

Certificate in Diagnostic Medical Sonography

Accreditation

Idaho State University is fully accredited by the Northwest Commission on College and Universities (NWCCU).

Overview

The Diagnostic Medical Sonography program is designed to facilitate the development of professional diagnostic medical sonographers who have acquired the technical skills and knowledge necessary to fulfill the needs required in the medical imaging setting. The sonographer plays a vital role in the health care team. Due to the rapid growth of technology in the health care setting, there is an increased demand for qualified personnel.

Philosophy

Idaho State University's Diagnostic Medical Sonography program was developed with the philosophy that didactic education and clinical experience, which includes "hands on," should happen together for continuity during learning. Therefore, during the entire program, the student learns in the laboratory setting and applies those acquired skills in the clinical setting. This happens on a weekly basis. Furthermore, in the classroom, students acquire the theoretical information necessary to perform as sonographers. The next step involves laboratory experiences where the opportunity to apply technological skills is acquired by using phantoms and simulations. Students then progress and perfect their skills by working with sonographers in a clinical environment. Additionally, several of the classes taught in the program focus on specialized areas of sonographic imaging, such as pediatrics, echocardiology, and perinatology and are taught by experts in their respective fields. This is atypical of most Diagnostic Medical Sonography programs and is a unique feature that sets the program apart from other programs. Our philosophy is that students who learn from experts become experts. When graduation approaches, students are ready to enter the profession confidently.

Mission

The mission of the Diagnostic Medical Sonography program is to provide students with both the academic and technical foundations to competently and safely perform sonography exams and procedures, to prepare qualified diagnostic medical sonographers who will ethically respond to the needs of patients with technical competence and compassion, and to assume a vital professional role as a medical team member.

Core Values

The Diagnostic Medical Sonography Program is committed to the following core values:

- Academics – promoting excellence in all academic endeavors.
- Knowledge – recognizing the significance of new knowledge in a profession that is predisposed to change while maintaining traditional values and emphasizing the needs of the patient.
- Dedication – helping meet the statewide and regional needs by providing access to quality education to prospective students.
- Community – helping meet the needs of the community in the health care setting by providing competent, qualified sonographers who are eligible upon graduation to sit for the national certification examination in diagnostic

medical sonography sponsored by the American Registry for Diagnostic Medical Sonography (ARDMS).

Certificate Program

The Diagnostic Medical Sonography program at Idaho State University offers a certificate program.

The Diagnostic Medical Sonography program is an undergraduate certificate, which consists of 3 consecutive semesters beginning in the fall. During the first semester of the program students take introductory sonography courses based in general imaging procedures and sonographic principles and instrumentation. During the next two semesters, the student studies and practices the clinical application of sonography in the university laboratory and at affiliated hospitals and clinics. The graduate is eligible to take the national examination for certification administered by the ARDMS.

The Diagnostic Medical Sonography program is designed to develop the technical skills and knowledge necessary for the student to satisfactorily function as a sonographer. Learning experiences enable the student to demonstrate competency in the technical aspect of the profession as well as human relations. The program further seeks to develop student interest in the professional societies and provides methodology to maintain competency upon graduation.

Upon completion of the program, the graduate will be able to work as a sonographer in a hospital, clinic, or private office and effectively perform his/her duties with patients in a responsible, ethical, and professional manner. Because of the rapid growth of the medical field, there is a need for well-trained sonographers.

Academic Standards

A grade of "C" or better is required in all prerequisite and program specific courses. A student who fails to achieve a minimum of a "C" grade in a course designated Diagnostic Medical Sonography (DMS) will be dismissed from the program and prohibited from taking any further courses with the DMS designation until the course(s) in question has/have been completed with (a) minimum grade(s) of "C."

The student is required to reapply to the program, in writing, at least one (1) month prior to the first day of classes of the semester in which readmission is sought. Additional details regarding readmission can be found in the current Diagnostic Medical Sonography Student Handbook.

Admission Procedures

Admission to the Diagnostic Medical Sonography program is competitive. Students will be evaluated and points awarded by using grades in radiography program curriculum or other prerequisites and required patient care experience as outlined on the Diagnostic Medical Sonography website. Prior coursework GPA will also be evaluated; a minimum grade point average of 3.0 is required. Additional points are awarded to ISU graduates, residents of the State of Idaho, and radiographers (or registry eligible students) registered through the American Registry of Radiologic Technologists (ARRT). Clinical sites may influence student acceptance and placement in the DMS program. Procedures for admission to the program include:

1. Complete procedures for admission to the University.
2. Complete and return the Diagnostic Medical Sonography Application and \$100 fee.
3. Completion of either an associates or bachelors degree from an accredited institution.
4. Submit official transcripts of all college and/or university courses completed, including advanced placement or dual-enrolled courses.

Application Deadline

The above admission procedures must be completed and received by the Diagnostic Medical Sonography Program by February 1st of the year the student is seeking admission. If the 1st falls on a weekend or holiday, the application must be received by the Friday preceding the deadline date. The sonography program begins in the Fall semester.

Diagnostic Medical Sonography Certificate Program

A student may be awarded a Certificate in Diagnostic Medical Sonography by fulfilling the following requirements:

Professional Curriculum

Code	Title	Credits
DMS 4400	Introduction to Sonography	1
DMS 4401	Abdominal Sonography I	2
DMS 4402	Abdominal Sonography II	1
DMS 4404	OB/GYN Sonography I	1
DMS 4405	OB/GYN Sonography II	1
DMS 4406	OB/GYN Sonography III	1
DMS 4407	Sonography Physics and Instrumentation I	1
DMS 4408	Sonography Physics and Instrumentation II	1
DMS 4409	Sonography Physics and Instrumentation III	1
DMS 4410	Fundamentals of Sonography Lab I	1
DMS 4411	Fundamentals of Sonography Lab II	1
DMS 4412	Fundamentals of Sonography Lab III	1
DMS 4413	Sonography Case Studies I	1
DMS 4414	Sonography Case Studies II	1
DMS 4415	Sonography Case Studies III	1
DMS 4416	Vascular Sonography	2
DMS 4417	Superficial Structures in Sonography	1
DMS 4418	Breast Sonography	1
DMS 4419	Sonography Specialty Areas	1
DMS 4451	Research Principles in Sonography	2
DMS 4476	Sonography ARDMS Registry Review	1
DMS 4491	Applied Sonography I	8
DMS 4492	Applied Sonography II	8
DMS 4493	Applied Sonography III	6
Total Credits		46
