NCHEC:

- Assessment of Needs and Capacity
- Planning
- Implementation
- Evaluation and Research
- Advocacy
- Communication
- Leadership and Management
- Ethics and Professionalism

Addiction Studies Concentration

Students with an addiction studies concentration are trained with a broad understanding of substance abuse issues as well as specific strategies to prevent/intervene with individuals in a variety of settings. Upon completion of this academic concentration, and coupled with 300 internship hours, students are eligible to become Substance Use Disorders Associate (SUDA) certified by The Idaho Board of Alcohol/Drug Counselor Certification (IBADCC). Upon completion of the Addiction Studies Certificate, paired with a 300-hour internship and a Bachelor's degree, students are eligible for the Certified Alcohol and Drug Counselor (CADC) certification through IBADCC.

Community Health Concentration

Students with a community health concentration are training to plan, implement, and evaluate health education and promotion activities in various settings such as health departments, hospitals, volunteer community health agencies, health maintenance organizations, corporations, fitness facilities, wellness centers, or university settings.

School Health Concentration

Students with a school health concentration are training to teach health in public or private junior high or senior high schools. Students choosing the school health concentration must also be admitted to the teacher education program and complete all requirements for teaching certifications through the College of Education.

Addiction Studies Academic Certificate (25 credits)

The Addiction Studies Certificate is a 25-credit academic certificate for those in health professions and beyond to understand addiction and how to help individuals and communities who are impacted by addiction. Coursework includes Harmful and Illicit Substances, Ethics, Chemical Dependency and the Family, Basic Counseling Skills, Case Management, Assessments for Substance Abuse Counselors, Group Skills, and more. Upon completion of this academic certificate, and coupled with 300 internship hours, students are eligible to become Substance Use Disorders Associate (SUDA) certified by The Idaho Board of Alcohol/Drug Counselor Certification (IBADCC). Upon completion of the Addiction Studies Certificate, paired with a 300-hour internship and a Bachelor's degree, students are eligible for the Alcohol/Drug Counselor (ADC) certification through IBADCC. Additionally, the knowledge and skills learned through taking the Certificate will provide competency in addressing addiction-related issues for anybody working in the helping professions.

Eligibility for the ADC or SUDA certifications through the Idaho Board of Alcohol and Drug Counselor Certification (IBADCC) includes the coursework offered through Idaho State University and a minimum requirement of internship hours, *not offered through Idaho State University*, working directly with substance abusing clients. Additional ADC/SUDA certification eligibility criteria is available on the IBADCC website. (<https://www.ibadcc.org/cadc/>)

Community Health Worker Academic Certificate (9 credits)

The Community Health Worker Academic Certificate meets the needs of community health workers who wish to pursue a certification that will prepare them to work in the growing community health worker occupations. Community health workers are increasingly recognized as valuable members of the health system that has increased in Idaho and across the nation. Community health workers who successfully complete this certificate will be prepared to assume a position as a community health worker in clinic and community settings and

assist in the development and implementation of community health programs within their community.

Accelerated Bachelors to Masters Programs

B.A./B.S. in Community and Public Health/Master of Health Education (MHE) Accelerated Program

Qualified undergraduate students (GPA # 3.3) can apply for the accelerated BS and MHE program prior to their last two semesters in the BS program. Approved students can count up to 12 credits of 5000-level or 6000-level required MHE courses toward their BS/BA in Community and Public Health graduation plan. These 12 credits of graduate-level coursework will count towards their MHE degree. An additional 18 credits of graduate coursework is required for the accelerated MHE program including 6 credits of HE 6650 Thesis or 6651 Project in Health Education.

B.A./B.S. in Community and Public Health/Master of Public Health (MPH) Accelerated Program

Qualified undergraduate students (GPA # 3.3) can apply for the accelerated BS and MPH program prior to their last two semesters in the BS program. Approved students can count up to 12 credits of 5000-level or 6000-level required MPH courses toward their BS/BA in Community and Public Health graduation plan. These 12 credits of graduate-level coursework will count towards their MPH degree. An additional 30 credits of graduate coursework is required for the accelerated MPH program, including 6 credits of electives and 6 credits of MPH 6650 Thesis or MPH 6651 Public Health Project.
